Traumascapes - Maria M. Tumarkin 2005-01-01
'Traumascapes are a distinctive category of places transformed physically and psychically by suffering, part of a scar tissue that stretches across the world.' Maria Tumarkin grew up in the old Soviet Union, and emigrated to Australia as a teenager. In 2004, she embarked on an international odyssey to investigate and write about major sites of violence and suffering. Traumascapes is a powerful meditation on the places she visited: Bali, Berlin, Manhattan, Moscow, Port Arthur, Sarajevo, and the field in Pennsylvania where the fourth plane involved in the attacks of September 11 2001 crashed. In a

time when terror and tragedy flourish these locations exhibit a compelling power, drawing pilgrims and tourists from around the world who want to understand the meaning of the traumatic events that unfolded there. In traumascapes, life goes on but the past is still unfinished business.

Bodies and Ruins - David Crew 2017-05-19
Bodies and Ruins explores changing German memories of World War II as it analyzes the construction of narratives in the postwar period including the depiction of the bombing of individual German cities. The book offers a corrective notion rising in the late 1990s notion that discussions of the Allied bombing were long overdue, because Germans who had endured the bombings had largely been condemned to silence after 1945. David Crew shows that far from being marginalized in postwar historical consciousness, the bombing war was in fact a central strand of German memory and identity. Local narratives of the bombing war, including photographic books, had already established themselves as important "vectors of memory" in the late 1940s and early 1950s. The bombing war had allowed Germans to see themselves as victims at a time when the Allied liberation of the concentration camps and the Nuremberg trials presented Germans to the world as perpetrators or at least as accomplices. The bombing war continued to serve this function even as Germans became more and more willing directly to confront the genocide of European Jews—which by the 1960s was beginning to be referred to as the Holocaust. Bodies and Ruins examines a range of local publications that

carried photographic images of German cities destroyed in the air war, images that soon entered the visual memory of World War II. Despite its obvious importance, historians have paid very little attention to the visual representation of the bombing war. This book follows the search for what were considered to be the "right" stories and the "right" pictures of the bombing war in local publications and picture books from 1945 to the present, and is intended for historians as well as general readers interested in World War II, the Allied bombing of German cities, the Holocaust, the history of memory and photographic/visual history.

Die Welt Der Verlassenen Orte - 2014-09

Durs Grünbein - Michael Eskin 2013-03-01

Durs Grünbein is the most significant poet and essayist in German today. No other modern German poet has written from such an emphatically European and global perspective, and this volume seeks to present the poet and his work to the English-speaking world in all their significance and breadth. Written by a line-up of international scholars and critics, the volume offers highly readable and wide-ranging essays on Grünbein's substantial oeuvre, complemented by specially commissioned material and an interview with the poet. It covers the German and European traditions, and engages with Grünbein's works in the context of a number of relevant topics, such as 'memory', 'urban life', 'mortality', 'love', and 'presence'; it also probes Grünbein's sustained dialogue with the natural sciences and the visual arts.

The Black Sun - Peter Moon 1997

An adventure in consciousness that reveals a vast array of new information. From the German flying saucer programme to the SS mission in Tibet, we are led on a path that gives us the most insightful look ever into the Third Reich and the holy relics they sought in their ultimate quest: the ark of the covenant and the holy grail. Going beyond the spear of destiny and other attempts to unlock the mysterious occultism of the Nazis, Peter Moon peers into the lab of the ancient alchemists and their white powered gold in order to explain the secret meaning behind the Egyptian and Tibetan 'Books of the Dead'.

The Harmony of Illusions - Allan Young

1997-10-27

As far back as we know, there have been individuals incapacitated by memories that have filled them with sadness and remorse, fright and horror, or a sense of irreparable loss. Only recently, however, have people tormented with such recollections been diagnosed as suffering from "post-traumatic stress disorder." Here Allan Young traces this malady, particularly as it is suffered by Vietnam veterans, to its beginnings in the emergence of ideas about the unconscious mind and to earlier manifestations of traumatic memory like shell shock or traumatic hysteria. In Young's view, PTSD is not a timeless or universal phenomenon newly discovered. Rather, it is a "harmony of illusions," a cultural product gradually put together by the practices, technologies, and narratives with which it is diagnosed, studied, and treated and by the various interests, institutions, and moral arguments mobilizing these efforts. This book is part history and part ethnography, and it includes a detailed account of everyday life in the treatment of Vietnam veterans with PTSD. To illustrate his points, Young presents a number of fascinating transcripts of the group therapy and diagnostic sessions that he observed firsthand over a period of two years. Through his comments and the transcripts themselves, the reader becomes familiar with the individual hospital personnel and clients and their struggle to make sense of life after a tragic war. One observes that everyone on the unit is heavily invested in the PTSD diagnosis: boundaries between therapist and patient are as unclear as were the distinctions between victim and victimizer in the jungles of Southeast Asia.

The Last World - Christoph Ransmayr 1996

popularity and power because of the needs expressed by the community of dentists here in the United States and globally. Transforming the Cottage Industry will outline this growing need for change in the dental community, the adaptation of the DSO model to meet the changing times and the concerns of the solo practice model. Also, it will address the misconceptions that all new models can foster. This book will also endeavor to look at the more human and sociological side of why we are at this crossroads in the first place, since change, no matter how timely or important, is always resisted. This book will address what makes change difficult and many times threatening to an old paradigm. We will look at the invaluable opportunity for those willing to adapt and shift.

Overcoming School Refusal - Joanne Garfi
2018-01-31

School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include:

- types of school refusers
- why children refuse to go to school
- symptoms
- short term and long term consequences
- accurate assessment
- treatment options
- what parents can do

Modernity and Early Cultures - Anna Minta
2011

At the beginning of the 20th century, the discovery of early cultures exerted a formative influence on modern architecture. Discussions on early civilizations in the Middle East, South-

East Asia, and the pre-Columbian cultures of North and South America as well as new perceptions of archaism and primitivism revolutionized the production of art and architecture.
 In this anthology, European and North and South American scholars from various fields address art and architectural theory to show the avant-garde's historical relation to archaeology and its influence on the development of Modernism. Contributors include Can Bilsel (San Diego), Luis E. Carranza (Rhode Island), Johannes Cramer (Berlin), Christian Freigang (Frankfurt), Maria P. Gindhart (Atlanta), Jorge F. Liernur (Buenos Aires), Anna Minta (Bern), and Bernd Nicolai (Bern).

In Praise of Antiheroes - Victor Brombert
2001-11

In an age of upheaval and challenged faith, traditional heroes are hard to come by, and harder still to love, with their bloodstained hands and backs unbowed by the consequences of their actions. Through penetrating readings of key works of modern European literature, Victor Brombert shows how a new kind of hero—the antihero—has arisen to replace the toppled heroic model. Though they fail, by design, to live up to conventional expectations of mythic heroes, antiheroes are not necessarily "failures." They display different kinds of courage more in tune with our time and our needs: deficiency translated into strength, failure experienced as honesty, dignity achieved through humiliation. Brombert explores these paradoxes in the works of Büchner, Gogol, Dostoevsky, Flaubert, Svevo, Hašek, Frisch, Camus, and Levi. Coming from diverse cultural and linguistic traditions, these writers all use the figure of the antihero to question handed-down assumptions, to reexamine moral categories, and to raise issues of survival and renewal embodying the spirit of an uneasy age.

The Culture of Defeat - Wolfgang Schivelbusch
2013-08-13

A fascinating look at history's losers—the myths they create to cope with defeat and the steps they take never to be vanquished again History may be written by the victors, Wolfgang Schivelbusch argues in his brilliant and provocative new book, but the losers often have the final word. Focusing on three seminal cases

of modern warfare-the South after the Civil War, France in the wake of the Franco-Prussian War, and Germany following World War I-Schivelbusch reveals the complex psychological and cultural reactions of vanquished nations to the experience of military defeat. Drawing on responses from every level of society, Schivelbusch shows how conquered societies question the foundations of their identities and strive to emulate the victors: the South to become a "better North," the French to militarize their schools on the Prussian model, the Germans to adopt all things American. He charts the losers' paradoxical equation of military failure with cultural superiority as they generate myths to glorify their pasts and explain their losses: the nostalgic "plantation legend" after the fall of the Confederacy; the cult of Joan of Arc in vanquished France; the fiction of the stab in the back by "foreign" elements in postwar Germany. From cathartic epidemics of "dance madness" to the revolutions that so often follow battlefield humiliation, Schivelbusch finds remarkable similarities across cultures. Eloquently and vibrantly told, *The Culture of Defeat* is a tour de force that opens new territory for historical inquiry.

The Terrors of Ice and Darkness - Christoph Ransmayr 1996-05

A brilliant interweaving of journeys and voyages-geographical, historical, psychological--*The Terrors of Ice and Darkness* is the riveting account of a narrator obsessed with a certain Josef Mazzini, a young Italian "lost in the arctic winter of 1981" who is himself obsessed with the Imperial Austro-Hungarian North Pole Expedition of 1873: "At first it was nothing more than a game to try to reduce the circumstances of his disappearance to some sort of explanation, any explanation. But every clue yielded a new unanswered question. Quite involuntarily I found myself taking one step after the other. . . . Cumulus clouds mirrored in a shop window became calving glaciers, patches of old snow in city parks became great floes of ice. The Arctic Ocean lay at my window. Much the same thing must have happened to Mazzini." Painstakingly retracing Mazzini's steps, the narrator simultaneously reconstructs the dramatic and fantastic story of the nineteenth-century journey, using actual letters and diaries of the members

of that harrowing expedition. These documents--sometimes surprisingly poetic and moving--combine in the narrator's imagination to evoke as never before the awful beauty of the world's farthest northern reaches. In a novel as crystalline as the polar ice, as penetrating as the arctic cold, Christopher Ransmayr spins an adventure tale both spellbinding and paradoxical in its subversive undermining of conventional notions of heroism and exploration.

[Year Zero](#) - Ian Buruma 2014-09-30

A marvelous global history of the pivotal year 1945 as a new world emerged from the ruins of World War II *Year Zero* is a landmark reckoning with the great drama that ensued after war came to an end in 1945. One world had ended and a new, uncertain one was beginning. Regime change had come on a global scale: across Asia (including China, Korea, Indochina, and the Philippines, and of course Japan) and all of continental Europe. Out of the often vicious power struggles that ensued emerged the modern world as we know it. In human terms, the scale of transformation is almost impossible to imagine. Great cities around the world lay in ruins, their populations decimated, displaced, starving. Harsh revenge was meted out on a wide scale, and the ground was laid for much horror to come. At the same time, in the wake of unspeakable loss, the euphoria of the liberated was extraordinary, and the revelry unprecedented. The postwar years gave rise to the European welfare state, the United Nations, decolonization, Japanese pacifism, and the European Union. Social, cultural, and political "reeducation" was imposed on vanquished by victors on a scale that also had no historical precedent. Much that was done was ill advised, but in hindsight, as Ian Buruma shows us, these efforts were in fact relatively enlightened, humane, and effective. A poignant grace note throughout this history is Buruma's own father's story. Seized by the Nazis during the occupation of Holland, he spent much of the war in Berlin as a laborer, and by war's end was literally hiding in the rubble of a flattened city, having barely managed to survive starvation rations, Allied bombing, and Soviet shock troops when the end came. His journey home and attempted reentry into "normalcy" stand in many ways for his generation's experience. A work of enormous

range and stirring human drama, conjuring both the Asian and European theaters with equal fluency, *Year Zero* is a book that Ian Buruma is perhaps uniquely positioned to write. It is surely his masterpiece.

Elements of Chemistry - William Allen Miller

Trauma and Guilt - Susanne Veas-Gulani
2003-01-01

This book analyzes postwar literary works on large area bombings of German cities both in the context of trauma theory and questions of guilt and shame about Germany's Nazi past, embedding the recent debate surrounding the air war of World War II and its influence on German culture in a broader historical, societal, and psychological context.

The Novels of Erich Maria Remarque - Brian Murdoch 2006

Presents a critical analysis of the works of the German author.

The Legacy of Nazi Occupation - Pieter Lagrou 1999-02-13

This volume, in *Studies in the Social and Cultural History of Modern Warfare* series, examines how France, Belgium and the Netherlands emerged from the military collapse and humiliating Nazi occupation they suffered during the Second World War. Rather than traditional armed conflict, the human consequences of Nazi policies were resistance, genocide and labour migration to Germany. Pieter Lagrou offers a genuinely comparative approach to these issues, based on extensive archival research; he underlines the divergence between ambiguous experiences of occupation and the univocal post-war patriotic narratives which followed. His book reveals striking differences in political cultures as well as close convergence in the creation of a common Western European discourse, and uncovers disturbing aspects of the aftermath of the war, including post-war antisemitism and the marginalisation of resistance veterans.

Brilliantly researched and fluently written, this book will be of central interest to all scholars and students of twentieth-century European history.

Difficult Heritage - Sharon Macdonald
2010-10-04

How does a city and a nation deal with a legacy of perpetrating atrocity? How are contemporary identities negotiated and shaped in the face of concrete reminders of a past that most wish they did not have? *Difficult Heritage* focuses on the case of Nuremberg – a city whose name is indelibly linked with Nazism – to explore these questions and their implications. Using an original in-depth research, using archival, interview and ethnographic sources, it provides not only fascinating new material and perspectives, but also more general original theorizing of the relationship between heritage, identity and material culture. The book looks at how Nuremberg has dealt with its Nazi past post-1945. It focuses especially, but not exclusively, on the city's architectural heritage, in particular, the former Nazi party rally grounds, on which the Nuremberg rallies were staged. The book draws on original sources, such as city council debates and interviews, to chart a lively picture of debate, action and inaction in relation to this site and significant others, in Nuremberg and elsewhere. In doing so, *Difficult Heritage* seeks to highlight changes over time in the ways in which the Nazi past has been dealt with in Germany, and the underlying cultural assumptions, motivations and sources of friction involved. Whilst referencing wider debates and giving examples of what was happening elsewhere in Germany and beyond, *Difficult Heritage* provides a rich in-depth account of this most fascinating of cases. It also engages in comparative reflection on developments underway elsewhere in order to contextualize what was happening in Nuremberg and to show similarities to and differences from the ways in which other 'difficult heritages' have been dealt with elsewhere. By doing so, the author offers an informed perspective on ways of dealing with difficult heritage, today and in the future, discussing innovative museological, educational and artistic practice.

Contested Pasts - Katharine Hodgkin
2003-09-02

This inter-disciplinary volume demonstrates, from a range of perspectives, the complex cultural work and struggles over meaning that lie at the heart of what we call memory. In the last decade, a focus on memory in the human sciences has encouraged new approaches to the

study of the past. As the humanities and social sciences have put into question their own claims to objectivity, authority and universality, memory has appeared to offer a way of engaging with knowledge of the past as inevitably partial, subjective and local. At the same time, memory and memorial practices have become sites of contestation, and the politics of memory are increasingly prominent.

Die Schweiz im Kalten Krieg 1945-1990 -

Thomas Buomberger 2017-03-30

Der Kalte Krieg zwischen der Sowjetunion und den USA prägte die Weltpolitik während fast eines halben Jahrhunderts. In der neutralen Schweiz, die fest auf der Seite des Westens stand, war dieser Krieg kälter als anderswo. Der Feind, der mit Atombomben drohte und die Schweiz kommunistisch zu unterwandern suchte, sass in Moskau. Die Folgen dieser Imagination waren: ein rabiater Antikommunismus, ein ausgreifender Staatsschutz, die allumfassende Vorbereitung auf einen Atomkrieg und die Entwicklung eigener Atomwaffen. Kaum ein anderes Land lebte den Kalten Krieg so intensiv wie die Schweiz. Thomas Buombergers Studie schildert erstmals, wie sich der Konflikt der Supermächte auf die Schweizer Politik und Gesellschaft auswirkte. Seine Mentalitätsgeschichte lässt die Stimmung der Zeit anhand vieler Beispiele aufleben und zeigt, wieso sich die Schweiz während Jahrzehnten in einem Zustand der Paranoia befand.

Ashes for Breakfast - Durs Grünbein

2014-11-25

The first English translation of Germany's leading contemporary poet. ...what is the whole surreal jokeshop of terrors compared to the infinitely chance little tricks of a poem. --from "MonoLogical Poem #1" Born in Dresden in 1962, Durs Grünbein is the most significant and successful poet to emerge from the former East Germany, a place where, he wrote, "the best refuge was a closed mouth." In unsettling, often funny, sometimes savage lines whose vivid images reflect his deep love for and connection with the visual arts, Grünbein is reinventing German poetry and taking on the most pressing moral concerns of his generation. Brilliantly edited and translated by the English poet Michael Hofmann, *Ashes for Breakfast* expertly

introduces Germany's most highly acclaimed contemporary poet to American readers.

***The Bars of Atlantis* - Durs Grünbein 2010-04-13**

This landmark collection of essays by one of the world's greatest living authors makes Durs Grünbein's wide-ranging and multifaceted prose available in English for the first time, and is a welcome complement to *Ashes for Breakfast*, his first book-length collection of poetry in English. Covering two decades, *The Bars of Atlantis* unfurls the entire breadth and depth of Grünbein's essayistic genius. Memoiristic and autobiographical pieces that introduce Grünbein, the man and the author, and tell the story of the making of a poet and thinker toward the end of a century marked by global political strife, unprecedented human suffering, long decades of totalitarian rule, and, in its final quarter, the dawn of a new, post-Cold War world order; essays that focus on Grünbein's major philosophical and aesthetic concerns, such as the intersection of art and science, literature and biology; extended reflections on the existential, cultural, political, and ethical import of the poet's craft in the contemporary world; and, finally, explorations of the meaning of classical antiquity for the present—all contribute to making.

Postmodern Brecht - Elizabeth Wright

2016-08-19

In this radical and deliberately controversial re-reading of Brecht, first published in 1989, Elizabeth Wright takes a new view of the playwright, giving us a more 'Brechtian' reading than so far achieved and making his work historically relevant here and now. The author discusses in detail Brecht's principle theories and concepts in the light of poststructuralist theory, and reassess the aesthetics and politics with regard to Marxist critics of his own day. Wright includes a re-reading of Brecht's early works, which presents them in relation to a postmodern theatre, and gives critical analyses of the work of Pina Bausch, Robert Wilson, and Heiner Müller, who use the techniques of performance theatre, showing how they deconstruct Brecht's distinction between illusion and reality and point to a postmodern understanding of their dialectical relation.

The Politics of Display - Sharon Macdonald

2010-10-05

The assumption that museum exhibitions, particularly those concerned with science and technology, are somehow neutral and impartial is today being challenged both in the public arena and in the academy. The Politics of Display brings together studies of contemporary and historical exhibitions and contends that exhibitions are never, and never have been, above politics. Rather, technologies of display and ideas about 'science' and 'objectivity' are mobilized to tell stories of progress, citizenship, racial and national difference. The display of the Enola Gay, the aircraft which dropped the atomic bomb on Hiroshima is a well-known case in point. The Politics of Display charts the changing relationship between displays and their audience and analyzes the consequent shift in styles of representation towards interactive, multimedia and reflexive modes of display. The Politics of Display brings together an array of international scholars in the disciplines of sociology, anthropology and history. Examples are taken from exhibitions of science, technology and industry, anthropology, geology, natural history and medicine, and locations include the United States of America, Australia, the United Kingdom, France, the Netherlands and Spain. This book is an excellent contribution to debates about the politics of public culture. It will be of interest to students of sociology, anthropology, cultural studies, museum studies and science studies.

German POWs, Der Ruf, and the Genesis of Group 47 - Aaron D. Horton 2013-12-11

This work traces the lives and careers of German authors Alfred Andersch and Hans Werner Richter,

Life and Death in the Third Reich - Peter Fritzsche 2009-06-30

Fritzsche deciphers the puzzle of Nazism's ideological grip. Its basic appeal lay in the Volksgemeinschaft - a "people's community" that appealed to Germans to be part of a great project to redress the wrongs of the Versailles treaty, make the country strong and vital, and rid the body politic of unhealthy elements. Diaries and letters reveal Germans' fears, desires, and reservations, while showing how Nazi concepts saturated everyday life.

Opening and Closing - Klapp 1978-09-29

In this original application of information theory

to social analysis, Orrin Klapp examines how and why societies are producing more stress than they ever can handle. He argues that the reduction of 'social noise', the chaos from which we try to construct meaning is a major goal of individuals and groups alike. Individuals, groups, even entire societies normally cycle rhythmically between two basic modes of adaptation to the constant communication flow: opening, or scanning for desired information; and closing, or defending against noise. For example, in a society functioning in the opening mode, movements like ecumenicism and expansionism achieve momentum. Extreme reactions in either mode lead to an opposite swing, according to Professor Klapp's model. His wide-ranging conceptual scheme incorporates hypotheses about the variety and redundancy of information, as well as about human channel capacities and the need for homeostasis. His research reveals intriguing relationships among such phenomena as the concern about industrial population and the search for ethnic roots.

The papyrus Bremner-Rhind, (British Museum no. 10188) - Raymond Oliver Faulkner 1933

Faszination Bunker - Martin Kaule 2014

Im Laufe des 20. Jahrhunderts wurden in weiten Teilen Europas Bunkeranlagen errichtet. Martin Kaule dokumentiert militärische Zweck- und Funktionsbauten aus Beton, aber auch Anlagen, die während des Zweiten Weltkrieges für die Verlagerung der deutschen Rüstungsindustrie in den Untergrund entstanden sind, Luftschutzeinrichtungen für die Zivilbevölkerung sowie zahlreiche Anlagen des Kalten Krieges, die vom Wett-rüsten zwischen Ost und West zeugen. Neben 100 Bunkern in Deutschland werden auch mehr als 50 Objekte im europäischen Ausland vorgestellt - in prägnanten Texten und mit mehr als 350 aktuellen und historischen Fotos. Die Bauwerke werden in ihrer geschichtlichen und politischen Bedeutung sowie ihrer gegenwärtigen Funktion erläutert: Hochbunker, Tiefbunker, Stollensysteme für U-Boote und Flugzeuge oder weitläufige unterirdische Anlagen, die zum Teil noch heute nicht betreten werden dürfen. Einst streng geheime militärische Depots und Gefechtsstände oder verbunkerte Anlagen von Geheimdiensten werden hier erstmals präsentiert.
