Luigi Ghirri - Maria Antonella Pelizzari 2018
Luigi Ghirri was an extraordinary photographer, as well as a writer and curator whose career was so rich and varied that it seems like a lesson in the contemporary history of the medium.

Although well known in his native Italy, Ghirri does not yet have the international audience his work merits--perhaps because he died so young. "It's Beautiful Here, Isn't It..."--the first book published on Ghirri in the U.S.--will establish

him as the seminal artist he was. Uncannily prescient, Ghirri shared the sensibility of what became known in the U.S. as the New Color and the New Topographics movements before they had even been named. Like his counterparts in Italian cinema, Ghirri believed that the local and the universal were inseparable and that life's polarities--love and hate, present and past--were equally compelling. Not surprisingly, his interests encompassed all the arts: he worked in Giorgio Morandi's studio and with architect Aldo Rossi, while influencing a generation of photographers, including Olivo Barbieri and Martin Parr. This dynamic new book includes a selection of Ghirri's essays published in English for the first time, as well as a selected chronology.

[The Moment It Clicks](#) - Joe McNally 2008-01-23
THE FIRST BOOK WITH ONE FOOT ON THE COFFEE TABLE, AND ONE FOOT IN THE CLASSROOM Joe McNally, one of the world's top pro digital photographers, whose celebrated

work has graced the pages of Sports Illustrated, Time, and National Geographic (to name a few), breaks new ground by doing something no photography book has ever done—blending the rich, stunning images and elegant layout of a coffee-table book with the invaluable training, no-nonsense insights, and photography secrets usually found only in those rare, best-of-breed educational books. When Joe's not on assignment for the biggest-name magazines and Fortune 500 clients, he's in the classroom teaching location lighting, environmental portraiture, and how to “get the shot” at workshops around the world. These on-location workshops are usually reserved for a handful of photographers each year, but now you can learn the same techniques that Joe shares in his seminars and lectures in a book that brings Joe's sessions to life. What makes the book so unique is the “triangle of learning” where (1) Joe distills the concept down to one brief sentence. It usually starts with something like, “An editor at

National Geographic once told me...” and then he shares one of those hard-earned tricks of the trade that you only get from spending a lifetime behind the lens. Then, (2) on the facing page is one of Joe’s brilliant images that perfectly illustrates the technique (you’ll recognize many of his photos from magazine covers). And (3) you get the inside story of how that shot was taken, including which equipment he used (lens, f/stop, lighting, accessories, etc.), along with the challenges that type of project brings, and how to set up a shot like that of your own. This book also gives you something more. It inspires. It challenges. It informs. But perhaps most importantly, it will help you understand photography and the art of making great photos at a level you never thought possible. This book is packed with those “Ah ha!” moments—those clever insights that make it all come together for you. It brings you that wonderful moment when it suddenly all makes sense—that “moment it clicks.”

Understanding Close-Up Photography -

Bryan Peterson 2009-03-31

In his sixth book, renowned photographer, popular instructor, and best-selling author Bryan Peterson challenges and inspires us to see close-up photography in new ways when we view it through his eyes. You’ve seen the dewdrops, but what about dewdrops on a bird’s wing or raindrops on a car windshield? You’ve seen the bumblebees on vibrant flowers, but what about the fluid edge of just one petal or the colorful rusting metal at industrial sites? Even when Peterson does capture the more traditional subjects, it’s done in untraditional ways—and often with minimal specialized equipment! Most important, he moves beyond the commonplace to inspire new ways of getting close, using your lenses, and discovering unconventional subjects.

Touchscreen Archaeology - Wanda Strauven

2021-05-17

The touchscreen belongs to a century-long history of hands-on media practices and

touchable art objects. This media-archaeological excavation examines the nature of our sensual involvement with media and invites the reader to think about the touchscreen beyond its technological implications. In six chapters, the book questions and historicizes both aspects of the touchscreen, considering "touch" as a media practice and "screen" as a touchable object.

Time On My Hands - Giorgio Vasta 2013-06-18
Palermo, Sicily, 1978. The Christian Democrat leader Aldo Moro has just been kidnapped in Rome by members of the notorious Red Brigades. Two months after his disappearance on 9th May, Moro is found dead in the boot of a car. A trio of eleven-year-old schoolboys, Nimbo, Raggio, and Volo, avidly follow the news of the abduction as their admiration for the brigatisti grows. When the boys themselves resolve to abduct a classmate and incarcerate him in a makeshift 'people's prison', the darkness within their world, and the world of the novel, becomes all-pervasive. A vivid and hellish description of

Sicily in the late seventies, *Time on my Hands* is an unforgettable novel from a significant new voice in Italian fiction.

In the sequel, *The Photographer's Mind*, he explained the way that professional photographers think a picture through before taking it. Both of these international best-sellers featured Michael's own photography: stunning landscapes, revealing portraits, and fascinating street photography. Now, in *The Photographer's Vision*, he examines the work of photography's greats, explaining how to look at a photo ? and how to learn from looking at it. The featured work includes some of the most distinguished names in photography's history: Nick Knight, Frederick Henry Evans, Frans Lanting, Tim Page, Wolfgang Tillmans, Nan Goldin, Paul Outerbridge, Walker Evans, Cindy Sherman, Elliott Erwitt, Trent Parke, Jeff Wall, Paul Strand, Romano Cagnoni, Horst Faas, James Casebere and many more, making this book visually stunning as well as intellectually authoritative.

The Hot Shoe Diaries - Joe McNally 2009-03-03
When it comes to photography, it's all about the light. After spending more than thirty years behind the lens—working for National Geographic, Time, Life, and Sports Illustrated—Joe McNally knows about light. He knows how to talk about it, shape it, color it, control it, and direct it. Most importantly, he knows how to create it...using small hot shoe flashes. In *The Hot Shoe Diaries*, Joe brings you behind the scenes to candidly share his lighting solutions for a ton of great images. Using Nikon Speedlights, Joe lets you in on his uncensored thought process—often funny, sometimes serious, always fascinating—to demonstrate how he makes his pictures with these small flashes. Whether he's photographing a gymnast on the Great Wall, an alligator in a swamp, or a fire truck careening through Times Square, Joe uses these flashes to create great light that makes his pictures sing.

Post-Digital Print - Alessandro Ludovico
2019-04-23

Digital technology is now a normal part of everyday life. The mutation of music and film into bits and bytes, downloads and streams is now taken for granted. For the world of book and magazine publishing however, this transformation has only just begun. Still, the vision of this transformation is far from new. For more than a century now, avant-garde artists, activists and technologists have been anticipating the development of networked and electronic publishing. Although in hindsight the reports of the death of paper were greatly exaggerated, electronic publishing has now certainly become a reality. How will the analog and the digital coexist in the post-digital age of publishing? How will they transition, mix and cross over? In this book, Alessandro Ludovico

fotografare-la-luce-esplorare-le-infinite-possibi

rereads the history of the avant-garde arts as a prehistory of cutting through the so-called dichotomy between paper and electronics. Ludovico is the editor and publisher of *Neural*, a magazine for critical digital culture and media arts. For more than 20 years now, he has been working at the cutting edge (and the outer fringes) of both print publishing and politically engaged digital art.

FOTOGRAFARE LA LUCE - Joe McNally

2013-02-08

Da 35 anni Joe McNally crea fotografie che raccontano delle storie. Le sue immagini, di volta in volta drammatiche, sottili, energiche, gioiose, toccanti, misteriose, sono eterogenee quanto gli approcci alla loro illuminazione. In Fotografare la luce, Joe vi porta dietro le quinte per spiegare le sue soluzioni per l'illuminazione di decine di fotografie. Ciò che rende unico questo libro, però, è che verrete guidati oltre le aride cifre per scoprire come far funzionare la luce in relazione alle foto. Fotografare la luce tratta di flash grandi e piccoli, e inizia con la dimostrazione delle tecniche di illuminazione di base, dei diffusori e delle soluzioni a flash singolo, per poi passare alla disamina delle singole immagini, delle tecnologie dei flash (come la sincro ad alta velocità e i più recenti attivatori TTL via radio) e di moltissimi stili e approcci all'illuminazione. Joe mostra le foto che

crea man mano che si avvicina allo scatto finale, e arricchisce il percorso con fotografie del “dietro le quinte” e schizzi che mostrano in dettaglio il posizionamento delle luci e le impostazioni di potenza, apertura e tempi di posa. Naturalmente le cifre non raccontano mai tutta la storia, e Joe va sempre oltre i metadati per arrivare al cuore dell’immagine. Ogni racconto tratta l’arte e la tecnica, svelando il modo in cui Joe si rapporta al soggetto e quali sono i motivi delle sue scelte tecniche e creative. Scritto con la leggerezza e lo humor che contraddistinguono l’autore, *Fotografare la luce* è ricchissimo di intuizioni e informazioni, e della conoscenza e della saggezza che nascono da un lavoro sul campo sempre attento, appassionato e meditato.

Women - Annie Leibovitz 1999-10-01

The photographs by Annie Leibovitz in *Women*, taken especially for the book, encompass a broad spectrum of subjects: a rap artist, an astronaut, two Supreme Court justices, farmers, coal miners, movie stars, showgirls, rodeo riders, socialites, reporters, dancers, a maid, a general, a surgeon, the First Lady of the United States, the secretary of state, a senator, rock stars, prostitutes, teachers, singers, athletes, poets, writers, painters, musicians, theater directors, political activists, performance artists, and businesswomen. "Each of these pictures must stand on its own," Susan Sontag writes in the essay that accompanies the portraits. "But the ensemble says, So this what women are now -- as different, as varied, as heroic, as forlorn, as conventional, as unconventional as this."

Presented in a straightforward, down-to-earth method, these compositional principles will become second nature, giving you the creative freedom to seek out new, stunning shots of your own. What's more, you will develop reliable skills to approach a wide variety of subjects - from portraits to landscapes and everything in between - and to consistently present them in a strong, compelling composition.

The Real Deal - Joe McNally 2021-10-19

Photographer and best-selling author Joe McNally shares stories and lessons from a life in photography.

When Joe McNally moved to New York City in 1976, his first job was at the *Daily News* as a copyboy, “the wretched dog of the newsroom.” He was earning the lowest pay grade possible and living in a cheap hotel in Manhattan. Life was not glamorous. But with a fierce drive, an eye for a picture, and a willingness to take (almost) any assignment that came his way, Joe stepped out onto the always precarious tightrope of the freelance photographer—and never looked back. Fast forward 40 years, and his work has included assignments and stories for *National Geographic*, *Time*, *LIFE*, *Sports Illustrated*, and more. He has traveled for assignments to nearly 70 countries and received dozens of awards for his photography.

In *The Real Deal*, Joe tells us how it all started,

and candidly shares stories, lessons, and insights he has collected along the way. This is not a dedicated how-to book about “where to put the light,” though there is certainly instructional information to be gleaned here. This is also not a navel-gazing look back at “the good old days,” because those never really existed anyway. Instead, *The Real Deal* is simply a collection of candid “field notes”—some short, some quite long—gathered over time that, together, become an intimate look behind the scenes at a photographer who has pretty much seen and done it all.

Though the photography industry bears little resemblance to the industry just 10 years ago (much less 40 years ago), what it really takes to become a successful photographer—the character traits, the fundamental lessons, the ability to adapt, and then adapt again—remains the same. Joe writes about everything from the crucial ability to know how to use (and make!)

window light to the importance of creating long-term relationships built on trust; from lessons learned after a day in the field to the need to follow your imagination wherever it takes you; from the “random” and “lucky” moments that propel one’s career to the wonders and pitfalls of today’s camera technology. For every mention of f-stops and shutter speeds, there is equal discussion about the importance of access, the occasional moment of hubris, and the idea of becoming iconic.

Before Joe was a celebrated and award-winning photographer, before he was a well-respected educator and author of multiple bestselling books, he was just...Joe, hustling every day, from one assignment to the next, piecing together a portfolio, a skill set, a reputation, a career. He imagined a life—and then took pictures of it. Here are a few frames.

Monsanto - Jim Gerritsen 2017-10-18

As a manufacturer of food and animal feed, seeds and chemical products, Monsanto is relentlessly developing and marketing new technologies. The monopoly it has arguably secured by dubious means bears no relation to its negligence with regard to potential risks. Particularly in light of the devastating consequences that are still causing suffering to people and the environment in many places, the company's self-portrayal as a forward-looking, omnipotent force for good seems cynical. The photographer Mathieu Asselin, who lives in France and Venezuela, has tried his hand at the daunting task of exploring the issues surrounding Monsanto. His investigative photographic study manages to capture the complexity of this topic, creating links between past, present and future and illuminating many different aspects from a variety of perspectives. the #1 best-selling digital photography book of all time! It's the award winning, worldwide smash hit, written by Scott Kelby, that's been translated into dozens of different languages.

Here's how Scott describes this book's brilliant premise: "If you and I were out on a shoot, and you asked me, 'Hey, how do I get this flower to be in focus, with the background out of focus?,' I wouldn't stand there and give you a photography lecture. In real life, I'd just say, 'Put on your zoom lens, set your f-stop to f/2.8, focus on the flower, and fire away.' That's what this book is all about: you and I out shooting where I answer questions, give you advice, and share the secrets I've learned just like I would with a friend—without all the technical explanations and techie photo speak."

This isn't a book of theory—full of confusing jargon and detailed concepts. This is a book on which button to push, which setting to use, and

when to use it. With over 200 of the most closely guarded photographic "tricks of the trade," this book gets you shooting dramatically better-looking, sharper, more colorful, more professional-looking photos every time.

Each page covers a single concept that makes your photography better. Every time you turn the page, you'll learn another pro setting, tool, or trick to transform your work from snapshots into gallery prints. If you're tired of taking shots that look "okay," and if you're tired of looking in photography magazines and thinking, "Why don't my shots look like that?" then this is the book for you.

Prague Panoramic - Josef Sudek 1992

No other cycle of Josef Sudek's photos depicts the artist's beloved city as a record of many Prague localities as nostalgic witnesses to the passage of time. The elongated format of his photographs enabled him not only to command a truly panoramic view of Prague: he himself was probably surprised by the resultant optic deformations whose distinctly expressive tinge offered by his old Kodak camera provided him with a golden opportunity of evoking--in his unique style--the rendition of various forms by

his older friends--Czech cubists.--From book jacket.

Luigi Ghirri: Cardboard Landscapes (Paesaggi Di Cartone) - 2020-06-23

A handsome facsimile of conceptualist Luigi Ghirri's poetic narrative of 1970s pop culture Italian photographer Luigi Ghirri (1943-92) made Cardboard Landscapes (Paesaggi di cartone)during his travels around Europe, coining the term "sentimental geography" to describe his unique artistic approach of examining the ordinary to prove it remarkable. The original handmade album features over 100 chromogenic color prints pasted onto the pages of a blank book, and was gifted by Ghirri to John Szarkowski, then the Director of the Department of Photography at the Museum of Modern Art, in the 1970s. A singular work of art, Cardboard Landscapes is now being published for the first time. The collection is an anomaly within Ghirri's overall oeuvre, as it prioritizes complex

composition rather than the sweeping tableaux for which he is best known. In this series of works, he regards the printed image as the subject, framing a kaleidoscope of photographs and advertisements to tell a poetic visual narrative that reflects at once regional, personal and popular culture, revealing a fascinating impulse to investigate his role within his own medium. Luigi Ghirri(1943-92) was a celebrated Italian artist and photographer known for his color photographs of landscape and architecture. He published his first photography book, Kodachrome, in 1978, and continued to utilize a conceptual framework to interrogate the line between fiction and reality.

the gamut from small flash to big flash, and everywhere in between. Of course, Joe includes coverage of Nikon Speedlights, but he also covers big flash, as well as "in-between" lights as the Elinchrom Quadra. The exploration of new technology, as well as the explanation of older technology. No matter what equipment Joe uses and discusses, the most important element of Joe's instruction is that it is straightforward, complete, and honest. No secrets are held back, and the principles he talks about apply generally to the shaping and quality of light, not just to an individual model or brand of flash. He tells readers what works and what doesn't via his let's-see-what-happens approach, he shows how he sets up his shots with plentiful sketches and behind-the-scenes production shots, and he does it all with the intelligence, clarity, and wisdom that can only come from shooting in the field for 30 years for the likes of National Geographic, Time, Life, and Sports Illustrated--not to mention the wit and humor of a clearly warped (if gifted)

mind.

Mind and Places - Anna Anzani 2020-05-12

This book explores the contributions of psychological, neuroscientific and philosophical perspectives to the design of contemporary cities. Pursuing an innovative and multidisciplinary approach, it addresses the need to re-launch knowledge and creativity as major cultural and institutional bases of human communities. Dwelling is a form of knowledge and re-invention of reality that involves both the tangible dimension of physical places and their mental representation. Findings in the neuroscientific field are increasingly opening stimulating perspectives on the design of spaces, and highlight how our ability to understand other people is strongly related to our corporeity. The first part of the book focuses on the contributions of various disciplines that deal with the spatial dimension, and explores the dovetailing roles that science and art can play from a multidisciplinary perspective. In turn, the

second part formulates proposals on how to promote greater integration between the aesthetic and cultural dimension in spatial design. Given its scope, the book will benefit all scholars, academics and practitioners who are involved in the process of planning, designing and building places, and will foster an international exchange of research, case studies, and theoretical reflections to confront the challenges of designing conscious places and enable the development of communities.

The Photographer's Mind - Michael Freeman
2012-11-12

The source of any photograph is not the camera or even the scene viewed through the viewfinder-it is the mind of the photographer: this is where an image is created before it is committed to a memory card or film. In The Photographer's Mind, the follow-up to the international best-seller, The Photographer's Eye, photographer and author Michael Freeman unravels the mystery behind the creation of a photograph. The nature of photography demands that the viewer constantly be intrigued and surprised by new imagery and different interpretations, more so than in any other art form. The aim of this book is to answer what

makes a photograph great, and to explore the ways that top photographers achieve this goal time and time again. As you delve deeper into this subject, The Photographer's Mind will provide you with invaluable knowledge on avoiding cliché, the cyclical nature of fashion, style and mannerism, light, and even how to handle the unexpected. Michael Freeman is the author of the global bestseller, The Photographer's Eye. Now published in sixteen languages, The Photographer's Eye continues to speak to photographers everywhere. Reaching 100,000 copies in print in the US alone, and 300,000+ worldwide, it shows how anyone can develop the ability to see and shoot great digital photographs.
