*Excel HSC Legal Studies* - Belinda Brassil 2004

**Regions and Powers** - Barry Buzan 2003-12-04

This book develops the idea that since decolonisation, regional patterns of security have become more prominent in international politics. The authors combine an operational theory of regional security with an empirical application across the whole of the international system. Individual chapters cover Africa, the Balkans, CIS Europe, East Asia, EU Europe, the Middle East, North America, South America, and South Asia. The main focus is on the post-Cold War period, but the history of each regional security complex is traced back to its beginnings. By relating the regional dynamics of security to current debates about the global power structure, the authors unfold a distinctive interpretation of post-Cold War international security, avoiding both the extreme oversimplifications of the unipolar view, and the extreme deterritorialisations of many globalist visions of a new world disorder. Their framework brings out the radical diversity of security dynamics in different parts of the world.

**Fault Lines of Globalization** - Hans Lindahl 2013-09-26

The question whether and how boundaries might individuate and thereby be constitutive features of any imaginable legal order has yet to be addressed in a systematic and comprehensive manner by legal and political theory. This book seeks to address this important omission, providing an original contribution to the debate about law in a global setting. Against the widely endorsed assumption that we are now moving towards law without boundaries, it argues that every imaginable legal order, global or otherwise, is bounded in space, time, membership, and content. The book is built up around three main insights. Firstly, that legal orders can best be understood as a form of joint action in which authorities mediate and uphold who ought to do what, where, and when with a view to realising the normative point of acting together. Secondly, that behaviour can call into question the boundaries that determine who ought to do what, where and when: a-legality. Thirdly, that this a-legality reveals boundaries as marking a limit and, to a lesser or greater extent, a fault line of the respective legal order. Legal boundaries reveal ways of ordering the who, what, where, and when of behaviour which have been excluded, yet which remain within the range of practical possibilities accessible to the collective: limits. However legal boundaries also intimate an order which exceeds the range of possibilities accessible to that collective - the fault line of the respective legal order. Careful analysis of a wide range of legal orders, including nomadism, Roman law, classical international law, ius gentium, multinationals, cyberlaw, lex mercatoria, the EU, global regimes of human rights, and space law validates this thesis. What sense, then, can we make of the normativity of the law, if there can be no inclusion without exclusion? Arguing that legal and political theories misunderstand how legal boundaries do their work of including and excluding, the book develops a normative theory of legal order which is alternative to both communitarianism and cosmopolitanism.

**Cambridge Yearbook of European Legal Studies Vol 1, 1998** - Alan Dashwood 1999-07-01

The Cambridge Yearbook of European Legal Studies provides a new forum for the scrutiny of significant issues in European Union Law, the law of the Council of Europe, and Comparative Law with a 'European' dimension, and particularly those which have come to the fore during the year preceding publication. The contributions appearing in the collection are commissioned by the Centre for European Legal Studies & CELS; Cambridge, which is the research Centre of Cambridge University Law Faculty specialising in European legal issues. The papers presented are all at the cutting edge of the fields which they address, and reflect the views of recognised experts drawn from the University world, legal practice, and the civil services of both the EU and its Member States. Inclusion of the comparative dimension brings a fresh perspective to the study of European law, and highlights the effects of globalisation of the law more generally, and the resulting cross fertilisation of norms and ideas that has occurred among previously sovereign and separate legal orders. Each edition will commence with the Mackenzie-Stuart Lecture, established in honour of Lord Mackenzie-Stuart, formerly President of the ECJ, and given each year in the Cambridge Law Faculty. The first Lecturer, in 1997, was Judge G Rodriguez Iglesias, currently President of the ECJ; the second was Mr Jean-Louis Dewost, Director General of the Commission's Legal Service. Their contributions launch Volume 1. The Cambridge Yearbook of European Legal Studies is an invaluable resource for those wishing to keep pace with legal developments in the fast moving world of European integration. **Who to Release?** - Nicola Padfield 2013-03-07

This book is concerned to explore the changing role of the Parole Board across the range of its responsibilities, including the prediction of risk and deciding on the release (or continued detention) of the growing number of recalled prisoners and of those subject to indeterminate sentences. In doing so it aims to rectify the lack of attention that has been given by lawyers, academics and practitioners to back door sentencing (where the real length of a sentence is decided by those who take the decision to release) compared to front door sentencing' (decisions taken by judges or magistrates in court). Particular attention is given in this book to the important changes made to the role and working of the Parole Board as a result of the impact of the early release scheme of the Criminal Justice Act 2005, with the Parole Board now deciding in Panels concerned with determinate sentence prisoners, lifers and recalled prisoners. A wide

range of significant issues, and case law, has arisen as a result of these changes, which the contributors to this book, leading authorities in the field, aim to explore.

**The Rule of Law in the Real World** - Paul Gowder 2016-02-09

In *The Rule of Law in the Real World*, Paul Gowder defends a new conception of the rule of law as the coordinated control of power and demonstrates that the rule of law, thus understood, creates and preserves social equality in a state. In a highly engaging, interdisciplinary text that moves seamlessly from theory to reality, using examples ranging from Ancient Greece through the present, Gowder sheds light on how societies have achieved the rule of law, how they have sustained it in the face of political upheaval, and how it may be measured and developed in the future. *The Rule of Law in the Real World* is an essential work for scholars, students, policymakers, and anyone else who believes the rule of law is critical to the proper functioning of society.

**Legal Studies Preliminary** - David Hamper 2009

LEGAL STUDIES PRELIMINARY THIRD EDITION provides students and teachers access to syllabus specific information on current legal issues, principles, contemporary events and factors affecting the application of the law. The focus of the student book is on accessibility and syllabus coverage. Information will be presented in a variety of formats including the use of the mind maps that will provide an overview of the key syllabus points to be covered. Review questions will allow students the opportunity to reinforce content and concepts. Some of the other key features are: A comprehensive glossary, Key terms, Chapter summaries, Table summaries, Points to consider. To help students prepare for end of year exams, the student book is accompanied by a new style of senior student CD, Exam Cafe. Exam Cafe is all about preparation for exams. In the Exam Cafe, students will be able to access: Answers to questions in the student book. Glossary terms and definitions. Daily study planners. Course content checklists. Exam tips. In addition their Exam Cafe student CD will give them access to the Internet Cafe where they can access multiple-choice quizzes, practice exams and sample student answers.

Foundations of Data Science - Avrim Blum 2020-01-23

This book provides an introduction to the mathematical and algorithmic foundations of data science, including machine learning, high-dimensional geometry, and analysis of large networks. Topics include the counterintuitive nature of data in high dimensions, important linear algebraic techniques such as singular value decomposition, the theory of random walks and Markov chains, the fundamentals of and important algorithms for machine learning, algorithms and analysis for clustering, probabilistic models for large networks, representation learning including topic modelling and non-negative matrix factorization, wavelets and compressed sensing. Important probabilistic techniques are developed including the law of large numbers, tail inequalities, analysis of random projections, generalization guarantees in machine learning, and moment methods for analysis of phase transitions in large random graphs. Additionally, important structural and complexity measures are discussed such as matrix norms and VC-dimension. This book is suitable for both undergraduate and graduate courses in the design and analysis of algorithms for data.

Dental Cementum in Anthropology - Stephan Naji 2021

"The purpose of this edited volume was to bring together specialists from various fields to present all the information needed to understand and implement cementochronology, the analysis of cementum growth. This interdisciplinary "Cementum Research Program" was initiated in 2010/2011 at a Paris workshop with Jean-Pierre Bocquet-Appel, Joël Blondiaux, Thomas Colard, and me. Initially, the goal was to develop a standardized cementum protocol for age estimation in anthropology (Colard et al. 2015). However, the

program's scope expanded rapidly into an initial poster symposium held at the 2012 annual meeting of the American Association of Physical Anthropology (AAPA) in Knoxville (USA). With the invaluable support of Jane Buikstra, selected presentations were published in a special issue of the *International Journal of Paleopathology* (Naji et al. 2016)."

**The Structural Transformation of the Public Sphere** - Jürgen Habermas 2015-01-06

This major work retraces the emergence and development of the Bourgeois public sphere - that is, a sphere which was distinct from the state and in which citizens could discuss issues of general interest. In analysing the historical transformations of this sphere, Habermas recovers a concept which is of crucial significance for current debates in social and political theory. Habermas focuses on the liberal notion of the bourgeois public sphere as it emerged in Europe in the early modern period. He examines both the writings of political theorists, including Marx, Mill and de Tocqueville, and the specific institutions and social forms in which the public sphere was realized. This brilliant and influential work has been widely recognized for many years as a classic of contemporary social and political thought, of interest to students and scholars throughout the social sciences and humanities.

National Courts and Preliminary References to the Court of Justice - Krommendijk, Jasper 2021-10-26

This innovative book examines why national courts refer preliminary references to the European Court of Justice (ECJ), and what the referring court does with the answers. Jasper Krommendijk highlights the three core stages in the interaction between national courts and the ECJ: question, answer and follow-up, shedding new light on this under-explored area.

**Democratizing Innovation** - Eric Von Hippel 2006-02-17

The process of user-centered innovation: how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy. Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. These innovating users—both individuals and firms—often freely share their innovations with others, creating user-innovation communities and a rich intellectual commons. In *Democratizing Innovation*, Eric von Hippel looks closely at this emerging system of user-centered innovation. He explains why and when users find it profitable to develop new products and services for themselves, and why it often pays users to reveal their innovations freely for the use of all. The trend toward democratized innovation can be seen in software and information products—most notably in the free and open-source software movement—but also in physical products. Von Hippel's many examples of user innovation in action range from surgical equipment to surfboards to software security features. He shows that product and service development is concentrated among "lead users," who are ahead on marketplace trends and whose innovations are often commercially attractive. Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users. He points to businesses—the custom semiconductor industry is one example—that have learned to assist user-innovators by providing them with toolkits for developing new products. User innovation has a positive impact on social welfare, and von Hippel proposes that government policies, including R&D subsidies and tax credits, should be realigned to eliminate biases against it. The goal of a democratized user-centered innovation system, says von Hippel, is well worth striving for. An electronic version of this book is available under a Creative Commons license.

Extending Working Life for Older Workers - Alysia Blackham 2016-11-03

The UK population is ageing rapidly. While age discrimination laws are seen as having broad potential to address the 'ageing challenge' and achieve instrumental and intrinsic objectives in the context of employment, it is unclear what impact they are having in practice. This monograph addresses two overarching research questions in the employment field: How are UK age discrimination laws operating in practice? How (if at all) could UK age discrimination laws be improved? A reflexive law theoretical standpoint is employed to investigate these issues, applying a mixed methods research design that engages qualitative, quantitative, doctrinal and comparative elements. This book demonstrates the substantial limitations of the Equality Act 2010 (UK) for achieving instrumental and intrinsic objectives. Drawing on qualitative expert interviews, statistical analysis and organisational case studies, it illustrates the failure of age discrimination laws to achieve attitudinal change in the UK, and reveals the limited prevalence of proactive measures to support older workers. Integrating doctrinal analysis, comparative analysis of Finnish law, and the Delphi method, it proposes targeted legal and policy changes to address demographic change, and offers an agenda for reform that may increase the impact of age discrimination laws, and enable them to respond effectively to demographic ageing. Runner up of the 2017 SLS Peter Birks Prize for Outstanding Legal Scholarship!

Tallinn Manual 2.0 on the International Law Applicable to Cyber Operations - 2017-02-02

Tallinn Manual 2.0 expands on the highly influential first edition by extending its coverage of the international law governing cyber operations to peacetime legal regimes. The product of a three-year follow-on project by a new group of twenty renowned international law experts, it addresses such topics as sovereignty, state responsibility, human rights, and the law of air, space, and the sea. Tallinn Manual 2.0 identifies 154 'black letter' rules governing cyber operations and provides extensive commentary on each rule. Although Tallinn Manual 2.0 represents the views of the experts in their personal capacity, the project benefitted from the unofficial input of many states and over fifty peer reviewers.

**Free Will Skepticism in Law and Society** - Elizabeth Shaw 2019-08-29

'Free will skepticism' refers to a family of views that all take seriously the possibility that human beings lack the control in action - i.e. the free will - required for an agent to be truly deserving of blame and praise, punishment and reward. Critics fear that adopting this view would have harmful consequences for our interpersonal relationships, society, morality, meaning, and laws. Optimistic free will skeptics, on the other hand, respond by arguing that life without free will and so-called basic desert moral responsibility would not be harmful in these ways, and might even be beneficial. This collection addresses the practical implications of free will skepticism for law and society. It contains eleven original essays that provide alternatives to retributive punishment, explore what (if any) changes are needed for the criminal justice system, and ask whether we should be optimistic or pessimistic about the real-world implications of free will skepticism.
