The Pulse of a Malaysian University - Rodolfo Jacobson 2008

The Pulse of a Malaysian University discloses the research agendas of language scholars at a Southeast-Asian university, allowing western readers to gain deeper knowledge of an Asian perspective on language issues. In Part A, five authors address diverse

ethnolinguistic/sociolinguistic issues such as the Minangkabau Pasambahan, media response to terrorism, negotiation discourse, bilingualism, and status of foreign languages. In Part B, four writers focus on the teaching of English in Malaysia with emphasis on grammar, reading, writing, and literature. Altogether, these essays feature important cultural and linguistic data

revealing the range of insight and knowledge that Malaysian/Indonesian professionals possess on such issues.

Networking the Learner - Deryn M. Watson
2013-11-11

Deryn Watson and Jane Andersen Editors
INTRODUCTION The role of a Preface is to introduce the nature of the publication. The book that emerges from an IFIP Technical Committee World Conference on Computers in Education is complex, and this complexity lies in the nature of the event from which it emerges. Unlike a number of other major international conferences, those organised within the IFIP education community are active events. A WCCE is unique among major international conferences for the structure that deliberately ensures that all attendees are active participants in the development of the debate. In addition to the major paper presentations and discussion, from international authors, there are panel sessions and professional working groups who debate

particular themes throughout the event. There is no doubt that this was not a dry academic conference - teachers, lecturers and experts, policy makers and researchers, learners and manufacturers mingled and worked together to explore, reflect, discuss and plan for the future. The added value of this event was that we know that it will have an impact on future practice; networks will be formed, both virtual and real - ideas will change and new ones will emerge. Capturing the essence of this event is a challenge - this post-conference book has three parts. The first is the substantial number of theme papers.

Bilingualism and the Bilingual - Samuel Abudarham 1987

The Knowledge Gap - Natalie Wexler

2020-08-04

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which

the general public, including many parents, remains unaware. But The Knowledge Gap isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

Funds of Knowledge - Norma Gonzalez

2006-04-21

The concept of "funds of knowledge" is based on a simple premise: people are competent and

*Downloaded from

have knowledge, and their life experiences have given them that knowledge. The claim in this book is that first-hand research experiences with families allow one to document this competence and knowledge, and that such engagement provides many possibilities for positive pedagogical actions. Drawing from both Vygotskian and neo-sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge, the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching. This book accomplishes three objectives: It gives readers the basic methodology and techniques followed in the contributors' funds of knowledge research; it extends the boundaries of what these researchers have done; and it explores the applications to classroom practice that can result from teachers knowing the communities in

which they work. In a time when national educational discourses focus on system reform and wholesale replicability across school sites, this book offers a counter-perspective stating that instruction must be linked to students' lives, and that details of effective pedagogy should be linked to local histories and community contexts. This approach should not be confused with parent participation programs, although that is often a fortuitous consequence of the work described. It is also not an attempt to teach parents "how to do school" although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to accomplish something that may be even more challenging: to alter the perceptions of working-class or poor communities by viewing their households primarily in terms of their strengths and resources, their defining pedagogical characteristics. Funds of Knowledge: Theorizing Practices in Households, Communities, and

Classrooms is a critically important volume for all teachers and teachers-to-be, and for researchers and graduate students of language, culture, and education.

The Writing Revolution - Judith C. Hochman
2017-08-07

Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and

study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

Applicable Linguistics - Ahmar Mahboob
2010-06-24

This collection of research offers an initial step in the pursuit of an applicable linguistics. Applicable Linguistics takes everyday real-life language-related problems - both theoretical and practical - in diverse social, professional and academic contexts as its starting point. It then uses and contributes to a theoretical model of language that can respond to and is applicable in

the context. The concept of applicable linguistics used in this volume is informed by the work of M.A.K. Halliday, who believes that "the value of a theory lies in the use that can be made of it." The chapters in this volume thus use and contribute to an applicable linguistics that engages with a range of issues including: translation, education, language teaching/learning, multimodality, media, social policy and action, and positive discourse analysis. This collection of research is offered as an initial step in the pursuit of Applicable Linguistics, which we hope will serve as a foundation for future work across the discipline.
