## *Sri Lanka in the Modern Age* - Nira Wickramasinghe 2006-03-31

Since the late 1970s civil war has left Sri Lanka in an almost permanent state of crisis; conventional histories of the country by liberal and Marxist scholars in the last two decades have thus tended to focus on the state's failure to accommodate the needs and demands of the minorities. The entire history of the twentieth century has been tied to this one key issue. *Sri Lanka in the Modern Age* offers a fresh perspective based on new research. Above all, the author has written a history of the peoples of Sri Lanka rather than a history of the nation-state.

**Integrated Science** - Nima Rezaei 2021-06-16

Integrated Science: Science without Borders" is the first volume of the INTEGRATED SCIENCE Book series, aiming to publish the results of the most updated ideas and reviews in transdisciplinary fields and to highlight the integration of discrete disciplines, including formal sciences, physical-chemical sciences and engineering, biological sciences, medical sciences, and social sciences. This volume primarily focuses on the research involving the integration of two or more academic fields offering an innovative, borderless view, which is one of the main focuses of the Universal Scientific Education and Research Network (USERN). The whole world is suffering from complex problems; these are borderless problems; thus, a borderless solution could merely solve such complex issues. Transdisciplinarity is a domain, that researchers work jointly, using a shared conceptual framework, drawing together disciplinary-specific theories, concepts, and approaches to address common problems. Lack of confidence, lack of expertise, complexities of healthcare, the confusing nature of healthcare environments, and lack of organization and standardization are the obstacles of successful scientific communication. Consequently, this book provides an overview of the essential elements of transdisciplinary studies and integrated science. The unique aspect of this book - privileging it from other books- is covering all aspects of science as harmonies of a single symphony.

**Fictions of the Bad Life** - Claire Solomon 2014

The first comprehensive and interdisciplinary study of the prostitute in Latin American literature, Claire Thora Solomon's book *The Naturalist Prostitute and Her Avatars in Latin American Literature, 1880-2010* shows the gender, ethnic, and racial identities that emerge in the literary figure of the prostitute during the consolidation of modern Latin American states in the late nineteenth century in the literary genre of Naturalism. Solomon first examines how legal, medical, and philosophical thought converged in Naturalist literature of prostitution. She then traces the persistence of these styles, themes, and stereotypes about women, sex, ethnicity, and race in the twentieth and twenty-first century literature with a particular emphasis on the historical fiction of prostitution and its selective reconstruction of the past. *Fictions of the Bad Life* illustrates how at very different moments—the turn of the twentieth century, the 1920s-30s, and finally the turn of the twenty-first century—the past is rewritten to accommodate contemporary desires for historical belonging and national identity, even as these efforts inevitably re-inscribe the repressed colonial history they wish to change.

**Understanding Mexicans and Americans** - Rogelio Diaz-Guerrero 2013-11-11

The Communication Lexicon is a new concept; it is a new source of information in the field of language and area studies. Its focus is on people's way of thinking, their frame of reference, their characteristic outlook on life. Compared to the more traditional area studies, our main focus is not on history or religion or geography, not on tangible material realities of existence in a particular country, but rather on people's shared subjective views of those realities which are dominant in their minds. The focus of the analysis is essentially psychological; it is centered on perceptions and motivations which influence people's choices and behavior. Compared to individual psychology, the information represented by this volume is psycho-cultural in that it is centered on the shared perceptions and motivations which people with the same language, backgrounds, and experiences develop together into a shared cultural view or subjective representation of their universe. The attention psycho-cultural factors are receiving these days follows from

the growing realization that their influences are powerful and yet they occur without people's awareness. Based on extensive empirical data produced through an analytic technique of indepth assessment, the Communication Lexicon presents the culturally characteristic system of meanings which members of a particular cultural community develop in construing their world. At the level of specifics the lexicon describes how selected themes such as family, society, work, and entertainment are perceived and understood by members of three cultures: Mexicans, Colombians, and U.S.

**Around the World in 10 Years: The Book of Independence** - Pablo Rey 2014-04

First we thought we could go around the world in 4 years. Then we were convinced that we could do it in 7. When we got to the sixth year of travel, we felt that 10 was a good round number. Almost 20 years later we are still on the road. And there's still half the planet left to explore.

"I'll never forget that Monday when I put the barrel of a gun to my head and fired until I was out of bullets, without stopping to think of what I was doing so I wouldn't have a chance to change my mind. It was my resignation to a future which I already knew, a farewell to a secure job, an adieu to a brilliant career in advertising, the microcosm where I had lived for the last twelve long years. It was ten minutes after ten in the morning and my last words were, more or less 'keep the corpse, I'm leaving.' My body collapsed and I walked out the door" The Book of Independence, is a journey through some of the world's worst backcountry roads with a 4x4 truck transformed into a house on wheels.
