Emotion and the Arts - Mette
Hjort 1997-09-04

The only work of its kind, this exciting collection assembles a number of analytically minded philosophers, psychologists, and literary theorists, all of whom seek to provide fine-grained accounts of critical problems having to do with emotion and art. How best to explain emotions produced by works of art? What goes on when we feel emotion for an abstract art such as music? How is it that we can intelligibly feel emotion for persons and situations that we know are fictional? What is involved in our empathic experience of negative emotion through the art of tragedy? A strongly interdisciplinary volume that captures the richness of current debates about the role of agency in human emotional response, this collection also considers the influence of culture on emotion and demonstrates that

cognitivist and social-constructivist perspectives need not be antagonistic and may actually work together in a complementary way. Essays cluster under four rubrics-- "The Paradox of Fiction", "Emotion and its Expression through Art", "The Rationality of Emotional Responses to Art", and "The Value of Emotion"-- and together they address questions of emotion in film, painting, music, dance, literature, and theater. With new work by leading thinkers in the field of aesthetics, and drawing upon state of the art scholarship from areas such as cognitive science, literary studies, and contemporary ethics, *Emotion and the Arts* is essential reading for those who study aesthetics, literature, theories of emotion, and the mind.

Marketing Modernism in Fin-
de-Siècle Europe - Robert
Jensen 2022-02-08

In this fundamental rethinking
of the rise of modernism from

its beginnings in the Impressionist movement, Robert Jensen reveals that market discourses were pervasive in the ideological defense of modernism from its very inception and that the avant-garde actually thrived on the commercial appeal of anti-commercialism at the turn of the century. The commercial success of modernism, he argues, depended greatly on possession of historical legitimacy. The very development of modern art was inseparable from the commercialism many of its proponents sought to transcend. Here Jensen explores the economic, aesthetic, institutional, and ideological factors that led to its dominance in the international art world by the early 1900s. He emphasizes the role of the emerging dealer/gallery market and of modernist art historiographies in evaluating modern art and legitimizing it through the formation of a canon of modernist masters. In describing the canon-building

of modern dealerships, Jensen considers the new "ideological dealer" and explores the commercial construction of artistic identity through such rhetorical concepts as temperament and "independent art" and through such institutional structures as the retrospective. His inquiries into the fate of the *juste milieu*, a group of dissidents who saw themselves as "true heirs" of Impressionism, and his look at a new form of art history emerging in Germany further expose a linear, dealer-oriented history of modernist art constructed by or through the modernists themselves.

depth exploration of Bouguereau's overwhelming popularity in turn-of-the-century America and the ways that his work--widely known from reviews, exhibitions, and inexpensive reproductions--resonated with the American public. While also lauded by the French artistic establishment and a dominant presence at the Parisian Salons, Bouguereau achieved his greatest success selling his idealized and polished paintings to a voracious American market. In this book, the authors discuss how the artist's sensual classical maidens, Raphaellesque Madonnas, and pristine peasant children embodied the tastes of American Gilded Age patrons, and how Bouguereau's canvases persuasively functioned as freshly painted Old Masters for collectors flush with new money"--

Dream States - Jennifer Laurie Shaw 2002-01-01

"This illustrated book is the first full-length examination of Puvis's murals and their critical reception during the artist's lifetime. Jennifer L. Shaw explains that Puvis's paintings were imagined to embody a vision of France. Although his regional images, allegories of the French heritage, and evocations of the nation as an embracing motherland were all part of a grand tradition of public art, Puvis's painting style was more closely aligned with the avant-garde. Rather than providing a specific narrative or allegory of France, Puvis's murals provoked viewers to experience their

own fantasies of Frenchness; rather than using the close brushwork favored by most of his contemporaries, Puvis used large, flat areas of color to render his subjects. Shaw persuasively argues that Puvis was the only painter of the period to unite the traditions of public art and modernist form. Her original analysis of Puvis's art underlines his importance to the history of modernism; her examination of the public response to his art illuminates debates about art, subjectivity, and national identity in fin-de-siecle France."--BOOK JACKET. *Bouguereau* - William Adolphe Bouguereau 1989

Rivals and Conspirators - Fae Brauer 2014-07-08

Once the State-run Salon in Paris closed, an array of independent Salons mushroomed starting with the French Artists Salon and Women's Salon in 1881 followed by the Independent Artists' Salon, National Salon of Fine Arts and Autumn Salon. Offering an unparalleled choice of art identities and alliances, together with undreamed-of opportunities for sales, commissions, prizes and art criticism, these great Salons guaranteed the centripetal and centrifugal power of Paris as the "modern art centre". Lured by the prospect of being exhibited annually in Salons the size of Biennales today, a huge number and national diversity of artists, from the Australian Rupert Bunny to the Spaniards Pablo Picasso and

Downloaded from
omahafoodtruckassociation.org

Juan Gris, flocked to Paris. Yet by no means were these Salons equal in power, nor did they work consensually to forge this “modern art centre”. Formed on the basis of their different cultural politics, constantly they rivalled one another for State acquisitions and commissions, exhibition places and spaces, awards, and every other means of enhancing their legitimacy. By no means were the avant-garde salons those that most succeeded. Instead, as this culturo-political history demonstrates, the French Artists’ and National Fine Art Salons were the most successful, with the genderist French Artists’ Salon being the most powerful and “official”. Despite the renown today of Neo-Impressionism, Art Nouveau, Fauvism, Cubism and Orphism, the most powerful artists in this “modern art centre” were not Sonia Delaunay, Émile Gallé, Paul Signac, Henri Matisse or even Picasso but such Academicians as Léon Bonnat, William Bouguereau, Fernand Cormon, Edouard Detaille, Gabriel

Ferrier, Jean-Paul Laurens, Luc-Oliver Merson and Aimé Morot, who exhibited at the “official” Salon supported by the machinery of the State. In its exposure of the rivalry, conflict and struggle between the Salons and their artists, this is an unprecedented history of dissension. It also exposes how, just below the welcoming internationalist veneer of this “modern art centre”, intense persecutionist paranoia lay festering. Whenever France’s “civilizing mission” seemed culturally, commercially or colonially threatened, it erupted in waves of nationalist xenophobia turning artistic rivalry into bitter enmity. In exposing how rivals became transmuted into conspirators, ultimately this book reveals a paradox resonant in histories that celebrate the international triumph of French modern art: that this magnetic “centre”, which began by welcoming international modernists, ended by attacking them for undermining its cultural supremacy, contaminating its

“civilizing mission” and politically persecuting the very modernist culture for which it has received historical renown.

representation. A skilled craftsman and master of human anatomy, he utilized a delicate palette and glorious light to sensitively capture nuances of personality and mood, vibrantly bringing the soul and spirit of his subjects to life. Bouguereau has left a large number of works and he is undoubtedly a key figure in 19th century French art. Although his work was widely collected by the English and more especially by the Americans in his lifetime, Bouguereau's reputation in France was more indistinct—indeed quite low—in his later years. He remained a hard supporter of the academic training system at a time when it was criticized for stifling originality and nurturing mediocrity.

The Essential Works of William Bouguereau - Kara

Lysandra Ross 2018-10-24

- Showcases the work of a realist artist whose work is enjoying a revival - Explores Bouguereau's work in new depth, with expert insight into his most important paintings William Bouguereau, the most popular artist in nineteenth-century France, is rapidly becoming one of the most popular realist artists of all time. This book is an exploration of the four main types of paintings that were most prevalent throughout Bouguereau's body of work. This includes his mythological works, religious works, peasants, and portraits. This final section on portraits focuses on paintings of heads and hands, which gave the artist the opportunity to concentrate on the subtleties of capturing human emotion, something at which the artist was a consummate master, and is a primary factor in what makes his works, in general, so

compelling. Although each section of the book discusses the importance of the individual genera within Bouguereau's oeuvre, and includes painting analyses to highlight his most important works, this book is a true showcase of the master's lifetime achievement through beautifully illustrated full-page plates of over 120 of his greatest masterpieces.
