Decision Making Under Uncertainty - Mykel J. Kochenderfer 2015-07-24

An introduction to decision making under uncertainty from a computational perspective, covering both theory and applications ranging from speech recognition to airborne collision avoidance. Many important problems involve decision making under uncertainty—that is, choosing actions based on often imperfect observations, with unknown outcomes. Designers of automated decision support systems must take into account the various sources of uncertainty while balancing the multiple objectives of the system. This book provides an introduction to the challenges of decision making under uncertainty from a computational perspective. It presents both the theory behind decision making models and algorithms and a collection of example applications that range from speech recognition

to aircraft collision avoidance. Focusing on two methods for designing decision agents, planning and reinforcement learning, the book covers probabilistic models, introducing Bayesian networks as a graphical model that captures probabilistic relationships between variables; utility theory as a framework for understanding optimal decision making under uncertainty; Markov decision processes as a method for modeling sequential problems; model uncertainty; state uncertainty; and cooperative decision making involving multiple interacting agents. A series of applications shows how the theoretical concepts can be applied to systems for attribute-based person search, speech applications, collision avoidance, and unmanned aircraft persistent surveillance. *Decision Making Under Uncertainty* unifies research from different communities using consistent notation, and is accessible to students and researchers across engineering disciplines who have some prior exposure to probability theory and

calculus. It can be used as a text for advanced undergraduate and graduate students in fields including computer science, aerospace and electrical engineering, and management science. It will also be a valuable professional reference for researchers in a variety of disciplines.

Lonely Days - 'Bayo Adebawale 2006

Faceless - Amma Darko 2003

Street life in the slums of Accra is realistically portrayed in this socially-committed, subtle novel about four educated women who are inspired by the plight of a 14-year old girl, Fofa. As the main characters convert their library center into a practical street initiative, the novel invokes the squalor, health risks, and vicious cycles of

poverty and violence that drive children to the streets and women to prostitution; and, from which, ultimately, no one in the society is free. *Cunningham's Manual of Practical Anatomy VOL 1 Upper and Lower Limbs* - Rachel Koshi 2017

Eye Movement Disorders - E.A.C.M. Sanders 2012-12-06

There is perhaps no area of neuro-ophthalmology that is advancing more rapidly with respect to an understanding of its anatomy and physiology than the ocular motor system. For this reason, it is difficult not only to keep up with the latest information concerning the basic mechanisms involved in the control of eye movements but also to remain up to date regarding the pathophysiology of specific disorders of eye movement. The material in this book is derived from a two-day course on eye movements held in The Netherlands in 1986. The course was designed as an introduction to

the normal ocular motor system and to disorders of eye movements and was aimed toward orthoptists, ophthalmologists, optometrists, neurologists, and neurosurgeons. The chapters in this book were compiled by a trio of experts in the field of eye movements and contain discussions of anatomy and physiology of the ocular motor system, techniques of examination of patients with diplopia, and pathophysiology of specific disorders of ocular motility. Many of the authors of these chapters are among the most active investigators of eye movements in the world today, and their comments thus reflect the latest information in the field. This text is both basic and comprehensive and thus has something for everyone, from the student just beginning a study of the ocular motor system to the seasoned 'veteran' who wishes to know the latest information regarding central ocular motor control mechanisms. Physics - Michael J. Anzelone 2012-08-15

The Fundamentals of Physics is a compact text that includes basic topics of classical physics that a student should be familiar with in order to be truly educated in science. The text's clear and concise presentation will help a student

understand the science of physics and round out his or her science foundation. The first chapter contains a historical perspective. This short history of science will firmly put the information in the text on a firm footing. A quick reading of the history will make the rest of the book easier to understand and increase the ability to remember material. Essential scientific ideas are presented in this text that fit together in such a way as to accept “new” information effortlessly and assimilate the “old” with the “new.” The general plan of the text is to explain simple ideas and then incorporate them into more complex ideas. Explanatory annotations are included to ensure a student's ease of reading. General safety rules at the beginning of the text should be reviewed, even if a laboratory is not part of the course. The book includes topics that lend themselves to demonstration of basic principles of physics. Students should be encouraged to participate in demonstrations to acquire some “hands on” experience. This will allow students

to grasp principles easier. The inclusion of a survey of the natural sciences will allow a student to be aware of the relationship of one science to another. An explanation of how the basic units of measurement were arrived at is essential for a thorough understanding of mathematical concepts. Galileo's law of falling bodies, Isaac Newton's laws of motion and a short explanation of Einstein's concepts of relativity are simply presented. Atomic theory and the states of matter are clearly presented. The beginner should have no difficulty. The properties of sound and light are presented and related to everyday activities. Electricity, electronics and magnetism are included because of their relevance to the modern workplace. Understandable and practical examples are given. Radioactivity is covered because of its importance in the modern world.

her solitude outdoors. This novel consists of those elements. It is now considered a classic of English literature. It was published under the pseudonym - "Ellis Bell" The story is full of high creativity and very imaginative. It narrates revenge also. It revolves around the main character, Heathcliff. Wuthering Heights is his farmhouse. Heathcliff is a young orphan, who was brought by Earnshaw at Wuthering Heights, 30 years ago. Earnshaw loves him (Heathcliff) so much, even neglects his own children. After death of Earnshaw, his elder son Hindley becomes the new master of Wuthering Heights and he allows Heathcliff to stay there only as a servant. Catherine is in love with Heathcliff, but doesn't show due to her social statue. The story thus seems very interesting and it ends with sights of the ghosts of Catherine and Heathcliff. It consists of many ups and downs Readers will Surely going to enjoy the novel. It's Heartthrobing and it's very difficult to getup without reading the novel - fully.

Propagation and Reflection of Shock Waves

- F V Shugaev 1998-05-05

This volume deals with the propagation of three-dimensional shock waves and their reflection from curved walls. It is divided into two parts. The first part presents a ray method. This is based on the expansion of fluid properties in power series at an arbitrary point on the shock front. Continuous fractions are used. Results for shock propagation in non-uniform fluids are given. The second part discusses the shock reflection from a concave body. The important

shock-focusing problem is included. The work is supported by both numerical and experimental results. Many interesting features, such as formation of a jet, vortices and the appearance of disturbances on the shock front, are discussed. Besides shock waves in gases, the distinctive features of shock propagation through a weakly ionized plasma are considered. Contents: Structure and Basic Properties of Shock Waves in Gases Shock Wave Propagation Through a Gas Interaction of a Plane Shock Wave with Disturbances and Stability of Shock Waves Reflection of a Shock Wave from a Convex Body Reflection of a Shock Wave from a Concave Body and Shock Focusing Propagation of a Shock Wave Through a Turbulent Gas Flow Propagation of a Shock Wave Through a Gas-Particle Mixture Laser-Driven Shock Waves Shock Waves in a Low-Temperature Plasma Readership: Researchers in fluid mechanics. keywords: Shock Wave; Shock Tube; Propagation, Reflection; Ray Method; Focusing; Vortical

Explicit Biology - A Revision Course (3rd Edition) - O. J. Olaoye 2014-05-01

The monograph "Explicit Biology: A Revision Course" for UTME, POST-UTME and other related examinations written by O.J. Olaoye is a complementary text to the various textbooks that have been written in the subject area. The book has five sections and twenty six chapters on all the biology topics. This book has become timely in view of the poor results that are being witnessed in the UTME examination especially in the sciences and mathematics, biology inclusive. These majorly are due to poor or inadequate access to good study materials. Each chapter has annotated topics followed by copious specimen questions on some past UTME and POST -UTME examination, for practice and emphasis. The topics in each chapter are adequately treated and with clarity. The illustrations are simple but effective. The author

has done a lot of work and put in efforts to come out with a very readable and useful text. It is highly recommended to all the students aspiring to undertake the UTME and POST-UTME examination, in order to improve highly their chances of success. O.A. Gamification and Consumer Engagement -

Rimantas Gatautis 2020-11-12

In the context of rapid ICT development, this book focuses on how gamification affects consumer engagement and can be used to create a shared value for customers and companies. Based on the constructs of shared value, consumer engagement and gamification, it creates a conceptual model and a research methodology to enable empirical testing and provide complex empirical research findings. The book demonstrates the use of game elements and the motivation to play games as a means of achieving a psychological effect, i.e., consumer engagement manifested through gamified activities and brand engagement. This joint empirical study, by an expert team, concludes that the analysis of consumer

perceived value in the context of engagement in gamified activities should distinguish between not just the theoretically identified company/brand-related economic, emotional, functional and social values, but also between engagement-related social and functional values. Unexpected Joy at Dawn - Alex Agyei-Agyiri 2003 Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularise their stay in the country'. This story of migration, identities and lives undermined by cynical and xenophobic politics pushed to its logical and terrible conclusion pertains to the Ghanaian orders of 'alien compliance' issued in 1970-1971, which determined to force all non-ethnic Ghanaians, so called illegal immigrants, to return to their - so stipulated - 'home'. The novel thus touches on concerns of deeper relevance to the politics of race and migration of
