The Science of Breaking Bad - Dave Trumbore
2019-06-25

All the science in Breaking Bad—from explosive experiments to acid-based evidence destruction—explained and analyzed for authenticity. Breaking Bad's (anti)hero Walter White (played by Emmy-winner Bryan Cranston) is a scientist, a high school chemistry teacher who displays a plaque that recognizes his “contributions to research awarded the Nobel Prize.” During the course of five seasons, Walt practices a lot of ad hoc chemistry—from experiments that explode to acid-based evidence destruction to an amazing

repertoire of methodologies for illicit meth making. But how much of Walt's science is actually scientific? In *The Science of “Breaking Bad,”* Dave Trumbore and Donna Nelson explain, analyze, and evaluate the show's portrayal of science, from the pilot's opening credits to the final moments of the series finale.

The intent is not, of course, to provide a how-to manual for wannabe meth moguls but to decode the show's most head-turning, jaw-dropping moments. Trumbore, a science and entertainment writer, and Nelson, a professor of chemistry and Breaking Bad's science advisor, are the perfect scientific tour guides.

Trumbore and Nelson cover the show's portrayal of chemistry, biology, physics, and subdivisions of each area including toxicology and electromagnetism. They explain, among other things, Walt's DIY battery making; the dangers of Mylar balloons; the feasibility of using hydrofluoric acid to dissolve bodies; and the chemistry of methamphetamine

itself. Nelson adds interesting behind-the-scenes anecdotes and describes her work with the show's creator and writers. Marius Stan, who played Bogdan on the show (and who is a PhD scientist himself) contributes a foreword. This is a book for every science buff who appreciated the show's scientific moments and every diehard Breaking Bad fan who wondered just how smart Walt really was.

Having reported on some of the world's most violent, least

understood regions in his bestsellers *Balkan Ghosts* and *The Ends of the Earth*, Robert Kaplan now returns to his native land, the United States of America. Traveling, like Tocqueville and John Gunther before him, through a political and cultural landscape in transition, Kaplan reveals a nation shedding a familiar identity as it assumes a radically new one. An Empire Wilderness opens in Fort Leavenworth, Kansas, where the first white settlers moved into Indian country and where Manifest Destiny was born. In a world whose future conflicts can barely be imagined, it is also the place where the army trains its men to fight the next war. "A nostalgic view of the United States is deliberately cultivated here," Kaplan writes, "as if to bind the uncertain future to a reliable past." From Fort Leavenworth, Kaplan travels west to the great cities of the heartland--to St. Louis, once a glorious shipping center expected to outshine imperial Rome and now touted, with its desolate inner city and miles of

suburban gated communities, as "the most average American city." Kaplan continues west to Omaha; down through California; north from Mexico, across Arizona, New Mexico, and Texas; up to Montana and Canada, and back through Oregon. He visits Mexican border settlements and dust-blown county sheriffs' offices, Indian reservations and nuclear bomb plants, cattle ranches in the Oklahoma Panhandle, glacier-mantled forests in the Pacific Northwest, swanky postsuburban sprawls and grim bus terminals, and comes, at last, to the great battlefield at Vicksburg, Mississippi, where an earlier generation of Americans gave their lives for their vision of an American future. But what, if anything, he asks, will today's Americans fight and die for? At Vicksburg Kaplan contemplates the new America through which he has just traveled--an America of sharply polarized communities that draws its population from pools of talent far beyond its borders; an America where the

distance between winners and losers grows exponentially as corporations assume government functions and the wealthy find themselves more closely linked to their business associates in India and China than to their poorer neighbors a few miles away; an America where old loyalties and allegiances are vanishing and new ones are only beginning to emerge. The new America he found is in the pages of this book. Kaplan gives a precise and chilling vision of how the most successful nation the world has ever known is entering the final, and highly uncertain, phase of its history.
