Textbook of Plastic and Reconstructive Surgery -
Deepak K. Kalaskar 2016-08-02
Written by experts from

London's renowned Royal Free Hospital, Textbook of Plastic and Reconstructive Surgery offers a comprehensive overview of the vast topic of reconstructive plastic surgery and its various subspecialties for introductory plastic surgery and surgical science courses. The book comprises five sections covering the fundamental principles of plastic surgery, cancer, burns and trauma, paediatric plastic

surgery and aesthetic surgery, and covers the breadth of knowledge that students need to further their career in this exciting field. Additional coverage of areas in which reconstructive surgery techniques are called upon includes abdominal wall reconstruction, ear reconstruction and genital reconstruction. A chapter on aesthetic surgery includes facial aesthetic surgery and blepharoplasty, aesthetic breast surgery, body contouring and the evolution of hair transplantation. The broad scope of this volume and attention to often neglected specialisms such as military plastic surgery make this a unique contribution to the field. Heavily illustrated throughout, *Textbook of Plastic and Reconstructive Surgery* is essential reading for anyone interested in furthering their knowledge of this exciting field. This book was produced as part of JISC's Institution as e-Textbook Publisher project. Find out more at <https://www.jisc.ac.uk/rd/proje>

The Epilepsies - Chrysostomos P. Panayiotopoulos 2005

The Epilepsies: Seizures, Syndromes and Management is the latest work from one of the world's leading experts and offers an exhaustive account of the classification and management of epileptic disorders. In thirteen chapters, Dr Panayiotopoulos gives clear and didactic guidance on the diagnosis, treatment and ongoing management of the full spectrum of epileptic syndromes with an insight and perception that only he can bring to the subject. This text is published in full colour throughout and is complemented by a pharmacopoeia and CD ROM with patient video-EEGs. An attractive, clear page layout and the accompanying supplementary material help the reader to easily identify the key components of each disorder, syndrome and seizure. Drawing on the author's outstanding collection of video-EEGs the

accompanying CD ROM is cross-referenced within the text thus providing the reader with both a clinical and visual description of the various epileptic disorders and further aiding diagnosis.

The IOC Manual of Sports

Injuries - Roald Bahr

2012-06-12

Created in collaboration with the Medical Commission of the International Olympic Committee this exciting new book is a must-have tool for all those involved in assessing and treating the active individual with injuries sustained in sports and physical activity: from primary care and ER physicians to general physical therapists, athletic trainers, nurse practitioners and physician's assistants. Written and edited by an international cast of world-leading experts, the book embraces a problem-oriented approach to guide the reader through the assessment and management of injuries in physical activity. Covering the various body regions and distinguishing between common and rarer injuries, the

book follows a trajectory from history taking and physical examination to diagnosis and treatment, providing clear and actionable guidance on management of the most common injuries and disorders. Over 500 beautiful full-color illustrations augment the text, showing readers detailed views of the techniques, procedures and other clinically-relevant information being described. Over the course of the last decade there have been significant developments in our understanding of sports injuries - what they are, how they should be assessed, and how they should be treated. The IOC Manual of Sports Injuries distills these advances into straightforward, practical guidance that clinicians can count on to optimize their care of the physically-active patient. **Family Nurse Practitioner Certification Intensive Review** - Maria T. Ischemic Optic Neuropathies - Sohan Singh Hayreh
2011-08-28

Ischemic optic neuropathy, often referred to as a stroke of the optic nerve, is one of the major causes of visual impairment or loss of vision. Yet it is a highly controversial and confusing subject because of the general lack of in-depth scientific understanding of the subject. In this book the leading authority in the field describes in detail the current knowledge about the different forms of the often devastating disease. Insights into the underlying pathogenesis and peculiar clinical features are given, leading the reader to the most appropriate way of management. This information will help any physician dealing with patients who suffer from sudden loss of vision.

Trauma - Eric Legome

2011-06-16

Trauma: A Comprehensive Emergency Medicine Approach is a fully illustrated, interdisciplinary overview of trauma. Using both evidence-based approaches and a practical understanding of the emergency department, it gives a broad and in-depth review of

trauma care. The entire spectrum of trauma presentations is reviewed from minor soft-tissue injuries through to major life-threatening conditions. Written by over 50 expert contributors, it gives concrete and practical recommendations for evaluation, treatment, consultation and disposition decisions on both common and unusual conditions. Extensive use of photographs, illustrations and key information boxes is used to make the material accessible. Additional sections provide an overview of multiple other issues relating to emergency management of trauma including administrative, nursing, research and legal matters. This book provides an essential reference for anyone who is called upon to provide acute trauma care in the emergency department.

Principles and Practice of Lacrimal Surgery -

Mohammad Javed Ali

2018-02-08

This second edition of the highly successful and

comprehensive text on lacrimal disorders presents the latest developments in this rapidly evolving field. The new edition includes six new chapters, additional photographs and all chapters now have a separate section on recent advances. Written by experts in the field of dacryology, this book is a practical guide to evaluating and managing patients with lacrimal disorders. It methodically discusses basic anatomy and underlying pathology, patient evaluation, and all surgical procedures currently used to manage such disorders. It thoroughly yet concisely reviews surgical modalities including the endoscopic and micro-endoscopic approaches and provides ample illustrations for a better understanding. Since familiarity with a surgical technique is incomplete without the knowledge of risk factors and red flags, the text highlights ways of dealing with surgical complications and failure. Further it discusses in detail controversial topics and treatment dilemmas and

reviews the current consensus among the experts. This is an up-to-date reference work for dacryologists, oculoplastic surgeons, general ophthalmologists as well as fellows in training.

Surgical Approaches to the Facial Skeleton - Edward Ellis (DDS.) 2006

Featuring over 400 full-color surgical photographs and drawings, this text/atlas is a step-by-step guide to the surgical approaches used to expose the facial skeleton. The authors describe in detail the key anatomic structures and the technical aspects of each approach, so that the surgeon can safely gain access to the region of the craniofacial skeleton requiring surgery. This Second Edition includes full-color intraoperative photographs that complement the surgical drawings. Several new approaches have been added—the transconjunctival approach to the medial orbit, subtarsal approach to the internal orbit, Weber-Ferguson approach to the midface, and facial degloving approach to

the midface.

Eyelid & Periorbital Surgery

- Mark A. Codner 2016-06-24

I found this up-to-date factual book to be well-written and relatively concise...Its easy readability will make it both appealing and useful for students, trainees, and experts.

-- PMFA News ...there are 80 aesthetic and reconstructive oculoplastic videos, 30 of which are new, which makes this a one-of-a-kind video library.

What I liked about the videos, especially the new ones, is the high quality, clarity, and details of technique provided by the authors who do the voiceovers themselves.

-- Plastic and Reconstructive Surgery **FIRST PRIZE** from the BMA Medical Book Awards for Surgical Specialties! Eyelid & Periorbital Surgery offers expansive coverage of aesthetic and reconstructive procedures in oculoplastic surgery. Oculoplastic and plastic surgeons combine their talents in this unique two-volume clinical resource that features comprehensive guidance for solving both

common and rare eyelid and periorbital problems. With more than 2,900 photos and color illustrations, this edition has 26 rewritten first edition chapters and expands on an additional 13 new chapters, including topics ranging from nonsurgical periorbital rejuvenation to male blepharoplasty. Best of all, there are more than 30 new surgical videos demonstrating the latest surgical techniques. Also included is a complimentary eBook. Divided into 5 sections, the book begins by covering the fundamentals including periorbital and eyelid anatomy, eyelid function, innervation, biomechanics, and tissue grafts. The following section discusses aesthetic surgery including procedures such as brow lift, upper and lower blepharoplasty, midface lift, treatment of malar bags and festoons, lateral canthal dysfunction, and management of chemosis. A new section has been added on aesthetic nonsurgical state-of-the-art periorbital treatments with an update on injectable fillers,

botulinum toxin injections, and fat grafting. The reconstructive surgery section covers ptosis surgery, upper and lower eyelid reconstruction, entropion and ectropion reconstruction, surgery for facial paralysis, malignant eyelid tumors, Graves' disease, and the treatment of pediatric patients. The new final section covers orbital and lacrimal surgery including blowout fracture of the orbital floor, neuroophthalmologic injuries, evisceration and enucleation, late repair of orbital fractures, and management of the lacrimal system. Step-by-step descriptions and detailed videos provide a wide variety of tips, clinical pearls, and personal insights from the authors making this an invaluable resource for surgeons interested in the topic.

Dermatology for the Advanced Practice Nurse - Faye Lyons, DNP, RN, FNP-C 2014-07-22
Unique decision trees promote accurate diagnosis and treatment of 60 common skin conditions. This is the first

primary care dermatology reference written by and for nurses. It focuses on approximately 60 skin conditions that are commonly seen in primary care settings and provides unique decision trees to assist in accurate diagnosis. Organized for quick access, the book presents conditions alphabetically and includes evidence-based treatment and management strategies along with full-color photos taken during actual office visits. Dermatologic diagnostics cover skin assessment, specimen collection procedures, and use of mechanical devices, along with relevant evidence-based topical, systemic, and surgical treatment options. The resource provides an overview of dermatology basics including skin anatomy and physiology and skin terminology. Illustrations, graphs, and skin terminology help to accurately document descriptions of rashes, lesions, and diseases during diagnostic evaluations. The book also defines risk factors in relation

to skin conditions and diseases and delineates conditions common to specific populations. A broad range of management strategies is presented along with alerts for when expert follow-up is indicated. To promote rapid identification of skin conditions, each is presented in a consistent organization that includes overview, epidemiology, pathology/histology, clinical presentation, differential diagnosis, treatment/management, special considerations and appropriate referrals, and patient education. The Clinical Pearls feature captures the authors' expertise. Additional photos are available from the website as a digital photo archive. Key Features: Focuses on approximately 60 common dermatological conditions with high-quality, full-color photos Presents four unique decision trees to foster accurate diagnosis and clinical decision making Delivers evidence-based protocols for diagnosis, treatment, and management

Uses a consistent format to promote quick access to information Written by advanced-degree nurse practitioners with nurses' informational needs in mind

Endocrine Surgery - Johnathan Hubbard 2009-10-14

There has been a recent surge of interest within the world of endocrine surgery in the US and worldwide with resultant significant changes on the way surgery is performed. Where before a 5-7 year period was taken for a general surgeon, after which the medic would take a 1 year residency then a fellowship, now they are looking at 3 years core surgery and then going straight to specialise, opening up the discipline to more people. The book is a valuable tool for

those revising for board examinations and Fellowship examinations. The text, compiled by expert authors from the USA, Europe and Asia, provides an international perspective on the basic knowledge and clinical management.

Rejuvenation of the Aging

Face - Amir M Karam

2015-08-28

Rejuvenation of the Aging Face covers the assessment, planning and treatment required to rejuvenate aging patients, using a combination of surgical and non-surgical approaches to give the best cosmetic results. It focuses on new areas such as fat transplant, rapidly-developing treatments such as injectables, and refinements to existing surgical techniques. Starting with an assessment of the presenting problem, the authors explain how best to devise a treatment plan that combines both surgical and non-surgical approaches. Detailed overviews are provided for each recommended surgical

technique, together with comprehensive discussion of post-operative considerations. With over 200 illustrations showing typical patient cases, a DVD with selected surgical video clips, and the combined expertise of highly regarded facial plastic surgeons and dermatologic surgeons, *Rejuvenation of the Aging Face* is an indispensable guide to the assessment and management of the aging face. Key Points Written by well-recognised educators in the areas of facial plastic and dermatologic surgery Covers the latest thinking on established techniques and hot, new emerging ones Highly illustrated with colour clinical photographs and short, focussed DVD clips

Aesthetic Plastic Surgery in Asians: Principles and Techniques, Two-Volume Set

Lee Pu 2015-06-15

Aesthetic Plastic Surgery in Asians: Principles and Techniques offers a comprehensive guide to all aspects of cosmetic surgery in Asians, focusing on the differences in surgical techniques and general principles when treating these patients. With special emphasis on minimally invasive techniques and minimization of scars, the book features contributions from surgeons in Asian regions who share their signature procedures and describe the latest innovations. The book is divided into ten

parts. It begins with general principles and discusses the cultural and societal influence on Asian patients for cosmetic surgery as well as psychological and psychiatric considerations for Asian cosmetic patients. Next, the book covers facial rejuvenation with chapters on treatment for acne scars, laser skin resurfacing, fat grafting, and Botox. The book discusses the various approaches to face lift, including the classic face-lift and the short-scar method. A section on cosmetic surgery of the eyelid examines the special considerations in Asian eyelid surgery. It discusses upper and lower blepharoplasty, management of the sunken eyelid, and periorbital rejuvenation. A section on rhinoplasty covers alloplastic implants, autologous cartilage grafts, and primary open and closed rhinoplasty. The book also discusses cosmetic surgery of the ear and of the facial skeleton. The next chapters cover breast augmentation with implants, focusing on the transaxillary

approach as well as the inframammary approach. The contributors discuss augmentation with conventional fat grafting and cell-assisted lipotransfer. Also covered are mastopexy, breast reduction, and breast reconstruction with pedicled TRAM flap. The final chapters cover abdominoplasty, liposuction of the trunk, buttock augmentation, calf reduction, and other procedures such as hair transplantation, penile enhancement, correction of varicose veins with endovascular laser, and correction of osmidrosis. Illustrated with over 2500 top-quality full-color drawings and photographs, and with three DVDs showcasing supplementary surgical techniques videos, this title is an absolutely indispensable resource for anyone involved in the aesthetic treatment of Asian patients.

Neurocritical Care Board Review - Asma Zakaria
2013-07-19

This book is organized according to the UCNS Neurocritical Care core curriculum outline (attached) to ensure that all topics represented on the boards are covered, and include both neuroscience critical care (general neurology, neurotrauma, neurovascular and neurosurgical problems) and general critical care topics

(systems trauma, cardiovascular, infectious disease, pulmonary, and renal issues, and hemodynamic monitoring). A set of 25 to 50 questions is generated for each subject on the syllabus, depending on the breadth of the topic and its relative weight or importance on the test. A detailed explanation will follow in the answer section of each chapter. Neuroimaging, EEG and monitoring waveforms, anatomical drawings, histology slides, and transcranial dopplers will be included in case questions to allow candidates to familiarize themselves with these tools as they form a significant part of the exam.

Treatment of Chronic Pain by Interventional Approaches - Timothy R. Deer
2014-12-08
From reviews of Deer, eds., Comprehensive Treatment of Chronic Pain by Medical, Interventional, and Integrative Approaches: "Comprehensive Treatment of Chronic Pain by Medical, Interventional, and Integrative Approaches is a

major textbook... [I]t should be a part of all departmental libraries and in the reference collection of pain fellows and pain practitioners. In fact, this text could be to pain as Miller is to general anesthesia." Journal of Neurosurgical Anesthesiology Edited by master clinician-experts appointed by the American Academy of Pain Medicine, this is a soft cover version of the Interventional sections of the acclaimed Deer, eds., Comprehensive Treatment of Chronic Pain by Medical, Interventional, and Integrative Approaches. It is intended as a primary reference for busy clinicians who seek up-to-date and authoritative information about interventional approaches to treating chronic pain. State-of-the-art coverage of full range of techniques: neural blockades, neurolysis blocks, and neurostimulation Review of clinically relevant anatomy and physiology "Key Points" preview contents of each chapter
Descriptive Psychopathology - Michael Alan Taylor

2008-11-13

In order to accurately describe and diagnose psychiatric illness, practitioners require in-depth knowledge of the signs and symptoms of behavioral disorders. Descriptive Psychopathology provides a broad review of the psychopathology of psychiatric illness, beyond the limitations of the DSM and ICD criteria. Beginning with a discussion of the background to psychiatric classification, the authors explore the problems and limitations of current diagnostic systems. The following chapters then present the principles of psychiatric examination and diagnosis, described with accompanying patient vignettes and summary tables, and related to different diagnostic concerns. A thought-provoking conclusion proposes a restructuring of psychiatric classification based on the psychopathology literature and its validating data. Written for psychiatry and neurology residents, clinical psychologists, behavioral

neurologists, clinical psychology students and psychiatric nurse practitioners, it is invaluable to anyone who accepts the responsibility for the care of patients with behavioral syndromes.

Physical Assessment of the Newborn - Ellen P. Tappero, DNP, RN, NNP-BC 2014-09-01

Physical Assessment of the Newborn, 5th Edition, is a comprehensive text with a wealth of detailed information on the assessment of the newborn. This valuable and essential resource illustrates the principles and skills needed to gather assessment data systematically and accurately, and also provides a knowledge base for interpretation of this data. Coverage addresses: gestational assessment, neurologic assessment, neonatal history, assessment of the dysmorphic infant, and systemic evaluation of individual body systems, as well as key information on behavioral and pain assessment, including the use of specific tools with various groups ranging from term to

extremely preterm infants. Numerous tables, figures, illustrations, and photos, many of them in full color, are a major strength that enhances the book's usefulness as a clinical resource. The text is an excellent teaching tool and resource for anyone who performs newborn examinations including nurses, neonatal and pediatric nurse practitioners, nurse-midwives, physicians and therapists. It can also serve as a core text for any program preparing individuals for advanced practice roles in neonatal care. **KEY FEATURES:** An authoritative and renowned text that comprehensively addresses all key aspects of newborn assessment Provides a well-ordered evaluation of individual body systems. Assists the practitioner in identifying infant state, behavioral clues, and signs of pain, facilitating individualized care. Comprehensively addresses the tremendous range of variation among newborns of different gestational ages. The content is

amplified by numerous photos and illustrations, many in full color Includes Power Point slides and an Image Bank

Psychodermatology in Clinical Practice - Anthony Bewley

2021-06-03

This book represents a simple, practical resource for all healthcare professionals working with dermatological patients with psychological aspects to their disease. The emphasis is on effective guidance rather than exhaustive case reviews, providing readers with a manual on the appropriate way to approach management of the patient in each case.

Comprehensive in coverage, but concise in its delivery of information,

Psychodermatology in Clinical Practice presents an idealized approach to management of psychodermatology patients within a global perspective, and provides practical tools to aid assessment of patients and in the decision-making process. It is suitable for dermatologists, psychiatrists and psychologists, dermatology nursing staff, primary care physicians and pediatricians.

History of Free Skin Grafting -

H.J. Klasen 2012-12-06

Amidst the innumerable articles and books on plastic and reconstructive surgery, a thorough and extensive study of the history of free skin grafting was still missing. This omission has now been rectified by Dr. Klasen. This book is an expansion of a M.D. thesis, written at the State University of Groningen, The Netherlands, and was guided by Professor A.J.C. Huffstadt, plastic surgeon, and Professor D. de Moulin, medical historian. Professor T. Gibson kindly revised the manuscript and wrote the epilogue. But, as Goethe put it: "nur ein Teil der Kunst kann gelehrt werden, der Künstler macht das Ganze" ("only a part of the art can be taught, the artist makes the totality"). The author, Henk Klasen, is a remarkable man. As a general surgeon, he devotes all his interest and skills to traumatology and problems of physiology and pathophysiology in surgery. With such talents it is natural that he also works parttime as one of the coordinators of a modern burn unit. Among his

hobbies are love of antiques and old books. This historical inclination has induced him to write the present book, in which he vividly describes the development of free skin grafting in its relevant theoretical and practical aspects. His elaborate study has resulted in an excellent reference book which at the same time provides enjoyable reading, once again demonstrating the value of history in understanding the present. A.J.C. HUFFSTADT, M.D.

Diagnosis and Management of Head and Face Pain - James Y. Suen 2018-07-20

This text is a comprehensive guide to the evaluation of patients with head and face pain. It is a resource for any physician or dentist to properly diagnosis and to learn the options for treating head and face pain, as well as know when to refer a patient to a specialist and how to identify which specialist is needed. It discusses the basic anatomy, etiology, and pathophysiology of head and face pain,

classification guidelines for treatment, and clinical case examples. Additional chapters on nerve blocks, nerve stimulators, radiosurgery, microvascular decompression, Botox, and alternative and complementary medicine are also included. Diagnosis and Management of Head and Face Pain will be an invaluable resource for otolaryngologists, family physicians, oral surgeons, dentists, neurologists, neurosurgeons, pain specialists, and patients who suffer from head and face pain.

TASER® Conducted Electrical Weapons: Physiology,

Pathology, and Law - Mark W. Kroll 2009-02-27
TASER® Conducted Electrical Weapons are rapidly replacing the club for law-enforcement control of violent subjects within many countries around the globe. A TASER CEW is a hand-held device that delivers a 400-volt pulse with a duration tuned to control the skeletal muscles without affecting the heart at a distance of up to 6.5 meters over tiny wires. If necessary, it begins with an arcing voltage of 50,000 V to penetrate thick clothing; the 50,000 V is never delivered to the body itself. Due to the widespread usage of these devices and the widespread misconceptions surrounding their operation, this book will have significant utility. This volume is written for cardiologists, emergency physicians, pathologists, law enforcement management, corrections personnel, and attorneys.
