*Romanesque Sculpture in Campania* - Dorothy F. Glass 1991

This first comprehensive study in English of Romanesque sculpture in Campania places the material in the context of South Italian medieval culture. Although medieval Campania was part of the Norman kingdom, which at its zenith included almost all of South Italy, it has distinguishable characteristics that set it apart from its neighbors: the emphatic imprint of the Roman past, a long-lived Lombard settlement, the authoritative conservatism of the abbey of Monte Cassino, the lack of Byzantine dominance, and close political and cultural ties with Sicily. In this sense, Romanesque sculpture in Campania is very much a local phenomenon, for it evolved from a close study of local antiquity and the selective adaptation of elements from neighboring provinces. From its beginning, Romanesque sculpture in Campania is characterized by attention to small scale decorative motifs seen on both portals and capitals. By the latter part of the twelfth century, an avid interest in stone pulpits and paschal candelabra fostered both internal consistency in local workshops and specifically Campanian content in part inspired by the local liturgy. Dorothy Glass's study urges that the definition of Romanesque be both expanded and extended chronologically to include the southern Mediterranean.

**Diocesan museums in Campania** - Ugo Dovere 2004

**Campania in the Flavian Poetic Imagination** - Antony Augoustakis 2019-01-24

The region of Campania with its fertility and volcanic landscape exercised great influence over the Roman cultural imagination. A hub of activity outside the city of Rome, the Bay of Naples was a place of otium, leisure and quiet, repose and literary productivity, and yet also a place of danger: the looming Vesuvius inspired both fear and awe in the region's inhabitants, while the Phlegraean Fields evoked the story of the gigantomachy and sulphurous lakes invited entry to the Underworld. For Flavian writers in particular, Campania became a locus for literary activity and geographical disaster when in 79 CE, the eruption of the

volcano annihilated a great expanse of the region, burying under a mass of ash and lava the surrounding cities of Pompeii, Herculaneum, and Stabiae. In the aftermath of such tragedy the writers examined in this volume - Martial, Silius Italicus, Statius, and Valerius Flaccus - continued to live, work, and write about Campania, which emerges from their work as an alluring region held in the balance of luxury and peril.

**Volcanism in the Campania Plain** - 2006-08-24

The book deals with the study of three important volcanisms in the Campania Plain: Vesuvius, Campi Flegrei and Ignimbrites. The knowledge of the volcanic evolution of Vesuvius and Campi Flegrei has a particular relevance because of the hazards that these volcanoes pose to the about 1.5 million people living in the Neapolitan area. The contributors to the volume bring new data (experiments on volatile solubility, fluid-melt inclusions, tectonic, geophysical, isotope, geochronology), which are helpful in the creation of new models for a better understanding of the behaviour of the volcanic systems. In particular a hydrothermal model is used to explain the ground movements (bradyseism) at Campi Flegrei. To develop such a model, the authors use an analogue for the evolving Campi Flegrei sub-volcanic system, the model of the porphyry mineralized systems. For Campanian

Ignimbrite the authors highlight the impact crystal-liquid separation has on melt compositional evolution and particularly focus on trace element and Th isotope evidence for open-system processes in the magma body associated with the Campanian Ignimbrite. The authors, for their interpretations, utilize thermodynamic and quantitative mass balance modelling of major and trace element data and semi-quantitative limits on Th and Sr isotopes to evaluate the role of crystal-melt separation, magma-fluid interaction, and assimilation of wallrock on the geochemical evolution of the Campanian Ignimbrite.

**Southern Italian Desserts** - Rosetta Costantino 2013-10-08

An authentic guide to the festive, mouthwatering sweets of Southern Italy, including regional specialties that are virtually unknown in the US, as well as variations on more popular desserts such as cannoli, biscotti, and gelato. As a follow-up to her acclaimed *My Calabria*, Rosetta Costantino collects 75 favorite desserts from her Southern Italian homeland, including the regions of Basilicata, Calabria, Campania, Puglia, and Sicily. These areas have a history of rich traditions and tasty, beautiful desserts, many of them tied to holidays and festivals. For example, in the Cosenza region of Calabria, Christmas means plates piled with grispelle (warm fritters drizzled with local honey) and pitta 'mpigliata (pastries filled with walnuts, raisins, and cinnamon). For the feast of Carnevale, Southern Italians celebrate with bugie ("liars"), sweet fried dough dusted in powdered sugar, meant to tattle on those who sneak off with them by leaving a wispy trail of sugar. With fail-proof recipes and information on the desserts' cultural origins and context, Costantino illuminates the previously unexplored confectionary traditions of this enchanting region.

[Romans in Northern Campania](#) - Paul Arthur 1991

This monograph is concerned with the archaeology and history of an area which includes the territories of the Roman and Latin colonies of

Minturnae, Sinuessa and Suessa Aurunca, and the famed Ager Falernus, from the later Iron Age to the early Middle Ages. Through detailed analysis of sites and artefacts it is shown that northern Campania was a region where natural conditions allowed vigorous cultural and economic development, particularly during the late Republic and the early Empire when the Roman elites had extensive land interests there.
