Urban Politics - Myron Levine 2019-07-24

Urban Politics blends the most insightful classic and current political science and related literature with current issues in urban affairs. The book's integrative theme is 'power,' demonstrating that the study of urban politics requires an analyst to look beyond the formal institutions and procedures of local government. The book also develops important subthemes: the impact of globalization; the dominance of economic development over competing local policy concerns; the continuing importance of race in the urban arena; local government activism versus the 'limits' imposed on local action by the American constitutional system and economic competition; and the impact of national and state government action on cities. Urban Politics engages students with pragmatic case studies and boxed material that use classic and current urban films and TV shows to illustrate particular aspects of urban politics. The book's substantial concluding discussion of local policies for environmental sustainability and green cities also appeals to today's students. Each chapter has been thoroughly rewritten to clearly relate the content to current events and academic literature, including the

following: the importance of the intergovernmental city the role of local governments as active policy actors and vital policy makers even in areas outside traditional municipal policy concerns the prospects for urban policy and change in and beyond the Trump administration, including the ways in which urban politics is affected by, but not determined by, Washington. Mixing classic theory and research on urban politics with the most recent developments and data in urban and metropolitan affairs, Urban Politics, 10e is an ideal introductory textbook for students of metropolitan and regional politics and policy. The book's material on citizen participation, urban bureaucracy, policy analysis, and intergovernmental relations also makes the volume an appropriate choice for Urban Administration courses.

Empty Mansions - Bill Dedman 2013-09-10

#1 NEW YORK TIMES BESTSELLER NAMED ONE OF THE BEST BOOKS OF THE YEAR BY Janet Maslin, The New York Times • St. Louis Post-Dispatch When Pulitzer Prize-winning journalist Bill Dedman noticed in 2009 a grand home for sale, unoccupied for nearly sixty years, he stumbled through a surprising portal into American history. Empty Mansions is a rich mystery of wealth and loss, connecting the Gilded Age opulence of the nineteenth century with a twenty-first-century battle over a \$300 million inheritance. At its heart is a reclusive heiress named Huguette Clark, a woman so secretive that, at the time of her death at age 104, no new photograph of her had been seen in decades. Though she owned palatial homes in California, New York, and Connecticut, why had she lived for twenty years in a simple hospital room, despite being in excellent health? Why were her valuables being sold off? Was she in control of her fortune, or controlled by those managing her money? Dedman has collaborated with Huguette Clark's cousin, Paul Clark Newell, Jr., one of the few relatives to have frequent conversations with her. Dedman and Newell tell a fairy tale in reverse: the bright, talented daughter, born into a family of extreme wealth and privilege, who secrets herself away from the outside world. Huguette was the daughter of self-made copper industrialist W. A. Clark, nearly as rich as Rockefeller in his day, a controversial senator, railroad builder, and founder of Las Vegas. She grew up in the largest house in New York City, a remarkable dwelling with 121 rooms for a family of four. She owned paintings by Degas and Renoir, a world-renowned Stradivarius violin, a vast collection of antique dolls. But wanting more than treasures, she devoted her

wealth to buying gifts for friends and strangers alike, to quietly pursuing her own work as an artist, and to guarding the privacy she valued above all else. The Clark family story spans nearly all of American history in three generations, from a log cabin in Pennsylvania to mining camps in the Montana gold rush, from backdoor politics in Washington to a distress call from an elegant Fifth Avenue apartment. The same Huguette who was touched by the terror attacks of 9/11 held a ticket nine decades earlier for a first-class stateroom on the second voyage of the Titanic. Empty Mansions reveals a complex portrait of the mysterious Huguette and her intimate circle. We meet her extravagant father, her publicity-shy mother, her star-crossed sister, her French boyfriend, her nurse who received more than \$30 million in gifts, and the relatives fighting to inherit Huguette's copper fortune. Richly illustrated with more than seventy photographs, Empty Mansions is an enthralling story of an eccentric of the highest order, a last jewel of the Gilded Age who lived life on her own terms.

New York and Los Angeles - David Halle 2013-05-07

This book provides in-depth comparative studies of the two largest cities and metropolitan areas in the United States: New York City and Los Angeles. The chapters, written by leading experts and based upon the most current information available from the Census and other sources, discuss and explicitly compare politics, economic prospects and the financial crisis, and a host of social issues. Reform movements in education, ethnic politics, budget stringency, strategies to deal with crime, the development and political context of infrastructure, rising inequality, immigration and immigrant communities, the segregation of the poor and minorities and the new segregation of the economic elite, environmental impacts and attempts to deal with them, the image of both cities and regions in the movies, architectural trends, and the differential impact and response to the financial crisis, including foreclosure patterns, are all examined in this volume. This comparative framework reveals that old paradigms such as urban "decline" or "resurgence" are inadequate for grasping the new challenges and complexities facing America's two major global cities. Each is responding in sometimes similar and different ways to the challenges brought on by two events that defined the last decade: the attack of 9/11 and its aftermath, and the continuing effects of the financial crisis. How all of these events, institutions, and trends play out in the New York and Los Angeles regions is important not only for the two cities, but also as a harbinger for other U.S. cities, the entire nation, and cities worldwide. New York and Los Angeles provides an essential guide for understanding the many forces that determine the future of our cities.

The WPA Guide to New York - Federal Writers' Project 2013-10-31

During the 1930s in the United States, the Works Progress Administration developed the Federal Writers' Project to support writers and artists while making a national effort to document the country's shared history and culture. The American Guide series consists of

individual guides to each of the states. Little-known authors—many of whom would later become celebrated literary figures—were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state's unique flavor. The WPA Guide to New York provides a total of 45 excellent tours, taking the reader across the Empire State, from Niagara Falls and the Adirondacks to the five boroughs of New York City. In addition to the nation's center for culture and industry, New York also contains rich Native American, Revolutionary, and immigration history—all detailed in this diverse guide for a diverse state.

Varieties of Police Behavior - James Q. WILSON 2009-06-30

The patrolman has the most difficult, complex, and least understood task in the police department. Much less is known of him than of his better publicized colleague, the detective. In this important and timely book, James Q. Wilson describes the patrolman and the problems he faces that arise out of constraints imposed by law, politics, public opinion, and the expectations of superiors. The study considers how the uniformed officer in eight communities deals with such common offenses as assault, theft,

drunkenness, vice, traffic, and disorderly conduct. Six of the communities are in New York State: Albany, Amsterdam, Brighton, Nassau County, Newburgh, and Syracuse. The others are Highland Park, Illinois, and Oakland, California. Enforcing laws dealing with common offenses is especially difficult because it raises the question of administrative discretion. Murder, in the eyes of the police, is unambiguously wrong, and murderers are accordingly arrested; but in cases such as street-corner scuffles or speeding motorists, the patrolman must decide whether to intervene (should the scuffle be stopped? should the motorist be pulled over?) and, if he does, just how to intervene (by arrest? a warning? an interrogation?). In most large organizations, the lowest-ranking members perform the more routinized tasks and the means of accomplishing these tasks are decided by superiors, but in a police department the lowest-ranking officer--the patrolman--is almost solely responsible for enforcing those laws which are the least precise, the most ambiguous. Three ways or "styles" of policing--the watchman, the legalistic, and the service styles--are analyzed and their relation to local politics is explored. In the final chapter, Mr. Wilson discusses if and how the patrolman's behavior can be changed and examines some current proposals for reorganizing police departments. He observes that the ability of the patrolman to do his job well may determine our success in managing social conflict and our prospects for maintaining a proper balance between liberty and order. Destructive Trends in Mental Health - Rogers H. Wright 2013-01-22
This book takes as its inspiration the assumption that the atmosphere of intellectual openness, scientific inquiry, aspiration towards diversity, and freedom from political pressure that once flourished in the American Psychological Association has been eclipsed by an "ultra-liberal agenda," in which voices of dissent, controversial points of view, and minority groups are intimidated, ridiculed and censored. Chapters written by established and revered practitioners explore these important issues within the contexts of social change, the ways in which mental health

services providers view themselves and their products, and various economic factors that have affected healthcare cost structure and delivery. In short, this book is intended to help consumers, practitioners, and policy makers to become better educated about a variety of recent issues and trends that have significantly changed the mental health fields.

The Invisible Justice System - Burton Atkins 1982

This anthology presents articles on various aspects of discretionary decisionmaking in the administration of justice. Discretionary justice suggests latitude of decisionmaking rather than formality or certainty, and unlike the symbolic idea of due process, it suggests that idiosyncrasy rather than rules may guide decisionmaking within the administration of criminal justice at all levels of the police, court, and penal systems. The relationship between forms of discretion and the criminal justice system is explored. The role of discretion at the arrest, prosecution, and sentencing levels as well as within the framework of correctional institutions is examined. The development of the discretionary ethic is discussed, and the severity and legality of its application in criminal justice procedures are examined. Discretion on the part of the police is covered, with special attention to legal norms and discretion in the police sentencing processes, factors in police discretion and decisionmaking, and administrative problems in controlling the exercise of police authority. An approach to the legal control of police in terms of discretionary powers is presented. The role of prosecutorial discretion is underscored; the application of discretion during charging and plea bargaining processes is examined, and means for controlling prosecutorial discretion are discussed. Judicial discretion during sentencing is also examined, with attention to pretrial decisionmaking, the growth and consequences of sentencing discretion, and contemporary sentencing proposals. Finally, the application of discretionary powers within the prison environment is summarized; decisionmaking within the prison community, the control of discretionary powers of prison organizations, the use of discretion in determining the severity of punishment for incarcerated offenders, and discretion within

the parole bureaucracies decisionmaking process are discussed.

Global Study on Homicide 2013 - United Nations 2014-06-15

The Global Study on Homicide 2013 is based on comprehensive data from more than 200 countries/territories, and examines and analyses

patterns and trends in homicide at the global, regional, national and sub-national levels. Such analysis is fundamental to understanding the various factors and dynamics that drive homicide, so that measures can be developed to reduce violent crime. The Study provides a typology of homicide, including homicide related to crime, coexistence-related homicide, and socio-political homicide. The nature of crime in several countries emerging from conflict, the role of various mechanisms in killing, and the response of the criminal justice system to homicide are also analyzed. A further chapter examines homicide at the sub-national level, and includes analysis at the city-level for selected global cities.
