Upheaval - Navid Kermani 2017-05-09

By foot, in buses, prison vans and trains, a steady stream of refugees traveled from the Greek island of Lesbos into Europe. In the autumn of 2015, award-winning writer Navid Kermani decided to accompany them on the "Balkan route." In this perceptive account from the front line of the "refugee crisis," Kermani shows how a seemingly distant world in which war and conflict rage has suddenly collided with our own. Kermani describes the situation on the Turkish west coast where thousands of refugees live in the most desperate conditions, waiting to take the perilous journey across the Mediterranean. Then, on Lesbos, he observes the culture shock amongst those who have survived the ordeal by sea. He speaks to aid workers and politicians, but most importantly of all to the refugees themselves, asking those who have come from Syria, Iraq, Afghanistan and elsewhere what has driven them to risk everything and embark on the long and treacherous journey to Europe. With great sensitivity Kermani reveals, often through small details, the cultural and political upheaval that has caused people to uproot their lives, and at the same time shining a light on Europe's inadequate and at times openly hostile response to the refugees. Interspersed with powerful images by

the acclaimed photographer Moises Saman, *Upheaval* is a much-needed human account of a crisis we cannot ignore.

Technology and Vocational Education for Sustainable Development - Margarita Pavlova 2008-12-14

Empowerment is the overarching idea used in this book. The term has a variety of meanings in different sociocultural and political contexts, including “self-strength, control, self-power, self-reliance, own choice, life of dignity in accordance with one’s values, capable of fighting for one’s rights, independence, own decision making, being free, awakening,

and capability” (The World Bank, 2002, p. 10). However, the World Bank report observed that most definitions focus on issues of “gaining power and control over decisions and resources that determine the quality of one’s life” (p. 10). This interpretation of empowerment provides a useful starting point for the development of the series of interconnected arguments explored here. Establishment of the basis for understanding, identifying and developing strategies through education necessary for individuals to be able to make choices that influence the quality of their lives is the main aim of this book. There are a number of assumptions and boundaries that frame this analysis. First, the book focuses on “agents”; however, empowerment is often conceptualised in terms of relationships between agency and structure (e. g. , Alsop, Bertelsen, & H- land, 2006). Agency could be defined as “an actor’s or group’s ability to make purposeful choices - that is, the actor is able to envisage and purposively choose options” (p. 11).

Robert Bosch - Peter Theiner 2019-10-15

Robert Bosch (1861 - 1942) was one of the most successful German entrepreneurs and philanthropists of the 20th century and, at the same time, a pioneer of the social market economy. This book presents a comprehensive and impressive biography of a visionary who thought far ahead of his time like almost no other. Peter Theiner follows the traces of

this trailblazer of modernity who founded a global company. 1886, Robert Bosch opened his Werkstätte für Feinmechanik und Elektrotechnik, today’s Robert Bosch GmbH, in a modest rear building. Pioneering innovations for motorized vehicles emerged from the young company, and Bosch was quickly able to point to tremendous international successes as an industrialist. Today, his name represents the rise of motor vehicles and electricity in the home. In addition, he also had an impact as a benefactor and philanthropist with a well-developed political profile and a strong sense of social responsibility. In a time of wars and upheaval, in an age of extremes, Bosch positioned himself as a staunch Democrat who cut against the grain of German history.

Love as Passion - Niklas Luhmann 2014-12-08

In this important book Niklas Luhmann - one of the leading social thinkers of the late 20th century - analyses the emergence of 'love' as the basis of personal relationships in modern societies. He argues that, while family systems remained intact in the transition from traditional to modern societies, a semantics for love developed to accommodate extra-marital relationships; this semantics was then transferred back into marriage and eventually transformed marriage itself. Drawing on a diverse range of historical and literary sources, Luhmann retraces the emergence and evolution of the special semantics of passionate love that has come to form the basis of modern forms of intimacy and personal relationships. This classic book by Luhmann has been widely recognized as a work of major importance. It is an outstanding contribution to social theory and it provides an original and illuminating perspective on the nature of modern marriage and sexuality.

Lexical Innovation - Karl Sornig 1981-01-01

In addition to borrowing from various foreign sources, the main origins of slang terms are the activation and revitalization of existing morphological and lexical material. Metaphorical manipulation of lexical items, as the main device used for the production of slangisms, shows remarkable similarities in languages otherwise quite different from each other. Slang is analyzed as a kind of substandard language variation which any full-fledged language is bound to develop because it is

experimental in that it is born from insubordination and protest against the stress experienced in the speech communities of large cities and is always characterized by that element of playfulness which is the hallmark of creative language in general.

Language Policy and Language Acquisition Planning - Maarja Siiner 2018-05-22

In the sociopolitics of language, sometimes yesterday's solution is tomorrow's problem. This volume examines the evolving nature of language acquisition planning through a collection of papers that consider how decisions about language learning and teaching are mediated by a confluence of psychological, ideological, and historical forces. The first two parts of the volume feature empirical studies of formal and informal education across the lifespan and around the globe. Case studies map the agents, resources, and attitudes needed for creating moments and spaces for language learning that may, at times, collide with wider beliefs and policies that privilege some languages over others. The third part of the volume is devoted to conceptual contributions that take up theoretical issues related to epistemological and conceptual challenges for language acquisition planning. These contributions reflect on the full spectrum of social and cognitive factors that intersect with the planning of language teaching and learning including ethnic and racial power relations, historically situated political systems, language ideologies, community language socialization, relationships among stakeholders in communities and schools, interpersonal interaction, and intrapersonal development. In all, the volume demonstrates the multifaceted and socially situated nature of language acquisition planning.

Hidden Agendas - Jane Kelsey 2013-05-01

'Forget the label "free trade agreement". The TPPA, under negotiation between New Zealand, the USA and ten other countries, is a direct

assault on our right to decide our own future.' In this hard-hitting BWB Text, Professor Jane Kelsey picks apart the current negotiations surrounding the proposed Trans-Pacific Partnership Agreement (TPPA) and comes to some disturbing conclusions. Such a treaty, she says in this new work, has little credible economic rationale but could have potentially dangerous effects on our ability to decide for ourselves how we address the economic, environmental, social and Treaty challenges of the twenty-first century. At a time of constitutional review, the secrecy surrounding the TPPA negotiations raises hard questions about the future shape of New Zealand.

Language Teaching and the Older Adult - Danya Ramírez Gómez 2016-09-15

The aging of the population and the increasing number of older adults pursuing foreign language courses call for a greater understanding of the ways in which these individuals learn foreign languages. This book offers a pioneering contribution to the literature on foreign language education for older adults (aged 60 and over), termed foreign language geragogy. It details an empirical, multidisciplinary study on Japanese older learners of Spanish and focuses on the influence of learning experiences on vocabulary learning strategy use. It discusses the constraints that preconceptions impose on learners, researchers, instructors and administrators, and it offers a set of practical recommendations for foreign language activities for elderly individuals. It also introduces the notion of 'learner re-training', an instructional mechanism that contributes to older learners' self-acknowledgment and autonomy development in foreign language learning. The book is directed at teachers and trainee teachers of foreign languages to older adults, and also at education professionals and researchers in the field of foreign language learning in general.

Handbook of Interpersonal Communication - Gerd Antos 2008-12-10

Interpersonal communication (IC) is a continuous game between the interacting interactants. It is a give and take - a continuous, dynamic flow that is linguistically realized as discourse as an on-going sequence of interactants' moves. Interpersonal communication is produced and interpreted by acting linguistically, and this makes it a fascinating research area. The handbook, *Interpersonal Communication*, examines how interactants manage to exchange facts, ideas, views, opinions, beliefs, emotion, etc. by using the linguistic systems and the resources they offer. In interpersonal communication, the fine-tuning of individuals' use of the linguistic resources is continuously probed. The language used

in interpersonal communication enhances social relations between interactants and keeps the interaction on the normal track. When interaction gets off the track, linguistic miscommunication may also destroy social relationships. This volume is essentially concerned with this fine-tuning in discourse, and how it is achieved among various interactant groups. The volume departs from the following fundamental questions: How do interpersonal relations manifest themselves in language? What is the role of language in developing and maintaining relationships in interpersonal communication? What types of problems occur in interpersonal communication and what kind of strategies and means are used to solve them? How does linguistically realized interpersonal communication interact with other semiotic modes? Interpersonal communication is seen and researched from the perspective of what is being said or written, and how it is realized in various generic forms. The current research also gives attention to other semiotic modes which interact with the linguistic modes. It is not just the social roles of interactants in groups, the possible media available, the non-verbal behaviors, the varying contextual frames for communication, but primarily the actual linguistic manifestations that we need to focus upon when we want to have a full picture of what is going on in human interpersonal communication. It is this linguistic perspective that the volume aims to present to all researchers interested in IC. The volume offers an overview of the theories, methods, tools, and resources of linguistically-oriented approaches, e.g. from the fields of linguistics, social psychology, sociology, and semiotics, for the purpose of integration and further development of the interests in IC., Topics e.g.: Orientation to interaction as primarily linguistically realized processes Expertise on theorizing and analyzing cultural and situational contexts where linguistic processes are realized Expertise on handling language corpora Expertise on theorizing and analyzing interaction types as genres Orientation to an integrated view of linguistic and non-linguistic participant activities and of how interactants generate meanings and interact with space Expertise on researching the management of the linguistic flow in interaction and its successfulness.

[Interaction in the Language Curriculum](#) - Leo Van Lier 2014-06-03
Interaction in the Language Curriculum offers an innovative theory of language education integrating curriculum practice, research and teaching. It emphasises the interdependence of knowledge and values and stresses the central importance of learning as a social process. Leo van Lier argues that moral as well as intellectual and practical principles must underlie curriculum development and everyday teaching, captured in his triple focus on Awareness, Autonomy, and Authenticity. In addition to its rich grounding in language education practice, the book draws support for his position from diverse sources in sociology, philosophy and cognitive science, from the work of Bourdieu, Giddens, Wittgenstein, Peirce, Vygotsky, Bakhtin, and Dewey. In the current broadening context of language education this study makes an important contribution to research. It presents a coherent philosophical theory as well as considering practical issues in implementation of a new language curriculum. As such, it will be of great benefit to teachers, applied linguists and educationalists generally.

Introduction To Mindfulness - IntroBooks Team

Mindfulness is the elementary human aptitude to feel own presence, i.e., being conscious of the point of the existence of self and the corresponding boundary of performance, posing complete rejection to the undue recognition or excessive activities, revolving around alarmingly. Awakening to the 3-pronged internal functional structure of the physical, mental and spiritual processes, lying dormant in an individual is the prime objective of mindfulness. Mindfulness is naturally present in a person's mind and soul, but it warrants a steadfast practice and exertion that should be included in daily chores. Then only, this abstract element can be viewed as a tangible object and mindfulness will complete its full circle. Sometimes, knowledge is taken as lessons of what a person observes straight through senses or thoughts and perceptions. This indicates that a particular person is mindful. Experiments are always on the path of an impulsive run in displaying that an individual is reshaping the brain's physical framework when the brain is educated to be mindful.

Art & Crime - Stefan Koldehoff 2022-07-12

A thrilling, eye-popping look at true crime in the billion-dollar art world. The art world is one of the most secretive of global businesses, and the list of its crimes runs long and deep. Today, with prices in the hundreds of millions for individual artworks, and billionaires' collections among the most conspicuous and liquid of their assets, crime is more rampant than ever in this largely unregulated universe. Increased prices and globalization have introduced new levels of fraud and malfeasance into the art world--everything from "artnapping," in which an artwork is held

hostage and only returned for a ransom, to forgery and tax fraud. However, the extent of the economic and cultural damage that results from criminality in the global art scene rarely comes to light. The stories of high-stakes, brazen art crimes told by art experts Stefan Koldehoff and Tobias Timm are by turns thrilling, disturbing, and unbelievable (the imagination for using art to commit crimes seems boundless). The authors also provide a well-founded analysis of what needs to change in the art market and at museums. From the authors of *False Pictures, Real Money* (about the Beltracchi art forgery case), *Art and Crime* includes a chapter on art owned by Donald Trump. It is a thoroughly researched, explosive, and highly topical book that uncovers the extraordinary and multifarious thefts of art and cultural objects around the world.

Animal Beauty - Christiane Nusslein-Volhard 2019-05-14

An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as "beauty"? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel

Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a “sexual selection” distinct from natural

selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.
