From Hypertension to Heart Failure - Michael Böhm
2012-12-06

Arterial hypertension, coronary heart disease and heart failure are the commonest cardiovascular conditions to present in clinical practice. Over the past few years it has become increasingly clear that they are closely and causally interrelated and that their relationship can have a significant bearing on prognosis. Epidemiological

studies have shown that arterial hypertension is one of the most important risk factors for developing heart failure. Only one in four patients with hypertension is adequately managed, and in 50% of cases, the hypertension has not been recognised or treated. Patients with pre-existing hypertension who go on to suffer an acute myocardial infarction have usually not previously had typical angina symptoms, the infarct territory is larger, life

threatening arrhythmias are commoner and hence in-hospital mortality and long-term prognosis are markedly worse. The presence of raised blood pressure in the post-infarct phase doubles the risk of manifest heart failure. The close relationship between hypertension, coronary heart disease and heart failure makes the choice of therapeutic strategy particularly important. Agents and classes of agents that have prognostic value in all three conditions should be considered first, as synergy might result in additional benefits. In such patients, this sort of therapeutic decision-making might have further advantages. The use of these agents may prevent complications which are not yet clinically obvious (such as heart failure).

Riset Keperawatan di Era Pandemi COVID-19 - Arabta M. Peraten Pelawi, dkk.
2021-10-18

Corona virus adalah keluarga besar virus yang menyebabkan penyakit mulai dari gejala ringan sampai berat.

Setidaknya ada dua jenis corona virus yang diketahui menyebabkan penyakit yang dapat menimbulkan gejala berat seperti Middle East Respiratory Syndrome (MERS) dan Severe Acute Respiratory Syndrome (SARS). Corona Virus Disease 2019 (COVID-19) adalah penyakit jenis baru yang belum pernah diidentifikasi sebelumnya, baik pada manusia maupun hewan. Virus penyebab COVID-19 ini dinamakan Sars-CoV-2. Virus corona adalah zoonosis (ditularkan antara hewan dan manusia). Penelitian menyebutkan bahwa SARS ditransmisikan dari kucing luwak (civet cats) ke manusia

dan MERS dari unta ke manusia. Adapun, hewan yang menjadi sumber penularan COVID-19 ini sampai saat ini masih belum diketahui. Dalam masa pandemi ini fungsi penelitian dan pengembangan merupakan salah satu komponen penting untuk mendukung upaya penanganan pandemi COVID-19, khususnya dalam memberikan saran perbaikan kebijakan yang berbasis bukti dan inovasi. Hal ini merupakan tantangan tersendiri, baik bagi lembaga maupun organisasi yang bergerak dalam ruang lingkup penelitian dan pengembangan, khususnya dalam upaya mendukung keberhasilan mengatasi pandemi penyakit dengan tetap menjaga keabsahan aspek ilmiah, etik penelitian dan kepentingan kesehatan masyarakat, serta perekonomian bangsa. Buku ini mencakup informasi terkait dengan penyelenggaraan penelitian di masa pandemi COVID-19 mencakup penelitian kesehatan baik untuk penelitian berbasis masyarakat dan fasilitas kesehatan. Seiring

dengan perjalanan waktu dan ilmu yang terus berkembang, kami menyadari buku perdana ini masih perlu lebih disempurnakan dan dilengkapi dan kami memberikan kesempatan terbuka atas saran dan kritik yang membangun. Besar harapan kami sekiranya buku ini dapat bermanfaat khususnya bagi kalangan peneliti bidang kesehatan dan bidang terkait dengan lainnya dalam situasi pandemi COVID-19 ini.

Principles and Practice of Geriatric Sleep Medicine - S.

R. Pandi-Perumal 2009-11-26

Sleep disorders cause considerable morbidity and distress in the aging population. By highlighting the clinical diagnosis and management of sleep disorders, this volume provides a valuable resource for all those involved in health care of older individuals. The changes in sleep patterns that occur during normal aging are described, followed by authoritative chapters on the presentation of various age-related sleep disorders. The book deals with the range of therapeutic measures available for managing these disorders and gives insight to potential areas of research that have emerged in the last few years,

such as the study of circadian rhythms in later life, sleep patterns associated with co-morbidities and the use of quality-of-life measurement tools to determine sleep quality as we age. This volume is relevant to sleep disorders specialists, psychiatrists, geriatricians and gerontologists, and any professionals and researchers working in the interdisciplinary areas of sleep and aging.

Salt - Mark Kurlansky
2011-03-18

From the award-winning and bestselling author of *Cod* comes the dramatic, human story of a simple substance, an element almost as vital as water, that has created fortunes, provoked revolutions, directed economies and enlivened our recipes. Salt is common, easy to obtain and inexpensive. It is the stuff of kitchens and cooking. Yet trade routes were established, alliances built and empires secured - all for something that filled the oceans, bubbled up from springs, formed crusts in lake beds, and thickly veined a

large part of the Earth's rock fairly close to the surface. From pre-history until just a century ago - when the mysteries of salt were revealed by modern chemistry and geology - no one knew that salt was virtually everywhere.

Accordingly, it was one of the most sought-after commodities in human history. Even today, salt is a major industry.

Canada, Kurlansky tells us, is the world's sixth largest salt producer, with salt works in Ontario playing a major role in satisfying the Americans' insatiable demand. As he did in his highly acclaimed *Cod*, Mark Kurlansky once again illuminates the big picture by focusing on one seemingly modest detail. In the process, the world is revealed as never before.

The authors examine in detail the mechanisms of hypertension in the elderly, the lifestyle trials and outcomes trials that were conducted in older persons, as well as the problems of clinical evaluation, secondary hypertension, adherence, and target organ damage. Extensive discussions of pharmacologic therapy detail the role of all the major drug classes.

Metodologi Penelitian

Kesehatan [Edisi Revisi] - I

Ketut Swarjana, SKM, MPH
Penelitian adalah hal penting dalam berbagai bidang kehidupan manusia di bumi ini. Perkembangan ilmu pengetahuan dan teknologi tidak terlepas dari aktivitas dunia penelitian, demikian juga di bidang pendidikan dan kesehatan. Perkembangan ataupun kemajuan di berbagai

hal di kedua bidang tersebut sangat dipengaruhi oleh aktivitas atau keberhasilan penelitian di bidangnya masing-masing. Kehadiran buku ini adalah ingin menjawab semua permasalahan di atas, baik yang dihadapi oleh peneliti, terutama penelitipemula maupun kesulitan yang dihadapi oleh mahasiswa baik sarjana maupun pasca sarjana dalam membuat proposal penelitian bidang kesehatan (keperawatan, kebidanan, kesehatan masyarakat, dan lain-lain).

Hypertension Control - WHO Expert Committee on Hypertension Control 1996 A state-of-the-art review of research findings that contribute to an understanding of hypertension and the best measures for its prevention and control, whether in individual patients or entire populations. Noting that elevated blood pressure is a massive health problem in almost every country, the report argues that programs for hypertension control should

be an integral part of all national health care systems. With this goal in mind, the report aims to help policy makers appreciate the significance and complexities of hypertension, understand the options available for control and then select the most appropriate mix of interventions. Details range from recommended procedures for obtaining an accurate assessment of blood pressure through advice on the best drugs for first-line treatment of hypertensive patients to a discussion of ways to educate populations about relevant lifestyle changes Throughout the report, population-based and individual approaches are presented as complementary, synergistic strategies for hypertension control. To assist physicians as well as policy makers, the report includes abundant recommendations based on the best scientific evidence for the management of different patient groups. A section on the clinical assessment of the hypertensive patient explains the

components of a coherent step-wise diagnostic process involving history taking physical examination and laboratory investigation. Included are an assessment of the most suitable drugs for first-line treatment and guidelines for developing management plans for mild hypertension, moderate and severe hypertension, resistant hypertension and hypertensive emergencies. In view of the need to assure that scarce resources are invested wisely, the report also discusses and compares the cost-effectiveness of different management strategies.

Home Blood Pressure Monitoring - George S.

Stergiou 2019-10-31

Hypertension remains a leading cause of disability and death worldwide. Self-monitoring of blood pressure by patients at home is currently recommended as a valuable tool for the diagnosis and management of hypertension. Unfortunately, in clinical practice, home blood pressure monitoring is often inadequately implemented, mostly due to the use of inaccurate devices and inappropriate methodologies. Thus, the potential of the method to improve the management of hypertension and cardiovascular disease prevention has not yet been exhausted. This volume presents the available evidence on home blood pressure monitoring, discusses its

strengths and limitations, and presents strategies for its optimal implementation in clinical practice. Written by distinguished international experts, it offers a complete source of information and guide for practitioners and researchers dealing with the management of hypertension.

Mini Nutritional Assessment (MNA) - Bruno J. Vellas 1999

This book is the first of a new

series which will present the proceedings of the newly established Nestlé Nutrition Workshop Series: Clinical & Performance Programme aimed at adult nutrition. Undernutrition is a common phenomenon in elderly people, and malnutrition reaches significant levels in those being in hospital, nursing homes or home care programs. Consequences of malnutrition often go unrecognised owing to the lack of specific validated instruments to assess nutritional status in frail elderly persons. The Mini Nutritional Assessment (MNA) provides a single, rapid assessment of nutritional status in the elderly of different degrees of independence, allowing the prevalence of protein-energy malnutrition to be determined and to evaluate the efficacy of nutritional intervention and strategies. Easy, quick and economical to perform, it enables staff to check the nutritional status of elderly people when they enter hospitals or institutions and to monitor changes occurring

during their stay. Moreover, the MNA is predictive of the cost of care and length of stay in hospital. This publication will be of immense assistance to heads of geriatric teaching units, teachers in nutrition, clinicians general practitioners and dieticians, enabling them to better detect, recognise and start treatment of malnutrition in the elderly.

emphasizing the importance of rigorous methodologies. Each receives a comprehensive practical treatment which includes an overview of its relative advantages, limitations, and applicability. Topics include quantitative and qualitative dietary methods and the evaluation of nutrient intakes; the assessment of growth, fat-free mass, and body fat; and the evaluation of anthropometric measurements and reference data from national surveys. Chapters on biochemical assessment deal with specific group nutrients, outlining methods selected for their appropriateness for undergraduate students with limited practical laboratory experience. Interpretive criteria for evaluating the biochemical measurements are included at the end of each method's exposition. This book will be of great use and interest to students studying nutritional assessment in dietetics, home economics, nutritional sciences, public health, and nursing, as well as to health professionals involved

in nutritional assessment.

Gerontologic Nursing -

Annette Giesler Lueckenotte
2000

GERONTOLOGIC NURSING provides comprehensive coverage of health promotion, gerontologic concepts and issues, and medical-surgical problems associated with the older adult. Divided into seven parts, each chapter follows a consistent organization including learning objectives, emergency boxes, client and family teaching boxes, research boxes, key points, special insights, and new health

promotion and nutrition boxes. The second edition also includes a new chapter on health promotion, expanded chapters on nutrition and functional assessment, and a dedicated MERLIN which provides the student and instructor with additional up-to-date tools and resources to enhance and expand their content knowledge. Highlights fundamental aging theories to provide a basis for biological and psychosocial aspects of quality nursing care. Provides complete and comprehensive coverage of assessment recapping normal, deviations from normal and abnormal findings. Uses a 5-step nursing process format to provide the consistent framework for presentation of nursing care. Features care plans with clinical situations for those disorders most prevalent in the elderly. Includes a separate chapter on cultural influences and integrates cultural awareness boxes throughout to focus on specific customs related to how a nurse might care for the aging client.

Includes separate chapters focusing on acute, home and long term care to provide a complete discussion of care in each of these settings. Provides detailed coverage of pain, infection, cancer, chronic illness, loss, death and dying, and substance abuse to explain potentially complex aspects of aging and the related care. Provides a consistent chapter pedagogy including learning objectives, summary, key points, and critical thinking exercises. Includes Client/Family teaching boxes that emphasize key aspects of practice and teaching for self-care. Highlights Home Care Tips Boxes to promote practical, effective care for the home-bound older client. Integrates Insight boxes that provide realistic vignettes on caring for the elderly and helpful hints from today's practicing gerontological nurses. Provides Emergency Treatment boxes that alert the student to danger signs and list immediate interventions. Includes research boxes with abstracts of current research

and implications for practice. Provides a nuts-and-bolts guide to blood-product administration for adult and pediatric patients. Outlines and explains transfusion reactions. Describes the effect of different types of fluids used in resuscitation. Includes formulas used in fluid administration. Provides the most up-to-date information about oxygen delivery devices. Presents information on how to help a Spanish-speaking child identify his/her level of pain. Includes the pediatric coma scale. Features the pediatric trauma score which is used to help evaluate the severity of injury. Provides information about domestic violence in the Mental Health Conditions chapter. Includes a section on the role of the Sexual Assault Nurse Examiner (SANE) and the latest findings on sexual assault. Presents additional information on mammalian bites and anaphylactic shock. Highlights major points of care for quick reference with bold or italicized text. Presents pediatric and adult content

separately in the reference section of the book for fast and easy access. Includes stroke and hypothermia algorithms. Covers the latest information on conscious sedation according to JCAHO standards, including a table on deep sedation. Features several new and updated tables which include the following information: conversion of Centigrade and Fahrenheit, updated normal lab values, updated medication tables, etc. (Includes a FREE MERLIN website at:

www.harcourthealth.com/MERLIN/Lueckenotte/)

Perubahan Tekanan Darah Lanjut Usia Dengan Hipertensi - Isna Ovari dan Silvia Nora Anggreini

Stress and Cardiovascular Disease - Paul Hjemdahl 2011-10-01

The main aim of this book is to evaluate the concept of stress and provide tools for physicians to identify patients who might benefit from stress management. This will incorporate a detailed description of the physiological and pathophysiological consequences of acute and chronic stress that might lead to cardiovascular disease. The book will aim to critically evaluate interventional research (behavioural and other therapies) and provide evidence based recommendations on how to manage stress in the cardiovascular patient. Our intentions are to define and highlight stress as an etiological factor for cardiovascular disease, and to describe an evidence based "tool box" that physicians may

use to identify and manage patients in whom stress may be an important contributing factor for their disease and their risk of suffering cardiovascular complications.

Akupresur untuk Kesehatan Wanita Berbasis Hasil Penelitian - Dr. Heni Setyowati ER, S.Kp, M.Kes 2018-02-15

Tubuh memiliki sistem kekebalan untuk melawan penyakit dan gangguan. Kekebalan tubuh akan berfungsi secara baik apabila energi mengalir secara lancar melalui meridian-meridian yang ada. Akupresur merupakan pemijatan dengan jari tangan pada titik-titik penyembuhan (akupoint) yang berfungsi untuk menyeimbangkan energi dalam tubuh sehingga meningkatkan kemampuan tubuh melakukan penyembuhan diri secara alami. Energi dalam tubuh yang tidak seimbang akan menyebabkan munculnya penyakit sebaliknya energi dalam tubuh yang seimbang akan mempertahankan seseorang itu dalam kondisi sehat. Berbagai penelitian

telah membuktikan bahwa akupresur efektif untuk menghilangkan berbagai gejala dan keluhan tanpa menimbulkan efek samping yang membahayakan pasien. Akupresur dapat dilakukan oleh tenaga kesehatan yang terlatih dan oleh diri sendiri dengan membaca literatur atau buku. Akupresur dapat diterapkan untuk menjaga kesehatan wanita di sepanjang siklus kehidupannya. Buku ini menjelaskan tentang berbagai gangguan utama yang paling sering muncul pada wanita mulai dari remaja putri, wanita hamil, wanita bersalin, wanita pasca persalinan dan wanita dengan masa menopause. Pembahasan dimulai dengan konsep gangguan atau masalah kesehatan yang muncul sampai dengan penanganan gangguan khususnya melalui akupresur yang didukung oleh hasil-hasil penelitian supaya menjadi evidence yang nyata untuk pelaksanaan akupresur. Aortopathy - Koichiro Niwa
2017-02-09

This is the first textbook to focus on Aortopathy, a new clinical concept for a form of vasculopathy. The first section of the book starts from discussing general concept and history of Aortopathy, and then deals with its pathophysiology, manifestation, intrinsic factor, clinical implication, management and prevention. The second part closely looks at various disorders of the Aortopathy such as bicuspid aortic valve and coarctation of aorta. The book editors have published a lot of works on the topic and have been collecting relating data in the field of congenital heart disease for the past 20 years, thus present the book with confidence. The topic - an association of aortic pathophysiological abnormality, aortic dilation and aorto-left ventricular interaction - is getting more and more attention among cardiovascular physicians. This

is the first book to refer for cardiologists, pediatric cardiologists, surgeons, ACHD specialists, etc. to acquire thorough knowledge on Aortopathy.

The Queen's Gambit -

Deborah Chester 2002-11-26

The national bestselling author of *The Sword, The Ring* and *The Chalice* returns the royal court intrigue, the castle secrets, and the crown scandals of her acclaimed trilogy. The throne was her destiny, until Princess Pheresa lost her groom, Mandria's heir, to the dark magic that consumed him. Now Pheresa's fate is uncertain, even when the great King Verence names her Princess Royal, because the title comes with one condition: She must take Lervan, a man of acceptable birth and rank, as her husband. Reluctantly, she agrees. Then, without warning, the old king dies. And Pheresa succeeds to the throne. But all is not well. Many fear that Pheresa has been weakened by the evil magic. Her enemies are strong. Her husband plots against her. And her only ally is the last man she would ever choose—and the one man she should never love.
