The Secret - Sean Kelly & Ted Mann & Byron Preiss 2014-03-18

The tale begins over three-hundred years ago, when the Fair People—the goblins, fairies, dragons, and other fabled and fantastic creatures of a dozen lands—fled the Old World for the New, seeking haven from the ways of

Man. With them came their precious jewels: diamonds, rubies, emeralds, pearls... But then the Fair People vanished, taking with them their twelve fabulous treasures. And they remained hidden until now... Across North America, these twelve treasures, over ten-thousand dollars in precious jewels in 1982 dollars, are buried. The key to finding each can be found within the twelve full-color paintings and verses of **THE SECRET: A TREASURE HUNT** was published in 1982. The year before publication, the author and publisher Byron Preiss had traveled to 12 locations in the continental U.S. (and possibly Canada) to secretly bury a dozen ceramic casques. Each casque contained a small key that could be redeemed for one of 12 jewels Preiss kept in a safe deposit box in New York. The key to finding the casques was to match one of 12 paintings to one of 12 poetic verses, solve the resulting riddle, and start digging. Since 1982, only two of the 12 casques have been recovered. The first was located in Grant Park, Chicago, in 1984 by a group of students. The second was unearthed in 2004 in Cleveland by two members of the Quest4Treasure forum.

Citizens and Rulers of the World - Mahshid Mayar 2022-02-16

By delving into the complex, cross-generational exchanges that characterize any political project as rampant as empire, this thought-provoking study focuses on children and their ambivalent, intimate relationships with maps and practices of mapping at the dawn of the "American Century." Considering children as students, map and puzzle makers, letter writers, and playmates, Mahshid Mayar interrogates the ways turn-of-the-century American children encountered, made sense of, and produced spatial narratives and cognitive maps of the United States and the world. Mayar further probes how children's diverse patterns of consuming, relating to, and appropriating the "truths" that maps represent turned cartography into a site of personal and political contention. To investigate where in the world the United States imagined itself at the end of the nineteenth century, this book calls for new modes of mapping the United States as it studies the nation on regional, hemispheric, and global scales. By examining the multilayered liaison between imperial pedagogy and geopolitical literacy across a wide range of archival evidence, Mayar delivers a careful microhistorical study of U.S. empire.
