The Good Little Ceylonese Girl - Ashok Ferry 2017-04-17

Our Sri Lankan narrator visits his friend Joe in Italy, where Joe attends a special course—in higher (or, shall we say, lower) studies in women. Italians—much like Sri Lankans—live at home through marriage, death, and sometimes even beyond the pale. An accompanying string of fake fiancés and phoney engagements are the backdrop to this delightful collection of darkly humorous tales about Sri Lankans at home and abroad. Long years and many miles away, Colombo's Father Cruz

attempts to rescue a church from parishioners who like to put their donations where others can see them—on large plaques; on the coast, a retired Admiral escapes the tsunami on an antique Dutch cabinet; two childhood sweethearts, in time-honoured Sri Lankan tradition, are married off to strangers. Ashok Ferrey writes about Sri Lanka and its people, wherever they roam, with remarkable acuity. He writes of the West's effect on Sri Lankans, of its 'turning them into caricatures, unmistakably genuine but not at all the real thing'. In *The Good Little Ceylonese Girl*, his second collection of stories, he shows us the reality beyond those feeble sketches, in its full glory.

A wonderful first novel which dramatically combines the suspense of a gripping literary thriller with a meditation on the nature of scientific chaos. Not satisfied to leave the investigations of these allegations to the Indian police, Roz Benegal begins a dangerous search for the truth. Interwoven with this utterly gripping detective story is a remarkable layering of knowledge gleaned from old books on storms, the monsoon, poisons and magical transformations, the narrator's fascination with chaos theory and her passionate interest in fate.

The Truth About Me - A Revathi 2010-07-10

We got stared at a lot. People asked out loudly—some out of curiosity, others out of malice—whether we were men or women or ‘number nines’ or devadasis. Several men made bold to touch us, on our backs, on our shoulders. Some attempted to grab our breasts. ‘Original or duplicate?’ they shouted and hooted. At such moments I felt despair and wondered if there would ever be a way for us to live with dignity and make a decent living. Revathi was born a boy, but felt and behaved like a girl. In telling her life story, Revathi evokes marvellously the deep unease of being in the wrong body that plagued her from childhood. To be true to herself, to escape the constant violence visited upon her by her family and community, the village-born Revathi ran away to Delhi to join a house of hijras. Her life became an incredible series of dangerous physical and emotional journeys to become a woman and to find love. The Truth about Me is the unflinchingly courageous and moving autobiography of a hijra who fought ridicule, persecution and violence both within her home and outside to find a life of dignity.

Computer Graphics from Scratch - Gabriel Gambetta 2021-05-13

Computer Graphics from Scratch demystifies the algorithms used in modern graphics software and guides beginners through building photorealistic 3D renders. Computer graphics programming books are often math-heavy and intimidating for newcomers. Not this one. Computer Graphics from Scratch takes a simpler approach by keeping the math to a minimum and focusing on only one aspect of computer graphics, 3D rendering. You'll build two complete, fully functional renderers: a raytracer, which simulates rays of light as they bounce off objects, and a rasterizer, which converts 3D models into 2D pixels. As you progress you'll learn how to create realistic reflections and shadows, and how to render a scene from any point of view. Pseudocode examples throughout make it easy to write your renderers in any language, and links to live JavaScript demos of each algorithm invite you to explore further on your own. Learn how to: Use perspective projection to draw 3D objects on a 2D plane Simulate the way rays of light interact with surfaces Add mirror-like reflections and cast shadows to objects Render a scene from any camera position using clipping planes Use flat, Gouraud, and Phong shading to mimic real surface lighting Paint texture

details onto basic shapes to create realistic-looking objects Whether you're an aspiring graphics engineer or a novice programmer curious about how graphics algorithms work, Gabriel Gambetta's simple, clear explanations will quickly put computer graphics concepts and rendering techniques within your reach. All you need is basic coding knowledge and high school math. Computer Graphics from Scratch will cover the rest.

Love in the Tsunami - Ashok Ferrey 2012

Colpetty People - Ashok Ferry 2017-04-17

In this extraordinary debut, Ashok Ferry chronicles, in a gently probing voice, the journeys of characters seeking something beyond the barriers of nations and generations. His tales of social-climbing Sri Lankans, of the pathos of immigration, of rich people with poor taste, of ice-cream karma, of innocent love, eternity, and more take us to Colombo's nouveau riche, hoity-toity returnees, ladies with buttery skin and square fingernails, old-fashioned aristocrats, and the poor mortals trapped between them. Ferry's stories comprise characters that are 'serious and fine and upstanding, and infinitely dull', but also others like young John-John, who loses his childhood somewhere 'high up in the air between

Asmara and Rome'; the maid, Agnes of God, whose mango-sucking teeth 'fly out at you like bats out of the mouth of a cave'; Ashoka, the immigrant who embodies his Sri Lankan identity only on the bus ride between home and work; and Professor Jayaweera who finds sterile freedoms caged in the 'unbending, straight lines of Western Justice'. Absurd, sad, scathing and generous, but mostly wickedly funny, *Colpetty People* presents modern Sri Lankans as they navigate worlds between Ceylon and the West.

Patsy Rodenburg reveals that the secret is learning to inhabit "the second circle": the optimal state between the first circle of introversion and self-doubt and the third of aggression and narcissism. With wisdom and patience, Rodenburg teaches you how to communicate effectively at

home, work, school, and—most important—with yourself. The Second Circle will empower you to meet life's most extraordinary trials with brio and to embrace the joys and challenges of every single day.

[Red Flower of China](#) - Zhai Zhenhua 2003-07

"The Cultural Revolution had transformed me into a devil," writes Zhai. In 1966, at age 15, she led a Red Guard brigade that tortured Chinese citizens branded counterrevolutionaries. She beat innocent people to death and had others exiled; her squad raided homes and murdered people. Now a professor of engineering in British Columbia, Zhai expresses remorse and guilt rather perfunctorily, and her cool confession is tinged with rationalizations. She blames the flourishing of her "evil, barbaric side" on her blind faith in Chairman Mao. Her fervor gave way to bitter disillusionment when she herself was banished to the countryside in 1969 to do three years of hard labor and be "re-educated" by peasants. This is a grisly account of how political brainwashing can induce converts to commit monstrous acts.
