In this groundbreaking book, a #1 bestseller in South Korea, a financial guru shares the secret to building your fortune using your emotion and opens the door to a new world full of hope and prosperity. When Wharton MBA Jooyun Hong went searching for the key to increasing wealth in a time of growing inequality, she did not expect to find herself studying under a famed and fascinating guru, known for advising the 1% of South Korea. She now shares what she learned from

In destinations ranging from Paris to Kyoto, this philosophical journey lays out a framework for achieving an empowered relationship with money. The guru has

found that almost everyone has the capacity to earn 3 to 7 million dollars—and some have a capacity for much more. As Jooyun applies the guru's practical but revolutionary insights to her everyday life—including journaling about the emotions that accompany spending money—she experiences a transformation of her mood, fulfillment, and ultimately, her net worth. By changing your emotions about money, you can make every purchase a step toward becoming your true self. The Economics of Innocent

Fraud - John Kenneth Galbraith
2009

'An almost indecently pleasurable read' The Times In this vigorous polemic John Kenneth Galbraith, a lifelong critic of unbridled corporate power, distils years of expertise to deliver a scathing attack on the modern financial system. Sounding the alarm on the gap between 'conventional wisdom' - a phrase he coined - and reality, Galbraith warns that the private sector and the public realm are becoming increasingly intertwined. He shows how politics and the media have colluded in the myth of a benign market system, accepting obscene pay gaps and unrestrained self-enrichment - ultimately meaning that we have come to condone legal, legitimate, 'innocent' fraud. First published in 2004, this extraordinarily prescient analysis of capitalism now has even greater power and relevance for our times. 'I agree with Galbraith. The bonus culture is skim, bribery, corporate theft' Simon Jenkins, Guardian 'The most stylish writer on economics of the past

half-century ... it will please those who appreciate Galbraith's dry wit and laconic iconoclasm' Financial Times 'America's great liberal economist, the intellectual heir to John Maynard Keynes' Economist

Zur strafrechtlichen Verantwortung internationaler Ratingagenturen im Rahmen der europäischen Schuldenkrise - Stefan

Wehner 2015-08-31

Die europäische Schuldenkrise ist allgegenwärtig und stellt Politik und Wirtschaft vor neue Herausforderungen. Das Handeln verschiedener Finanzmarktakteure führte seit dem Ausbruch der US-Subprime-Krise im Jahr 2007 weltweit zu einer Kapitalvernichtung von mehreren Billionen Euro. In der Europäischen Union wird die Auffassung vertreten, dass die Ratingagenturen durch ihre Fehleinschätzungen einen maßgeblichen Anteil zur Verschärfung der Schuldenkrise beitrugen, ohne dass ihre Position ernsthaft

hinterfragt wurde. Stefan Wehner untersucht in seiner Dissertation, inwiefern das Handeln internationaler Ratingagenturen strafrechtliche Konsequenzen nach sich ziehen kann. Darüber hinaus wird die Frage aufgeworfen, ob die europäische Harmonisierung strafrechtlicher Vorschriften in der Lage ist, einen wirksamen Beitrag zum Schutz und zur Disziplinierung der Finanzmärkte zu leisten. Eine besondere Aufmerksamkeit legt der Autor auf die grundsätzliche Forderung nach einer strengeren Regulierung für Ratingagenturen. Die Erfahrungen und Lehren aus der weltweiten Finanzkrise haben in Europa bereits verschiedene Reformvorschläge auf den Weg gebracht, um das Vertrauen der Anleger in die Märkte wiederzugewinnen. Die damit verbundenen Vorschläge reichen von der Einführung eines eigenständigen Haftungsregimes für Ratingagenturen bis hin zur Etablierung einer europäischen

Ratingagentur. Im Mittelpunkt steht die Frage, inwieweit der Staat in wirtschaftliche Zusammenhänge und insbesondere in die Regulierung der Kapitalmärkte eingreifen darf und ob das Strafrecht als Instrument der Wirtschaftssteuerung eingesetzt werden kann, um die Einflussnahme der Ratingagenturen auf die internationalen Finanzmärkte zu begrenzen.

The Colombo Bay - Richard Pollak 2013-09-10

In the face of killer storms, fires, piracy, and terrorism, container ships the length of city blocks and more than a dozen stories high carry 90 percent of the worlds trade. This is an account of one ship's voyage and of the sailors who daily risk their lives to deliver six million containers a year to United States ports alone. Inside these twenty-foot and forty-foot steel boxes are the thousands of imports -- from chinos and Game Boys to garlic and frozen shrimp -- without which North America's consumer society would

collapse. To explore this little-known and dangerous universe of modern seafaring, Richard Pollak joined the Colombo Bay in Hong Kong and over the next five weeks sailed with her and her 3,500 containers across the South China Sea, the Indian Ocean, the Mediterranean, and the Atlantic. En route, this mammoth vessel called at Singapore and Colombo, passed through the Suez Canal (toll: \$250,000), then put in at Malta and Halifax before tangling with Hurricane Karen on the two-day run to New York. Here is the story of the ship's unheralded twenty-four-man company; of the unflappable British captain, Peter Davies, a veteran of four decades at sea; of Federico Castrojas, who like the rest of the hard-working Filipino crew must daily confront the loneliness of being away from his family for nine months at a stretch; of Simon Westall, the twenty-one-year-old third mate, who reveals what it is like to be gay in the broad-shouldered world of the merchant service.

It is a world where pirates in the Malacca Strait sneak up behind ships at night in fast power boats, then clamber aboard and either rob the unarmed sailors at gunpoint and escape into the dark or throw the crew into the sea and hijack the ship, plundering her cargo and sometimes repainting her and setting out to do business under another name and flag. It is a world where families desperate to get to the United States or Europe pay thousands of dollars to the Chinese Snakeheads and other criminal gangs, who secrete these wretched migrants in stifling containers; after a week or more at sea these stowaways arrive in the Promised Land either starving or dead. Pollak sailed on September 13, 2001, into a changed world, on one of 7,000 container ships whose millions of uninspected boxes suddenly had become potential Trojan horses in which terrorists could transport weapons of mass destruction into the heart of the United States. Throughout his riveting narrative, Pollak

interweaves the insights of Herman Melville and Joseph Conrad, whose masterful portrayals of seafaring make the voyage of the Colombo Bay a dramatic reminder of what a hard and rarely reported life merchant seamen have always led out on the "unhooped oceans of this planet."

The Phenomenon of IPO Underpricing in the European and U.S. Stock Markets - Oliver Reiche

2014-06-01

The Initial Public Offering (IPO) marks one of the most important events of a company. Basically, the aim is to generate maximum proceeds by selling the company's shares to investors. However, the shares that are sold seem to be underpriced as the price significantly soars on the first trading day. Since the very first detection of this phenomenon in the United States in 1969, several subsequent studies have documented the existence of worldwide IPO underpricing. This study focuses on IPO Underpricing in the European and United States Stock

Markets by outlining and discussing the following essential issues: What is underpricing in the context of the IPO? Which motivations are there and how do they impact? Is there IPO underpricing in the markets of Europe and the United States of America?

The Power of Capitalism -

Rainer Zitelmann 2018-11-30

"The market has failed, we need more government intervention. That's the mantra politicians, the media, and intellectuals have been reiterating ever since the outbreak of the 2008 financial crisis. By taking the reader on a journey across continents and through recent history, Rainer Zitelmann disproves this call for greater government intervention, and demonstrates that capitalism matters more than ever. The author provides compelling evidence from across the world that capitalism has been the solution to a number of massive problems. He compares developments in West and East Germany, North and South Korea, capitalist Chile v. Socialist Venezuela, and analyzes the extraordinary economic rise of China. For

many people, capitalism is a dirty word. This book provides a timely reminder of capitalism's power in enabling growth and prosperity, and in alleviating poverty.

Die Optimierung von Quellensteuerbelastungen bei Aktienindexfonds - Gerd Kommer 2015-06-29

Gerd Kommer hat in seinen bisherigen Büchern (u.a. „Souverän Investieren“) ein für Privatanleger praktikables und auf den aktuellen Erkenntnissen der Forschung fußendes Konzept entwickelt,

wie Kapitalmarktanlagen organisiert werden müssen, um langfristig mit einem hohen Sicherheitsgrad gute Ergebnisse zu erzielen. Das vorliegende Buch erweitert dieses Konzept um eine zusätzliche Perspektive, die die langfristige Rendite von Kapitalmarktanlagen für Privatanleger in ähnlich hohem Maße beeinflusst, wie die laufende Kostenbelastung durch Finanzdienstleister: die Steuerbelastungen. Den meisten Privatanlegern in Deutschland ist nicht bewusst, dass sie durch ein international diversifiziertes Aktienfondsportfolio simultan Steuerpflichten in einer Vielzahl von Ländern begründen. Beteiligt sind typischerweise: (1) Deutschland als Wohnsitzland des Anlegers, (2) Deutschland, Luxemburg, Irland oder Liechtenstein als Domizilländer der Investmentfonds, (3) bis zu 50 Zielländer, in welchen Quellensteuern z.B. auf Dividenden einbehalten werden und (4) die Länder, in denen die Anleger ihr Bankdepot

unterhalten, wie z.B. Deutschland, Österreich, Schweiz oder Liechtenstein. Je nach Fallkonstellation erheben mehrere der hier beteiligten Staaten unabhängig voneinander den Maximalsatz derjenigen Steuern, die ihnen nach ihren nationalen Steuerrechten zustehen könnte; kumuliert kann sich durchaus eine effektive Steuerbelastung von bis zu 60% ergeben. Steuererleichterungen und -rückzahlungen, etwa auf der Grundlage bestehender Abkommen zur Vermeidung von Doppelbesteuerungen (DBAs), werden typischerweise erst dann gewährt und vollzogen, wenn die Anspruchsgrundlagen seitens des Anlegers nachgewiesen wurden und sich jemand tatsächlich um die Rückholung „zu viel“ gezahlter, erstattungsfähiger Steuern in den betreffenden Ländern gekümmert hat. Da diese Rückerstattung aus in der vorliegenden Arbeit analysierten Gründen normalerweise nicht erfolgt,

zahlt der deutsche Privatanleger regelmäßig deutlich mehr Steuern auf seine internationalen Dividendeneinkünfte, als er eigentlich müsste und als ihm bewusst ist; langfristig kann dies die Anlageergebnisse erheblich beeinträchtigen. Gerd Kommer quantifiziert in dieser Arbeit diese Effekte, beschreibt ihren steuerrechtlichen Hintergrund und zeigt konkrete, auch für Privatanleger praktikable Wege auf, wie die Anlagesituation deutlich verbessert werden kann.

Maybe Esther - Katja

Petrowskaja 2018-01-30

An inventive, unique, and extraordinarily moving debut memoir that pieces together the fascinating story of one woman's family across twentieth-century Russia, Ukraine, Poland, and Germany. Katja Petrowskaja wanted to create a kind of family tree, charting relatives who had scattered across multiple countries and continents. Her idea blossomed into this striking and highly original work of narrative nonfiction, an account of her search for meaning within the stories of her ancestors. In a series of short meditations, Petrowskaja delves into family legends, introducing a remarkable cast

of characters: Judas Stern, her great-uncle, who shot a German diplomatic attaché in 1932 and was sentenced to death; her grandfather Semyon, who went underground with a new name during the Bolshevik Revolution in Russia, forever splitting their branch of the family from the rest; her grandmother Rosa, who ran an orphanage in the Urals for deaf-mute Jewish children; her Ukrainian grandfather Vasily, who disappeared during World War II and reappeared without explanation forty-one years later—and settled back into the family as if he'd never been gone; and her great-grandmother, whose name may have been Esther, who alone remained in Kiev and was killed by the Nazis. How do you talk about what you can't know, how do you bring the past to life? To answer this complex question, Petrowskaja visits the scenes of these events, reflecting on a fragmented and traumatized century and bringing to light family figures who threaten to

drift into obscurity. A true search for the past reminiscent of Jonathan Safran Foer's Everything Is Illuminated, Daniel Mendelsohn's The Lost, and Michael Chabon's Moonglow, Maybe Esther is a poignant, haunting investigation of the effects of history on one family.

The Asian 21st Century -

Kishore Mahbubani 2021-12-30

This open access book consists of essays written by Kishore Mahbubani to explore the

challenges and dilemmas faced by the West and Asia in an increasingly interdependent world village and intensifying geopolitical competition. The contents cover four parts: Part One The End of the Era of Western Domination. The major strategic error that the West is now making is to refuse to accept this reality. The West needs to learn how to act strategically in a world where they are no longer the number 1. Part Two The Return of Asia. From the years 1 to 1820, the largest economies in the world were Asian. After 1820 and the rise of the West, however, great Asian civilizations like China and India were dominated and humiliated. The twenty-first century will see the return of Asia to the center of the world stage. Part Three The Peaceful Rise of China. The shift in the balance of power to the East has been most pronounced in the rise of China. While this rise has been peaceful, many in the West have responded with considerable concern over the influence China will have on

the world order. Part Four Globalization, Multilateralism and Cooperation. Many of the world's pressing issues, such as COVID-19 and climate change, are global issues and will require global cooperation to deal with. In short, human beings now live in a global village. States must work with each other, and we need a world order that enables and facilitates cooperation in our global village.

Undercover Epicenter Nurse

- Erin Marie Olszewski

2020-08-18

Undercover Epicenter Nurse blows the lid off the COVID-19 pandemic. What would you do if you discovered that the media and the government were lying to us all? And that hundreds, maybe thousands of people were dying because of it? Army combat veteran and registered nurse Erin Olszewski's most deeply held values were put to the test when she arrived as a travel nurse at Elmhurst Hospital in the epicenter of the COVID-19

pandemic. After serving in Iraq, she was back on the front lines—and this time, she found, the situation was even worse. Rooms were filthy, nurses were lax with sanitation measures, and hospital-acquired cases of COVID-19 were spreading like wildfire. Worse, people who had tested negative multiple times for COVID-19 were being labeled as COVID-confirmed and put on COVID-only floors. Put on ventilators and drugged up with sedatives, these patients quickly deteriorated—even though they did not have coronavirus when they checked in. Doctors-in-training were refusing to perform CPR—and banning nurses from doing it—on dying patients whose families had not consented to “Do Not Resuscitate” orders. Erin wasn’t about to stand by and let her patients keep dying on her watch, but she knew that if she told the truth, people wouldn’t believe her. It was just too shocking. Willing to go to battle for her patients, Erin made the decision to go deep undercover, recording

conversations with other nurses, videos of malpractice, and more. She began to share what she found on social media. Unsurprisingly, she was fired for it. Now, Erin is standing up to tell the whole horrifying story of what happened inside Elmhurst Hospital to demand justice for those who fell victim to the hospital’s greed. Not only must the staff be held accountable for their unethical actions; but also, this kind of corruption must be destroyed so that future Americans are not put at risks. The deaths have to end, and Erin won’t rest until the bad actors are exposed. Undercover Epicenter Nurse: How Fraud, Negligence, and Greed Led to Unnecessary Deaths at Elmhurst Hospital is a shocking and infuriating inside exposé of the American healthcare system gone wrong. At the same time, it’s the story of a woman who traveled from the small-town streets of Wisconsin, to the battlefields of Iraq, to the mean streets of Queens, on a quest to help fight for her country. With this

book, the real battle has begun.

This book provides instruction on how to use the OrCAD design suite to design and manufacture printed circuit boards. The primary goal is to show the reader how to design a PCB using OrCAD Capture and OrCAD Editor. Capture is used to build the schematic diagram of the circuit, and Editor is used to design the circuit board so that it can be manufactured. The book is written for both students and practicing engineers who need in-depth instruction on how to use the software, and who need background knowledge of the PCB design process. Beginning to end coverage of the printed circuit board design process. Information is presented in the exact order a circuit and PCB are designed Over 400 full color illustrations, including extensive use of screen shots from the software, allow readers to learn features of the product in the most realistic

manner possible

Straightforward, realistic examples present the how and why the designs work, providing a comprehensive toolset for understanding the OrCAD software Introduces and follows IEEE, IPC, and JEDEC industry standards for PCB design. Learning from the European experience is crucial for Americans. Moreover this evolution is inscribed in the historical movement of Islamic theology and expansionism. It is not fortuitous but it has its own theological and political structure that must be known in the West if we wish to live in a peaceful world.

The Pocket Adoption Coach -

Michele Hengen 2021-05-26

The Pocket Adoption Coach is a woman's personal tale of becoming a mother. With candour and heart, Michele Hengen invites us along on the journey of highs and lows that tracked her family's evolution from aching couple to five-

person glory, courtesy of an adoption of a little girl from Ukraine and a double adoption from a Canadian twin pregnancy. At numerous points along the way, the author was told that their plans could not be realized. But by developing a clear vision and keeping it in sight, she and her husband were at last able to realize their goal. Here, she shares the life lessons she picked up along the way, lessons that transcend the particulars of their adoptions and are applicable to anyone setting out along this rewarding—and often bewildering—path.

When to Rob a Bank - Steven

D. Levitt 2015-05-05

In celebration of the 10th anniversary of the landmark book Freakonomics comes this curated collection from the most readable economics blog in the universe. It's the perfect solution for the millions of readers who love all things Freakonomics. Surprising and erudite, eloquent and witty, When to Rob a Bank demonstrates the brilliance that has made the

Freakonomics guys an international sensation, with more than 7 million books sold in 40 languages, and 150 million downloads of their Freakonomics Radio podcast. When Freakonomics was first published, the authors started a blog—and they’ve kept it up. The writing is more casual, more personal, even more outlandish than in their books. In *When to Rob a Bank*, they ask a host of typically off-center questions: Why don’t flight attendants get tipped? If you were a terrorist, how would you attack? And why does KFC always run out of fried chicken? Over the past decade, Steven D. Levitt and Stephen J. Dubner have published more than 8,000 blog posts on the Freakonomics website. Many of them, they freely admit, were rubbish. But now they’ve gone through and picked the best of the best. You’ll discover what people lie about, and why; the best way to cut gun deaths; why it might be time for a sex tax; and, yes, when to rob a bank. (Short answer: never; the ROI is

terrible.) You’ll also learn a great deal about Levitt and Dubner’s own quirks and passions, from gambling and golf to backgammon and the abolition of the penny.

Ego - Frank Schirrmacher
2015-11-30

Twenty-five years after the end of the Cold War, a new Cold War is being waged in our societies. During the Cold War a theoretical model of man was developed by economists and the military, an egotistical being interested only in his own benefit and in duping his opponents to achieve his ends: a modern homo oeconomicus. After his career in the Cold War ended, he was not scrapped but adapted to the needs of the twenty-first century. He became the ringmaster of a new era of information capitalism. He sought to read, control and influence thoughts; to predict, price and eliminate risks. Today stock-market trading is guided by him. He uses computer algorithms and Big Data to build up detailed pictures of our preferences and

then suggest and sell goods to us. The model has become a self-fulfilling prophecy. We are no longer the masters of our own fate. The Game of Life runs without us. Schirmmacher traces the progress of this extreme rationalization of social life from the Cold War games of the 1950s Rand Corporation to the stock-market trading techniques that brought about the financial crash of 2008, showing how these developments were interwoven with the rise of game theory, rational choice theory and neoliberal economics. The state and politics increasingly submitted themselves to the logic of computerized game theory and an economic view of the world, evading real decision-making in the process. In this brave new world individuals, alone in front of their computers, may think they are constructing a reality of their own choosing, but in fact they are being manipulated all along by others who are setting the rules of the game. This international bestseller by one

of Germany's most distinguished journalists is a powerful indictment of a way of thinking that has become pervasive and threatens to undermine not only parliaments and constitutions but also the sovereignty of the individual to be the person he or she wants to be.

Animal Beauty - Christiane Nusslein-Volhard 2019-05-14

An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer

to as “beauty”? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a “sexual selection” distinct from natural selection. Nüsslein-Volhard examines key

examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.
