Water Quality Data - Arthur Hounslow
2018-02-06

Water Quality Data emphasizes the interpretation of a water analysis or a group of analyses, with major applications on ground-

water pollution or contaminant transport. A companion computer program aids in obtaining accurate, reproducible results, and alleviates some of the drudgery involved in water chemistry calculations. The text is divided into nine chapters and includes computer programs applicable to all the main concepts presented. After introducing the fundamental aspects of water chemistry, the book focuses on the interpretation of water chemical data. The interrelationships between the various aspects of geochemistry and between chemistry and geology are discussed. The book describes the origin and interpretation of the major elements, and some minor ones, that affect water quality. Readers are introduced to the elementary thermodynamics necessary to understand the use and results from water equilibrium computer programs. The book includes a detailed overview of organic chemistry and identifies the simpler and environmentally important organic chemicals. Methods are given to estimate the

Did I Hear My Name Whispered on the Wind? -
Mike Beirens 2019-04-04

This book was written from the point of helping people of all walks of life. Remember, just one of life's little details can change life's meaning. The power of faith, the power of love, and the power of the human spirit—they are as far apart as they can be in this life. Yet it's these three elements that when combined can change who you are and what you can be. There is an expression through mortal eyes, and it is based on this fact and is true. The whole of the human race must realize that they can only look at life through mortal eyes. You would be surprised not only at what you would see but also at what you would encounter if you allow yourself to be immersed in your life's story. As you read this book and mix with humanity, you will see that there are a great many people that are handicapped. Some of the handicaps are visibly. Other are not so visible. A great many people may need someone like you to reach out and share yourself with

them. Help someone open the door to his or her full potential! Help them not feel awkward or uncomfortable when they share a story or a joke. It may not be funny to you, but laugh anyway, or at least smile. There is no tax or charge. Life is full of opportunities to share yourself, from family members to friends or just an acquaintance. Make it a goal to give someone a hug today. Tell someone you love them every day. Remember that it takes great courage to expose the real self. Allow yourself the opportunity to get to know the greatest person in your earthly life: yourself.
