## *The Women of Berkshire Hathaway* - Karen Linder 2012-05-08

A fascinating look at the top women at Berkshire Hathaway and how they got there Although proportionally women continue to lag far behind men as CEOs and board members at major institutions, there has been a marked uptick in the number of female business leaders in recent years. Looking at the changes that have happened at Berkshire Hathaway—Warren Buffett's holding company, *The Women of Berkshire Hathaway: Lessons from Warren Buffett's Female CEOs and Directors* provides a unique look at the gradual shattering of the glass ceiling at one of America's top firms. An influx of female leadership over the past few years—today there are four female CEOs, up from just one a decade ago—has invigorated Berkshire Hathaway with energy and unique female insight. Profiling these remarkable women, the book provides motivational and management information for a wide range of readers, from business students to Buffett fans. Looks closely at the female board members of Berkshire Hathaway and the female managers who run Berkshire Hathaway companies Follows the paths that brought these women to their current positions Explores their working relationship with their employees and Warren Buffett, and how they balance work and their private lives The only book focusing on eight of the most powerful women at Berkshire Hathaway, *The Women of Berkshire Hathaway* is an inspirational read about the triumph of a group of remarkable women within a company once dominated by men.

## *Like a Virgin* - Richard Branson 2012-09-25

It's business school, the Branson way. Whether you're interested in starting your own business, improving your leadership skills, or simply looking for inspiration from one of the greatest entrepreneurs of our time, Richard Branson has the answers. Like a Virgin brings together some of his best advice, distilling the experiences and insights that have made him one of the world's most recognized and respected business

leaders. In his trademark thoughtful and encouraging voice, Branson shares his knowledge like a close friend. He'll teach you how to be more innovative, how to lead by listening, how to enjoy your work, and much more. In hindsight, Branson is thankful he never went to business school. Had he conformed to the conventional dos and don'ts of starting a business, would there have been a Virgin Records? A Virgin Atlantic? So many of Branson's achievements are due to his unyielding determination to break the rules and rewrite them himself. Here's how he does it.

## **Global Economic Prospects, January 2017** - World Bank Group 2017-03-01

Stagnant global trade, subdued investment, and heightened policy uncertainty marked another difficult year for the world economy. A subdued recovery is expected for 2017, with receding obstacles to activity in commodity exporters and solid domestic demand in commodity importers. Weak investment is weighing on medium-term prospects across many emerging markets and developing economies (EMDEs). Although fiscal stimulus in major economies, if implemented, may boost global growth above expectations, risks to growth forecasts remain tilted to the downside. Important downside risks stem from heightened policy uncertainty in major economies. *Global Economic Prospects* is a World Bank Group Flagship Report. On a semiannual basis (January and June), it examines global economic developments and prospects, with a special focus on developing countries. The report includes analysis of topical policy challenges faced by developing countries through in-depth research in the January edition and shorter analytical pieces in the June edition.

## Memory in the Mekong - Will Brehm

"This is a pathbreaking work at the intersection of international relations, the politics of education, and the construction of historical memory. Highly recommended." —Kanishka Jayasuriya, Murdoch University,

Australia This edited collection explores the possibilities, perils, and politics of constructing a regional identity. The Association of Southeast Asian Nations (ASEAN), a multinational institution comprised of 10 member states, is dedicated to building a Southeast Asian regional identity that includes countries along Southeast Asia's Mekong River delta: Cambodia, Thailand, Vietnam, Laos, and Myanmar. After successfully establishing an economic community in 2015, where capital and people can freely move across national borders, ASEAN and its partners now aim to develop a sociocultural community that is fully functional in a wide range of sectors by 2025. As part of this vision, ASEAN wishes to construct a regional identity by uniting over 600 million people, which will be achieved partly through national school systems that teach shared histories. In this text, the contributors critically examine the many questions that arise in the face of this significant change: What does an ASEAN identity look like? Is it even possible or desirable to create a common identity across the diverse peoples of Southeast Asia? Given the divergent memories of history, how would a regional identity exist alongside national identity? Memory in the Mekong grapples with these questions by exploring issues of shared history, national identity, and schooling in a region that is frequently underexamined and underrepresented in Western scholarship. Contributors: Will Brehm, Bich-Hang Duong, Yasushi Hirotsato, Yuto Kitamura, Somsanit Larvankham, Rosalie Metro, Thongdeuane Nanthanavone, Vong-on Phuaphansawat, Anna Zongolowicz.

#### **A Time Traveller's Guide to Our Next Ten Years** - Frans Cronje 2014-04-01

"Picture South Africa ten years from now: are the angry poor rising up and seizing land and businesses? Or has economic reform created jobs and growth? Is an increasingly desperate government clamping down on freedoms? Or do the middle class still braai in suburban bliss? South Africa is at a tipping point, and small shifts in political and economic conditions can bring about dramatic changes. Unemployment, slow growth, threats to freedom of speech, and poor education can send the country in any direction. Leading scenario planner Frans Cronje identifies the key trends that will shape our future. Will South Africa follow the Narrow Road, the Wide Road, the Rocky Road or the Toll Road?" -- Back cover.

#### **A Survey of Sustainable Development** - Jonathan Harris 2013-04-16

Perpetual economic growth is physically impossible on a planet with finite resources. Many concerned with humanity's future have focused on the concept of "sustainable development" as an alternative, as they seek means of achieving current economic and social goals without compromising the ability of future generations to meet their own goals. Sustainable development brings together elements of economics, public policy, sociology, ecology, resource management, and other related areas, and while the term has become quite popular, it is rarely defined, and even less often is it understood. A Survey of Sustainable Development addresses that problem by bringing together in a single volume the most important works on sustainable human and economic development. It offers a broad overview of the subject, and gives the reader a quick and thorough guide to this highly diffuse topic. The volume offers ten sections on topics including: economic and social dimensions of sustainable development the North/South balance population and the demographic transition agriculture and renewable resources energy and materials use globalization and corporate responsibility local and national strategies Each section is introduced with an essay by one of the volume editors that provides an overview of the subject and a summary of the mainstream literature, followed by two- to three-page abstracts of the most important articles or book chapters on the topic. A Survey of Sustainable Development is the sixth and final volume in the Frontier Issues of Economic Thought series produced by the Global Development And Environment Institute at Tufts University. Each book brings together the most important articles and book chapters in a "frontier" area of

economics where important new work is being done but has not yet been incorporated into the mainstream of economic study. The book is an essential reference for students and scholars concerned with economics, environmental studies, public policy and administration, international development, and a broad range of related fields.

Future Cities: Dynamics and Sustainability - F. Moavenzadeh 2012-12-06

The world's burgeoning cities are a critical fact of the 21st Century - and represent one of the greatest challenges to the future. By the year 2050 cities with populations over three million will more than double from 70 today to over 150. The authors in this book claim that contrary to conventional wisdom, that cities distort natural processes, just the opposite is true. Cities are far more than the sinks of energy, vast drains of natural resources, and obstacles to sustainable development. Properly managed, they claim, cities can be transformative arenas in which raw materials may be rationally and economically developed to support people decently, and whole regions sustainably. This volume provides new ideas for managing the mega-cities of our future. The editors' goal is to shape a new way of thinking about mega-cities - one that promotes their function in modern societies as engines of the ideas, technologies, and loci of political will needed to build a new regime of global sustainability.

**Overconnected** - William H. Davidow 2011

In Feb 2006, a Danish newspaper printed twelve highly provocative caricatures of the prophet Muhammad. The drawings landed on the internet and quickly circled the globe. As a direct result, riots ensued and at least 139 people died. This is just one example of overconnection. The consequences of an over-connected world cannot be ignored. In this important book, William H. Davidow takes a highly pragmatic approach by recognising that the digital clock cannot be turned back in terms of ubiquitous connectivity, but urges that caution and forethought is applied to the systems we build in the future. Davidow identifies four distinct levels of connection: Underconnected, Interconnected, Highly Connected and Overconnected. Highly Connected is the ideal state we must strive for and avoid spilling into Overconnected.
