Beautiful Shadow - Andrew Wilson 2008-12-07

The life of Patricia Highsmith was as secretive and unusual as that of many of the best-known

characters who people her "peerlessly disturbing" thrillers and short stories. Yet even as her work has found new popularity in the last few years, the life of this famously elusive writer has remained a mystery. For Beautiful Shadow, the first biography of Highsmith, British journalist Andrew Wilson mined the vast archive of diaries, notebooks, and letters she left behind, astonishing in their candor and detail. He interviewed her closest friends and colleagues as well as some of her many lovers. But Wilson also traces Highsmith's literary roots in the work of Poe, noir, and existentialism, locating the influences that helped distinguish Highsmith's writing so startlingly from more ordinary thrillers. The result is both a serious critical biography and one that reveals much about a brilliant and contradictory woman, one who despite her acclaim and affairs always maintained her solitude.

Shoeshine Girl - Clyde Robert Bulla 2013-06-25

Who ever heard of a shoeshine girl? The last thing Sarah Ida wants to do is spend the summer with her Aunt Claudia. But when her parents send her away because of problems at home, that is exactly what she has to do. With no allowance and no fun to be had, Sarah Ida decides to look for a job. But who will hire a ten year old? Al, the shoeshine man, will! Sarah loves her job, even if it means getting knee-deep in shoe polish everyday. Then something terrible happens and it looks like the shoeshine stand will have to close forever. If Sarah Ida wants to keep it open, she'll have to learn a few lessons about growing up along the way ...

Nitrogen Fixation in Agriculture, Forestry, Ecology, and the Environment - Dietrich

Werner 2006-01-20

Sustainability has a major part to play in the global challenge of continued development of regions, countries, and continents all around the World and biological nitrogen fixation has a key role in this process. This volume begins with chapters specifically addressing crops of major global importance, such as soybeans, rice, and sugar cane. It continues with a second important focus, agroforestry, and describes the use and promise of both legume trees with their rhizobial symbionts and other nitrogen-fixing trees with their actinorhizal colonization. An over-arching theme of all chapters is the interaction of the plants and trees with microbes and this theme allows other aspects of soil microbiology, such as interactions with arbuscular mycorrhizal fungi and the impact of soil-stress factors on biological nitrogen fixation, to be addressed. Furthermore, a link to basic science occurs through the inclusion of chapters describing the biogeochemically important nitrogen cycle and its key relationships among nitrogen fixation, nitrification, and denitrification. The volume then provides an up-to-date view of the production of microbial inocula, especially those for legume crops.

Labyrinth and Piano Key Weirs - Sébastien Erpicum 2011-05-10

Labyrinth spillways are almost as old as dam engineering. In spite of the fact that they appear as a very good technical-economical compromise, only 0.1% of large dams are equipped with such weirs. The main reason for this is that traditional labyrinth weirs usually cannot be installed on top of concrete gravity dams as they require a large foundat

Twenty-Sixth International Congress on Large Dams / Vingt-Sixième Congrès International des Grands Barrages - CIGB ICOLD 2018-06-18

The International Committee on Large Dams (ICOLD) held its 26th International Congress in Vienna, Austria (1-7 July 2018). The proceedings of the congress focus on four main questions: 1. Reservoir sedimentation and sustainable development; 2. Safety and risk analysis; 3. Geology and dams, and 4. Small dams and levees. The book thoroughly discusses these

questions and is indispensable for academics, engineers and professionals involved or interested in engineering, hydraulic engineering and related disciplines.

Drought Policies: Case Studies on Mega-droughts for the High Level Experts and Leaders Panel on Water and Disasters (HELP) - Jerome Delli Priscolli 2019-11-15

This book focuses on mega-droughts of the past 20 years. Twelve cases from both developed and developing countries are elaborated in the book. Its intention is to draw lessons from the cases of extremely severe water shortages so that countries and stakeholders can be better prepared for extreme drought events in the future. Several recurrent themes emerge from the diverse case studies and descriptions of programs. For example, most chapters discuss the necessity to move from reactive (compensatory) to preventive policies. This

theme has implications for use of insurance in developing countries, e.g. is insurance encouraging investments to help countries avoid disasters or is it acting mostly in a humanitarian way to compensate for losses to help people? Several authors point to the importance of risk assessment and to developing risk based policies for drought. This raises statistical issues of how such assessments of uncertainty and risks are done and how they relate to actual occurrence of events. Most chapters call for more inter-sectoral policies, policies which integrate water resources management approaches and to the necessity of raising public awareness of droughts in times of no drought. The issue of structural versus nonstructural is clear in most cases. While often cast as 'either/or' the message that emerges is more one of how do you integrate these approaches. Finally, a few chapters bring to light how prevention is needed for national security as well as water security. In Focus - a book series that showcases the latest accomplishments in water research. Each book focuses on a specialist area with papers from top experts in the field. It aims to be a vehicle for in-depth understanding and inspire further conversations in the sector.

Children of Cain - Michael Howard 2019-07-20
The mid-twentieth century saw the birth of popular occultism in Europe and the New World, including an interest in witchcraft. Chief among these was Wicca, a recension of ceremonial magic and nature worship advanced by Gerald Gardner and Alex Sanders, now widely regarded as a religion. However, lesser-known streams of the witch-current thrived the shadows, having older historical roots, and linked to a body of practice - witch-bottles, knotted cord spells, curses, exorcisms, sexual magic, and charms ranging from the conjuration of angels to protection for livestock and hearth. This is Traditional Witchcraft, whose origin in part lies with the sorcery of the cunning-folk of Britain and Colonial America. Eschewing the popular occult limelight, its perpetuation as a mystery-cult continues as a largely closed group of initiates. Now revised and expanded, the second

edition of CHILDREN OF CAIN is the definitive history of Traditional Witchcraft and its key operatives in Britain and the United States, and is based on over forty years of research and private collaboration with practitioners of this mysterious form of folk magic.

The forgotten story of the Cook family, Crawley and the Great War.

Canada 1919 - Tim Cook 2020-06-15

With compelling insight, Canada 1919 examines the concerns of Canadians in the year following the Great War: the treatment of veterans, including nurses and Indigenous soldiers; the rising farm lobby; the role of labour; the place of children; the influenza pandemic; the country's international standing; and commemoration of the fallen. Even as the military stumbled through massive demobilization and the government struggled to hang on to power, a new Canadian nationalism was forged. This fresh perspective on the concerns of the time exposes the ways in

Guidelines for Poison Control - International
Program on Chemical Safety 1997

Provides authoritative guidelines for the establishment or improvement of national programmes for poison control. Addressed to policy-makers and the administrators of specialized facilities, the book responds to the need for comprehensive advice on the most rationale and effective ways to manage the greatly increased number of poisoned patients seen throughout the world. Strategies for the prevention of poisoning are also described. The guidelines draw on the practical experiences of numerous well-established poison centres in different parts of the world. Although recommended lines of action have universal relevance, the book gives particular attention to the situation in developing countries, where a basic infrastructure for the care of poisoned patients is often absent and special problems arise from the lack of adequate communications, transportation, drugs, and support services. Throughout, emphasis is placed on the role and functions of a poison information centre as a crucial component of any national programme for poison control. The book has nine chapters presented in two parts. Part one provides an

overview of the policy issues surrounding decisions to introduce measures, including specialized facilities, for the prevention and management of poisoning. Arguing that a poison information centre should be available in every country, part one also describes the benefits of such centres, outlines their principal functions, and suggests various options for their logical and cost-effective operation. Against this background, part two provides detailed technical advice on how to organize and operate the various facilities and services that make up a comprehensive system for poison control. Separate chapters describe the functions and requirements of information services, clinical services, and analytical toxicological and other laboratory services, and discuss the importance of toxicovigilance as a strategy for prevention. Subsequent chapters explain how to deal with major emergencies involving toxic chemicals, and outline solutions to the problem, encountered in most developing countries, of obtaining essential antidotes. Part two concludes with advice on the design and content of forms for collecting, storing, and reporting data, followed by a detailed list of the main literature required in a poisons information centre. Additional practical information is provided in a series of annexes, which describe a computer software system for the management of poisons data, reproduce several model record and reporting forms, and classify a large number of antidotes and related agents according to their proven effectiveness and urgency of availability. ..". For those involved in improving safety, this book is a bible... It is very difficult to be critical of this outstanding work ... an essential reference for all those involved in the use and handling of chemicals. For regulators and those concerned with government policy issues, it should be compulsory reading..." - Chemistry and Industry

Numbering the Dead - John Aitchison
2015-08-05

Numbering the Dead is a seminal account of the violent civil conflict that broke out around the city of Pietermaritzburg in 1987 and what

ensued over the next three years. Aitchison and his colleagues, based at the Centre for Adult Education, documented and dissected the ebb and flow and the changing circumstances of this not-so-low intensity civil war in the region. They collected, computerised, and categorised literally thousands of instances of eyewitness or documentary evidence, and then applied an innovative synthesis of qualitative and quantitative approaches that uncovered the patterns and intimated the underlying causes. This book, mainly covering the period 1987 to 1989, presents a distillation of this monitoring work, conducted under unimaginably difficult and stressful conditions. It was originally done with the simple aim of stopping the killing by telling people in the province, in South Africa and the world what was happening, as accurately and truthfully as possible.

Literacy Work Stations - Debbie Diller 2003

This book will help teachers solve the dilemma: What does the rest of my class do while I'm

working with a small reading group? Debbie Diller offers practical suggestions for over a dozen literacy work stations that link to instruction and make preparation and management easy for teachers. Learn how to set up work stations, how to manage them, and how to keep them going throughout the year. Each chapter includes: how to introduce each station; materials to include at each station; what to model; how to solve problems; how to differentiate; how to assess and keep students accountable; reflection questions for professional development. Materials in both English and Spanish are provided in the extensive resource section. Throughout the book the author has included photos of literacy workstations from a variety of classrooms in which she has worked to illustrate the methods discussed in the text.
