First 101 Words - Highlights Learning 2019-09-24

This oversized lift-the-flap board book of a child's first 101 words has big, clearly labeled photos of objects in a baby and toddler's world with an interactive puzzle activity on each spread. Identifying words and their meanings is an important foundational step in language development for babies and toddlers, and Highlights brings Fun with a Purpose® into this essential learning. Babies will love looking at and naming the photos in this sturdy book, while toddlers and parents will enjoy the lift-the-flap questions and answers that help them find the cute red bird hidden on each spread.

Radar Instruction Manual - United States. Maritime Administration 2005

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State

Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. Single Crystals of Electronic Materials - Roberto Fornari 2018-09

Single Crystals of Electronic Materials: Growth and Properties is a complete overview of the state of the art growth of bulk semiconductors. It is not only a valuable update of the body of information on crystal growth of well-established electronic materials such as silicon, III-V, II-VI and IV-VI semiconductors, but includes chapters on novel semiconductors including wide bandgap oxides (ZnO Ga2O3, In2O3, Al2O3), nitrides (AlN and GaN) and diamond. Each chapter focuses in-depth on a material, providing a comprehensive overview including: Applications and requirements of the electronic material Thermodynamic properties and definition of usable growth methods Schematics of growth methods for the material Description of up-to-date growth technologies and processes Tailoring of crystal properties via growth parameters Benefits of computer modelling Doping issues and reduction of defect density State-of-the art of the material New trends and future developments

Damnation Marked - SM Reine 2014-03-01

There's something in the earth deep below Elise Kavanagh's territory. A shadow is falling upon local demons to devour their flesh and harvest their souls. And it's coming for Elise next. The Union has an easy way out. They want to send Elise into hiding again with her former partner, James Faulkner. All she has to do is surrender the territory and trust that they can protect the ethereal ruins, the dark gate, and the city she's come to know as home. Greater powers have other plans for Elise and her fabled power as Godslayer-plans that mean surrendering her life and blood to the most powerful demon alive. But if she descends, there's no turning back. Once she gazes into the abyss, it will gaze back into her...and Elise will be damned forever.
