Forgetting August - J.L. Berg 2015-12-01

She can forgive, but can she forget? Some days, Everly still thinks she
sees him. In the food court at the mall, or in a car speeding past as the
light changes. It only lasts a second, but when it happens, she slips back
to a time when she was ruled-and nearly ruined-by August Kincaid. And it
doesn't matter that she's moved on, that she's about to marry another
man. In those moments the only thing she can do to regain control is take
a deep breath and remind herself that August can't hurt her-because he's
in a coma. Except that he's not anymore. August is awake. With no
memories, he sets out to solve the mystery of his lost life. He unearths a
photograph of a beautiful redhead named Everly and knows instinctively
that she's the key. But when he finds her, the August she describes is
more monster than man. Tortured by the thought of having hurt her,
August wants only to become the man Everly deserves. As the new
August emerges, Everly glimpses the person she first fell in love with.

But can she trust that this August is real? When the final secret of their shared past is revealed, one of them will make a choice that changes their future forever . . .

Delete - Viktor Mayer-Schönberger 2011-07-05

The hazards of perfect memory in the digital age Delete looks at the surprising phenomenon of perfect remembering in the digital age, and reveals why we must reintroduce our capacity to forget. Digital technology empowers us as never before, yet it has unforeseen consequences as well. Potentially humiliating content on Facebook is enshrined in cyberspace for future employers to see. Google remembers everything we've searched for and when. The digital realm remembers what is sometimes better forgotten, and this has profound implications for us all. In Delete, Viktor Mayer-Schönberger traces the important role that forgetting has played throughout human history, from the ability to make sound decisions unencumbered by the past to the possibility of second chances. The written word made it possible for humans to remember across generations and time, yet now digital technology and global networks are overriding our natural ability to forget—the past is ever present, ready to be called up at the click of a mouse. Mayer-Schönberger examines the technology that's facilitating the end of forgetting—digitization, cheap storage and easy retrieval, global access, and increasingly powerful software—and describes the dangers of everlasting digital memory, whether it's outdated information taken out of context or compromising photos the Web won't let us forget. He explains why information privacy rights and other fixes can't help us, and proposes an ingeniously simple solution—expiration dates on information—that may. Delete is an eye-opening book that will help us remember how to forget in the digital age.

Seeing Is Forgetting the Name of the Thing One Sees - Lawrence Weschler 2008

"Robert Irwin, perhaps the most influential of the California artists, moved from his beginnings in abstract expressionism through successive shifts in style and sensibility, into a new aesthetic territory altogether, one where philosophical concepts of perception and the world interact.

Weschler has charted the journey with exceptional clarity and cogency. He has also, in the process, provided what seems to me the best running history of postwar West Coast art that I have yet seen."—Calvin Tomkins

Eva Traube Abrams, a semiretired librarian in Florida, is at the returns desk one morning when her eyes lock on to a photograph in a newspaper nearby. She freezes; it's an image of a book she hasn't seen in sixty-five years—a book she recognizes as *The Book of Lost Names*. The accompanying article describes the looting of libraries across Europe by the Nazis during World War II—an experience Eva remembers all too well. As a graduate student in 1942, Eva was forced to flee Paris after the arrest of her father, a Polish Jew. Finding refuge in a small mountain

town in the Free Zone, she begins forging identity documents for Jewish children fleeing to neutral Switzerland. But erasing people comes with a price, and along with a mysterious, handsome forger named Rémy, Eva decides she must find a way to preserve the real names of the children who are too young to remember who they really are. The records they keep in the *Book of Last Names* will become even more vital when the Resistance cell they work with is betrayed and Rémy disappears. As the Germans close in, Eva records a last, vital message in the book. Decades later, does she have the strength to seek out its answer—and help reunite those lost during the war?

The Dictionary of Obscure Sorrows - John Koenig 2021-11-16

NEW YORK TIMES BESTSELLER “It’s undeniably thrilling to find words for our strangest feelings...Koenig casts light into lonely corners of human experience...An enchanting book.” —The Washington Post A truly original book in every sense of the word, *The Dictionary of Obscure Sorrows* poetically defines emotions that we all feel but don’t have the words to express—until now. Have you ever wondered about the lives of each person you pass on the street, realizing that everyone is the main character in their own story, each living a life as vivid and complex as your own? That feeling has a name: “sonder.” Or maybe you’ve watched a thunderstorm roll in and felt a primal hunger for disaster, hoping it would shake up your life. That’s called “lachesism.” Or you were looking through old photos and felt a pang of nostalgia for a time you’ve never

actually experienced. That's "anemoia." If you've never heard of these terms before, that's because they didn't exist until John Koenig set out to fill the gaps in our language of emotion. The Dictionary of Obscure Sorrows "creates beautiful new words that we need but do not yet have," says John Green, bestselling author of *The Fault in Our Stars*. By turns poignant, relatable, and mind-bending, the definitions include whimsical etymologies drawn from languages around the world, interspersed with otherworldly collages and lyrical essays that explore forgotten corners of the human condition—from "astrophe," the longing to explore beyond the planet Earth, to "zenosyne," the sense that time keeps getting faster. The Dictionary of Obscure Sorrows is for anyone who enjoys a shift in perspective, pondering the ineffable feelings that make up our lives. With a gorgeous package and beautiful illustrations throughout, this is the perfect gift for creatives, word nerds, and human beings everywhere.

A Primer for Forgetting - Lewis Hyde 2019-06-18

"One of our true superstars of nonfiction" (David Foster Wallace), Lewis Hyde offers a playful and inspiring defense of forgetfulness by exploring the healing effect it can have on the human psyche. We live in a culture that prizes memory—how much we can store, the quality of what's preserved, how we might better document and retain the moments of our

life while fighting off the nightmare of losing all that we have experienced. But what if forgetfulness were seen not as something to fear—be it in the form of illness or simple absentmindedness—but rather as a blessing, a balm, a path to peace and rebirth? *A Primer for Forgetting* is a remarkable experiment in scholarship, autobiography, and social criticism by the author of the classics *The Gift and Trickster Makes This World*. It forges a new vision of forgetfulness by assembling fragments of art and writing from the ancient world to the modern, weighing the potential boons forgetfulness might offer the present moment as a creative and political force. It also turns inward, using the author's own life and memory as a canvas upon which to extol the virtues of a concept too long taken as an evil. Drawing material from Hesiod to Jorge Luis Borges to Elizabeth Bishop to Archbishop Desmond Tutu, from myths and legends to very real and recent traumas both personal and historical, *A Primer for Forgetting* is a unique and remarkable synthesis that only Lewis Hyde could have produced.

The Seven Sins of Memory - Daniel L. Schacter 2002-05-07

A New York Times Notable Book: A psychologist's "gripping and thought-provoking" look at how and why our brains sometimes fail us (Steven Pinker, author of *How the Mind Works*). In this intriguing study, Harvard psychologist Daniel L. Schacter explores the memory miscues that occur in everyday life, placing them into seven categories: absent-mindedness, transience, blocking, misattribution, suggestibility, bias, and persistence. Illustrating these concepts with vivid examples—case studies, literary excerpts, experimental evidence, and accounts of highly visible news events such as the O. J. Simpson verdict, Bill Clinton's grand jury testimony, and the search for the Oklahoma City bomber—he also delves into striking new scientific research, giving us a glimpse of the fascinating neurology of memory and offering "insight into common malfunctions of the mind" (*USA Today*). "Though memory failure can amount to little more than a mild annoyance, the consequences of misattribution in eyewitness testimony can be devastating, as can the consequences of suggestibility among pre-school children and among adults with 'false memory syndrome' . . . Drawing upon recent

neuroimaging research that allows a glimpse of the brain as it learns and remembers, Schacter guides his readers on a fascinating journey of the human mind.” —Library Journal “Clear, entertaining and provocative . . . Encourages a new appreciation of the complexity and fragility of memory.” —The Seattle Times “Should be required reading for police, lawyers, psychologists, and anyone else who wants to understand how memory can go terribly wrong.” —The Atlanta Journal-Constitution “A fascinating journey through paths of memory, its open avenues and blind alleys . . . Lucid, engaging, and enjoyable.” —Jerome Groopman, MD “Compelling in its science and its probing examination of everyday life, *The Seven Sins of Memory* is also a delightful book, lively and clear.”

—Chicago Tribune Winner of the William James Book Award

The Story of Forgetting - Stefan Merrill Block 2008-04-01

In Stefan Merrill Block’s extraordinary debut, three narratives intertwine to create a story that is by turns funny, smart, introspective, and revelatory. Abel Haggard is an elderly hunchback who haunts the remnants of his family’s farm in the encroaching shadow of the Dallas suburbs, adrift in recollections of those he loved and lost long ago. As a young man, he believed himself to be “the one person too many”; now he is all that remains. Hundreds of miles to the south, in Austin, Seth Waller is a teenage “Master of Nothingness”—a prime specimen of that gangly, pimple-rashed, too-smart breed of adolescent that vanishes in a puff of sarcasm at the slightest threat of human contact. When his mother is diagnosed with a rare form of early-onset Alzheimer’s, Seth sets out on a quest to find her lost relatives and to conduct an “empirical investigation” that will uncover the truth of her genetic history. Though neither knows of the other’s existence, Abel and Seth are linked by a dual legacy: the disease that destroys the memories of those they love, and the story of Isidora—an edenic fantasy world free from the sorrows of remembrance, a land without memory where nothing is ever possessed, so nothing can be lost. Through the fusion of myth, science, and storytelling, this novel offers a dazzling illumination of the hard-learned truth that only through the loss of what we consider precious can we understand the value of what remains.

The Memory Illusion - Dr Julia Shaw 2016-06-16

THE INTERNATIONAL BESTSELLER 'Truly fascinating.' Steve Wright, BBC Radio 2 - Have you ever forgotten the name of someone you’ve met dozens of times? - Or discovered that your memory of an important event was completely different from everyone else’s? - Or vividly recalled being in a particular place at a particular time, only to discover later that you couldn’t possibly have been? We rely on our memories every day of our lives. They make us who we are. And yet the truth is, they are far from being the accurate record of the past we like to think they are. In *The Memory Illusion*, forensic psychologist and memory expert Dr Julia Shaw draws on the latest research to show why our memories so often play tricks on us - and how, if we understand their fallibility, we can actually improve their accuracy. The result is an exploration of our minds that both fascinating and unnerving, and that will make you question how much you can ever truly know about yourself. Think you have a good memory? Think again. 'A spryly paced, fun, sometimes frightening exploration of how we remember - and why everyone remembers things that never truly happened.' Pacific Standard

In his most extraordinary book, the bestselling author of *Awakenings* and “poet laureate of medicine” (*The New York Times*) recounts the case histories of patients inhabiting the compelling world of neurological disorders, from those who are no longer able to recognize common objects to those who gain extraordinary new skills. Featuring a new preface, Oliver Sacks’s *The Man Who Mistook His Wife for a Hat* tells the stories of individuals afflicted with perceptual and intellectual disorders: patients who have lost their memories and with them the greater part of their pasts; who are no longer able to recognize people and common objects; whose limbs seem alien to them; who lack some skills yet are gifted with uncanny artistic or mathematical talents. In Dr. Sacks’s

splendid and sympathetic telling, his patients are deeply human and his tales are studies of struggles against incredible adversity. A great healer, Sacks never loses sight of medicine's ultimate responsibility: "the suffering, afflicted, fighting human subject."

The Book of M - Peng Shepherd 2018-06-05

Brad Thor's Summer 2018 Fiction Pick for THE TODAY SHOW! "Eerie, dark, and compelling, [The Book of M] will not disappoint lovers of The Passage (2010) and Station Eleven (2014)." --Booklist WHAT WOULD YOU GIVE UP TO REMEMBER? Set in a dangerous near future world, The Book of M tells the captivating story of a group of ordinary people caught in an extraordinary catastrophe who risk everything to save the ones they love. It is a sweeping debut that illuminates the power that memories have not only on the heart, but on the world itself. One afternoon at an outdoor market in India, a man's shadow disappears—an occurrence science cannot explain. He is only the first. The phenomenon spreads like a plague, and while those afflicted gain a strange new power, it comes at a horrible price: the loss of all their memories. Ory and his wife Max have escaped the Forgetting so far by hiding in an abandoned hotel deep in the woods. Their new life feels almost normal, until one day Max's shadow disappears too. Knowing that the more she forgets, the more dangerous she will become to Ory, Max runs away. But Ory refuses to give up the time they have left together. Desperate to find Max before her memory disappears completely, he follows her trail across a perilous, unrecognizable world, braving the threat of roaming bandits, the call to a new war being waged on the ruins of the capital, and the rise of a sinister cult that worships the shadowless. As they journey, each searches for answers: for Ory, about love, about survival, about hope; and for Max, about a new force growing in the south that may hold the cure. Like The Passage and Station Eleven, this haunting,

seeing-is-forgetting-the-name-of-the-thing-one-see

thought-provoking, and beautiful novel explores fundamental questions of memory, connection, and what it means to be human in a world turned upside down.

'On its more radical fringes, modern art merges with modern philosophy, and this excellent, provocative profile...points up the extent to which the act of perception, rather than any specific objects, has become the

The Forgetting River - Doreen Carvajal 2013-08-06

The unexpected and moving story of an American journalist who works to uncover her family's long-buried Jewish ancestry in Spain. Raised a Catholic in California, New York Times journalist Doreen Carvajal is shocked when she discovers that her background may actually be connected to conversos from Inquisition-era Spain: Jews who were forced to renounce their faith and convert to Christianity or face torture and death. With vivid childhood memories of Sunday sermons, catechism, and the rosary, Carvajal travels to the centuries-old Andalucian town of Arcos de la Frontera, to investigate her lineage and recover her family's original religious heritage. In Arcos, Carvajal comes to realize that fear remains a legacy of the Inquisition along with the cryptic messages left by its victims. Back at her childhood home in California, she uncovers papers documenting a family of Carvajals who were burned at the stake in the 16th-century territory of Mexico. Could the author's family history be linked to the hidden history of Arcos? And could the unfortunate Carvajals have been her ancestors? As she strives to find proof that her family had been forced to convert to Christianity six hundred years ago, Carvajal comes to understand that the past flows like a river through time—and that while the truth might be submerged, it is never truly lost.

Burnt Sugar - Avni Doshi 2021-01-26

Shortlisted for the 2020 Booker Prize, a searing literary debut novel set in India about mothers and daughters, obsession and betrayal "I would be lying if I say my mother's misery has never given me pleasure," says Antara, Tara's now-adult daughter. This is a love story and a story about betrayal—not between lovers but between a mother and a daughter. . . . In her youth, Tara was wild. She abandoned her arranged marriage to join an ashram, embarked on a stint as a beggar (mostly to spite her affluent parents), and spent years chasing a disheveled, homeless

"artist," all with little Antara in tow. But now Tara is forgetting things, and Antara is an adult—an artist and married—and must search for a way to make peace with a past that haunts her as she confronts the task of caring for a woman who never cared for her. Sharp as a blade and laced with caustic wit, Burnt Sugar unpicks the slippery, choking cord of memory and myth that binds mother and daughter: Is Tara's memory loss real? Are Antara's memories fair? In vivid and visceral prose, Avni Doshi tells a story at once shocking and empathetic of a mother-daughter relationship and a daughter's search for self. A journey into shifting memories, altering identities, and the subjective nature of truth, Burnt Sugar is the stunning and unforgettable debut of a major new voice in contemporary fiction.

Memory, History, Forgetting - Paul Ricoeur 2009-01-01

Why do major historical events such as the Holocaust occupy the forefront of the collective consciousness, while profound moments such as the Armenian genocide, the McCarthy era, and France's role in North Africa stand distantly behind? Is it possible that history "overly remembers" some events at the expense of others? A landmark work in philosophy, Paul Ricoeur's *Memory, History, Forgetting* examines this reciprocal relationship between remembering and forgetting, showing how it affects both the perception of historical experience and the production of historical narrative. *Memory, History, Forgetting*, like its title, is divided into three major sections. Ricoeur first takes a phenomenological approach to memory and mnemonical devices. The underlying question here is how a memory of present can be of something absent, the past. The second section addresses recent work by historians by reopening the question of the nature and truth of historical knowledge. Ricoeur explores whether historians, who can write a history of memory, can truly break with all dependence on memory, including memories that resist representation. The third and final section is a profound meditation on the necessity of forgetting as a condition for the possibility of remembering, and whether there can be something like happy forgetting in parallel to happy memory. Throughout the book there are careful and close readings of the texts of Aristotle and Plato, of

Descartes and Kant, and of Halbwachs and Pierre Nora. A momentous achievement in the career of one of the most significant philosophers of our age, Memory, History, Forgetting provides the crucial link between Ricoeur's Time and Narrative and Oneself as Another and his recent reflections on ethics and the problems of responsibility and representation. "His success in revealing the internal relations between recalling and forgetting, and how this dynamic becomes problematic in light of events once present but now past, will inspire academic dialogue and response but also holds great appeal to educated general readers in search of both method for and insight from considering the ethical ramifications of modern events. . . . It is indeed a master work, not only in Ricoeur's own vita but also in contemporary European philosophy."—Library Journal "Ricoeur writes the best kind of philosophy—critical, economical, and clear."— New York Times Book Review

Seeing is Forgetting the Name of the Thing One Sees - Lawrence Weschler 2008

When this book first appeared in 1982, it introduced readers to Robert Irwin, the Los Angeles artist who one day got hooked on his own curiosity and decided to live it. Now expanded to include six additional chapters and twenty-four pages of color plates, *Seeing Is Forgetting the Name of the Thing One Sees* chronicles three decades of conversation between Lawrence Weschler and light and space master Irwin. It surveys many of Irwin's site-conditioned projects--in particular the Central Gardens at the Getty Museum (the subject of an epic battle with the site's principal architect, Richard Meier) and the design that transformed an abandoned Hudson Valley factory into Dia's new Beacon campus--enhancing what many had already considered the best book ever on an artist.

The Forgetting - Sharon Cameron 2016-09-13

From beloved author of *Rook* comes a brilliant and genre-bending exploration of truth and memory, love and loss in this remarkable story of a civilization that undergoes a collective forgetting. What isn't written, isn't remembered. Even your crimes. Nadia lives in the city of Canaan,

where life is safe and structured, hemmed in by white stone walls and no memory of what came before. But every twelve years the city descends into the bloody chaos of the Forgetting, a day of no remorse, when each person's memories -- of parents, children, love, life, and self -- are lost. Unless they have been written. In Canaan, your book is your truth and your identity, and Nadia knows exactly who hasn't written the truth. Because Nadia is the only person in Canaan who has never forgotten. But when Nadia begins to use her memories to solve the mysteries of Canaan, she discovers truths about herself and Gray, the handsome glassblower, that will change her world forever. As the anarchy of the Forgetting approaches, Nadia and Gray must stop an unseen enemy that threatens both their city and their own existence -- before the people can forget the truth. And before Gray can forget her.

In Love - Amy Bloom 2022-03-08

NEW YORK TIMES BESTSELLER • A powerful memoir of a love that leads two people to find a courageous way to part—and a woman's struggle to go forward in the face of loss—that "enriches the reader's life with urgency and gratitude" (The Washington Post) "A pleasure to read . . . Rarely has a memoir about death been so full of life. . . . Bloom has a talent for mixing the prosaic and profound, the slapstick and the serious."—USA Today ONE OF THE BEST BOOKS OF THE YEAR: NPR Amy Bloom began to notice changes in her husband, Brian: He retired early from a new job he loved; he withdrew from close friendships; he talked mostly about the past. Suddenly, it seemed there was a glass wall between them, and their long walks and talks stopped. Their world was altered forever when an MRI confirmed what they could no longer ignore: Brian had Alzheimer's disease. Forced to confront the truth of the diagnosis and its impact on the future he had envisioned, Brian was determined to die on his feet, not live on his knees. Supporting each other in their last journey together, Brian and Amy made the unimaginably difficult and painful decision to go to Dignitas, an organization based in Switzerland that empowers a person to end their own life with dignity and peace. In this heartbreaking and surprising memoir, Bloom sheds light on a part of life we so often shy away from

discussing—its ending. Written in Bloom’s captivating, insightful voice and with her trademark wit and candor, *In Love* is an unforgettable portrait of a beautiful marriage, and a boundary-defying love.

The Forgetting - David Shenk 2003-01-14

NATIONAL BESTSELLER A powerfully engaging, scrupulously researched, and deeply empathetic narrative of the history of Alzheimer’s disease, how it affects us, and the search for a cure. Afflicting nearly half of all people over the age of 85, Alzheimer’s disease kills nearly 100,000 Americans a year as it insidiously robs them of their memory and wreaks havoc on the lives of their loved ones. It was once minimized and misunderstood as forgetfulness in the elderly, but Alzheimer’s is now at the forefront of many medical and scientific agendas, for as the world’s population ages, the disease will touch the lives of virtually everyone. David Shenk movingly captures the disease’s impact on its victims and their families, and he looks back through history, explaining how Alzheimer’s most likely afflicted such figures as Jonathan Swift, Ralph Waldo Emerson, and Willem de Kooning. The result is a searing and graceful account of Alzheimer’s disease, offering a sobering, compassionate, and ultimately encouraging portrait.

Remember - Lisa Genova 2021-03-23

NEW YORK TIMES BESTSELLER • A fascinating exploration of the intricacies of how we remember, why we forget, and what we can do to protect our memories, from the Harvard-trained neuroscientist and bestselling author of *Still Alice*. “Using her expertise as a neuroscientist and her gifts as a storyteller, Lisa Genova explains the nuances of human memory”—Steven Pinker, Johnstone Professor of Psychology, Harvard University, author of *How the Mind Works* Have you ever felt a crushing wave of panic when you can't for the life of you remember the name of that actor in the movie you saw last week, or you walk into a room only to forget why you went there in the first place? If you're over forty, you're probably not laughing. You might even be worried that these lapses in memory could be an early sign of Alzheimer's or dementia. In reality, for the vast majority of us, these examples of forgetting are completely normal. Why? Because while memory is amazing, it is far

from perfect. Our brains aren't designed to remember every name we hear, plan we make, or day we experience. Just because your memory sometimes fails doesn't mean it's broken or succumbing to disease. Forgetting is actually part of being human. In *Remember*, neuroscientist and acclaimed novelist Lisa Genova delves into how memories are made and how we retrieve them. You'll learn whether forgotten memories are temporarily inaccessible or erased forever and why some memories are built to exist for only a few seconds (like a passcode) while others can last a lifetime (your wedding day). You'll come to appreciate the clear distinction between normal forgetting (where you parked your car) and forgetting due to Alzheimer's (that you own a car). And you'll see how memory is profoundly impacted by meaning, emotion, sleep, stress, and context. Once you understand the language of memory and how it functions, its incredible strengths and maddening weaknesses, its natural vulnerabilities and potential superpowers, you can both vastly improve your ability to remember and feel less rattled when you inevitably forget. You can set educated expectations for your memory, and in doing so, create a better relationship with it. You don't have to fear it anymore. And that can be life-changing.
