The sixteen contributions have been written by a team of international experts who collectively submit the newly proposed Rotterdam Rules to a sustained, penetrative and comprehensive analysis. The scale of the Rotterdam Rules is staggeringly wide, as also are their detail and complexity, and coming to a full understanding of the provisions and implications of the Rules represents a challenge even to those experienced in the law and practice of commercial shipping. This book examines virtually all aspects of the Rules and will provide an effective, reliable and readable guide to everyone seeking a complete grasp of the Rules.

Apollo 20. The Disclosure - Luca Scantamburlo 2010

Since April 2007, a whistleblower by the name of "retiredafb" has been shocking the general public with its disclosure: footages and comments posted on YouTube and Revver.com. He claims to be William Rutledge, and the Apollo 20 Commander for the USAF (August 1976). Luca Scantamburlo - ex journalist - has interviewed him and another YouTube user ("moonwalker1966delta") who claims to be a former NASA astronaut, and the Apollo 19 Commander (February 1976). Did these presumed secret joint US/USSR space missions take place indeed? The targets would have been

some lunar anomalies, on the far side of the Moon. The opinion of the Author is this amazing story contains some kernels of truth, behind the controversial strategy of disclosure (video fakes and misleading data are present). In the book there are the reasons for his opinion, the chronology of his research (with his Web articles already published), the interviews with the two alleged Commanders, and some revelations never published before.

Elder Law in Maryland 4th Edition - Jason A. Frank 2021-12-03

Encompasses Uniform Federal Law and the Unique Aspects of Maryland Law Even more than most areas of the law, elder law tends to be state specific. In Maryland, long-term medical care regulations, health care decision making, and guardianship are just a few of the areas in which state law cannot be subsumed in general statements of majority rules or hornbook law. Yet, at the same time, uniform federal law governs Social Security issues and various consumer protection statutes and housing assistance programs. Elder Law in Maryland provides guidance to both applicable federal law and the unique aspects of Maryland elder law. Practical, Comprehensive Guidance for the Maryland Practitioner In a single, concise volume, Elder Law in Maryland accurately renders elder law as it currently exists in

Organizational Immunity to Corruption -

Agata Stachowicz-Stanusch 2010-06-01

The current discussion about corruption in organizational studies is one of the most growing, most fertile and perhaps most fascinating ones. Corruption is also a construct that is multilevel and can be understood as being created and supported by social and cultural interaction. As a result, an ongoing dialogue on corruption permeates the levels of analysis and numerous research domains in organizational studies. Thus I see a major opportunity and necessity to look on corruption from a multilevel

and multicultural perspective. Second, in the global society of the world today where organizational boundaries are becoming increasingly transparent and during the Global Crisis, which has been rooted in unethical and corrupt behavior of large corporations, a deeper understanding of corruption, its forms, typologies, ways to increase organizational immunity and the best practices how to fight against corruption that are particularly significant and can also uncover it means that individuals, groups, organizations and whole societies can be used to sustain a sense of purpose, direction, meaning and the right way for creating a moral frame for the ethical behavior in the world of flux. Third, there is a growing pressure in the field of organizational studies and management to formulate theories that stimulate thinking of corruption, to change understanding of the phenomenon and, what is the most important, to carry out actions that produce valued outcomes. This exciting book

provides an authoritative and comprehensive overview of organizational corruption. It is an essential reference tool to carry out further research on corruption in organization. This book uncovers new theoretical insights that, I hope, will inspire new questions about corruption in organization; it also changes our understanding of the phenomenon and encourages further exploration and research. Contemporary Concert Diplomacy - Jung Karsten 2016-10-24

Two centuries after the Congress of Vienna formed the 'Concert of Europe', the great powers of the world once again assembled in Austria's capital in June 2015: This time they were negotiating an end to the nuclear standoff with Iran. These so-called EU-3+3 negotiations signify a broader trend: From Iran to North Korea, from the former Yugoslavia to Israel and Palestine, the great powers increasingly opt for exclusive and informal ad hoc formats in crisis management. Though lacking in aristocratic grandeur and festive surroundings, these context-specific, self-selected forums for policy-coordination in many ways resemble the

nineteenth-century 'Concert of Europe'. Why do the key actors in the contemporary international system consciously shun the standards of accountability and legitimacy represented by the post-war liberal institutional order? Why are they in favor of a more casual form of diplomacy that is not constrained by an inclusive membership, strict rules of procedure, and modern standards of transparency? This study rationalizes the popularity and assesses the viability of Contemporary Concert Diplomacy as a means for crisis management in the post-Cold War world. Drawing on a system-level analysis as well as four extensive case studies (the Yugoslavia Contact Group, the Middle East Quartet, the Six Party Talks with North Korea, and the EU-3+3 negotiations with Iran), it examines and explains the emergence, operation, and outcomes of Contemporary Concert Diplomacy. In doing so, it sheds light on a highly significant - but vastly understudied - instrument of crisis management. It thus proves

valuable to both, the student and practitioner of international affairs.

In Part II, *Information Sources and Their Use*, discussion of each source type has

been updated to encompass key resources in print and on the Web, where an increasing number of freely available sources join those purchased or licensed by libraries. A number of new authors are contributors to this new edition, bringing to their chapters their experience as teachers of reference and as practitioners in different types of libraries. Discussions of services in Part I integrate digital reference as appropriate to each topic, such as how to conduct a reference interview online using instant messaging. Boxes interspersed in the text are used to present scenarios for discussion, to highlight key concepts, or to present excerpts from important documents. Discussions of sources in Part II place more emphasis on designing effective search strategies using both print and digital resources. The chapter on selection and evaluation of sources addresses the changing nature of reference collections and how to evaluate new types of sources. Each chapter concludes with an updated list of

additional readings to guide further study. A new companion website will provide links to Web-accessible readings and resources as well as additional scenarios for discussion and example search strategies to supplement those presented in the text.
