The Wretched of the Earth - Frantz Fanon 2007-12-01

The sixtieth anniversary edition of Frantz Fanon's landmark text, now with a new introduction by Cornel West First published in 1961, and reissued in this sixtieth anniversary edition with a powerful new introduction by Cornel West, Frantz Fanon's *The Wretched of the Earth* is a masterful and timeless interrogation of race, colonialism, psychological trauma, and revolutionary struggle, and a continuing influence on movements from Black Lives Matter to decolonization. A landmark text for revolutionaries and activists, *The Wretched of the Earth* is an eternal touchstone for civil rights, anti-colonialism, psychiatric studies, and Black consciousness movements around the world. Alongside Cornel West's introduction, the book features critical essays by Jean-Paul Sartre and Homi K. Bhabha. This sixtieth anniversary edition of Fanon's most famous text stands proudly alongside such pillars of anti-colonialism and anti-racism as Edward Said's *Orientalism* and *The Autobiography of Malcolm X*.

Culture and Imperialism - Edward W. Said 2012-10-24

A landmark work from the author of *Orientalism* that explores the long-overlooked connections between the Western imperial endeavor and the culture that both reflected and reinforced it. In the nineteenth and early twentieth centuries, as the Western powers built empires that stretched from Australia to the West Indies, Western artists created masterpieces ranging from *Mansfield Park* to *Heart of Darkness* and *Aida*. Yet most cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such writers as W. B. Yeats, Chinua Achebe, and Salman Rushdie to show how subject peoples produced their own vigorous cultures of opposition and resistance. Vast in scope and stunning in its erudition, *Culture and Imperialism* reopens the dialogue between literature and the life of its time.

Theories of Development - William Crain 2015-10-02

The result of extensive scholarship and consultation with leading scholars, this text introduces students to twenty-four theorists and compares and contrasts their theories on how we develop as individuals. Emphasizing the theories that build upon the developmental tradition established by Rousseau, this text also covers theories in the environmental/learning tradition.

Losing Military Supremacy - Andrei Martyanov 2018-06-04

"Martyanov explains why and how the US armed forces have lost the military supremacy they thought they once had and how Russia, which supposedly had been defeated in the Cold War, succeeded not only in catching up with USA, but actually surpassing it in many key domains such as long range cruise missiles, diesel-electric submarines, air defenses, electronic warfare, air superiority and many others. Andrei Martyanov's book is an absolute 'must read' for any person wanting to understand the reality of modern warfare and super-power competition." THE SAKER While exceptionalism is not unique to America, the intensity of their conviction and its global ramifications are. This view of its exceptionalism has led the US to grossly misinterpret—sometimes deliberately—the causative factors of key events of the past two centuries. Accordingly, the wrong conclusions have been derived, and very wrong lessons learned. Nowhere has this been more manifest than in American military thought and its actual application of military power. Time after time the American military has failed to match lofty declarations about its superiority, producing instead a mediocre record of military accomplishments. Starting from the Korean

War the United States hasn't won a single war against a technologically inferior, but mentally tough enemy. The technological dimension of American "strategy" has completely overshadowed any concern with the social, cultural, operational and even tactical requirements of military (and political) conflict. With a new Cold War with Russia emerging, the United States enters a new period of geopolitical turbulence completely unprepared in any meaningful way—intellectually, economically, militarily or culturally—to face a reality which was hidden for the last 70+ years behind the curtain of never-ending Chalabi moments and a strategic delusion concerning Russia, whose history the US viewed through a Solzhenitsified caricature kept alive by a powerful neocon lobby, which even today dominates US policy makers' minds. Martyanov's former Soviet military background enables deep insight into the fundamental issues of warfare and military power as a function of national power—assessed correctly, not through the lens of Wall Street "economic" indices and a FIRE economy, but through the numbers of enclosed technological cycles and culture, much of which has been shaped in Russia by continental warfare and which is practically absent in the US.

Fanged Noumena - Nick Land 2011-04-01

A dizzying trip through the mind(s) of the provocative and influential thinker Nick Land. During the 1990s British philosopher Nick Land's unique work, variously described as "rabid nihilism," "mad black deleuzianism," and "cybergothic," developed perhaps the only rigorous and culturally-engaged escape route out of the malaise of "continental philosophy" —a route that was implacably blocked by the academy. However, Land's work has continued to exert an influence, both through the British "speculative realist" philosophers who studied with him, and through the many cultural producers—writers, artists, musicians, filmmakers—who have been invigorated by his uncompromising and abrasive philosophical vision. Beginning with Land's early radical rereadings of Heidegger, Nietzsche, Kant and Bataille, the volume collects together the papers, talks and articles of the mid-90s—long the subject of rumour and vague legend (including some work which has never previously appeared in print)—in which Land developed his futuristic theory-fiction of cybercapitalism gone amok; and ends with his enigmatic later writings in which Ballardian fictions, poetics, cryptography, anthropology, grammatology and the occult are smeared into unrecognisable hybrids. *Fanged Noumena* gives a dizzying perspective on the entire trajectory of this provocative and influential thinker's work, and has introduced his unique voice to a new generation of readers.

Calling the Doves - Juan Felipe Herrera 1995

The author recalls his childhood in the mountains and valleys of California with his farmworker parents who inspired him with poetry and song.

Exotic Nations - Renata Wasserman 2018-03-15

In this highly original and critically informed book, Renata R. Mautner Wasserman looks at how, during the first decades following political independence, writers in the United States and Brazil assimilated and subverted European images of an "exotic" New World to create new literatures that asserted cultural independence and defined national identity. *Exotic Nations* demonstrates that the language of exoticism thus became part of the New World's interpretation of its own history and natural environment.

Cerca / Close - Juan Felipe Herrera 2019-09

Some things are close -- cerca. Others are far -- lejos. With sweet simplicity, this charming dual-language board book and its companion volume, *Lejos/Far*, engage young children. Mi cuarto está cerca de la cocina. My bedroom is close to the kitchen. As she walks from her kitchen through a daisy-filled yard to the house next door, a little girl notices things that are close to each other -- just as the little boy she goes to visit is close to her.

An American Utopia - Fredric Jameson 2016-07-12

Controversial manifesto by acclaimed cultural theorist debated by leading writers Fredric Jameson's pathbreaking essay "An American Utopia" radically questions standard leftist notions of what constitutes an emancipated society. Advocated here are—among other things—universal conscription, the full acknowledgment of envy and resentment as a fundamental challenge to any communist society, and the acceptance that the division between work and leisure cannot be overcome. To create a new world, we must first change the way we envision the world. Jameson's text is ideally placed to trigger a debate on the alternatives to global capitalism. In addition to Jameson's essay, the volume includes responses from philosophers and political and cultural analysts, as well as an epilogue from Jameson himself. Many will be appalled at what they will encounter in these pages—there will be blood! But perhaps one has to spill such (ideological) blood to give the Left a chance. Contributing are Kim Stanley Robinson, Jodi Dean, Saroj Giri, Agon Hamza, Kojin Karatani, Frank Ruda, Alberto Toscano, Kathi Weeks, and Slavoj Žižek.

Wealth And Poverty Of Nations - David S. Landes 2015-04-20

The history of nations is a history of haves and have-nots, and as we approach the millennium, the gap between rich and poor countries is widening. In this engrossing and important new work, eminent historian David Landes explores the complex, fascinating and often startling causes of the wealth and poverty of nations. The answers are found not only in the large forces at work in economies: geography, religion, the broad swings of politics, but also in the small surprising details. In Europe, the invention of spectacles doubled the working life of skilled craftsmen, and played a prominent role in the creation of articulated machines, and in China, the failure to adopt the clock fundamentally hindered economic development. The relief of poverty is vital to the survival of us all. As David Landes brilliantly shows, the key to future success lies in understanding the lessons the past has to teach us - lessons uniquely imparted in this groundbreaking and vital book which exemplifies narrative history at its best.

Race Is about Politics - Jean-Frédéric Schaub 2019-01-08

How the history of racism without visible differences between people challenges our understanding of the history of racial thinking. Racial divisions have returned to the forefront of politics in the United States and European societies, making it more important than ever to understand race and racism. But do we? In this original and provocative book, acclaimed historian Jean-Frédéric Schaub shows that we don't—and that we need to rethink the widespread assumption that racism is essentially a modern form of discrimination based on skin color and other visible differences. On the contrary, Schaub argues that to understand racism we must look at historical episodes of collective discrimination where there was no visible difference between people. Built around notions of identity and otherness, race is above all a political tool that must be understood in the context of its historical origins. Although scholars agree that races don't exist except as ideological constructions, they disagree about when these ideologies emerged. Drawing on historical research from the early modern period to today, Schaub makes the case that the key turning point in the political history of race in the West occurred not with the Atlantic slave trade and American slavery, as many historians have argued, but much earlier, in fifteenth-century Spain and Portugal, with the racialization of Christians of Jewish and Muslim origin. These Christians were discriminated against under the new idea that they had negative social and moral traits that were passed from generation to generation through blood, semen, or milk—an idea whose legacy has persisted through the age of empires to today.

Challenging widespread definitions of race and offering a new chronology of racial thinking, Schaub shows why race must always be understood in the context of its political history.

Death by a Thousand Cuts - Matt Qvortrup 2021-06-21

Putting the current crisis of democracy into historical perspective, *Death by a Thousand Cuts* chronicles how would-be despots, dictators, and outright tyrants have finessed the techniques of killing democracies earlier in history, in the 20th Century, and how today's autocrats increasingly continue to do so in the 21st. It shows how autocratic government becomes a kleptocracy, sustained only to enrich the ruler and his immediate family. But the book also addresses the problems of being a dictator and considers if dictatorships are successful in delivering public policies, and finally, how autocracies break down. We tend to think of democratic breakdowns as dramatic events, such as General Pinochet's violent coup in Chile, or Generalissimo Franco's overthrow of the Spanish Republic. But this is not how democracies tend to die – only five percent of democracies end like this. Most often, popular government is brought down gradually; almost imperceptibly. Based in part on Professor Qvortrup's BBC Programme *Death by a Thousand Cuts* (Radio-4, 2019), the book shows how complacency is the greatest danger for the survival of government by the people. Recently democratically elected politicians have used crises as a pretext for dismantling democracy. They follow a pattern we have seen in all democracies since the dawn of civilisation. The methods used by Octavian in the dying days of the Roman Republic were almost identical to those used by Hungarian strongman Viktor Orbán in 2020. And, sadly, there are no signs that the current malaise will go away. *Death by a Thousand Cuts* adds substance to a much-discussed topic: the threat to democracy. It provides evidence and historical context like no other book on the market. Written in an accessible style with vignettes as well as new empirical data, the book promises to be the defining book on the topic. This book will help readers who are concerned about the longevity of democracy understand when and why democracy is in danger of collapsing, and alert them to the warning signs of its demise.

Imagina - Jose A. Blanco 2010-01-04

The Hostage Brain - Bruce S. McEwen 1994

The Sumerians - Samuel Noah Kramer 2010-09-17

The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader. For the layman

the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation."—American Journal of Archaeology "An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity."—Library Journal

The Visitation of Hannah Arendt - Michal Ben-Naftali 2020-04-06

The Visitation of Hannah Arendt is an attempt to literally enact Arendt's notion of "natality". Arendt, known to a large extent through her engagement with the public sphere and with political discourse, is invited here to pay intimate visitations to four different figures: an anonymous student, the poetess Dahlia Ravikovich, the ghost of Stefan Zweig and Michal, Saul's daughter. The intellectual visitation, as a complex process of both mimesis and rejection, is revealed to be a natality, a rebirth in spirit. The book presents an aesthetic-semiotic reading of Arendt by traversing the ensemble of her work. A special chapter is dedicated to Eichmann in Jerusalem.

Essays on Paula Rego: Smile When You Think about Hell - Maria Manuel Lisboa 2019-09-25

In these powerful and stylishly written essays, Maria Manuel Lisboa dissects the work of Paula Rego, the Portuguese-born artist considered one of the greatest artists of modern times. Focusing primarily on Rego's work since the 1980s, Lisboa explores the complex relationships between violence and nurturing, power and impotence, politics and the family that run through Rego's art. Taking a historicist approach to the evolution of the artist's work, Lisboa embeds the works within Rego's personal history as well as Portugal's (and indeed other nations') stories, and reveals the interrelationship between political significance and the raw emotion that lies at the heart of Rego's uncompromising iconographic style. Fundamental to Lisboa's analysis is an understanding that apparent opposites – male and female, sacred and profane, aggression and submissiveness – often co-exist in Rego's work in a way that is both disturbing and destabilising. This collection of essays brings together both unpublished and previously published work to make a significant contribution to scholarship about Paula Rego. It will also be of interest to scholars and students of contemporary painting, Portuguese and British feminist art, and the political and ideological aspects of the visual arts.

The First Resort of Kings - Richard T. Arndt 2011

Imagine - Juan Felipe Herrera 2020-10-06

A buoyant, breathtaking poem from Juan Felipe Herrera — brilliantly illustrated by Caldecott Honoree Lauren Castillo — speaks to every dreaming heart. Have you ever imagined what you might be when you grow up? When he was very young, Juan Felipe Herrera picked chamomile flowers in windy fields and let tadpoles swim across his hands in a creek. He slept outside and learned to say good-bye to his amiguitos each time his family moved to a new town. He went to school and taught himself to read and write English and filled paper pads with rivers of ink as he walked down the street after school. And when he grew up, he became the United States Poet Laureate and read his poems aloud on the steps of the Library of Congress. If he could do all of that . . . what could you do? With this illustrated poem of endless possibility, Juan Felipe Herrera and Lauren Castillo breathe magic into the hopes and dreams of readers searching for their place in life.

Brittle Power - Amory B. Lovins 1983-04-01

Technics and Civilization - Lewis Mumford 2010-10-30

Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, Technics and Civilization was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us

today. "The questions posed in the first paragraph of Technics and Civilization still deserve our attention, nearly three quarters of a century after they were written."—Journal of Technology and Culture

Memory Politics in Contemporary Russia - Mariëlle Wijermars 2018-07-11

This book examines the societal dynamics of memory politics in Russia. Since Vladimir Putin became president, the Russian central government has increasingly actively employed cultural memory to claim political legitimacy and discredit all forms of political opposition. The rhetorical use of the past has become a defining characteristic of Russian politics, creating a historical foundation for the regime's emphasis on a strong state and centralised leadership. Exploring memory politics, this book analyses a wide range of actors, from the central government and the Russian Orthodox Church, to filmmaker and cultural heavyweight Nikita Mikhalkov and radical thinkers such as Aleksandr Dugin. In addition, in view of the steady decline in media freedom since 2000, it critically examines the role of cinema and television in shaping and spreading these narratives. Thus, this book aims to gain a better understanding of the various means through which the Russian government practices its memory politics (e.g., the role of state media) and, on the other hand, to sufficiently value the existence of alternative and critical voices and criticism that existing studies tend to overlook. Contributing to current debates in the field of memory studies and of current affairs in Russia and Eastern Europe, this book will be of interest to scholars working in the fields of Russian Studies, Cultural Memory Studies, Nationalism and National Identity, Political Communication, Film, Television and Media Studies.

Post-Imperium - Dmitri V. Trenin 2011-08-01

The war in Georgia. Tensions with Ukraine and other nearby countries. Moscow's bid to consolidate its "zone of privileged interests" among the Commonwealth of Independent States. These volatile situations all raise questions about the nature of and prospects for Russia's relations with its neighbors. In this book, Carnegie scholar Dmitri Trenin argues that Moscow needs to drop the notion of creating an exclusive power center out of the post-Soviet space. Like other former European empires, Russia will need to reinvent itself as a global player and as part of a wider community. Trenin's vision of Russia is an open Euro-Pacific country that is savvy in its use of soft power and fully reconciled with its former borderlands and dependents. He acknowledges that this scenario may sound too optimistic but warns that the alternative is not a new version of the historic empire but instead is the ultimate marginalization of Russia.

A imaginação totalitária - Francisco Razzo 2016-06-24

Um livro que escancara os perigos da esperança na política. Com o rigor de um scholar e a força argumentativa de um polemista, Francisco Razzo expõe uma tese perturbadora: esquerda, direita ou centro, somos todos responsáveis pelas jaulas voluntárias de nossas ideologias. A imaginação totalitária é a

estrela promissora de um escritor que quer nos perturbar sem fazer nenhuma concessão. E, sobretudo, o relato de um exorcismo pessoal de alguém que também quer expulsar os demônios que infestam a atual sociedade brasileira – especialmente quando esta crê que a política é a última esperança que nos resta.

The Licit Life of Capitalism - Hannah Appel 2019-12-13

The Licit Life of Capitalism is both an account of a specific capitalist project—U.S. oil companies working off the shores of Equatorial Guinea—and a sweeping theorization of more general forms and processes that facilitate diverse capitalist projects around the world. Hannah Appel draws on extensive fieldwork with managers and rig workers, lawyers and bureaucrats, the expat wives of American oil executives and the Equatoguinean women who work in their homes, to turn conventional critiques of capitalism on their head, arguing that market practices do not merely exacerbate inequality; they are made by it. People and places differentially valued by gender, race, and colonial histories are the terrain on which the rules of capitalist economy are built. Appel shows how the corporate form and the contract, offshore rigs and economic theory are the assemblages of liberalism and race, expertise and gender, technology and domesticity that enable the licit life of capitalism—practices that are legally sanctioned, widely replicated, and ordinary, at the same time as they are messy, contested, and, arguably, indefensible.

Shift Or Rift - Gustav Lindstrom 2003

Inventing Europe - G. Delanty 1995-04-19

A critical analysis of the idea of Europe and the limits and possibilities of a European identity in the broader perspective of history. This book argues that the crucial issue is the articulation of a new identity that is based on post-national citizenship rather than ambivalent notions of unity.

Staying with the Trouble - Donna J. Haraway 2016-08-19

In the midst of spiraling ecological devastation, multispecies feminist theorist Donna J. Haraway offers provocative new ways to reconfigure our relations to the earth and all its inhabitants. She eschews referring to our current epoch as the Anthropocene, preferring to conceptualize it as what she calls the Chthulucene, as it more aptly and fully describes our epoch as one in which the human and nonhuman are inextricably linked in tentacular practices. The Chthulucene, Haraway explains, requires sym-poiesis, or making-with, rather than auto-poiesis, or self-making. Learning to stay with the trouble of living and dying together on a damaged earth will prove more conducive to the kind of thinking that would provide the means to building more livable futures. Theoretically and methodologically driven by the signifier SF—string figures, science fact, science fiction, speculative feminism, speculative fabulation, so far—Staying with the Trouble further cements Haraway's reputation as one of the most daring and original thinkers of our time.

Violent Becomings - Bjørn Enge Bertelsen 2016-08-01

Violent Becomings conceptualizes the Mozambican state not as the bureaucratically ordered polity of the nation-state, but as a continuously emergent and violently challenged mode of ordering. In doing so, this book addresses the question of why colonial and postcolonial state formation has involved violent articulations with so-called 'traditional' forms of sociality. The scope and dynamic nature of such violent becomings is explored through an array of contexts that include colonial regimes of forced labor and pacification, liberation war struggles and civil war, the social engineering of the post-independence state, and the popular appropriation of sovereign violence in riots and lynchings.

Management of Knowledge-Intensive Companies - Mats Alvesson 1995-01-01

Thinking in Dark Times - Roger Berkowitz 2010

Hannah Arendt is one of the most important political theorists of the twentieth century. In her works, she grappled with the dark events of that century, probing the nature of power, authority, and evil, and seeking to confront totalitarian horrors on their own terms. This book focuses on how, against the professionalized discourses of theory, Arendt insists on the greater political importance of the ordinary activity of thinking. Indeed, she argues that the activity of thinking is the only reliable protection against the horrors that buffeted the last century. Its essays explore and enact that activity, which Arendt calls the habit of erecting obstacles to oversimplifications, compromises, and conventions. Most of the essays were written for a conference at Bard College celebrating the 100th anniversary of Arendt's birth. Arendt left her personal library and literary effects to Bard, and she is buried in the Bard College cemetery. Material from the Bard archive—such as a postcard to Arendt from Walter Benjamin or her annotation in her copy of Machiavelli's *The Prince*—and images from her life are interspersed with the essays in this volume. The volume will offer provocations and insights to Arendt scholars, students discovering Arendt's work, and general readers attracted to Arendt's vision of the importance of thinking in our own dark times.

Cinematic Independence - Noah Tsika 2022-02-22

A free open access ebook is available upon publication. Learn more at www.luminosoa.org. Cinematic Independence traces the emergence, demise, and rebirth of big-screen film exhibition in Nigeria. Film companies flocked to Nigeria in the years following independence, beginning a long history of interventions by Hollywood and corporate America. The 1980s and 1990s saw a shuttering of cinemas, which were almost entirely replaced by television and direct-to-video movies. However, after 1999, the exhibition sector was revitalized with the construction of multiplexes. Cinematic Independence is about the periods that straddle this disappearing act: the immediate decades bracketing independence in 1960, and the years after 1999. At stake is the Nigerian postcolony's role in global debates about the future of the movie theater. That it was eventually resurrected in the flashy form of the multiplex is not simply an achievement of commercial real estate, but also a testament to cinema's persistence—its capacity to stave off annihilation or, in this case, come back from the dead.

Research in Teaching and Learning about the Holocaust - Jolanta Ambrosewicz-Jacobs 2017-02-20

Nineteen Eighty-Four - George Orwell 2021-01-09

"Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.
