Ghettostadt - Gordon J Horwitz 2009-06-30

Ghettostadt is the terrifying examination of the Jewish ghetto's place in the Nazi worldview. Exploring ghetto life in its broadest context, it deftly maneuvers between the perspectives and actions of Łódź's beleaguered Jewish community, the Germans who oversaw and administered the ghetto's affairs, and the "ordinary" inhabitants of the once Polish city.
From Crime Scene to Court - Peter C White 2007-10-31

Forensic science has been variously described as fascinating, challenging and even frightening. If you have only a vague concept of what forensic science is, this book will provide the answer. Aimed at non-scientists, or those with limited scientific knowledge, Crime Scene to Court covers all three main areas of an investigation where forensic science is practised, namely the scene of the crime, the forensic laboratory and the court. Coverage includes details of how crime scene and forensic examinations are conducted in the United Kingdom, the principles of crime scene investigations and the importance of this work in an investigation, and courtroom procedures and the role of the expert witness. The latest methods and techniques used in crime scene investigation and forensic laboratories are reported, cases are presented to illustrate why and how examinations are performed to generate forensic evidence and there is a bibliography for each chapter which provides further material for those readers wishing to delve deeper into the subject. This revised and

updated edition also includes coverage on changes in professional requirements, the latest developments in DNA testing and two new chapters on computer based crimes and Bloodstain Pattern Analysis. Ideal for those studying forensic science or law, the book is intended primarily for teaching and training purposes. However, anyone with a role in an investigation, for example police, crime scene investigators or indeed those called for jury service, will find this text an excellent source of information.

Frames interdisziplinär: Modelle, Anwendungsfelder, Methoden - Alexander Ziem

2018-06-25

Das Frame-Konzept als kognitives Repräsentationsformat ist seit seiner Einführung durch Minsky und Fillmore vielfach rezipiert und modifiziert worden. Dieser interdisziplinär ausgerichtete Band vereint Beiträge aus so unterschiedlichen Disziplinen wie Linguistik, Philosophie, Medien-, Kommunikations- und Informationswissenschaften bis hin zur Klinischen Psychiatrie, die das Frame-Konzept aus grundagentheoretischer sowie methodologischer Perspektive in den Blick nehmen, die aber auch verschiedene Anwendungsfelder für Frames erproben. The series 'Proceedings in Language and Cognition' explores issues of mental representation, linguistic structure and representation, and their interplay. The research presented in this series is grounded in the idea explored in the Collaborative Research Center 'The structure of representations in language, cognition and science' (SFB 991) that there is a universal format for the representation of linguistic and cognitive concepts.

Im Fokus: Paläontologie - Nadja Podbregar
2013-10-19

Warum gibt es keine Mammuts mehr? Wen jagte der Tyrannosaurus rex? Und war der Neandertaler wirklich eine Sackgasse der Evolution? Um diese Fragen zu beantworten, müsste man eigentlich zurück in die Urzeit reisen können. Doch den Paläontologen gelingt es heute dank modernster Methoden auch ohne Zeitmaschine, aus fossilen Knochen, Pflanzenrelikten, aber auch Resten urzeitlicher DNA faszinierende Einblicke in die Tier- und Pflanzenwelt vergangener Epochen zu gewinnen. Dieses Buch stellt einige ihrer Erkenntnisse vor und erklärt unter anderem, warum Vögel eigentlich Dinosaurier sind, wie viel Wahrheit im Säbelzahnkater Diego aus dem Film „Ice Age“ steckt und was unsere Gene heute noch über unsere Vorfahren verraten.
Gastrins and the Vagus - Jens F. Rehfeld 1979

The Nature of Culture - Miriam N. Haidle
2016-01-19

This volume introduces a model of the expansion of cultural capacity as a systemic approach with biological, historical and individual dimensions.

It is contrasted with existing approaches from primatology and behavioural ecology; influential factors like differences in life history and demography are discussed; and the different stages of the development of cultural capacity in human evolution are traced in the archaeological record. The volume provides a synthetic view on a) the different factors and mechanisms of cultural development, and b) expansions of cultural capacities in human evolution beyond the capacities observed in animal culture so far. It is an important topic because only a volume of contributions from different disciplines can yield the necessary breadth to discuss the complex subject. The model introduced and discussed originates in the naturalist context and tries to open the discussion to some culturalist aspects, thus the publication in a series with archaeological and biological emphasis is apt. As a new development the synthetic model of expansion of cultural capacity is introduced and discussed in a broad perspective.

On Last Things - Otto Weininger 2001

With his suicide in 1903, at the age of 23, Otto Weininger became a central figure in the mythology of fin-de-siecle Vienna. This volume of essays, published posthumously, is a sequel to his book, *Sex and Character*, which was banned by Nazi censors. This is its first translation into English.

A New History of German Literature - David E. Wellbery 2004

In a collection of essays on key events, works, themes, and other aspects of German literary history, the entries focus on particular literary works, events in the life of the authors, historical moments, pieces of music, technological innovations, and theatrical and cinematic premiers.

German Scholars and Ethnic Cleansing, 1919-1945 - Michael Fahlbusch 2005-01-30
Recently, there has been a major shift in the focus of historical research on World War II

towards the study of the involvements of scholars and academic institutions in the crimes of the Third Reich. The roots of this involvement go back to the 1920s. At that time right-wing scholars participated in the movement to revise the Versailles Treaty and to create a new German national identity. The contribution of geopolitics to this development is notorious. But there were also the disciplines of history, geography, ethnography, art history, archeology, sociology, and demography that devised a new nationalist ideology and propaganda. Its scholars established an extensive network of personal and institutional contacts. This volume deals with these scholars and their agendas. They provided the Nazi regime with ideas of territorial expansion, colonial exploitation and racist exclusion culminating in the Holocaust. Apart from developing ideas and concepts, scholars also actively worked in the SS and Wehrmacht when Hitler began to implement its criminal policies in World War II. This collection of original essays, written by the foremost European scholars in this field, describes key figures and key programs supporting the expansion and exploitation of the Third Reich. In particular, they analyze the historical, geographic, ethnographical and ethno-political ideas behind the ethnic cleansing and looting of cultural treasures.

Kurds - Mehrdad Izady 2015-06-03

First Published in 1993. Since before the dawn of recorded history the mountainous lands of the northern Middle East have been home to a distinct people whose cultural tradition is one of the most authentic and original in the world. Some vestiges of Kurdish life and culture can actually be traced back to burial rituals practiced over 50,000 years ago by people inhabiting the Shanidar Caves near Arbil in central Kurdistan. In this book, the author has tried to identify and delineate the heritage of the Kurds, now thoroughly submerged in the accepted and standard models for subdividing Middle Eastern civilization, none of which is designed to accommodate the stateless Kurds.

Criminal Shadows - David Canter 1994

Every crime casts a unique shadow that may be interpreted to lead the police to the criminal responsible. This book looks at "offender profiling" that helps the police to identify and

track individual criminals by the nature of their crime.

Religion and Modernity - Detlef Pollack 2017

This is not a book that provides a new integrated theory of religious change in modern societies, but rather one that develops theoretical elements that contribute to the understanding of some contemporary religious developments. Most of the approaches in sociology of religion are prone to emphasize either processes of religious decline or of religious upswing. For example, secularization theory usually includes a couple of relevant factors--such as functional differentiation, economic affluence or social equality--in order to account for religious change. However, the result of such a theory's empirical analyses seems to be certain in advance, namely that the social relevance of religion is decreasing. In contrast, the religious market model devised by sociologists of religion in the US is inclined to detect everywhere processes of religious upsurge. Religion and Modernity: An International Comparison avoids a purely theoretically based perspective on religious changes. For this reason, Detlef Pollack and Gergely Rosta do not begin with theoretical propositions but with questions. The authors raise the question of how the social significance of religion in its various facets has changed in modern societies, and explain what factors and conditions have contributed to these changes.

Art and Anarchy - Edgar Wind 1985

Will works of the imagination ever regain the power they once had to challenge and mould society and the individual? This was the question posed by Edgar Wind's influential Reith Lectures delivered in 1960 and later expanded into his book Art and Anarchy. The book examines the various forces that have fashioned the modern view of the art, from mechanization and fear of intellect to connoisseurship and--perhaps the fundamental weakness of our age--the dispassionate acceptance of art. In the course of his discussion, Wind surveyed a wide range of topics in the history of painting, literature, music, and the plastic arts from the Renaissance to modern times.

Christianity's Criminal History - K. D.
2018-10-02

Karlheinz Deschner (1924-2014) was a German scholar. He spent the first sixty years of his life investigating the history of the Catholic Church before starting the ten volumes of his maximum opus, Kriminalgeschichte des Christentums (Christianity's Criminal History), which ended at ninety. White nationalists are pretty knowledgeable of the Jewish problem. But very few are aware that Jewish subversion is an epiphenomenon of a religion of Semitic origin: Christianity. Who among the white nationalists-or what more recently is known as the Alt-Right-knows the real history of Christianity? Who is aware that Christian fanatics literally destroyed the Greco-Roman world? The present book is an abridged translation of some chapters of the first three volumes of Deschner's Christianity's Criminal History.

Johnny, My Friend - Peter Pohl 1991

Everything changes for Chris one August evening when red-haired, freckle-faced Johnny turns up on a bicycle, but who is Johnny and why do the police have his bicycle and other belongings?

Archaeogaming - Andrew Reinhard 2018-06-18
Video games exemplify contemporary material objects, resources, and spaces that people use to define their culture. Video games also serve as archaeological sites in the traditional sense as a place, in which evidence of past activity is preserved and has been, or may be, investigated

using the discipline of archaeology, and which represents a part of the archaeological record. This book serves as a general introduction to "archaeogaming"; it describes the intersection of archaeology and video games and applies archaeological method and theory into understanding game-spaces as both site and artifact.

Brutale See - Joachim Wahl 2015-12-18

Jeder kennt sie - die Geschichten über wagemutige Seefahrer, tragische Schiffsunglücke und blutige Meutereien. Aber was verbirgt sich hinter den Mythen um Kapitän Ahab, William Bligh und den berühmten berüchtigten Sklavenaufstand auf der Amistad? Dicht und hoch spannend erzählen Joachim und Susanne Wahl neun prägende Begebenheiten aus der Geschichte der Seefahrt und nehmen Sie mit auf eine Reise in die Vergangenheit. Begegnen Sie tollkühnen Abenteurern, eitlen Emporkömmlingen, grausamen Menschenhändlern und wahren Helden. „Brutale See“ ist ein Buch über stolze Schiffe, nautische Meisterleistungen und mächtige Nationen. Aber vor allem ist es ein Buch über Menschen, die durch ihr Können und ihre Selbstlosigkeit, ihre Schwäche und Lasterhaftigkeit entscheidend zu dem Verlauf einiger der aufsehenerregendsten Kapitel der Seefahrtsgeschichte beigetragen haben. Jedes

Kapitel enthält eine Einführung zum Zeitgeschehen, eine Beschreibung der Schiffe und ihrer Besatzungen sowie Erläuterungen zu Motivation und Ziel der Reisen. Wer mehr über die einzelnen Ereignisse oder allgemeine Aspekte der Seefahrt erfahren möchte, findet Infokästen zu ausgewählten Themen sowie ein ausführliches Literaturverzeichnis.

Destruction in the Performative - 2016-08-09
Cultural transformation tends to be described in one of two ways: either with reference to what comes about, is created or emerges in the process of change or with reference to what is destroyed or obscured in that process. Within a performative paradigm, that is, from a perspective which focuses on the manner in which social and cultural reality is constituted or brought about by human activity, theorists have, in recent years, tended to underline the productive aspects of transformation by emphasising the creative thrust of performative processes and events. In so doing, this perspective has tended to overlook the extent to which a certain destructive element may in fact be inherent to such performative processes. Drawing upon a range of historical and contemporary constellations of socio-cultural change and a variety of different types of events and activities, the articles in this volume describe different forms of destruction and their respective role in processes of transformation. Their shared aim is to explore the manner in which destructivity, such as the destabilisation and destruction of orders, subjects and bodies,

can be grasped by concepts of performativity. In other words, to what extent may a certain destructive dynamic be inscribed within this very notion?

Practical Aspects of Rape Investigation - Robert R. Hazelwood 2016-11-25

This latest edition addresses rape and sexual assaults from all clinical, pathological, medical, and legal aspects. The book focuses on the victim and covers contemporary issues in sexual violence, investigative aspects of rape and sexual assault, offender fantasy, the personality of the offender, collection of evidence, medical examinations, and treatment, as well as trial preparation issues. Special topics include pedophiles, female and juvenile offenders, drug-facilitated rape, sexual sadism, elder abuse, and sexual assault within the military.

What Death Means Now - Tony Walter 2017-08-30

Although death is universal, how we respond to it--how we ready ourselves for death and how we grieve--depends on when and where we live. New preparations for dying, new kinds of funerals, new ways of handling grief, and new ways to memorialize are continually evolving, and with them come new challenges. Bringing to bear twenty-five years of work on the sociology of death and dying, Tony Walter engages critically with key questions such as: should we talk about death more and plan in advance? How possible is advance planning as more people suffer frailty and dementia? How do physical migration and digital connection affect the irreducibly material process of dying? Is the traditional funeral still relevant? Can burial and cremation be ecological? And how should we grieve: quietly, openly, or even online?

Built on Bones - Brenna Hassett 2017-02-23
Imagine you are a hunter-gatherer some 15,000 years ago. You've got a choice - carry on foraging, or plant a few seeds and move to one

of those new-fangled settlements down the valley. What you won't know is that urban life is short and riddled with dozens of new diseases; your children will be shorter and sicker than you are, they'll be plagued with gum disease, and stand a decent chance of a violent death at the point of a spear. Why would anyone choose this? This is one of the many intriguing questions tackled by Brenna Hassett in *Built on Bones*. Using research on skeletal remains from around the world, this book explores the history of humanity's experiment with the metropolis, and looks at why our ancestors chose city life, and why they have largely stuck to it. It explains the diseases, the deaths and the many other misadventures that we have unwittingly unleashed upon ourselves throughout the metropolitan past, and as the world becomes increasingly urbanised, what we can look forward to in the future. Telling the tale of shifts in human growth and health that have occurred as we transitioned from a mobile to a largely settled species. *Built on Bones* offers an accessible insight into a critical but relatively unheralded aspect of the human story: our recent evolution.

Stimme und Schrift - Alfred Messerli 2008
Im Gegensatz zur Schriftkultur, die in den letzten zwei Jahrzehnten zum Thema zahlreicher Arbeiten geworden ist, hat die Erforschung der sekundären Mündlichkeit bislang noch kaum begonnen, geschweige denn von einem interdisziplinären Ansatz, wie ihn der vorliegende Band präsentiert, profitieren können. In einer Zeit, in der sich die 'Schrift' als Leitmedium der Gesellschaft etabliert, bekunden Dichter und Denker eine Erfahrung des Verlustes an Nähe und Unmittelbarkeit (Präsenz). Gegen Orientierungs- und Bindungsverlust sowie Einsamkeitserfahrungen werden kompensatorisch die Stimme (Reden, Vorlesen und Hören) und die gesellige Kommunikation unter Anwesenden beschworen. Mit der Durchsetzung der elektronischen Funkmedien im späten 19. Jahrhundert (Telefon, Radio) und im späten 20. Jahrhundert dem Internet verändert sich die Situation jeweils ein weiteres Mal.

15000 Jahre Mord und Totschlag - Joachim Wahl 2015-03

A History of Ancient Geography Among the Greeks and Romans - Sir Edward Herbert Bunbury 1879

The Homosexuality of Men and Women - Magnus Hirschfeld 2000

One of the founders of the scientific study of sex, Magnus Hirschfeld (1868-1935) led the field with his pioneering objective examinations of homosexuality, tranvestism, and gender identity. "The Homosexuality of Men and Women" was designed to provide a unified, comprehensive description of homosexuality while ridding heterosexuals of gay prejudice and allowing homosexuals to confront their isolation and accept themselves. Opening with a definition and a detailed biological discussion of sexual orientation, including the childhood and adolescent phases, Hirschfeld addresses the physical, mental, and emotional life of homosexuals while explaining the inborn nature of homosexuality and bisexuality. In the second half of the book, Hirschfeld looks at sociology, community life, bonding, roles in society, history, persecution, victimisation, and the law. His documentation of gays in the military and the "new technology" of his day -- such as the telephone and aeroplanes and their affect on the lives of homosexuals -- offers farsighted observations that strongly parallel today's national debates and new developments.

Nipisat - a Saqqaq Culture Site in Sisimiut, Central West Greenland - Anne Birgitte Gotfredsen 2004

From 1989 to 1994, more than 200 m² were excavated at the Saqqaq site of Nipisat, situated on a small island 15 km south of Sisimiut. The excellent preservation conditions for organic material, and the fact that some of the stone artefacts were not previously known from the Saqqaq Culture, were the main reasons for the excavation. More than 70,000 bone fragments, 20,000 flakes and 1,000 artefacts were recovered. A total of 33 dates, making this site one of the best dated in the entire Arctic, reveal that Nipisat was occupied continuously for nearly 1,500 years. Although protruding bedrock disturbed the stratigraphy and several lenses of crushed shells interrupted the layers, three different chronological phases could be identified. Phase 1 is dated by eight 14C dates

ranging from 2020 to 1740 BC (cal). Phase 2 partly overlaps, but is mainly younger than phase 1 and dated by five 14C dates to 1860-1325 BC (cal). Phase 3 is dated by 16 14C dates to 1310-810 BC (cal). One date was very young (520 BC (cal)) and problematic because of extreme oscillations of the 14C curve. From phase 1 there is a mid-passage structure with a box-hearth. A ring of flagstones surrounds the structure. From phase 2 there is a well-defined box-hearth. There was no clear outline of a tent ring surrounding the hearth, which could be due to later disturbances in phase 3. No dwelling structures were recognised from phase 3. Instead several sherds of soapstone were recorded, indicating the use of blubber for light or cooking. From phase 1 and 2 the tool types are well known from other Saqqaq sites in Greenland and Arctic Canada e.g. small harpoon endblades, projectile points, knife blades, scrapers, burins etc. and needles, flint flakers, harpoon heads, wedges etc. But from phase 3 previously unknown types were recorded. A new tool kit for sea mammal hunting is seen in the very sturdy harpoon or lance head made of antler. In addition there are many different kinds of barbed leisters or spears. New types of bevelled harpoon heads, bevelled knife blades and bevelled projectile points, all made of killiaq (silicified slate), were also registered. The faunal assemblage of Nipisat yielded 28,823 identified bone fragments representing at least 42 species of fish, birds and mammals. The fish remains, comprising c. 2% of the faunal material, consisted nearly entirely (98%) of fairly large sized cod (). The bird remains comprise c. 47% of the material and derive from at least 24 bird species. Gulls are the dominant group (c. 54% of the bird remains) followed by eider ducks (spp.) (24%) and spp. (13%) presumably barnacle geese (), while auks () were found in lower frequencies. The most spectacular finds, however, were skeletal remains of subadult great auks () from the oldest phase. A total of 60 presumed whooper swan () remains constitute the hitherto largest, northernmost and oldest occurrence in Greenland. At least 14 mammalian species were identified revealing a surprisingly large proportion of caribou () (51% of the mammal remains) for a coastal site. Seals accounted for 45%, with the common seal () as

the absolutely dominant component. Other marine mammals were walrus () and harbour porpoise (), which played an important but minor role. Polar bear () hunting was documented by the presence of four fragments from the youngest phase. Saqqaq people were accompanied by fairly large and robust dogs (). Nipisat, the first larger Saqqaq site to be excavated from the Open Water Area was a coastal site and through all occupation phases the game animals of the surrounding waters and fjords were hunted. For more than a millennium, the site was visited briefly from time to time, at least during spring, summer and early autumn. Staging geese were captured during spring. In June and July the breeding birds were exploited for their eggs and easily accessible young, as documented by large numbers of juvenile gull bones in particular. The common seal hunting specialised on immature individuals caught primarily during their first summer on the breeding grounds. The inhabitants at Nipisat also hunted caribou on the mainland. The age structure and sex distribution of the caribou remains primarily reflect stalking. Selected body parts, especially the fore and hind legs and the heads, were transported to the island for raw material, meat filleting and further processing for marrow extraction and fat rendering. The exploitation of fauna through the entire occupation period was remarkably constant with respect to choice of game animal and the selected age groups. Although eiders were more abundant in phase 1 (36%) than in phase 3 (17%) while gulls increased from 43 to 61% in the same time period. The same trend was found valid for geese, which increased over time while the importance of auks decreased. Harbour porpoise seem to have decreased while walrus increased in relative importance through time. Caribou seem to be of greater importance in phase 3 with 55% compared to 45% in phase 1. The slight shift in preferred resources may be explained by fluctuating abundance and availability of the game species combined with the development of new hunting tools. Based on the new investigations in the Sisimiut District, the gap between Saqqaq and Dorset Culture in Central West Greenland has been diminished. Although resource exploitation at the site seems to have been very stable through all three

phases, there are aspects of cultural change bridging the transition from Saqqaq to Dorset Cultures. The introduction of bevelled tools, sturdy harpoon or lance heads and the abandonment of the bow and arrow in phase 3, show cultural affiliation with Dorset technology. This is also true in terms of lithic raw material

preference, the introduction of soapstone artefacts and the absence of dwelling structures with a well-defined box-hearth. At the same time it looks like, the central occupation area for the Saqqaq Culture shifted southwards from the Qeqertarsuup Tunua area towards Sisimiut and Nuuk.
