*Monoculture* - F. S. Michaels 2011-04-25

Winner of the 2011 George Orwell Award. One of The Atlantic's top psychology books of 2011. As human beings, we've always told stories: stories about who we are, where we come from, and where we're going. Now imagine that one of those stories is taking over the others, narrowing our diversity and creating a monoculture. Because of the rise

of the economic story, six areas of your world - your work, your relationships with others and the environment, your community, your physical and spiritual health, your education, and your creativity - are changing, or have already changed, in subtle and not-so-subtle ways. And because how you think shapes how you act, the monoculture isn't just changing your mind - it's changing your life. In *Monoculture*, F.S. Michaels draws on extensive research and makes surprising connections among disciplines to take a big-picture look at how one story is changing everything. Her research and writing have been supported by the Social Sciences and Humanities Research Council of Canada, the Killam Trusts, and regional and municipal arts councils. Michaels has an MBA, and lives and writes in British Columbia.

**Homecoming** - John Bradshaw 2013-04-24

Are you outwardly successful but inwardly do you feel like a big kid? Do you aspire to be a loving parent but all too often “lose it” in hurtful ways? Do you crave intimacy but sometimes wonder if it's worth the struggle? Or are you plagued by constant vague feelings of anxiety or depression?

If any of this sounds familiar, you may be experiencing the hidden but damaging effects of a painful childhood—carrying within you a “wounded inner child” that is crying out for attention and healing. In this powerful book, John Bradshaw shows how we can learn to nurture that inner child, in essence offering ourselves the good parenting we needed and longed for. Through a step-by-step process of exploring the unfinished business of each developmental stage, we can break away from destructive family rules and roles and free ourselves to live responsibly in the present. Then, says Bradshaw, the healed inner child becomes a source of vitality, enabling us to find new joy and energy in living. *Homecoming* includes a wealth of unique case histories and interactive techniques, including questionnaires, letter-writing to the inner child, guided meditations, and affirmations. Pioneering when introduced, these classic therapies are now being validated by new discoveries in attachment research and neuroscience. **Handwriting for Heroes** - Kathleen E. Yancosek 2009-01-01

**Loving** - Sheryll Cashin 2017-06-06

The landmark story of how interracial love and marriage changed American history—and continues to alter the landscape of American politics. When Mildred and Richard Loving wed in 1958, they were ripped from their shared bed and taken to court. Their crime: miscegenation, punished by exile from their home state of Virginia. The resulting landmark decision of *Loving v. Virginia* ended bans on interracial marriage and remains a signature case—the first to use the words “white supremacy” to describe such racism. Drawing from the earliest chapters in US history, legal scholar Sheryll Cashin reveals the enduring legacy of America’s original sin, tracing how we transformed from a country without an entrenched construction of race to a nation where one drop of nonwhite blood merited exclusion from full citizenship. In vivid detail, she illustrates how the idea of whiteness was created by the planter class of yesterday and is reinforced by today’s power-hungry dog-whistlers to divide struggling whites and people of color, ensuring plutocracy and undermining the common good. Not just a hopeful treatise on the future of race relations in America, *Loving* challenges the notion that trickle-down progressive politics is our only hope for a more inclusive society. Accessible and sharp, Cashin reanimates the possibility of a future where interracial understanding serves as a catalyst of a social revolution ending not in artificial color blindness but in a culture where acceptance and difference are celebrated.

In this paperback edition is a foreword by activist and author John Robbins and a reader's group study guide. This ground-breaking work, voted one of the top ten books of 2010 by VegNews Magazine, offers an absorbing look at why and how humans can so wholeheartedly devote ourselves to certain animals and then allow others to suffer needlessly, especially those slaughtered for our consumption. Social psychologist Melanie Joy explores the many ways we numb ourselves and disconnect from our natural empathy for farmed animals. She coins the term "carnism" to describe the belief system that has conditioned us to eat certain animals and not others. In Why We Love Dogs, Eat Pigs, and

Wear Cows Joy investigates factory farming, exposing how cruelly the animals are treated, the hazards that meatpacking workers face, and the environmental impact of raising 10 billion animals for food each year. Controversial and challenging, this book will change the way you think about food forever.

Parenting Matters - National Academies of Sciences, Engineering, and Medicine 2016-11-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive

developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**No Way to Treat a Child** - Naomi Schaefer Riley 2021-10-05

Kids in danger are treated instrumentally to promote the rehabilitation of their parents, the welfare of their communities, and the social justice of their race and tribe—all with the inevitable result that their most precious developmental years are lost in bureaucratic and judicial red tape. It is time to stop letting efforts to fix the child welfare system get derailed by activists who are concerned with race-matching, blood ties, and the abstract demands of social justice, and start asking the most important question: Where are the emotionally and financially stable, loving, and permanent homes where these kids can thrive? “Naomi Riley’s book reveals the extent to which abused and abandoned children are often injured by their government rescuers. It is a must-read for those seeking solutions to this national crisis.” —Robert L. Woodson, Sr., civil rights leader and president of the Woodson Center “Everyone interested in child welfare should grapple with Naomi Riley’s powerful evidence that the current system ill-serves the safety and well-being of vulnerable kids.” —Walter Olson, senior fellow, Cato Institute, Robert A. Levy Center for Constitutional Studies

**ANTHEM** - Ayn Rand 2021-01-01

Hailed by The New York Times as "a compelling dystopian look at paranoia from one of the most unique and perceptive writers of our time," this brief, captivating novel offers a cautionary tale. The story unfolds within a society in which all traces of individualism have been eliminated from every aspect of life — use of the word "I" is a capital offense. The hero, a rebel who discovers that man's greatest moral duty is the pursuit of his own happiness, embodies the values the author embraced in her personal philosophy of objectivism: reason, ethics, volition, and individualism. Anthem anticipates the themes Ayn Rand explored in her later masterpieces, *The Fountainhead* and *Atlas Shrugged*. Publisher's Weekly acclaimed it as "a diamond in the rough, often dwarfed by the superstar company it keeps with the author's more popular work, but every bit as gripping, daring, and powerful." Anthem is a dystopian fiction novella by Ayn Rand, written in 1937 and first published in 1938 in England. It takes place at some unspecified future date when mankind has entered another dark age characterized by irrationality, collectivism, and socialistic thinking and economics.

Technological advancement is now carefully planned (when it is allowed to occur at all) and the concept of individuality has been eliminated.

**Different Loving** - William Brame 1996-01-13

"A detailed, eye-opening account of the real sexual underground in America . . . a thorough and serious study."—Playboy From Different Loving: In order to understand unusual sexualities such as dominance and submission, one first has to consider the question 'What is normal?' If the unique function of sex is reproductive—and the only reason men and women should engage in sex is for the purpose of creating a new life—then only heterosexual intercourse is normal. By this standard, many common acts, even contraception, must be considered aberrant.

Reproductive relevance was the Victorian standard of normalcy, and even today many of the laws in the United States still abide by that model. But people have always pursued sex for both reproduction and for pleasure and well-being. We start from the premise that sex for pleasure is a normal human drive and is acceptable when it brings pleasure to both partners. From this perspective, D&S is simply a 'different' kind of loving. We hope to add to the greater body of knowledge about what people really do behind closed doors with the people they most love and trust. Perhaps Different Loving will help open the door for further research into the mystery, beauty, and complexity of human life and its diverse expressions. Praise for Different Loving "The definitive guide to the sexual styles of those who walk on the wild side."—Kirkus Reviews "As a window on largely unexplored territory, Different Loving is a breakthrough in the dialogue on human sexuality, and a significant work of popular sociology."—South Bend Tribune "A comprehensive primer on loving with leather and romance by riding crop."—Michael Musto, New York Daily News
