*Teacher Selection and Interview Portfolios* - Ronald K. Theel 2002-04-27

The major research questions for this study were: (a) What forms do teacher interview portfolios take? (b) What meaning do school principals make of these portfolios? (c) How, if at all, are teacher portfolios being used by principals in deciding whom to hire? This was a case study using qualitative research procedures. The study was situated in the hiring policies and practices of Central City School District from 1995 to 1999. Semi-structured interviews of 18 k-12 principals and 4 key informants were primary means of data gathering. Document analyses supplemented interview data. Interview portfolios typically consisted of lesson plans; photographs of projects, activities, and teacher-student interactions; and supporting examples of classroom practice. Statements of educational philosophy, credentials, letters of reference, transcripts, and other background information were also included. Most principals viewed portfolios as a way for candidates to express their educational beliefs, illustrate skills and methods, and supplement the interview with examples from applicants' experience. Principals expressed a desire for more evidence of having used the portfolio development process as a means of reflection and introspection. Overall, interview portfolios were not key contributors to principals' hiring decisions. The reasons for this varied. Some principals mentioned time constraints during interviews. Others expressed skepticism that portfolios provided meaningful evidence of candidates' teaching ability and people skills. Propositions and implications for future research center on portfolio format and assessment criteria, authenticity and self-knowledge, selection interview procedures, teacher preparation, teacher recruitment and hiring, and information management in Central City School District. Perhaps one of the most valuable benefits of the portfolio process lies in the development of a new norm for the profession: placing discussion and debate about what constitutes "good teaching" into a public forum.

What Do Principals Do? provides a comprehensive and expansive look into a high school principal's job. Rather than a survey asking principals how much time they spend on various tasks, this work provides empirical evidence of exactly what a principal does every day of the year and how much time he spends doing it. Based on the results of a three-year longitudinal study conducted by a California High School Principal of the Year (Association of California School Administrators, 2012), this book reveals precisely what a principal does, when he does it, and how much time he spends doing it. The study identifies 72 discrete tasks performed by principals and examines how much time (disaggregated by day, week, month, and year) they spend on each of those 72 tasks. The results of the data collection are the foundation of the book. The findings are supplemented with explanations and analyses that reveal the workings of K-12 education and give readers a glimpse of life in a comprehensive high school. This is a must read for everyone considering a life in public school administration. The author, Dr. Jonathan Hurst, the longest running principal in Elsinore High School's 130-year history, provides insightful commentary and relevant anecdotes from a rich and rewarding career served in a large comprehensive high school in Southern California. This book provides detailed, quantitative evidence and an explanation for just what a principal does and how much time he spends doing it. In the process, it demonstrates the requisite skills for effective school governance, administrative multi-tasking, and productive principal behavior. Data collected covers three years and encompasses over 20,500 tasks and 7,500 hours of work. This is a useful augmentation to existing administrative credential course readings as it provides evidence for what the research and authors are saying and demonstrates those skills, procedures, and operations that are an everyday part of a school administrator's job. But the appeal for What Do Principals Do? goes beyond those seeking knowledge about educational administration. Besides the facts and figures about how a principal spends his time, Dr. Hurst offers explanations for why and how the time is spent, and he provides insight into the educational scene. This book has appeal for students in teacher education programs, because it explains school communities and life in a school system, and that also makes it appealing to the lay person or parent who wants to understand how schools work.

*Sessional Papers* - British Columbia. Parliament 1919

**Sex and the American Teenager** - R. Murray Thomas 2009-07-23

Sex and the American Teenager provides an expert's assessment of the controversies surrounding the sexual development of adolescents, and their beliefs and problems regarding such matters. Using numerous case studies, Dr. Thomas illustrates specific ways that sexual issues arise in school and the variables that impact each case, while suggesting ways parents and school officials can deal with problematic situations. Though not simply statistics-laden, Dr. Thomas's book is replete with information about teenagers who engage in sexual acts, become pregnant, are sexually abused, and contract sexually transmitted diseases. Dr. Thomas also discusses the coping methods teenagers use, and he describes the types of sex education programs in which students are most likely to participate. Dozens of case studies illustrate how problems of students' sexual behavior can differ from one incident to another depending on the teenagers' ages, family backgrounds, school settings, and the culture of the surrounding communities. Thomas concludes the book by summarizing the recent past and speculating about the likely status of sex in schools in the years ahead.
