Scripts of Servitude - Beatriz P. Lorente
2017-10-19

This book examines how language is a central resource in transforming migrant women into transnational domestic workers. Focusing on the migration of women from the Philippines to Singapore, the book unpacks why and how language is embedded in the infrastructure of transnational labor migration that links migrant-sending and migrant-receiving countries. It sheds light on the everyday lives of transnational domestic workers and how they draw on their linguistic repertoires, and in particular on English, as they cross geographical and social spaces. By showing how the transnational mobility of labor is dependent on the selection and performance of particular assemblages of linguistic resources that index migrants as labor and not as people, the book provides a powerful lens with which to examine how migration contributes to relationships of inequality and how such inequalities are produced and challenged on the terrain of language.

Handbook of Korean Vocabulary - Miho Choo
1996-03-01

Vocabulary learning is the single most important component of second-language acquisition. In cases where the second language is unrelated to the learner's native tongue, this task presents special challenges because there are typically few clues in a word's form to assist in learning and remembering its meaning. This book offers a solution to this problem for students of Korean. The Handbook is the first ever "root dictionary" of Korean designed for second-language learners. Useful for students at all levels, it contains more than 1,500 vocabulary lists consisting of words built from a shared root. These lists offer a unique and efficient way for students to acquire new words. Upon encountering a word, students can consult the lists for its component roots and discover many other semantically related words built from the same elements. An introduction provides an overview of Korean vocabulary and detailed instructions on how to use the word lists. A pronunciation guide outlines the major principles determining the pronunciation of compounds and other multipart words in Korean.

Recruiting Immigrant Workers: Korea 2019 - Organisation for Economic Co-operation and Development 2019

The Korean labour migration system has expanded since the mid-2000s, primarily in the admission of temporary foreign workers for less skilled jobs. Its temporary labour programme,

addressed largely at SMEs in manufacturing and based on bilateral agreements with origin countries, has become the largest such programme in the OECD. Structural changes in the labour force, with a rapidly shrinking and highly educated youth population, keep the underlying demand for this programme strong. Yet skills levels of workers are increasing, and there is interest in increasing Korea's share in global talent mobility, including international students and innovative entrepreneurs. This book addresses the question of how to ensure that international recruitment can help meet urgent needs in the labour market which cannot be met locally, and how the temporary labour migration programme - and other migration streams - can evolve to ensure that Korea meets its policy objectives. This review first examines the characteristics of the Korean labour market and main challenges where labour migration can help address demand. Following a discussion of various programmes and procedures, the review assesses how labour migration is playing a role in different sectors and how programme governance could be improved. It then explores the channels for high-skilled migrants and how these could be improved in light of international experience.

International Labour Migration in the Middle East and Asia - Kwen Fee Lian 2019-08-22

The discourse on migration outcomes in the West has largely been dominated by issues of integration, but it is more relevant to view immigration in non-Western societies in relation to practices of exclusion and inclusion. Exclusion refers to a situation in which individuals and groups are usually denied access to the goods, services, activities and resources associated with citizenship. However, this approach has been criticised in relation to gender issues, which are very relevant to the situation of migrants. The authors in this volume address this criticism. Furthermore, when framed within a North-South discourse, it may be potentially ethnocentric to assume that the experience of exclusion is cross-culturally uniform. Indeed, work on migration issues has invariably been

conducted within such a discourse. The contributors go beyond this binary discourse of 'exclusion versus inclusion' which has dominated migration research. They examine the situation of migrants in the Middle East and Asia as one that encompasses both exclusion and inclusion, addressing related concepts of empowerment, ethnocentrism, the feminisation of migration and gendered geographies of power, liberal constraint and multiculturalism, individual agency, migrant-friendly discourses, spaces of emancipation and spaces of insecurity. The book highlights current research in the Arab Gulf states, and examines multiculturalism in Asia more broadly. It will be of particular interest to students and researchers in international labour migration studies in the Middle East and Asia.

Babel No More - Michael Erard 2012-01-10
 A "fascinating" (The Economist) dive into the world of linguistics that is "part travelogue, part science lesson, part intellectual investigation...an entertaining, informative survey of some of the most fascinating polyglots of our time" (The New York Times Book Review). In *Babel No More*, Michael Erard, "a monolingual with benefits," sets out on a quest to meet language superlearners and make sense of their mental powers. On the way he uncovers the secrets of historical figures like the nineteenth-century Italian cardinal Joseph Mezzofanti, who was said to speak seventy-two languages, as well as those of living language-superlearners such as Alexander Arguelles, a modern-day polyglot who knows dozens of languages and shows Erard the tricks of the trade to give him a dark glimpse into the life of obsessive language acquisition. With his ambitious examination of what language is, where it lives in the brain, and the cultural implications of polyglots' pursuits, Erard explores the upper limits of our ability to learn and use languages and illuminates the intellectual potential in everyone. How do some people escape the curse of Babel—and what might the gods have demanded of them in return?
