Los Angeles Magazine - 1999-07

Los Angeles magazine is a regional magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture, entertainment, fashion, art and architecture, and news that define Southern California. Started in the spring of 1961, Los Angeles magazine has been addressing the needs and interests of our region for 48 years. The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian.

Consumer Behaviour in Asia - Hellmut Schütte
2016-07-27

Success in the Asian market is crucial to many firms. Yet many marketing strategies are based on a 'western' perspective of what consumers want and respond to. In *Consumer Behaviour in Asia*, the authors argue that Asian culture is so fundamentally different to Western Culture that existing consumer behaviour concepts cannot be applied to Asian consumers. In this book the authors outline and explain these differences and put forward modifications to many well-known consumer behaviour concepts. *Consumer Behaviour in Asia* shows how firms need to modify their marketing strategies in such areas as segmentation, positioning and the marketing mix in order to successfully penetrate these markets.

Vegetarian Times - 1981-09

To do what no other magazine does: Deliver simple, delicious food, plus expert health and lifestyle information, that's exclusively vegetarian but wrapped in a fresh, stylish mainstream package that's inviting to all. Because while vegetarians are a great, vital, passionate niche, their healthy way of eating and the earth-friendly values it inspires appeals to an increasingly large group of Americans. VT's goal: To embrace both.

Entrepreneur - 1995-07

Chinese Scalp Acupuncture - Jason Jishun Hao 2011

This new book could make a difference in the life of a patient when no other therapies will help. The authors, who have a combined 60 years of experience using Chinese scalp acupuncture, have composed a thorough clinic manual for practical clinical applications of scalp acupuncture to treat patients who suffer from seriously debilitating conditions such as the sequelae of stroke, phantom limb pain, PTSD, Meniere's syndrome, multiple sclerosis, herpes zoster, seizures, essential tremor, and Parkinson's Disease. The authors begin with an introduction to the neuroanatomy and neurophysiology of the brain and scalp for non-

Western medical practitioners. They review Chinese medical theories supporting the use of scalp acupuncture, provide thorough explanations of area locations and uses, and include details of needling technique specific to scalp acupuncture. There are over 40 case studies with treatment details, as well as excellent illustrations of each treatment area.

Insurance Restoration Contracting - Paul Bianchina 2011

Insurance restoration the repair of buildings damaged by water, fire, smoke, storms, and other disasters is an exciting and challenging field of construction. It also offers contractors lucrative work that's immune to economic downturns pipes still break, buildings still burn, and trees are still blown over, regardless of the economy. And with the insurance companies funding the repairs, your payment is virtually guaranteed. But not just anyone can repair fire- and water-damaged buildings. You need the knowledge and the equipment to get the job done right, and that's what this book is all about. From understanding fire repairs and smoke odors to restorative drying methods, mold remediation, and handling contents, you'll not only learn how to provide top-notch property and content restoration services, but also how to become the person homeowners and insurance companies turn to first in an emergency putting yourself first in line for all the best jobs.

Milady Standard Esthetics: Fundamentals - Milady 2012-02-24

Milady Standard Esthetics Fundamentals, 11th

edition, is the essential source for basic esthetics training. This new edition builds upon Milady's strong tradition of providing students and instructors with the best beauty and wellness education tools for their future. The rapidly expanding field of esthetics has taken a dramatic leap forward in the past decade, and this up-to-date text plays a critical role in creating a strong foundation for the esthetics student. Focusing on introductory topics, including history and opportunities in skin care, anatomy and physiology, and infection control and disorders, it lays the groundwork for the future professional to build their knowledge. The reader can then explore the practical skills of a skin care professional, introducing them to the treatment environment, basic facial treatments, hair removal, and the technology likely to be performed in the salon or spa setting. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Essential Health Benefits - Institute of Medicine 2012-01-17

In 2010, an estimated 50 million people were uninsured in the United States. A portion of the uninsured reflects unemployment rates; however, this rate is primarily a reflection of the fact that when most health plans meet an individual's needs, most times, those health plans are not affordable. Research shows that people without health insurance are more likely to experience financial burdens associated with the utilization of health care services. But even among the insured, underinsurance has emerged as a barrier to care. The Patient Protection and Affordable Care Act (ACA) has made the most comprehensive changes to the provision of health insurance since the development of Medicare and Medicaid by requiring all Americans to have health insurance by 2016. An estimated 30 million individuals who would otherwise be uninsured are expected to obtain insurance through the private health insurance market or state expansion of Medicaid programs. The success of the ACA depends on the design of the essential health benefits (EHB) package and its affordability. Essential Health Benefits recommends a process for defining, monitoring, and updating the EHB package. The book is of value to Assistant Secretary for

Pain Management and the Opioid Epidemic

- National Academies of Sciences, Engineering, and Medicine 2017-10-28

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Business - Barry L. Reece 1987

Diagnosis and Treatment of Autism - C. Gillberg 2013-06-29

In 1987, The Swedish Medical Research Council's Group for Evaluation of Medical Technology approached me on the subject of organizing a conference on Autism - Diagnosis and Treatment. The original idea for this conference had come from a Stockholm politician, Leni Bjorklund, who had felt that, at least in Sweden, autism appeared to be an area in which conflicting views on etiology and

treatment had led to children and parents not always receiving adequate help. Professors Agne Larsson, MD, Tore Schersten, MD and Bjorn Smedby, MD in particular showed a keen interest and it was decided to hold a State-of-the-Art-Conference on autism in Gothenburg. The State-of-the-Art-Conference on Autism - Diagnosis and Treatment was held in Gothenburg May 8 -10, 1989. A panel of international experts was selected because of outstanding research or clinical activity in the field and in order to represent a wide variety of professional and theoretical approaches ranging from epidemiology, neurobiology and cognitive psychology to psychiatry, neurology, education, behavioural treatment and psychoanalysis. A group of professional observers involved in the field of autism was chosen so as to cover Sweden in a representative fashion. This group consisted of administrators, child psychiatrists, psychologists, social workers, pediatricians, nurses and teachers.

Clinical Acupuncture - Gabriel Stux 2011-06-28

Acupuncture is rapidly moving out of the arena of "alternative" medicine, in large part because it is grounded more firmly than other alternative treatments in research. This book provides readers with the up-to-date information on the clinical bases of acupuncture.

Integrative Medicine - David Rakel 2007-01-01

Drawing on solid scientific evidence as well as extensive first-hand experience, this manual provides the practical information you need to safely and effectively integrate complementary and alternative treatment modalities into your practice. It explains how alternative therapies can help you fight diseases that do not respond

readily to traditional treatments... presents integrative treatments for a full range of diseases and conditions, including autism, stroke, chronic fatigue syndrome, and various forms of cancer...explores how to advise patients on health maintenance and wellness...and offers advice on topics such as meditation, diet, and exercises for back pain. 24 new chapters, a new organization, make this landmark reference more useful than ever. Provides dosages and precautions to help you avoid potential complications. Delivers therapy-based pearls to enhance your patient care. Facilitates patient education with helpful handouts. Offers helpful icons that highlight the level and quality of evidence for each specific modality. Includes bonus PDA software that lets you load all of the therapeutic review sections onto your handheld device. Presents a new organization, with numerous section headings and subheadings, for greater ease of reference. Provides additional clinical practice and business considerations for incorporating integrative medicine into clinical practice.

Herbs and Roots - Tamara Venit Shelton
2019-11-26

An innovative, deeply researched history of Chinese medicine in America and the surprising interplay between Eastern and Western medical practice Chinese medicine has a long history in the United States, with written records dating back to the American colonial period. In this intricately crafted history, Tamara Venit Shelton chronicles the dynamic systems of knowledge, therapies, and materia medica crossing between China and the United States from the eighteenth century to the present. Chinese medicine, she argues, has played an important and often unacknowledged role in both facilitating and undermining the consolidation of medical authority among formally trained biomedical scientists in the United States. Practitioners of Chinese medicine, as racial embodiments of "irregular" medicine, became useful foils for Western physicians struggling to assert their superiority of practice. At the same time, Chinese doctors often embraced and successfully employed Orientalist stereotypes to sell their services to non-Chinese patients skeptical of modern biomedicine. What results is a story of racial constructions, immigration

politics, cross-cultural medical history, and the lived experiences of Asian Americans in American history.

The Saffron Kitchen - Yasmin Crowther
2007-08-28

In a powerful debut novel that moves between the crowded streets of London and the desolate mountains of Iran, Yasmin Crowther paints a stirring portrait of a family shaken by events from decades ago and worlds away. On a rainy day in London the dark secrets and troubled past of Maryam Mazar surface violently, with tragic consequences for her daughter, Sara, and her newly orphaned nephew. Maryam leaves her English husband and family and returns to the remote Iranian village where her story began. In a quest to piece their life back together, Sara follows her mother and finally learns the terrible price Maryam once had to pay for her freedom, and of the love she left behind. Set against the breathtaking beauty of two very different places, this stunning family drama transcends culture and is, at its core, a rich and haunting narrative about mothers and daughters.

Advancing Nursing Practice in Pain Management - Eloise Carr 2010-02-22

This book showcases the development and evaluation of innovative examples of pain management initiatives by advanced practitioners. It considers each service development or community initiative both in terms of advanced practice nursing and pain management. There is a wide range of examples of innovation in pain management included - from the introduction of ketamine use in one trust, to wider issues around meeting the needs of pain management in the community. The book considers issues including use of research, education and interprofessional working in the advanced practitioner role. Each chapter looks at development of the service, challenges of implementation, evaluation of the service's success and justifying the importance of the advanced nurse in the service's achievements. Underlying theory is considered but the focus of each chapter is the translation of knowledge and skills into practice Written by expert advanced nurse practitioners with a wealth of experience in pain management Explores pain management in primary and secondary care, both within and outside the NHS Suitable for qualified nurses,

Nurse Practitioners, specialist nurses working in the pain field and nursing students on postgraduate courses on pain management
