Pius IX - Roberto De Mattei 2004
The solemn beatification of Pope Pius IX in September 2000 celebrated the heroic virtue of one of the most influential figures of the nineteenth century. Born in 1792, Giovanni Maria Mastai Ferretti was elected Pope on June 16th 1846. His pontificate, the subject of this biographical study, lasted thirty-two years, the longest after that of St Peter himself. Elevated to the Papacy amid the historical backdrop of turmoil and revolution in Italy and Europe, he was also to play a central role in the drama of the Risorgimento that led to the creation of a united Italy. Publication of the English translation of Roberto de Mattei's acclaimed study of Pius IX marks the 150th anniversary of the Pope's solemn definition of the Dogma of Our Lady's Immaculate Conception. Roberto de Mattei holds the chair of Modern History at the University of Cassino (Rome), is vice president of the Italian C.N.R. (National Council for Research) and is well-known in Italy as a journalist and writer.

Cognition and Interaction: From Computers to Smart Objects and Autonomous Agents - Amon Rapp 2019-10-10

Cognitive sciences have been involved under numerous accounts to explain how humans interact with technology, as well as to design technological instruments tailored to human needs. As technological advancements in fields like wearable and ubiquitous computing, virtual reality, robotics and artificial intelligence are presenting novel modalities for interacting with

technology, there are opportunities for deepening, exploring, and even rethinking the theoretical foundations of human technology use. This volume entitled "Cognition and Interaction: From Computers to Smart Objects and Autonomous Agents" is a collection of articles on the impacts that novel 3 September Frontiers in Psychology 2019 | Cognition and Interaction interactive technologies are producing on individuals. It puts together 17 works, spanning from research on social cognition in human-robot interaction to studies on neural changes triggered by Internet use, that tackle relevant technological and theoretical issues in human-computer interaction, encouraging us to rethink how we conceptualize technology, its use and development. The volume addresses fundamental issues at different levels. The first part revolves around the biological impacts that technologies are producing on our bodies and brains. The second part focuses on the psychological level, exploring how our psychological characteristics may affect the way we use, understand and perceive technology, as well as how technology is changing our cognition. The third part addresses relevant theoretical problems, presenting reflections that aim to reframe how we conceptualize ourselves, technology and interaction itself. Finally, the last part of the volume pays attention to the factors involved in the design of technological artifacts, providing suggestions on how we can develop novel technologies closer to human needs. Overall, it appears that human-computer interaction will have to face a variety of challenges to account for the rapid changes we are witnessing in the current technology landscape.

Legal Guide on Contract Farming - Food and Agriculture Organization of the United Nations
2018-06-26

Contract farming, broadly understood as agricultural production and marketing carried out under a previous agreement between producers and their buyers, supports the production of a wide range of agricultural commodities and its use is growing in many countries. Mindful of the importance of enhancing knowledge and awareness of the legal regime applicable to contract farming operations, the International Institute for the Unification of Private Law (UNIDROIT), the Food and Agriculture Organization of the United Nations (FAO) and the International Fund for Agricultural Development (IFAD) have prepared this UNIDROIT/FAO/IFAD Legal Guide on Contract Farming. The Guide is a useful tool and reference point for a broad range of users involved in contract farming practice, policy design, legal research and capacity building. It can contribute as well to create a favourable, equitable and sustainable environment for contract farming.

Alexandre Singh: Causeries - Alexandre Singh 2016

From the French 'causer', to talk informally, Causeries details a series of encounters between British artist Alexandre Singh and various writers, scientists and philosophers on such wide-ranging topics as Hindu cosmogony, South Park, and scatology. Causeries presents a selection of 29 public conversations conducted by Singh during his residency at Witte de With, Rotterdam in preparation for his play, The

Humans. This young, New York-based Englishman's slippery yarns seem the perfect medium for the Wiki age, weaving fact and fiction, textbook lore, mythologies and flights of fantasy. But Singh doesn't want us to forget that stories have always been shifty. His long talks, done from memory, hark back to the ancient Homeric tradition where poets would recount epics, passing the tales - which would be reshaped by each new teller's elisions and embellishments - from generation to generation.

-- Skye Sherwin (The Guardian) Singh has exhibited in museums around the world including: Palais de Tokyo, Paris; Art Basel; Sculpture Centre, New York; Neuer Berliner Kunstverein, Berlin; Guggenheim Museum, New York; Hayward Gallery, London; and 12th Biennale de Lyon. Publication in conjunction with the past program, The Humans at Witte de With Center for Contemporary Art, Rotterdam, June 2012 - January 2013 and Causeries, Witte de With Center for Contemporary Art, April 2012 - March 2013.

The Birds of Haiti and the Dominican Republic (Classic Reprint) - Alexander Wetmore 2015-07-16

Excerpt from *The Birds of Haiti and the Dominican Republic* Samaria Bay it is swampy with broad, wet savannas grown with palms, or extensive stretches of wet forest, penetrated with difficulty, that at the sea become mangrove swamps. The central mountain system of the island is a broken series of ridges and peaks that present no systematic arrangement to the eye of the traveller. The Cordillera Central, as it is known in the Dominican Republic, begins in a series of low hills in the arid eastern end of the island and extending westward broadens and becomes better watered until in its central portions it receives heavy downpours of rain. It continues through northern Haiti as the rugged Massif du Nord to a point northwest of Gros Morne, and at the south in Haiti is extended through the Montagnes Noires into the Sierra de Neiba that runs back into the Dominican Republic between the valleys of San Juan and Enriquillo. At the north the central mountain mass is limited by the Cibao Valley, while at the south in the Dominican Republic one spur reaches the vicinity of the sea at Sabana Buey. The system is 130 kilometers wide near its middle, and in its greatest extent is between 400 and 500 kilometers long. The summit of Loma Tina, in the Dominican Republic, near its center, reputed to be the highest mountain in the West Indies, is reported to rise meters above sea level, while Culo de Maco nearby is about its equal. Lorna Rucillo, also called Pico de Yaque, not far from Culo de Maco, is recorded as meters high. Broad stretches through these central mountains are covered with beautiful forests of pine mingled

with areas of rain-forest jungle. The climate of the high interior valleys is invigorating, with hot days and cool nights, with occasional frost in the highest altitudes in winter. Rainfall is abundant in the Dominican Republic while to the west in Haiti the land is drier. About the Publisher

The Economics of Being Poor - Theodore William Schultz 1993

"The Economics of Being Poor" is mainly devoted to the economics of acquiring skills and knowledge, to investment in the quality of the population and to the increasing economic importance of human capital - the quality of the work-force embodied in the health, education and skills, including the entrepreneurial skills of the workers themselves. The volume is divided into three parts: "Most People are Poor, Investing in Skills and Knowledge, and Effects of Human Capital." "The Economics of Being Poor" represents a remarkable testament to perhaps the most elegant stylist in post-war economics.

Enabling the Business of Agriculture 2017 - World Bank Group 2017-04-03

Enabling the Business of Agriculture 2017, the third report in the series, offers insights into how laws and regulations affect private sector development for agribusinesses, including

producer organizations and other agricultural entrepreneurs. Globally comparable data and scored indicators encourage regulations that ensure the safety and quality of agricultural inputs, goods and services but are not too costly or burdensome. The goal is to facilitate the operation of agribusinesses and allow them to thrive in a socially and environmentally responsible way, enabling them to provide essential agricultural inputs and services to farmers that could increase their productivity and profits. Regional, income-group and country-specific trends and data observations are presented for 62 countries and across 12 topics: seed, fertilizer, machinery, finance, markets, transport, water, ICT, land, livestock, environmental sustainability and gender. Data are current as of June 30, 2016. For more information, please see <http://eba.worldbank.org>
The History of English Poetry - Thomas Warton 1774

Ethics, Liberalism and Realism in International Relations - Mark D. Gismondi 2007-09-17

This book explores the complex issue of international ethics in the two dominant schools of thought in international relations; Liberalism and Realism. Both theories suffer from an inability to integrate the ethical and pragmatic dimensions of foreign policy. Liberal policy makers often suffer from moral blindness and a tendency toward coercion in the international arena, whilst realists tend to be epistemic sceptics, incorporating Nietzsche's thought, directly or indirectly, into their theories. Mark Gismondi seeks to resolve the issues in these two approaches by adopting a covenant based approach, as described by Daniel Elazar's work on the covenant tradition in politics, to international relations theory. The covenant approach has three essential principles: policy makers must have a sense of realism about the existence of evil and its political consequences power must be shared and limited liberty requires a basis in shared values. Ethics, Realism and Liberalism in International Relations will be of interest to students and researchers of politics, philosophy, ethics and international relations.

The Hellfest - A Pilgrimage for Metalheads -

Corentin CHARBONNIER

The study presented here shows, through the analysis of the Hellfest, an annual metal music festival held in Clisson in the Loire-Atlantique region of France, that this music constitutes a true culture. To understand the current position the Hellfest holds for the metal community, it is necessary to know its evolution since its creation, to examine the relationships it promotes between the festivalgoers themselves, and between the festivalgoers and the artists, and to examine its role as a place where a community with no real geographical foothold can be united during a given period of time. The various sociabilities that are experienced at the Hellfest cannot be understood without taking an interest in the particular economy set up by the organisers, an economy that contributes to the recognition of the event and influences its sociabilities. The organisers have had and are committed to addressing the wishes of the festivalgoers of all subgenres of metal music, making them actors and not just mere consumers and involving local economic actors as well. The Hellfest allows each metalhead to take a break from his or her life in a particular space, for a defined period of time, offering everyone the opportunity to assert or reassert his or her identity through different rituals. It is thus the pilgrimage of the entire metal community
