A Taxonomy for Learning, Teaching, and Assessing - Benjamin Samuel Bloom 2001

This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives- cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or

Shipping Economics - Kevin Cullinane
2005-06-15

Shipping is by far the most significant mode of transportation for the carriage of freight. In terms of volume alone, no other mode comes close. Its dominance is even more overwhelming when distances are accounted for. This book is concerned with the economics of this pivotal mode of transportation. It reveals that the influences on the development and current state of shipping economics research are extremely eclectic. The various chapters in the book represent areas that are of central concern to ongoing research in the field. As such, the book is useful to students, researchers, industrialists, policy makers and consultants. The authors of the contributed chapters are some of the leading

names in the world of shipping economics, addressing a number of diverse areas: The econometric modeling of shipping markets; Shipping finance (a critical issue in such a capital intensive industry); Fiscal policy (and its impact on an international industry with great asset mobility) and Safety and security (aspects that have risen to prominence with increasing concerns over the environment and international terrorism). Ultimately, while shipping as a business depends upon trade, it is absolutely certain that the business of trade depends upon shipping. The final two chapters, therefore, incorporate aspects of network economics, welfare economics and international trade theory to analyze where and how shipping sits within the wider perspective of industrial supply chains. Professor Kevin Cullinane, BA BSc MSc PhD FCILT CNI Professor Kevin Cullinane is Chair in Marine Transport and Management at the University of Newcastle in the U.K. He was previously Professor and Head of the

The content structure has been redesigned with a new format that promotes a more functionally driven multimodal approach to planning, design, and implementation, including guidance toward the latest tools and technology. The material has been updated to reflect the latest changes to major transportation resources such as the HCM, MUTCD, HSM, and more, including the most current ADA accessibility regulations. Transportation planning has historically followed the rational planning model of defining objectives, identifying problems, generating and evaluating alternatives, and developing plans. Planners are increasingly expected to adopt a more multi-disciplinary approach, especially in light of the rising importance of

Educating the Student Body - Committee on Physical Activity and Physical Education in the School Environment 2013-11-13
Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to

review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all

types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

Education, Economy & Society - Salim Vally
2014-07-31

Education, Economy & Society is a compelling and comprehensive antidote to the misconstrued nature of the relationship between education and society in South Africa. It provides a constructive critique of conventional discourses, but also alternative approaches to understanding the connections between education and the triple scourge of unemployment, inequality, and poverty. The book's contributors passionately argue that South African education finds its value and

purpose in a focus on social justice, transformation, and democratic citizenship. The joy of education is to capture human imaginations and unleash their creativity towards a more humane and compassionate society. This rich resource explores the possibilities for a new pedagogy in post-school education and training through empirical research on skills, technology, and issues of employment on the shop floor; a critical analysis of the youth wage subsidy; and workers' education. The book will appeal to a wide audience including students and academics in the fields of industrial sociology, economics, adult education, further education and training, and those in youth development.

Engineering - Unesco 2010-01-01

This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but

engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.--Publisher's description.

Transforming the Workforce for Children Birth Through Age 8 - National Research Council 2015-07-23

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health,

development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education

professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and

ultimately improve outcomes for children. *Study and Master Economic and Management Sciences Grade 8 CAPS Exercise Book* - Marietjie Barnard 2013-10-31

The Sri Lankan Economy - Prema-chandra Athukorala 2017-10-01

This is a pivotal period in Sri Lanka's economic development. The end of conflict opens a door for accelerated economic growth and poverty reduction. Reform is needed to regain momentum because fiscal imbalances and rising public debt could jeopardize macroeconomic stability. The economy would benefit from significant trade and commercial policy reform. The labor market suffers from sluggish growth of formal sector employment and from skills mismatches, which can be addressed by changes in education policy and systems. The book analyzes these and related critical constraints on the Sri Lankan economy, and proposes a set of policy reforms that would lay the foundations for more rapid and inclusive development.

Cost-Benefit Analysis for Development - Asian Development Bank 2013-01-01

The Asian Development Bank (ADB) has been

continuously undertaking measures to enhance the effectiveness of its operations. To improve projects both at the preparation and implementation stages, ADB issued the Guidelines for Economic Analysis of Projects in 1997 as a means to enhancing project quality at entry. The conduct of proper economic analysis helps ensure the efficient use of development funds and public resources and thereby increase aid effectiveness. This practical guide is a supplement to the Guidelines for the Economic Analysis of Projects. It provides an overview of recent methodological developments in cost-benefit analysis as well as suggested improvements in the economic analysis of projects in selected sectors through case studies. These case studies illustrate the application of suggested methodologies, taking into account sector-specific needs, as well as difficulties faced by practitioners in terms of data and time constraints during project processing. It also aims to contribute to ADB's

International Business - Marios Katsioloudes
2007-03-15

Traditionally, international business (IB) texts survey the field from a USA perspective, going on to compare the USA to the rest of the business world. This text addresses IB from a purely multinational perspective. International Business is examined from the USA angle, going on to address IB issues from other countries' perspectives, what we call the "Reverse Perspective." The authors interview business executives and politicians from a number of countries including the USA, Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, and Russia. These interviews are incorporated at appropriate points in the text providing first-hand information and practical insight. Cases include: Air Arabia, Gap, Diebold

Inc, Matsushita, AMSUPP, NIKE, China Eastern Airlines, Luton & Dunstable Hospital, Harley Davidson, Cassis de Dijon, Green investments in Belize, Chicago Food and Beverage Company, Advanced Software Analytics

Broader, Bolder, Better - Elaine Weiss
2021-02-23

In *Broader, Bolder, Better*, authors Elaine Weiss, of the *Broader, Bolder Approach to Education* campaign, and Paul Reville, former Massachusetts secretary of education, make a compelling case for a fundamental change in the way we view education. The authors argue for a large-scale expansion of community-school partnerships in order to provide holistic, integrated student supports (ISS) from cradle to career, including traditional wraparound services like health, mental health, nutrition, and family supports, as well as expanded access to opportunities such as early childhood education, afterschool activities, and summer enrichment programs. The book builds on nearly

a decade of research by the Broader, Bolder Approach to Education, a national initiative endorsed by more than sixty policy experts and leaders from across the country, and draws on the work of Harvard's Education Redesign Lab. It pulls from case studies of effective ISS efforts in twelve diverse communities to illustrate the variety of strategies that can be adopted locally. A call to action that also provides examples of communities that are successfully leveling the playing field for poor children, this book offers a detailed vision for building—through field work, mobilization, and financing—comprehensive systems to prepare all children for success.

Economic Crisis in Europe - Paul van den Noord 2011

The European economy is emerging from its deepest recession since the 1930s. This volume, which brings together economic analysis from the European Commission services, explains how swift policy response avoided a financial meltdown; but turning the ongoing recovery into

sustained growth requires action on five challenges: boosting potential output, enhancing labour market flexibility, preparing fiscal consolidation, facilitating intra-EU adjustment, and unwinding global imbalances. Europe also needs an improved co-ordinated crisis-management framework to help it respond to any similar situations that may arise in the future. Economic Crisis in Europe shows that the beginnings of such a crisis-management framework are emerging, building on existing institutions and legislation and complemented by new initiatives. Naturally, initial EU policy efforts, such as fiscal stimulus, focused on crisis control and mitigation. But first steps have also been taken to redesign financial regulation and supervision with crisis prevention in mind. The design of crisis resolution policies is now becoming a main task. While any premature withdrawal of policy stimulus should be avoided, exit strategies should be ready for implementation, embedded in a broader policy

framework that also includes growth-enhancing structural reforms.

Contemporary Economic Issues - H. Wolf
2016-07-27

This volume contains chapters on a range of topics which include economic methodology in macroeconomics, central bank independence, policy signalling, public policy as second best analysis, the determinants of economic growth, a continuum approach to unemployment policy, and pensions. The volume dispels the notion that these are largely unrelated issues and illustrates the merger process which is taking place between hitherto rather separate economic sub-disciplines. They move the focus of attention and challenge received wisdom.

Cambodia - Asian Development Bank 2014-11-01
Cambodia has enjoyed over two decades of robust growth, with rising foreign investment and deepening integration into global and regional value chains. The country---once riven by civil war and conflict---is now politically

stable and increasingly making its mark as the world's eighth-largest rice producer, Asia's 10th largest garment exporter, and a rising tourist destination. Yet Cambodia faces considerable challenges. It suffers from major infrastructure deficits; limited skills development and education quality; and weaknesses in governance. Fiscal resources are also stretched. Moreover, for a successful transition to a modern industrialized economy, Cambodia needs to diversify and upgrade its productive capabilities. This publication examines the opportunities and the challenges, and offers recommendations for long-term socioeconomic strategy.
