The Dinner Party - Joshua Ferris 2017-05-02

A New York Times Book Review Notable Book of the Year: The first collection of short stories from the critically acclaimed, prize-winning author of *To Rise Again at a Decent Hour*. These eleven stories by Joshua Ferris, many of which were first published in *The New Yorker*, are at once thrilling, strange, and comic. The modern tribulations of marriage, ambition, and the fear of missing out as the temptations flow like wine and the minutes of life tick down are explored with the characteristic wit and insight that have made Ferris one of our most critically acclaimed novelists. Each of these stories burrows deep into the often awkward and hilarious misunderstandings that pass between strangers and lovers alike, and that turn ordinary lives upside down. Ferris shows to what lengths we mortals go to coax human meaning from our very modest time on earth, an effort that skews ever-more desperately in the direction of redemption. There's Arty Groys, the Florida retiree whose birthday celebration involves pizza, a prostitute, and a life-saving heart attack. There's Sarah, the Brooklynite whose shape-shifting existential dilemma is set in motion by a simple spring breeze. And there's Jack, a man so warped by past experience that he's incapable of having a normal social interaction with the man he hires to help him move out of storage. The stories in *The Dinner Party* are about lives changed forever when the reckless gives way to possibility and the ordinary cedes ground to mystery. And each one confirms Ferris's reputation as one of the most dazzlingly talented, deeply humane writers at work today.

Residential Duct Systems - Manual D - Acca 2017-02

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacturer's blower performance tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true

variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically identifies related informative material.

Annual Energy Outlook 2012 - Energy Information Administration (U S) 2012-10-03

"The projections in the U.S. Energy Information Administration's (EIA's) Annual Energy Outlook 2012 (AEO2012) focus on the factors that shape the U.S. energy system over the long term. Under the assumption that current laws and regulations remain unchanged throughout the projections, the AEO2012 Reference case provides the basis for examination and discussion of energy production, consumption, technology, and market trends and the direction they may take in the future. It also serves as a starting point for analysis of potential changes in energy policies. But AEO2012 is not limited to the Reference case. It also includes 29 alternative cases (see Appendix E, Table E1), which explore important areas of uncertainty for markets, technologies, and policies in the U.S. energy economy. Many of the implications of the alternative cases are discussed in the 'Issues in focus' section of this report. / Key results highlighted in AEO2012 include continued modest growth in demand for energy over the next 25 years and increased domestic crude oil and natural gas production, largely driven by rising production from tight oil and shale resources. As a result, U.S. reliance on imported oil is reduced; domestic production of natural gas exceeds consumption, allowing for net exports; a growing share of U.S. electric power generation is met with natural gas and renewables; and energy-related carbon dioxide emissions remain below their 2005 level from 2010 to 2035, even in the absence of new Federal policies designed to mitigate greenhouse gas (GHG) emissions."--Executive Summary (p. 2).

The Lost Art of Steam Heating - Dan Holohan 1992

This was my first book and a true labor of love. I spent decades studying steam and the work of Dead Men, in both old buildings and on library shelves. I traveled the country, haunting used-book stores, looking for engineering books that held the answers to questions that nagged at me. I was obsessed with this topic, and when I finally sat to write, I poured all that I had learned into this book, and as I wrote, I tried my best to make the words sound good to you - like we were together and having a conversation. I wanted you to

know what I know and I wanted you to be able to do what I can do when it comes to old steam systems. This book arrived in 1992 and has since gone through dozens of printings. We've sold it in every state as well as in foreign countries. Steam heat is everywhere there are old buildings, so why shouldn't you be the one with the answers? Dan Holohan
