## Secondary Science 11 to 16 -

Gren Ireson 2010-03-25  
Are you looking for ideas to make your science teaching come alive? Full of suggestions for exciting and practical activities to engage children, Practical Science 11-16 explains the science behind the experiments and shows you where it links to the national curricula in England, Scotland, Wales and Northern Ireland. The book covers the three sciences: chemistry, biology and physics. It contains detailed subject knowledge to ensure you grasp key concepts, and there are lots of useful

diagrams to help illustrate key points. Experiments include: extracting DNA from a kiwi fruit capturing rainbows the chromatography of sweets removing iron from cornflakes a plate tectonic jigsaw

Gateway GCSE (9-1) Biology

for Combined Science from

Collins has been developed to

embed the skills your students

need to succeed in all three

assessment objectives, while providing a clear and supportive route through the new, more challenging GCSE content. \* Each spread starts with language and ideas at a lower level and increases in complexity, engaging students of all ability levels \* Key concept spreads highlight knowledge that students must grasp before they can move on \* Dedicated pages on analysing, interpreting and evaluating practicals, so students are fully prepared for the indirect assessment. \* Maths activities at the appropriate level are embedded throughout, along with Maths skills pages that focus on developing the skills needed for each topic \* Prepare students for the demands of the new specification with differentiated questions, worked examples and lots of opportunities to practice \* Co-teach both Foundation and Higher tier with a single book (the Higher-only content is clearly flagged).
