Understanding the Digital World - Brian W. Kernighan 2017-01-24

The basics of how computer hardware, software, and systems work, and the risks they create for our privacy and security Computers are everywhere. Some of them are highly visible, in laptops, tablets, cell phones, and smart watches. But most are invisible, like those in appliances, cars, medical equipment, transportation systems, power grids, and weapons. We never see the myriad computers that quietly collect, share, and sometimes leak vast amounts of personal data about us. Through computers, governments and companies increasingly monitor what we do. Social networks and advertisers know far more about us than we should be comfortable with, using information we freely give them. Criminals have all-too-easy access to our data. Do we truly understand the power of computers in our world? Understanding the Digital World explains how computer hardware, software, networks, and systems work. Topics include how computers are built and how they compute; what programming is and why it is difficult; how the Internet and the web operate; and how all of these affect our security, privacy, property, and other important social, political, and economic issues. This book also touches on fundamental ideas from computer science and some of the inherent limitations of computers. It includes numerous color illustrations, notes on sources for further exploration, and a glossary to explain technical terms and buzzwords. Understanding the Digital World is a must-read for all who want to know more about computers and communications. It explains, precisely and carefully, not only how they operate but also how they influence our daily lives, in terms anyone can understand, no matter what their experience and knowledge of technology.

**Curated Decay** - Caitlin DeSilvey 2017-02-14

Transporting readers from derelict homesteads to imperiled harbors, postindustrial ruins to Cold War test sites, Curated Decay presents an unparalleled provocation to conventional thinking on the conservation of cultural heritage. Caitlin DeSilvey proposes rethinking the care of certain vulnerable sites in terms of ecology and entropy, and explains how we must adopt an ethical stance that allows us to collaborate with—rather than defend against—natural processes. Curated Decay chronicles DeSilvey's travels to places where experiments in curated ruination and creative collapse are under way, or under consideration. It uses case studies from the United States, Europe, and elsewhere to explore how objects and structures produce meaning not only in their preservation and persistence, but also in their decay and disintegration. Through accessible and engaging discussion of specific places and their stories, it traces how cultural memory is generated in encounters with ephemeral artifacts and architectures. An interdisciplinary reframing of the concept of the ruin that combines historical and philosophical depth with attentive storytelling, Curated Decay represents the first attempt to apply new theories of materiality and ecology to the concerns of critical heritage studies.

Agroecological Crop Protection - Jean-Philippe Deguine 2017-12-22

This book is devoted to Agroecological Crop Protection, which is the declension of the principles of agroecology to crop protection. It presents the concepts of this innovative approach, case studies and lessons and generic keys for agroecological transition. The book is intended for a wide audience, including scientists, experimenters, teachers, farmers, students. It represents a new tool, proposing concrete keys of action on the basis of feedbacks validated scientifically. Beyond the examples presented, it is therefore of general scope and proposes recommendations for all temperate and tropical cropping systems. It contributes to the training and teaching modules in this field and it is an updated information support for professionals and a teaching aid for students (agronomy, crop protection, biodiversity management, agroecology).

Small Country - Gaël Faye 2019-03-05

Already an international sensation and prize-winning bestseller in France, an evocative coming-of-age story of a young boy, a lost childhood and a shattered homeland. SHORTLISTED FOR THE ALBERTINE PRIZE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY ESQUIRE • LONGLISTED FOR THE ANDREW CARNEGIE MEDAL FOR EXCELLENCE IN FICTION • LONGLISTED FOR THE ASPEN WORDS LITERARY PRIZE Burundi, 1992. For ten-year-old Gabriel, life in his comfortable expatriate neighborhood of Bujumbura with his French father, Rwandan mother and little sister Ana, is something close to paradise. These are carefree days of laughter and adventure – sneaking Supermatch cigarettes and gorging on stolen mangoes – as he and his mischievous gang of friends transform their tiny cul-de-sac into their kingdom. But dark clouds are gathering over this small country, and soon their peaceful existence will shatter when Burundi, and neighboring Rwanda, are brutally hit by civil war and genocide. A novel of extraordinary power and beauty, *Small Country* describes an end of innocence as seen through the eyes of a child caught in the maelstrom of history. Shot through with shadows and light, tragedy and humor, it is a stirring tribute not only to a dark chapter in Africa's past, but also to the bright days that preceded it.

Three Dialogues Between Hylas and Philonous in Opposition to Sceptics and Atheists - George Berkeley 2020-09-28

HYLAS. It is indeed something unusual; but my thoughts were so taken up with a subject I was discoursing of last night, that finding I could not sleep, I resolved to rise and take a turn in the garden. PHIL. It happened well, to let you see what innocent and agreeable pleasures you lose every morning. Can there be a pleasanter time of the day, or a more delightful season of the year? That purple sky, those wild but sweet notes of birds, the fragrant bloom upon the trees and flowers, the gentle influence of the rising sun, these and a thousand nameless beauties of nature inspire the soul with secret transports; its faculties too being at this time fresh and lively, are fit for those meditations, which the solitude of a garden and tranquillity of the morning naturally dispose us to. But I am afraid I interrupt your thoughts: for you seemed very intent on something. HYL. It is true, I was, and shall be obliged to you if you will permit me to go on in the same vein; not that I would by any means deprive myself of your company, for my thoughts always flow more easily in conversation with a friend, than when I am alone: but my request is, that you would suffer me to impart my reflexions to you. PHIL. With all my heart, it is what I should have requested myself if you had not prevented me. HYL. I was considering the odd fate of those men who have in all ages, through an affectation of being distinguished from the vulgar, or some unaccountable turn of thought, pretended either to believe nothing at all, or to believe the most extravagant things in the world. This however might be borne, if their paradoxes and scepticism did not draw after them some consequences of general disadvantage to mankind. But the mischief lieth here; that when men of less leisure see them who are supposed to have spent their whole time in the pursuits of knowledge professing an entire ignorance of all things, or advancing such notions as are repugnant to plain and commonly received principles, they will be tempted to entertain suspicions concerning the most important truths, which they had hitherto held sacred and unquestionable. PHIL. I entirely agree with you, as to the ill tendency of the affected doubts of some philosophers, and fantastical conceits of others. I am even so far gone of late in this way of thinking, that I have quitted several of the sublime notions I had got in their schools for vulgar opinions. And I give it you on my word; since this revolt from metaphysical notions to the plain dictates of nature and common sense, I find my understanding strangely enlightened, so that I can now easily comprehend a great many things which before were all mystery and riddle.

Seismic Retrofitting: Learning from Vernacular Architecture - Mariana R. Correia 2015-08-31

Local communities have adapted for centuries to challenging surroundings, resulting from unforeseen natural hazards. Vernacular architecture often reveals very intelligent responses attuned to the environment. Therefore, the question that emerged was: how did local populations prepare their dwellings to face frequent earthquakes? It was to respond to this gap in knowledge, that the SEISMIC-V research project was instigated, and this interdisciplinary international publication was prepared. The research revealed the existence of a local seismic culture, in terms of reactive or preventive seismic resistant measures, able to survive, if properly maintained, in areas with frequent earthquakes. The fundamental contribution and aims of the publication were to enhance: -The disciplinary interest in vernacular architecture; -Its contribution to risk mitigation in responding to natural hazards; -To encourage academic and scientific research collaboration among different disciplines; -To contribute to the improvement of vernacular dwellings, which half of the world's population still inhabits nowadays. Fifty international researchers and experts presented case studies from Latin America, the Mediterranean, Eastern and Central Asia and the Himalayas region, with reference to 20 countries, i.e. Algeria, Bolivia, Bhutan, Chile, China, Egypt, El Salvador, Greece, Haiti, Italy, Japan, Mexico, Morocco, Nepal, Nicaragua, Peru, Romania, Taiwan, Turkey and a closer detailed analysis of Portugal. This publication brings together 43 contributions, with new perspectives on seismic retrofitting techniques and relevant data, addressing vernacular architecture; an amazing source of knowledge, and to this day, home to 4 billion people.

*Embodying Colonial Memories* - Paul Stoller 2014-01-02

A study of the West African Hauka - spirits that grotesquely mimic and mock "Europeans" of the colonial epoch. The author considers spirit possession as a set of embodied practices with serious social and cultural consequences. *Embodying Colonial Memories* is the first in-depth study of the West African Hauka, spirits in the body of (human) mediums which mimic and mock Europeans of the colonial epoch. Paul Stoller, who was initiated into a spirit possession troupe, recounts an insider's tale of the Hauka with respect and "brotherly" deference. He combines narrative description, historical analysis, and reflections on the importance of embodiment and mimesis to social theory, with particular reference to the Songhay peoples of the Republic of Niger.
