Black Surgeons and Surgery in America - Don K. Nakayama 2021-10-22

Tactical Combat Casualty Care Handbook - United States Army 2017-05-17

Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility. Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and paramedics in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are not designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities

The Light In The Window - June Goulding 2012-05-31

'I promised that I would one day write a book and tell the world about the home for unmarried mothers. I have at last kept my promise.' In Ireland, 1951, the young June Goulding took up a position as midwife in a home for unmarried mothers run by the Sacred Heart nuns. What she witnessed there was to haunt her for the next fifty years. It was a place of secrets, lies and cruelty. A place where women picked grass by hand and tarred roads whilst heavily pregnant. Where they were denied any contact with the outside world; denied basic medical treatment and abused for their 'sins'; where, after the birth, they were forced into hard labour in the convent for three years. But worst of all was that the young women were expected to raise their babies during these three years so that they could then be sold - given up for adoption in exchange for a donation to the nuns. Shocked by the nuns' inhumane treatment of the frightened young women, June risked her job to bring some light into their dark lives. June's memoir tells the story of twelve women's experiences in this home and of the hardships they endured, but also the kindness she offered them, and the hope she was able to bring.

Critical Care Emergency Medicine - David Farcy 2011-10-27

The first comprehensive text on critical care emergency medicine "...goes a long way toward establishing emergency physicians as credible intensivists....The book is unique as it blends the perspective of a true intensivist with that of emergency medicine. The book is the first of its kind, and I predict it will become known as the standard reference for

those emergency physicians, as well as others, who wish to understand the overlap between emergency medicine and critical care."--Thomas M. Scalea, MD, FACS, FCCM, R. Adams Cowley Shock Trauma Center and University of Maryland School of Medicine (from the foreword) Critical Care Emergency Medicine is destined to become the standard reference for all clinicians who wish to understand the overlap between emergency medicine and critical care. PHTLS: Prehospital Trauma Life Support for First Responders Course Manual - National Association of Emergency Medical Technicians (NAEMT) 2019-12

In the field, seconds count. PHTLS: Prehospital Trauma Life Support for First Responders, Second Edition teaches and reinforces the principles of rapidly assessing a trauma patient using an orderly approach, immediately treating life-threatening problems as they are identified, and minimizing any delays in initiating transport to an appropriate destination. Developed by the National Association of Emergency Medical Technicians (NAEMT) in cooperation with the American College of Surgeons Committee on Trauma (ASC-COT), PHTLS for First Responders, Second Edition reflects current, evidence-based knowledge and practice, and promotes critical-thinking as the foundation for providing quality care. Rapidly assessing a trauma patient to identify life-saving care is at the heart of PHTLS for First Responders, Second Edition. It takes 2 minutes or less for a patient to exsanguinate. No other intervention first responders perform is more important than stopping that level of bleeding in trauma patients. To reflect this, PHTLS for First Responders, Second Edition utilizes the XABCDE patient assessment mnemonic to place exsanguinating hemorrhage at the forefront of every patient encounter. The importance of XABCDE (eXsanguinating hemorrhage, airway, breathing, circulation, disability, and expose/environment) is reinforced in every clinical chapter. PHTLS for First Responders, Second Edition features a new course manual, which reinforces and clarifies key concepts from the course; features an engaging, interactive design; and is written so you feel like you are participating in a conversation, versus listening to a lecture.

Trauma and Emergency Surgery - Georgios Tsoulfas 2021-07-14

One of the most interesting and challenging fields of surgery is trauma and emergency surgery. The formation of a trauma surgical subspecialty has led to a more organized system of dealing with trauma as well as saving lives. Emergency surgery has been the evolution of this, as an effort to incorporate the knowledge and skills of trauma surgery, intensive care, and emergency general surgery, all in one specialty. This is a collection of chapters describing the nature of damage control surgery, which is one of the key concepts and strategies for managing the most challenging trauma and emergency surgery patients. The authors of this book represent a team of true global experts on the topic.

In addition to the knowledge shared, the authors provide their personal clinical experience in a variety of different aspects of damage control surgery.
