## Spontaneous Venturing - Dean A. Shepherd 2022-11-01

Identifying a new approach to disaster response: spontaneous, compassionate, and impromptu actions to alleviate suffering. In Spontaneous Venturing, Dean Shepherd and Trenton Williams identify and describe a new approach for responding to disaster and suffering: the local organizing of spontaneous, compassionate, and impromptu actions—the rapid emergence of a compassionate venture. This approach, termed by the authors “spontaneous venturing,” can be more effective than the traditional “command-and-control” methods of large disaster relief organizations. It can customize and target resources and deliver them quickly, helping victims almost immediately. For example, during the catastrophic 2009 bushfires in Victoria, Australia—the focal disaster for the book—residents organized an impromptu relief center that collected and distributed urgently needed goods without red tape. Special bonds and friendships formed among the volunteers and victims; some were both volunteer and victim. Many victims were able to mobilize resources despite considerable personal losses. Shepherd and Williams

describe the lasting impact of disaster and tell the stories of Victoria residents who organized in the aftermath of the bushfires. They consider the limitations of traditional disaster relief efforts and explain that when victims take action to help others, they develop behavioral, emotional, and assumptive resilience; venturing leads to social interaction, community connections, and other positive outcomes. Finally, they explore spontaneous venturing in a less-developed country, investigating the activities of Haitians after the devastating 2010 earthquake. The lesson for communities hit by disaster: find opportunities for compassionate action.

**Becoming an Entrepreneur** - Susanne Weber 2014-05-05

This book provides new insights into the important field of Entrepreneurship Education. The editors pick up Fayolle's invitation: "How can we learn from 'institutional' culture?" and translate it to a

variety of aspects of learning to start-up. From the perspective of Human Resource Education and Management (Wirtschaftspädagogik) the authors shed light into the socio-cultural system of entrepreneurship education. They start with mapping out its challenges. They discuss context factors like political regimes affecting entrepreneurial activities, consider goals including moral awareness, introduce ideas of modeling entre- and intrapreneurial competencies, suggest teaching-learning-strategies, discuss evaluation procedures and introduce case studies of entrepreneurship education in different countries for different study levels. All in all this book stimulates and supports the challenges of educators, students, and practitioners (human resource managers, consultants, principals, teachers, and trainers) to introduce into the varying contexts of entrepreneurship education content specific, procedural, causal elements necessary for starting and maintaining an enterprise.

*Entrepreneurship Education* - Gustav Hägg 2021-07-13

The discussion around whether entrepreneurship can be taught is becoming obsolete as the number of entrepreneurship courses, specializations and degrees is rising at an unprecedented rate all over the world and the demand for entrepreneurial education teachers or instructors is constantly growing. The global community of entrepreneurial education proponents is enthusiastic about the possibility of spreading the idea of entrepreneurship, as it is believed to benefit societies and economies in addition to influencing human development on an individual level. The fervour is nurtured by public policies and the development of an enterprising culture in the public discourse. In this discourse, entrepreneurship is treated as a panacea for numerous social and economic problems. This book is a solid reference point for all who are interested in conducting research on entrepreneurial education or engaged in teaching entrepreneurship. It is a compendium of knowledge about entrepreneurial education as a research field, seen from the perspective of the last four decades, its complete contemporary history. It reviews the progress of the field from the outset to the present in terms of its socio-economic context, changes

in the academic community, but also its research focus and methodological development. This uniquely comprehensive book is a resource of both knowledge on entrepreneurial education research and inspiration for future studies within the field. This timely and relevant book provides practical insights for educators when developing their teaching practice and will be of interest to entrepreneurship educators and entrepreneurship education researchers.

**Handbook on the Entrepreneurial University** - Alain Fayolle 2014-01-01

This insightful Handbook offers a lens through which to view entrepreneurship strategy for higher education institutions, as it becomes increasingly necessary for universities to consider changing their strategies, culture and practices to become more entrepreneurial. Is the idea of an entrepreneurial university a myth or a reality? Is the university model capable of adapting to new evolving trends and a more complex professional world? And, what is the impact of entrepreneurship in education? Through extensive research and case studies from some of the leading entrepreneurial thinkers around the world, Alain Fayolle and Dana Redford answer these questions and raise further issues for debate. Particular focus is given to developing university strategy, public policy and start-up support as a means to foster graduate entrepreneurship.

Each contribution explores different perspectives related to the entrepreneurial university concept and its role in stimulating economic growth through cooperative relationships with business and government. As a comprehensive study of the entrepreneurial university, this Handbook will prove invaluable to business and entrepreneurship students and academics, as well as university administrators, researchers and others interested in the evolution of the university. *Entrepreneurship and Family Business* - Jerome A. Katz 2010-06-23 Deals with the issue of entrepreneurship and family business. This title considers the issues, problems, contexts, or processes that make a family firm more entrepreneurial. It covers topics such as the emergence and growth of family businesses, and the use of entrepreneurial policies, practices and strategies by family firms.

Entrepreneurial Small Business - Jerome Katz 2008-01-04

Entrepreneurial Small Business (ESB) provides students with a clear vision of small business as it really is today. It focuses on the distinctive nature of small businesses that students might actually start versus high growth firms. The goal of the companies described in this textbook is personal independence with financial security; not market dominance with extreme wealth. Traditional beliefs and models in small business are discussed, as well as the latest findings and best practices from academic and consulting arenas. Katz and Green recognize the distinction between entrepreneurs who aim to start the successor to Amazon.com and the pizza place around the corner. They discuss the challenges facing entrepreneurs, while keeping focused on the small businesses students plan to start.

**Planetary Improvement** - Jesse Goldstein 2018-03-16

An examination of clean technology entrepreneurship finds that “green capitalism” is more capitalist than green. Entrepreneurs and investors in the green economy have encouraged a vision of addressing climate change with new technologies. In Planetary Improvement, Jesse Goldstein examines the cleantech entrepreneurial community in order to understand the limitations of environmental transformation within a capitalist system. Reporting on a series of investment pitches by cleantech entrepreneurs in New York City, Goldstein describes investor-friendly visions of incremental improvements to the industrial status quo that are hardly transformational. He explores a new “green spirit of capitalism,” a discourse of planetary improvement, that aims to “save the planet” by looking for “non-disruptive disruptions,” technologies that

deliver “solutions” without changing much of what causes the underlying problems in the first place. Goldstein charts the rise of business environmentalism over the last half of the twentieth century and examines cleantech's unspoken assumptions of continuing cheap and abundant energy. Recounting the sometimes conflicting motivations of cleantech entrepreneurs and investors, he argues that the cleantech innovation ecosystem and its Schumpeterian dynamic of creative destruction are built around attempts to control creativity by demanding that transformational aspirations give way to short-term financial concerns. As a result, capitalist imperatives capture and stifle visions of sociotechnical possibility and transformation. Finally, he calls for a green spirit that goes beyond capitalism, in which sociotechnical experimentation is able to break free from the narrow bonds and relative privilege of cleantech entrepreneurs and the investors that control their fate.

**The Entrepreneurial Paradox** - Lianne Taylor 2016-11-29

Exploring the interaction between entrepreneurs and managers, this book attempts to understand the psychology behind how they think, behave and interact in order to benefit organizations. The Entrepreneurial Paradox shows how to achieve sustainable success and resilience through teamwork. In examining the collective mind, the author asserts that understanding these relationships can secure the right changes within a business through the integration and transfer of entrepreneurial experience and new managerial approaches. Presenting original research, the author reveals new insights into the challenges in such interactions, addresses what causes them and provides a guide for avoiding conflict.

**Digital Entrepreneurship** - Mariusz Soltanifar 2020-11-13

This open access book explores the global challenges and experiences related to digital entrepreneurial activities, using carefully selected examples from leading companies and economies that shape world business today and tomorrow. Digital entrepreneurship and the companies steering it have an enormous global impact; they promise to transform the business world and change the way we communicate with each other. These companies use digitalization and artificial intelligence to enhance the quality of decisions and augment their business and customer operations. This book demonstrates how cloud services are continuing to evolve; how cryptocurrencies are traded in the banking industry; how platforms are created to commercialize business, and how, taken together, these developments provide new opportunities in the digitalized era. Further, it discusses a wide range of digital factors changing the way businesses operate, including artificial intelligence, chatbots, voice search, augmented and virtual reality, as well as cyber threats and data privacy management. "Digitalization mirrors the Industrial Revolution's impact. This book provides a complement of perspectives on the opportunities emanating from such a deep seated change in our economy. It is a comprehensive collection of thought leadership mapped into a very useful framework. Scholars, digital entrepreneurs and practitioners will benefit from this timely work." Gina O'Connor, Professor of Innovation Management at Babson College, USA "This book defines and delineates the requirements for companies to enable their businesses to succeed in a post-COVID19 world. This book deftly examines how to accomplish and achieve digital entrepreneurship by leveraging cloud computing, AI, IoT and other critical technologies. This is truly a unique "must-read" book because it goes beyond theory and provides practical examples." Charlie Isaacs, CTO of Customer Connection at Salesforce.com, USA "This book provides digital entrepreneurs useful guidance identifying, validating and building their venture. The international authors developed new perspectives on digital entrepreneurship that can support to create impact ventures." Felix Staeritz, CEO FoundersLane, Member of the World Economic Forum Digital Leaders Board and bestselling author of FightBack, Germany

*Alongside Community* - Debra A. Harkins 2017-11-09

*Alongside Community* is a step-by-step guide that prepares social science students to be democratic citizens by examining the theory, method, and sociopolitical dynamics that impact helping those different from oneself. The first part of this book explores the more theoretical issues of helping others, including issues of social identity, values, and power. The second part of this guidebook examines action-based methods; interventions available for community-based engagement; and the sociopolitical issues that inevitably arise for those who strive to create social change including issues of race, ethnicity, social class, gender, sexual orientation, mental health, educational and environmental justice along with suggestions on how to address these issues. The third part of *Alongside Community* critically explores how to measure the impact of community service on major stakeholders including student, faculty, college and community agency and ends with reflections and suggestions on how to be a lifelong civically engaged citizen.

**Narrative and Discursive Approaches in Entrepreneurship** - Chris Steyaert 2005-01-01

. . . the four books comprising the series would certainly be a valuable addition to any entrepreneurship library. However, each book also stands alone as an individual purchase. Lorraine Warren, *International Journal of Entrepreneurial Behaviour and Research* The book delivers what it promises: a map of the uses of narrative methods in entrepreneurship studies. It is both an interesting contribution to the field and an important methodological handbook for all entrepreneurship researchers who are thinking of adopting qualitative methods in their inquiries. However, it may also be read with advantage by other researchers using ethnography as their main methodological approach to social studies. . . The aim of the book is to show how narratives can enrich entrepreneurship studies, a goal that in my opinion is aptly fulfilled. Monika Kostera, *Scandinavian Journal of Management* . . . the contributors in this text breathe fresh and imaginative linguistic resources and narrative/discursive frames of reference into the inquiry of entrepreneurial activities. The anecdote, the narrative, the metaphorical,

the discursive and the dramaturgical are significant therefore, not only because they bring to the surface voices, emotions, processes and the relationality of (everyday) entrepreneurial activity that have possibly been previously silenced. But also, to paraphrase Steyaert, these approaches highlight the controversial and interactive aspects of the research process. . . The text is welcome because it treats narrative in a serious and scholarly way. Denise Fletcher, International Small Business Journal In their edited book Narrative and Discursive Approaches in Entrepreneurship, Daniel Hjorth and Chris Steyaert provide a fascinating glimpse into a perspective on entrepreneurship that will be enlightening for many readers. Entrepreneurship authors typically talk about theory, methods, and data as if a straight-forward linear process united them all, and making sense of entrepreneurship was simply a matter of knowing how to interpret one's findings. By contrast, the authors in this volume propose narrative and discursive approaches in which the contributing authors emphasize rich description, reflexive conceptualization, and interpretations offered as part of the story itself. They draw upon an international set of cases, including Russia, Sweden, Denmark, Norway, Venezuela, and North America. The cases themselves make for fascinating reading, quite apart from what we learn about the difficulties of imposing a particular interpretation on a given story. For example, taxi drivers in Caracas, management consultants in Denmark, and women entrepreneurs in northern Norway all make for fascinating narratives from which to understand the entrepreneurial process. Unlike many edited books which have no plot, the editors have included opening and closing sections that link the chapters, offer alternative readings of them, and propose new and expansive ways of thinking about entrepreneurship. Howard Aldrich, University of North Carolina at Chapel Hill, US Daniel Hjorth and Chris Steyaert set out to advance the study of entrepreneurship by refocusing the lens of discovery from economics, management and marketing to other paradigmatic stances in social sciences and humanities like anthropology and literary studies. The result is a provocative collection of chapters that inspire the reader to consider and explore new ideas and research practice that incorporate

both the context and place of entrepreneurship. From the perceptive insights of the editors to the rigorous and provocative discourse of the chapters and thoughtful responses in the conclusion emerges a story, in the best of storytelling tradition, about how a linguistic turn can rouse new insights. The editors ask, how do these texts move you? they entice, provoke, challenge, stimulate and guide. Their implications should be far reaching and required reading for any student of t

**Trailblazing in Entrepreneurship** - Dean A. Shepherd 2017-01-21

This book is open access under a CC BY 4.0 license. In this book, the authors present a challenge for future research to build a stronger, more complete understanding of entrepreneurial phenomena. They argue that this more complete picture of entrepreneurial phenomena will likely come from scholars who undertake at least some trailblazing projects; from scholars who broaden the range of research questions, the potential outcomes of entrepreneurial action, and the selection and combination of research methods; and from researchers who avoid the endless debates about the margins of the field and its sub-fields or about whether one theoretical or philosophical lens is superior to another. This book offers suggestions for future research through a variety of topics including prosocial action, innovation, family business, sustainability and development, and the financial, social, and psychological costs of failure. It promises to make an important contribution to the development of the field and help academics, organizations, and society make useful contributions to the generation of entrepreneurial research.

**Entrepreneurship: Creating and Leading an Entrepreneurial Organization** - Arya Kumar

A new venture or business always stands on the precarious ground of

unpredictable challenges wherein it is constantly subjected to pressures from competition and the ever changing dynamics of the market. In this scenario, a venture can only be successful, if it is guided by an entrepreneur who measures situations insightfully and calculates the risks before taking a plunge. Entrepreneurship: Creating and Leading an Entrepreneurial Organization is about creating, managing, and leading an entrepreneurial organization. The contents would help in inculcating an entrepreneurial mindset, developing entrepreneurial skills, and equipping the reader with the basic knowledge and skills for launching and managing the growth of a venture. The teaching/learning of entrepreneurship require greater focus on experiential learning.

Therefore, the book extensively emphasizes on experiential learning and a hands-on approach - 'learning by doing'. Book has cited a number of examples and given cases and exercises from Indian as also global contexts to make entrepreneurship learning an enjoyable experience.

Principles of Management - Openstax 2022-03-25

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. The Entrepreneurial Personality - Elizabeth Chell 2008-06-30

Is there such a thing as an 'entrepreneurial personality'? What makes someone an entrepreneur is a question that has intrigued the lay person and the scholar for many years, but can such a personality be identified or is it simply a socially constructed phenomenon? Elizabeth Chell pursues an alternative line of argument: to show that the entrepreneurial personality is, on the one hand, socially constructed, but on the other hand, presents consistency in behaviours, skills and competencies. This second edition of the highly acclaimed The Entrepreneurial Personality revisits the topic and updates the evidence from a multi-disciplinary perspective. The book carefully weaves together the arguments and views from economists, sociologists and psychologists in order to develop a strong conceptual foundation. It discusses the inferences that these experts have made about the nature of entrepreneurs and the entrepreneurial process, and explores whether such evidence has enabled psychometricians to develop robust instruments for assessing the characteristics of entrepreneurs. The evidence for a range of purported traits is reviewed and the models and research designs of interested social scientists are explained and evaluated. Throughout, Chell laces her argument richly with a set of cases derived from primary and secondary sources. This book presents a timely set of views on the entrepreneurial personality, and will be of great interest to academics in the fields of entrepreneurship, economics, management, applied psychology and sociology. This accessible text will also appeal to the interested general reader, as well as practitioners and consultants

dealing with entrepreneurs in the field.

**Researching Entrepreneurship** - Per Davidsson 2006-04-18

Entrepreneurship is a phenomenon of tremendous societal importance. It is also an elusive phenomenon, and researching entrepreneurship is therefore fun, fascinating and frustrating at times. In *Researching Entrepreneurship*, Per Davidsson, one of the most highly recognized entrepreneurship scholars shares in a personal and readable way his rich experience and ideas on how entrepreneurship can or should be researched. After a comprehensive treatment of entrepreneurship as societal phenomenon and scholarly domain, the core chapters of the book discuss design, sampling, operationalization and analysis issues on several levels of analysis: individual, venture, firm, industry, region and nation. The book is targeted at doctoral students and other relative newcomers to the field of entrepreneurship research. However, taking a fresh, reflective perspective and looking beyond research conventions, it should provide potential for inspiration and food for thought also for

experienced entrepreneurship researchers.

**Small Business Management** - William L. Megginson 2000-08-01

Research Handbook of Finance and Sustainability - Sabri Boubaker 2018

The severe consequences of the global financial crisis 2008-2009 and numerous accounting frauds and financial scandals over the last fifteen years have led to calls for more ethical and responsible actions in all economic activities including consumption, investing, governance and regulation. Despite the fact that ethics in business and corporate social responsibility rules have been adopted in various countries, more efforts have to be devoted to motivate and empower more actors to integrate ethical behavior and rules in making business and managerial decisions. The Research Handbook of Finance and Sustainability will provide the readers but particularly investors, managers, and policymakers with comprehensive coverage of the issues at the crossroads of finance, ethics and sustainable development as well as proposed solutions, while focusing on three different levels: corporations, investment funds, and financial markets.

The outcome is a balanced approach to the theory and application of business concepts, with attention to the knowledge and skills necessary for student success in this course and beyond.

**Entrepreneurial Cognition** - Dean A. Shepherd 2018-01-31

This open access book investigates the inter-relationship between the mind and a potential opportunity to explore the psychology of

entrepreneurship. Building on recent research, this book offers a broad scope investigation of the different aspects of what goes on in the mind of the (potential) entrepreneur as he or she considers the pursuit of a potential opportunity, the creation of a new organization, and/or the selection of an entrepreneurial career. This book focuses on individuals as the level of analysis and explores the impact of the organization and the environment only inasmuch as they impact the individual's cognitions. Readers will learn why some individuals and managers are able to identify and successfully act upon opportunities in uncertain environments while others are not. This book applies a cognitive lens to understand individuals' knowledge, motivation, attention, identity, and emotions in the entrepreneurial process.

*Entrepreneurial Small Business* - Jerome A. Katz 2020

"This book got its start with a simple question from my mother, "What is the difference between what you teach and what your father did for a living?" We were sitting shiva (which is the ancient Jewish tradition of

mourning), in this case after the death of my father, a Polish immigrant to the United States who had been a small business owner for almost 50 years at the time of his death in 2003"--
