Organization Practice - F. Ellen Netting 2003
This new text gives social work students a solid background in organizational theory and shows them how to apply different practice approaches when managing in diverse, increasingly multicultural organizational settings. This is the only current social work text completely dedicated to organization practice within the field of social work (that is not just a collection

of readings). The authors believe that social work students must fully understand the assumptions behind the theories they embrace and learn to act on those theories by using a variety of practice approaches within organizations. Without learning to do this, they will not be leaders in organizations that address complex social problems. This text is theoretically driven, giving attention to historical and post-modern theories of organization and organizational behavior. The intent is to provide students with a critical lens for understanding organizations and their own role as leaders and change agents within those organizations.

Generalist Case Management: A Method of Human Service Delivery - Marianne R. Woodside 2016-12-05

This practical text equips students with the fundamental information and skills needed to be effective case managers, covering such central issues as the responsibilities of case management, competencies needed for ethical and multicultural case management, participation in interdisciplinary and interorganizational teams, and engagement in advocacy and leadership. The first-person experience of a client and her case managers draws students into the text. To ensure that the book offers current and accurate information, the authors interviewed human service case managers nationwide about their jobs, skills, challenges, and clients. These interviews, combined with current research and numerous case studies, make GENERALIST CASE MANAGEMENT: A METHOD OF HUMAN SERVICE DELIVERY, 5th Edition, realistic and relevant. The text also aligns with NASW case management standards and helps to prepare students for earning C-SWMC certification and the HS-BCP credential. Psychological Testing in the Service of Disability Determination - Institute of Medicine 2015-06-29
The United States Social Security Administration (SSA) administers two disability programs: Social Security Disability Insurance (SSDI), for

disabled individuals, and their dependent family members, who have worked and contributed to the Social Security trust funds, and Supplemental Security Income (SSSI), which is a means-tested program based on income and financial assets for adults aged 65 years or older and disabled adults and children. Both programs require that claimants have a disability and meet specific medical criteria in order to qualify for benefits. SSA establishes the presence of a medically-determined impairment in individuals with mental disorders other than intellectual disability through the use of standard diagnostic criteria, which include symptoms and signs. These impairments are established largely on reports of signs and symptoms of impairment and functional limitation. Psychological Testing in the Service of Disability Determination considers the use of psychological tests in evaluating disability claims submitted to the SSA. This report critically reviews selected psychological tests, including symptom validity tests, that could contribute to SSA disability determinations. The report discusses the possible uses of such tests and their contribution to disability determinations. Psychological Testing in the Service of Disability Determination discusses testing norms, qualifications for administration of tests, administration of tests, and reporting results. The recommendations of this report will help SSA improve the consistency and accuracy of disability determination in certain cases.
