## *Learning for a Complex World* - Norman J Jackson 2011-09-16

This book has been primarily written for people who are interested and involved in helping students maximise the learning and development they gain from their higher education experience. The authors contributing to this book hope that their attempt to examine and give practical meaning to the idea of lifewidness makes sense to you and helps you support and facilitate development of people in your professional context. We hope also that it might have meaning for you in your own life. The book is also written for people who are helping higher education institutions develop a better understanding of the ways in which students engage in and are shaped by their whole life experience while they are studying. And for those people who are trying to bring about change in institutional practice, particularly those who are finding it challenging, we hope the contributions in this book will reinforce your conviction that this is a worthwhile thing to do. In recent years, Universities in the UK have been encouraged to evaluate what they do through the lens of the students' experience. This has resulted in an increasing institutional interest and awareness in the way in which students integrate higher education with their life beyond the campus. Student Support Services in some universities have been inspired by the visionary report 'Learning Reconsidered: A Campus-wide Focus on the Student Experience' (NASPA and ACPA 2004). We hope that this book will encourage and be of value to those who make decisions or who create policies relating to the student experience.

**Applying Educational Research** - M. D. Gall 2014-03-14

This title is only available as a loose-leaf version with Pearson eText. Applying Educational Research focuses on relating research to practice, helping educators see the relevance of research to their daily work. This goal of making research relevant is accomplished by focusing on current "problems of practice." Each chapter highlights a set of important issues for teachers, students, and schools--issues like teacher evaluation, the effectiveness of close-reading strategies, and the use of computer-supported instruction. The research examples and articles in the chapter then address these issues, providing students a meaningful context for the information they are learning about research methods. Through this approach, students learn about the research process and current research on topics that directly impact practice. From reviews of the text: The writing style of the textbook is excellent . . . . Writing clarity for content builds from one paragraph to another. . . . The Gall, Gall, and Borg textbook is the only text I would consider for [my Master's-level research course]. Because the authors are scholars and practitioners, they bring a depth and range to the topic of educational research that is unsurpassed." --Vikki K. Collins, Troy University "The writing style is very clear. I find it easy to read and navigate among the chapters. Most graduate students in my class will not have any problems reading the book. The authors provide a very gentle introduction to educational research. . . . The authors adopt a balanced view of educational research. . . . They have explained most of the quantitative analyses used in educational research, and they have explicated the major theories of qualitative research. They have introduced the research techniques in a clear manner accessible to a broad audience inside and outside of the education field." --Xiaofeng Steven Lui, University of South Carolina 0133831574 / 9780133831573 Applying Educational Research: How to Read, Do, and Use Research to Solve Problems of Practice, Loose-Leaf Version with Video-Enhanced Pearson eText -- Access Card Package Package consists of: 0132868636 / 9780132868631 Applying Educational Research: How To Read, Do, and Use Research To Solve Problems of Practice, Loose-Leaf Version 0133398811 / 9780133398816 Applying Educational Research: How To Read, Do, and Use Research To Solve Problems of Practice, Pearson eText -- Access Card

**Strata Fundamentals** - Frank Poeta 2010

**RPL As Specialised Pedagogy** - Linda Cooper 2017-07-01

Internationally, Recognition of Prior Learning (RPL) has become a standard component of education policy reforms aimed at meeting the requirements of a globalised labour market on the one hand, while responding to demands for widening access to further and higher education on the other. However, despite the promises of RPL to enable 'optimal inclusion', this ideal is not easily realised in practice. Drawing on case study research of RPL practices in four different contexts in South Africa, RPL as Specialised Pedagogy: Crossing the Lines offers a novel theoretical framework for understanding RPL not simply as an assessment practice, but as a specialised pedagogy for navigating knowledge boundaries across different contexts. The book develops a conceptual language for describing what is common and distinctive about RPL practices across different sites and contexts, thus providing a unique contribution to a field that has traditionally been under-theorised. RPL as Specialised Pedagogy will be of significant interest to RPL practitioners and educators, to researchers and students in the field, and to policy researchers and policy makers.

Re-theorising the Recognition of Prior Learning - National Institute of Adult Continuing Education (England and Wales) 2006

The recognition of prior learning (RPL) is an educational response to the need to widen participation in education and training for economic advancement and social inclusion. The social meanings of RPL have different configurations depending on historical, cultural, economic and political forces in different places. One constant is the reliance on the widely pervasive educational philosophies of experiential learning: constructivism and progressivism. This book challenges the orthodoxy of experiential learning and the particular readings of knowledge, pedagogy, learning, identity and power which it privileges. It does this by introducing different theoretical resources to RPL and drawing on experiences of RPL in the UK, the USA, Canada, South Africa, Australia, and Sweden. The book provides a range of re-conceptualisations of the

relational terrain between adult experience and learning on the one hand, and specialist or academic knowledge on the other.

**Frontiers in Entrepreneurship** - Boris Urban 2010-07-23

The series Perspectives in Entrepreneurship: A Research Companion provides an authoritative overview of specialised themes in entrepreneurship. Each of the four books presents the conceptual framework and foundations underlying a specialist field of scholarship in entrepreneurship. The series is inspired by the dearth of higher-level texts available in South Africa, failing to encapsulate the rigorous research evident in the growing field of entrepreneurship internationally. The content is driven by a judicious selection and interpretation of key knowledge set in context by introducing and delineating major topics previously not discussed in-depth in traditional entrepreneurial texts. A blend of theoretical and empirical evidence is presented that collectively demonstrates the convergence of thinking on a particular theme. Identifying and evaluating the most seminal and impactful scholarly research on different subject areas where entrepreneurship is at the core, serves to achieve this convergence. By applying a theoretical lens to central issues 'about entrepreneurship' rather than focusing on practical issues of 'how to', the series has a conceptual outlook with specialist areas in detailed narrative. The book is deliberately structured to add value to learners who are undertaking secondary programmes in entrepreneurship by building on basic entrepreneurship principles and theory. The series builds on fundamental entrepreneurial texts. Each book provides a valuable knowledge base for educators, third year and postgraduate students, researchers, policy makers, and service providers.
