The Spider Network - David Enrich 2017-03-23

In 2006, an oddball group of bankers, traders and brokers from some of the largest financial institutions made a startling realization: Libor—the London interbank offered rate, which determines the interest rates on trillions in loans worldwide—was set daily by a small group of easily manipulated administrators, and that they could reap huge profits by nudging it fractions of a percent to suit their trading portfolios. Tom Hayes, a brilliant but troubled mathematician, became the lynchpin of a wild alliance that included a prickly French trader nicknamed “Gollum”; the broker “Abbo,” who liked to publicly strip naked when drinking; a nervous Kazakh chicken farmer known as “Derka Derka”; a broker known as “Village” (short for “Village Idiot”) who racked up huge expense account bills; an executive called “Clumpy” because of his patchwork hair loss; and a broker uncreatively nicknamed “Big Nose” who had once been a semi-professional boxer. This group generated incredible riches until it all unraveled in spectacularly vicious, backstabbing fashion. With exclusive access to key characters and evidence, *The Spider Network* is not only a rollicking account of the scam, but also a provocative examination of a financial system

that was crooked throughout.

Burning Down the House - Nell Bernstein 2014-06-03

When teenagers scuffle during a basketball game, they are typically benched. But when Will got into it on the court, he and his rival were sprayed in the face at close range by a chemical similar to Mace, denied a shower for twenty-four hours, and then locked in solitary confinement for a month. One in three American children will be arrested by the time they are twenty-three, and many will spend time locked inside horrific detention centers that defy everything we know about how to rehabilitate young offenders. In a clear-eyed indictment of the juvenile justice system run amok, award-winning journalist Nell Bernstein shows that there is no right way to lock up a child. The very act of isolation denies delinquent children the thing that is most essential to their growth and rehabilitation: positive relationships with caring adults. Bernstein introduces us to youth across the nation who have suffered violence and psychological torture at the hands of the state. She presents these youths all as fully realized people, not victims. As they describe in their own voices their fight to maintain their humanity and protect their individuality in environments that would deny both, these young people offer a hopeful alternative to the doomed effort to reform a system that should only be dismantled. *Burning Down the House* is a clarion call to shut down our nation's brutal and counterproductive juvenile prisons and bring our children home.

Let's Get Free - Paul Butler 2010-06-08

Drawing on his personal fascinating story as a prosecutor, a defendant, and an observer of the legal process, Paul Butler offers a sharp and engaging critique of our criminal justice system. He argues against discriminatory drug laws and excessive police power and shows how our policy of mass incarceration erodes communities and perpetuates crime. Controversially, he supports jury nullification—or voting “not guilty” out of principle—as a way for everyday people to take a stand against unfair laws, and he joins

with the “Stop Snitching” movement, arguing that the reliance on informants leads to shoddy police work and distrust within communities. Butler offers instead a “hip hop theory of justice,” parsing the messages about crime and punishment found in urban music and culture. Butler's argument is powerful, edgy, and incisive.

The Shell Bitumen Industrial Handbook - 1995

The Crime of Aggression - Noah Weisbord 2019-06-11

A gripping behind-the-scenes account of the dramatic legal fight to hold leaders personally responsible for aggressive war. On July 17, 2018, starting an unjust war became a prosecutable international crime alongside genocide, crimes against humanity, and war crimes. Instead of collective state responsibility, our leaders are now personally subject to indictment for crimes of aggression, from invasions and preemptions to drone strikes and cyberattacks. The Crime of Aggression is Noah Weisbord's riveting insider's account of the high-stakes legal fight to enact this historic legislation and hold politicians accountable for the wars they start. Weisbord, a key drafter of the law for the International Criminal Court, takes readers behind the scenes of one of the most consequential legal dramas in modern international diplomacy. Drawing on in-depth interviews and his own invaluable insights, he sheds critical light on the motivations of the prosecutors, diplomats, and military strategists who championed the fledgling prohibition on unjust war—and those who tried to sink it. He untangles the complex history behind the measure, tracing how the crime of aggression was born at the Nuremberg trials only to fall dormant during the Cold War, and he draws lessons from such pivotal events as the collapse of the League of Nations, the rise of the United Nations, September 11, and the war on terror. The power to try leaders for unjust war holds untold promise for the international order, but also great risk. In this incisive and vitally important book, Weisbord explains how judges in such cases can balance the imperatives of justice and peace, and how the fair prosecution of aggression can humanize modern statecraft.

Total Performance Scorecard - Hubert Rampersad 2004-02-18

In the post-Enron climate corporate executives are increasingly pressured to increase productivity and create an ethical, trustworthy organizational climate. 'Total Performance Scorecard' introduces a concept of organizational improvement and change management that combines the Balanced Scorecard model with the learning organization theory. The TPS contains a personal balanced scorecard, which is tied to an organizational balanced scorecard. These scorecards reflect not only performance goals but personal learning and growth goals as well, and the organizational scorecards also address organizational climate issues. Continuous improvement, change management, 360 degree feedback, and the learning organization are theories that the TPS makes use of in a very straightforward way. If implemented, the TPS enables a company to tie personal goals to organizational goals and tie personal performance to organizational performance, all within a culture that supports integrity, personal growth, learning, and open communication. Nirvana!

Thanks, Obama - David Litt 2017-09-19

A NEW YORK TIMES BESTSELLER An Esquire Best Book of 2017 Remember when presidents spoke in complete sentences instead of in unhinged tweets? Former Obama speechwriter David Litt does. In his comic, coming-of-age memoir, he takes us back to the Obama years – and charts a path forward in the age of Trump. More than any other presidency, Barack Obama's eight years in the White House were defined by young people – twenty-somethings who didn't have much experience in politics (or anything else, for that matter), yet suddenly found themselves in the most high-stakes office building on earth. David Litt was one of those twenty-somethings. After graduating from college in 2008, he went straight to the Obama campaign. In 2011, he became one of the youngest White House speechwriters in history.

Until leaving the White House in 2016, he wrote on topics from healthcare to climate change to criminal justice reform. As President Obama's go-to comedy writer, he also took the lead on the White House Correspondents' Dinner, the so-called "State of the Union of jokes." Now, in this refreshingly honest memoir, Litt brings us inside Obamaworld. With a humorists' eye for detail, he describes what it's like to accidentally trigger an international incident or nearly set a president's hair aflame. He answers questions you never knew you had: Which White House men's room is the classiest? What do you do when the commander in chief gets your name wrong? Where should you never, under any circumstances, change clothes on Air Force One? With nearly a decade of stories to tell, Litt makes clear that politics is completely, hopelessly absurd. But it's also important. For all the moments of chaos, frustration, and yes, disillusionment, Litt remains a believer in the words that first drew him to the Obama campaign: "People who love this country can change it." In telling his own story, Litt sheds fresh light on his former boss's legacy. And he argues that, despite the current political climate, the politics championed by Barack Obama will outlive the presidency of Donald Trump. Full of hilarious stories and told in a truly original voice, *Thanks, Obama* is an exciting debut about what it means - personally, professionally, and politically - to grow up.

Procurement of Works - 2000

These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. Usual Cruelty - Alec Karakatsanis 2019-10-29

Downloaded from
omahafoodtruckassociation.org on by

From an award-winning civil rights lawyer, a profound challenge to our society's normalization of the caging of human beings, and the role of the legal profession in perpetuating it Alec Karakatsanis is interested in what we choose to punish. For example, it is a crime in most of America for poor people to wager in the streets over dice; dice-wagerers can be seized, searched, have their assets forfeited, and be locked in cages. It's perfectly fine, by contrast, for people to wager over international currencies, mortgages, or the global supply of wheat; wheat-wagerers become names on the wings of hospitals and museums. He is also troubled by how the legal system works when it is trying to punish people. The bail system, for example, is meant to ensure that people return for court dates. But it has morphed into a way to lock up poor people who have not been convicted of anything. He's so concerned about this that he has personally sued court systems across the country, resulting in literally tens of thousands of people being released from jail when their money bail was found to be unconstitutional. Karakatsanis doesn't think people who have gone to law school, passed the bar, and sworn to uphold the Constitution should be complicit in the mass caging of human beings—an everyday brutality inflicted disproportionately on the bodies and minds of poor people and people of color and for which the legal system has never offered sufficient justification. Usual Cruelty is a profoundly radical reconsideration of the American "injustice system" by someone who is actively, wildly successfully, challenging it.

The Price You Pay for College - Ron Lieber
2021-01-26

Named one of the best books of 2021 by NPR New York Times Bestseller and a New York Times Book Review Editor's Choice pick "Masterly . . . represents an extraordinary achievement: It is comprehensive and detailed without being tedious, practical without being banal, impeccably well judged and unusually rigorous."—Daniel Markovits, New York Times Book Review "Ron Lieber is a gift."—Scott Galloway The hugely popular New York Times

Your Money columnist and author of the bestselling *The Opposite of Spoiled* offers a deeply reported and emotionally honest approach to the biggest financial decision families will ever make: what to pay for college—a decision made even more confusing because of the Covid-19 pandemic. Sending a teenager to a flagship state university for four years of on-campus living costs more than \$100,000 in many parts of the United States. Meanwhile, many families of freshmen attending selective private colleges will spend triple—over \$300,000. With the same passion, smarts, and humor that infuse his personal finance column, Ron Lieber offers a much-needed roadmap to help families navigate this difficult and often confusing journey. Lieber begins by explaining who pays what and why and how the financial aid system got so complicated. He also pulls the curtain back on merit aid, an entirely new form of discounting that most colleges now use to compete with peers. While price is essential, value is paramount. So what is worth paying extra for, and how do you know when it exists in abundance at any particular school? Is a small college better than a big one? Who actually does the teaching? Given that every college claims to have reinvented its career center, who should we actually believe? He asks the tough questions of college presidents and financial aid gatekeepers that parents don't know (or are afraid) to ask and summarizes the research about what matters and what doesn't. Finally, Lieber calmly walks families through the process of setting financial goals, explaining the system to their children and figuring out the right ways to save, borrow, and bargain for a better deal. *The Price You Pay for College* gives parents the clarity they need to make informed choices and helps restore the joy and wonder the college experience is supposed to represent.

Islamic Republic of Iran - International Monetary Fund 2003-09-05

Domestic demand continued to grow at rapid rates, despite corrective fiscal and monetary policy measures. Although trade and financial sector reforms advanced and foreign direct investment (FDI) regulations were liberalized, there was less progress in improving the business environment, reducing labor market rigidities, and restructuring and privatizing public enterprises. IMF staff stressed the need for further advances in trade liberalization, improved fiscal management, financial system restructuring, labor market reform, privatization, and elimination of subsidies. The managed float exchange regime remains appropriate for Iran.
