

Preventive And Social Medicine University Sultan Qaboos

This is likewise one of the factors by obtaining the soft documents of this **Preventive And Social Medicine University Sultan Qaboos** by online. You might not require more get older to spend to go to the ebook introduction as well as search for them. In some cases, you likewise accomplish not discover the broadcast Preventive And Social Medicine University Sultan Qaboos that you are looking for. It will entirely squander the time.

However below, behind you visit this web page, it will be as a result completely simple to get as with ease as download lead Preventive And Social Medicine University Sultan Qaboos

It will not take many grow old as we tell before. You can accomplish it while piece of legislation something else at home and even in your workplace. for that reason easy! So, are you question? Just exercise just what we provide below as well as evaluation **Preventive And Social Medicine University Sultan Qaboos** what you as soon as to read!

The Handbook of Systemic Family Therapy, Systemic Family Therapy and Global Health Issues - Mudita Rastogi 2020-10-19

Volume IV of The Handbook of Systemic Family Therapy considers family-level interventions for issues of global public health. Information on the effectiveness of relational treatment is included along with consideration of the most appropriate modality for treatment. Developed in partnership with the American Association for Marriage and Family Therapy (AAMFT), it will appeal to clinicians, such as couple, marital, and family therapists, counselors, psychologists, social workers, and psychiatrists. It will also benefit researchers, educators, and graduate students involved in CMFT.

Critical Issues in Healthcare Policy and Politics in the Gulf Cooperation Council States - Ravinder Mamtani MD 2018-01-02

This is the first book to examine challenges in the healthcare sector in the six Gulf Cooperation Council (GCC) countries (Saudi Arabia, Oman, the United Arab Emirates, Qatar, Kuwait, and Bahrain). These countries experienced remarkably swift transformations from small fishing and pearling communities at the beginning of the twentieth century to

wealthy petro-states today. Their healthcare systems, however, are only now beginning to catch up. Rapid changes to the population and lifestyles of the GCC states have completely changed—and challenged—the region’s health profile and infrastructure. While major successes in combatting infectious diseases and improving standards of primary healthcare are reflected in key health indicators, new trends have developed; increasingly “lifestyle” or “wealthy country” diseases, such as diabetes, heart disease, and cancer, have replaced the old maladies. To meet these emerging healthcare needs, GCC states require highly trained and skilled healthcare workers, an environment that supports local training, state-of-the-art diagnostic laboratories and hospitals, research production and dissemination, and knowledge acquisition. They face shortages in most if not all of these areas. This book provides a comprehensive study of the rapidly changing health profile of the region, the existing conditions of healthcare systems, and the challenges posed to healthcare management across the six states of the GCC.

Personalized Food Intervention and Therapy for Autism Spectrum

Disorder Management - M. Mohamed Essa 2020-01-31

The book focuses on implications of traditional and processed foods for autism spectrum disorder (ASD) intervention and management. Numerous phytonutrients and pharmacologically active compounds in edible natural products and diet could influence and offer protection to neuronal dysfunction that occurs due to ASD. The neuroprotective effects of various fruits, vegetables, nuts and seeds phytochemicals, and other natural bioactive ingredients against ASD and related conditions are discussed. Topics such as the possible neuroprotective mechanism of action of these foods and the therapeutic role of antioxidants in relation to ASD are addressed. This book also highlights the scope of using anti-inflammatory agents and antioxidants to promote neurogenesis and improve other symptoms in ASD. It emphasizes personalized nutritional approaches with dietary management of neurodevelopmental disorders/ASD cases. Information in this book is relevant to researchers in the field of complementary and alternative medicine, nutraceuticals, neuroscience, agriculture, nutrition, and food science. This volume is beneficial to students of varying levels, and across multiple disciplines.

Bioactive Components, Diet and Medical Treatment in Cancer Prevention - Mostafa I. Waly 2018-04-06

The high rate of urbanization and a steady increase in per capita income has improved the socio-economic status of people all over the world. This has resulted in drastic changes in their lifestyle and food consumption patterns, where traditional foods are being replaced with more ready-made junk foods with few servings of fresh vegetables and fruits. It has been postulated that industrialization has caused change in food choice, dietary pattern modification and resulted in a sedentary lifestyle. In addition, contaminated foods with unsafe microbes and chemical hazards are increasing. All of these events have resulted in an increased risk of cancer, the leading cause of mortality and morbidity worldwide. This book will provide a basic understanding of cancer, its risk factors, preventive measures, and possible treatments currently available, as well as identifying the different dietary factors that might synergize with a sedentary lifestyle in the etiology of cancer, and its prevention measure.

Knowledge for Sustainable Development - Unesco 2002

This three volume set presents a multidisciplinary examination of the global life support systems on which we depend by providing a selection of articles on sustainable development issues written by international experts. Volume 1 focuses on the earth and atmospheric sciences, mathematical, biological and medical sciences, social sciences and humanities, physical sciences, engineering and technology resources. Volume 2 covers chemical sciences, energy science and water engineering, as well as the main issues related to environmental sciences and ecological resources. Volume 3 offers a comprehensive view of food and agricultural engineering resources, the management of human and natural resources, economic and institutional resources, information technology and systems management, as well as a regional overview of sustainable development issues. Each article includes a bibliography, a glossary and a guide to further information available as part of the on-line Encyclopedia version (<http://www.eolss.net>).

Healthy Ageing in Asia - Goh Cheng Soon 2022-07-21

Asia is the world's most populous region and has the highest per capita number of older people in the world. It is also home to the healthy ageing traditions of Ayurveda and Chinese Medicine and the rich regional traditions of Japan, Korea, Southeast Asia, and South Asia. This book addresses policies related to ageing, traditional Asian approaches to ageing, an integrated medical system approaches to ageing, ageing in place, and community empowerment. Features Presents information on The 100-Year Life. As a counterpoint to focussing on the frail elderly, Japan is promoting the '100-Year Life Society', a societal model in which all citizens are dynamically engaged and productive throughout the lifespan to reach a healthy 100 years of age. Discusses a framework for optimization of Ageing in Place or staying at home as this is a desired option for most older people. Presents evidence for exercise and movement in healthy aging with guidelines in different states of ageing. Features information on how to improve mental wellbeing in cognitive decline, isolation and loneliness, poor nutrition, and reduced mobility. Creates an understanding of loss and bereavement through processes

and the impact of loss. Provides information on developments in health technology to optimize efficiency, accuracy, and effectiveness of providers. Details health insurance options including coverage for traditional as well as modern medical services, provides models for other countries in the region. Lists coping skills or abilities to help older people to be more independent and in control of their lives. Features information on Asian herbs, spices and foods in healthy ageing across the lifespan and specifically in addressing age-related health issues. "What is required is a new culture based on the science in which older people are expected to remain, or become increasingly active, physically, cognitively and emotionally maintaining or strengthening a strong sense of purpose. Europe is looking to Asia because this culture is more prevalent there than in Europe. The core theme is not one of 'caring' for a passive subset of the population but of promoting lifelong learning because knowledge is the elixir of life." - Professor Sir Muir Gray, Founding Director, The Optimal Ageing Programme & Professor in the Nuffield Department of Surgery, University of Oxford

Oman Under Qaboos - Calvin H. Allen 2014-01-14

This is an examination of the political, economic and social development of Oman from the accession Sultan Qaboos in a palace coup in 1970 to the promulgation of the basic law of 1996. The book argues that the sultanate does not follow the "rentier" model but the patriarchal tradition.

Encyclopedia of Environmental Health - 2019-08-22

Encyclopedia of Environmental Health, Second Edition presents the newest release in this fundamental reference that updates and broadens the umbrella of environmental health— especially social and environmental health—for its readers. There is ongoing revolution in governance, policies and intervention strategies aimed at evolving changes in health disparities, disease burden, trans-boundary transport and health hazards. This new edition reflects these realities, mapping new directions in the field that include how to minimize threats and develop new scientific paradigms that address emerging local, national and global environmental concerns. Represents a one-stop resource for

scientifically reliable information on environmental health. Fills a critical gap, with information on one of the most rapidly growing scientific fields of our time. Provides comparative approaches to environmental health practice and research in different countries and regions of the world. Covers issues behind specific questions and describes the best available scientific methods for environmental risk assessment.

Situation Analysis of Children and Women in the Sultanate of Oman - 1995

Applied Health Economics for Public Health Practice and Research - Rhiannon Tudor Edwards 2019-03-19

In today's world of scarce resources, determining the optimal allocation of funds to preventive health care interventions (PHIs) is a challenge. The upfront investments needed must be viewed as long term projects, the benefits of which we will experience in the future. The long term positive change to PHIs from economic investment can be seen across multiple sectors such as health care, education, employment and beyond. *Applied Health Economics for Public Health Practice and Research* is the fifth in the series of *Handbooks in Health Economic Evaluation*. It presents new research on health economics methodology and application to the evaluation of public health interventions. Looking at traditional as well as novel methods of economic evaluation, the book covers the history of economics of public health and the economic rationale for government investment in prevention. In addition, it looks at principles of health economics, evidence synthesis, key methods of economic evaluation with accompanying case studies, and much more. Looking to the future, *Applied Health Economics for Public Health Practice and Research* presents priorities for research in the field of public health economics. It acknowledges the role played by natural environment in promoting better health, and the place of genetics, environment and socioeconomic status in determining population health. Ideal for health economists, public health researchers, local government workers, health care professionals, and those responsible for health policy development. *Applied Health Economics for Public Health Practice and Research* is an

important contribution to the economic discussion of public health and resource allocation.

Issues in Cancer Prevention, Detection, and Screening Research and Practice: 2011 Edition - 2012-01-09

Issues in Cancer Prevention, Detection, and Screening Research and Practice: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Cancer Prevention, Detection, and Screening Research and Practice. The editors have built Issues in Cancer Prevention, Detection, and Screening Research and Practice: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Cancer Prevention, Detection, and Screening Research and Practice in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Cancer Prevention, Detection, and Screening Research and Practice: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Evil Eye, Jinn Possession, and Mental Health Issues - G. Hussein Rassool 2018-08-16

Evil Eye, Jinn Possession, and Mental Health Issues raises awareness of the cultural considerations, religion and spirituality involved in the assessment of Muslim patients with mental health problems. The belief that Jinn spirits can cause mental illness in humans through affliction or possession is widely accepted among Muslims, meaning this belief is a crucial, but frequently overlooked, aspect of mental health problems with

Muslim patients in psychiatric care. This book explores the nature of such beliefs, their relationship to mental health and the reasons for their importance in clinical practice. The book argues that it is vital to consider mental disorders as a multifactorial affair, in which spiritual, social, psychological and physical factors may all play a role. It suggests differential diagnostic skills may have an important part to play in offering help to those who believe their problems are caused by possession, and provides accessible literature on clinical issues and practice, interventions, management and evidence-based practice to help health workers achieve a better understanding of Muslim beliefs about possession and how to work with patients that hold such beliefs. Evil Eye, Jinn Possession, and Mental Health Issues is an essential manual for mental health professionals, social workers and psychologists. It should also be of interest to academics and students in the healthcare sciences.

Professional Issues in Nursing - Carol Huston 2021-12-09

Give students a professional edge in nursing practice with proven, expert insight across a variety of enduring and contemporary issues facing today's nursing workforce. Rich in engaging pedagogical features and extensively updated with the latest evidence-based perspectives on workplace considerations, workforce issues, legal and ethical concerns, nursing education challenges, and more, Professional Issues in Nursing: Challenges and Opportunities, 6th Edition, readies students for the realities of today's changing healthcare environment and instills the critical thinking and clinical judgment skills to achieve success in any nursing setting.

Qualitative Designs and Methods in Nursing (Set) - Mary De Chesnay, PhD, RN, PMHCNS-BC, FAAN 2014-12-19

This is the first series to comprehensively address leading qualitative research designs and methods from a nursing perspective, and is a must-have for every research library. These are practical, how-to guides to conducting research using seven different qualitative designs that encompass new and traditional methodologies. Written by Dr. Mary de Chesnay, a noted qualitative research scholar, and contributing specialists in each of the qualitative methods, each of the seven books

discusses the theoretical rationale for using a particular design, describes its components, and delineates a practical plan to conduct studies. Utilizing a practical, problem-solving approach, the books delineate appropriate methods, ethical considerations, critical issues, and potential pitfalls. Examples of published qualitative nursing research worldwide, along with author commentary, support the new researcher in making decisions and facing challenges. Case studies follow a template that includes a description of the study, data collection and analysis, and dissemination. Also included are techniques whereby researchers can ensure high standards of rigor, and an extensive bibliography and list of resources. The book's practical point of view is geared to help novice researchers and specialists alike develop or expand their competencies, engage graduate faculty and students, and aid nursing research staff in larger hospitals and other healthcare institutions, as well as in-service educators and students. Key Features of this One-of-a-Kind Resource Library: Focuses on practical problem solving Reviews the philosophical basis for each qualitative design Disseminates the most current references in each design Provides a plan to conduct studies using the design and discusses appropriate methods, ethical considerations, and potential challenges Showcases the research of international scholars Is peer reviewed by design and method experts
New Research Centers - 2005

Encyclopaedia of Food Science, Food Technology and Nutrition - Robert Macrae 1993-05-25

Disease Control Priorities, Third Edition (Volume 8) - Donald A. P. Bundy 2017-11-20

More children born today will survive to adulthood than at any time in history. It is now time to emphasize health and development in middle childhood and adolescence--developmental phases that are critical to health in adulthood and the next generation. *Child and Adolescent Health and Development* explores the benefits that accrue from sustained and targeted interventions across the first two decades of life.

The volume outlines the investment case for effective, costed, and scalable interventions for low-resource settings, emphasizing the cross-sectoral role of education. This evidence base can guide policy makers in prioritizing actions to promote survival, health, cognition, and physical growth throughout childhood and adolescence.

Indian Science Abstracts - 2002

COVID-19 - Social Science Research during a Pandemic - Paul Russell Ward 2022-07-13

International Who's who in Medicine - Nicholas S. Law 1995

Food As Medicine - M. Mohamed Essa 2013-01-01

There is currently a growing body of evidence that supplementing the human diet with natural products is of major benefit for human health and well-being. Nowadays, the use of complementary or alternative medicine, functional food and especially the consumption of natural products, has been increasing rapidly world-wide, mostly because of their supposed less frequent side effects. Both in conventional and traditional medicines, food and natural products continue to provide valuable therapeutic agents. The issues regarding the efficacy and safety of currently available modern medicine agents have prompted the search for safer and more effective alternatives. This book contains a comprehensive collection of the beneficial features of fruits, vegetables, nuts and medicinal plants and herbs, against various diseases and how they should be utilised to obtain all their qualities and benefits.

Index Medicus - 2004

Youth Development in India - Sibnath Deb 2021-12-31

This book provides a comprehensive understanding of youth development and protection in the Indian context. It reviews the demographic and socio-economic background and future prospects of Indian youth. The book discusses the role of family and culture in the upbringing and development of youth, changing political and socio-

economic situations, and the influence of parents and teachers in shaping the future of the youth. The book highlights the nature of adversities faced by children and youth and the subsequent impact on their mental health and well-being. It also examines the efficacy of various skill development programmes and national and international policies designed for the youth. The book will be of interest to students, teachers, and researchers of population sciences, population studies, psychology, childhood studies, development studies, sociology, and youth studies. It will also be of interest to policymakers and NGOs working with children and youth.

The Report: Oman 2008 - 2008

Social and Psychological Aspects of HIV/AIDS and their Ramifications - Gobopamang Letamo 2011-10-26

This book has assembled an array of chapters on the social and psychosocial aspects of HIV/AIDS and their impact on HIV/AIDS and related behaviours. The book addresses key areas of HIV and AIDS, including, but not in any way limited to, care-seeking behaviour, adherence, access, psychosocial needs and support services, discrimination and the impact the epidemic has on various sectors of the economy. The book has seventeen chapters; seven chapters deal with social aspects of HIV/AIDS, four with psychosocial aspects of HIV/AIDS, and the remaining six chapters with the impact of social and psychosocial factors on HIV/AIDS and related behaviours. The book is an essential reading for academics, students and other people interested in the field of HIV and AIDS.

Medical Physics During the COVID-19 Pandemic - Kwan Hoong Ng
2021-03-28

Spreading to every corner of the Earth, the COVID-19 virus has had an unparalleled impact on all aspects of our lives. This book explores in detail how the COVID-19 pandemic has affected clinical practice, education, and research in medical physics, and how colleagues on the frontline dealt with this unpredictable and unprecedented pandemic. It tackles key questions such as: How did medical physicists first respond

to the situation? What innovative strategies were taken and how effective were they? How are medical physicists preparing for the future? There will be a focus on the different experiences of regional medical physicists and the responses and outlooks in clinical practice, education, and research in the affected continents, Asia-Pacific, the Middle East, Europe, Africa and North and Latin America. With over 91 contributors from 39 countries, this unique resource contains key perspectives from teams from each territory to ensure a global range of accounts. The collective opinion and wisdom from the major medical physics journal editors-in-chief are also explored, alongside how the pandemic has affected the quantity and quality of publications. Voices of early-career researchers and students of medical physics will be included, with narratives of their experiences coping with life during the pandemic. Lastly, communicating leadership in times of adversity is highlighted. This book will be a historic account of the impact of the COVID-19 virus on the field of medical physics. It will be an ideal reference for medical physicists, medical physics trainees and students, hospital administrators, regulators, and healthcare professionals allied with medical physics. Key features: The first book to cover the impact of COVID-19 on the field of medical physics Edited by two experts in the field, with chapter contributions from subject area specialists around the world Broad, global coverage, ranging from the impact on teaching, research, and publishing, with unique perspectives from journal editors and students and trainees

Country Reports on Human Rights Practices - 2003

International Who's who in Medicine - 1995

Medieval Islamic Medicine - Peter E. Pormann 2007

The medical tradition that developed in the lands of Islam during the medieval period (c. 650-1500) has, like few others, influenced the fates and fortunes of countless human beings. It is the story of contact and cultural exchange across countries and creeds, affecting caliphs, kings, courtiers, courtesans, and the common crowd. In addition to being

fascinating in its own right, it formed the roots from which modern Western medicine arose. Contrary to the stereotypical picture, medieval Islamic medicine was not simply a conduit for Greek ideas, but was a locus for innovation and change. The book is organised around five topics: the emergence of medieval Islamic medicine and its intense cross-pollination with other cultures, the theoretical medical framework, the function of physicians within the larger society, the medical care as seen through preserved case histories, and the role of magic and devout religious invocations in scholarly as well as everyday medicine. A concluding chapter on the 'afterlife' concerns the impact of medieval Islamic medicine upon the European medical tradition and its continued practice today. The aim of this book is not to compress the entire history of medieval Islamic medicine into a single small volume. Rather, it presents an overview, highlighted with particular examples.

Year Book - Royal Society of Tropical Medicine and Hygiene - 1994
Includes list of fellows.

Global Health for All - Jean-Paul Gaudillière 2022-04-15

Global Health for All trains a critical lens on global health to share the stories that global health's practices and logics tell about 20th and 21st century configurations of science and power. An ethnography on multiple scales, the book focuses on global health's key epistemic and therapeutic practices like localization, measurement, triage, markets, technology, care, and regulation. Its roving approach traverses policy centers, sites of intervention, and innumerable spaces in between to consider what happens when globalized logics, circulations, and actors work to imagine, modify, and manage health. By resting in these in-between places, *Global Health for All* simultaneously examines global health as a coherent system and as a dynamic, unpredictable collection of modular parts.

Excerpta Medica - 1990

Six issues per volume. Arranged under general aspects, health services management, and technology assessment and product evaluation. Entries give bibliographical information, abstract, and cross references. Subject, author indexes.

The Mortality and Health Transitions in Oman - 2000

Directory of U.S. Fulbright Scholars - 2000

Pain Management in Special Circumstances - Nabil Shallik
2018-11-21

Like management of disease, management of pain is as old as the human race. When patients come to us with their pain, they present us with a wonderful opportunity: the chance to understand them, to understand how their pain is affecting their lives, the challenge of discovering what is causing their pain, and finally the opportunity to prescribe medications and lifestyle changes to help them gain relief from their pain. It is hoped that this book will provide the latest evidence-based updates on pain management in special circumstances and will serve as a ready reference for those embarking on pain management. Its intent is not to be a heavy book that can only be stored on a bookshelf, but a pocket-sized reference that can be carried, be easily navigated, and be available whenever a conceptual gap compromises pain physicians and their ability to treat their patients.

Handbook of Autism and Pervasive Developmental Disorder -
Johnny L. Matson 2022-08-11

This handbook provides a substantive foundation of autism theory and research, including a comprehensive overview, conceptualization, and history of autism spectrum disorder (ASD) and pervasive developmental disorder (PDD). This robust reference work integrates the broad scholarly base of literature coupled with a trenchant analysis of the state of the field in nosology, etiology, assessment, and treatment. Its expert contributors examine findings and controversies (e.g., the actual prevalence of autism) as well as longstanding topics of interest as well as emerging issues from around the globe. In addition, the handbook describes multiple assessments, diagnoses, interventions and treatments for autism and PDD. It addresses such key topics as assessment of core symptoms and comorbidities, risk factors, epidemiology, diagnostic systems, neuroscience as well as issues regarding family adaptation. In

addition, the handbook explores the rapidly evolving and expanding topics of medications, diets, fringe and harmful treatments, applied behavior analysis, and early intensive behavioral interventions. Key areas of coverage include: Survey of diagnostic criteria and assessment strategies for autism and pervasive developmental disorder. Genetic, behavioral, biopsychosocial, and cognitive models of autism assessment and treatment. Psychiatric disorders in individuals with ASD. Theory of mind and facial recognition in persons with autism. Diagnostic instruments for assessing core features and challenging behaviors in autism and PDD. Evidence-based psychosocial, pharmacological, and integrative treatments for autism and other developmental disabilities. Interventions specifically for adults with ASD. Training issues for professionals, parents, and other caregivers of individuals with autism and developmental disabilities. Review of findings of successful and promising therapies coupled with guidance on how to distinguish between dubious and effective treatments for autism and PDD. The handbook is an indispensable resource for researchers, professors, graduate students as well as clinicians, therapists, and other practitioners in clinical child and school psychology, child and adolescent psychiatry, social work, special education, behavioral rehabilitation, pediatric medicine, developmental psychology, and all allied disciplines.

Cancer in the Arab World - Humaid O. Al-Shamsi 2022

This is an Open Access book. This book is a must-have for healthcare providers and researchers, public health specialists and policy makers who are interested and involved in cancer care in the Arab world. The Arab world consists of 22 countries, which are members of the Arab League and spanning over 13,132,327 km² with over 423,000,000 population. Over the past few decades, the Arab world has witnessed a swift evolution in healthcare provision. Nonetheless, Arab countries have considerable variability in economic capabilities, resource allocation, and

intellectual talent that inevitably reflect on access to modern cancer care and prevention. This book is authored by experts from the Arab world who provide vital information on cancer statistics and risk factors, available clinical care pathways and infrastructure, and prevention programs in their individual countries. The chapters also address specific challenges in each country and insights into future directions to achieve optimal care with conventional and novel diagnostics and therapies to keep up with the era of precision medicine. Special topics of interest and unique to the Arab world are also discussed, such as out of the country's medical tourism for cancer care and cancer care during war and conflict. Other special chapters include: Cancer research in the Arab world, Radiation therapy in Arab World and Pediatric Oncology in the Arab World. *Cancer in the Arab World* is the first comprehensive book that addresses cancer care in depth in all Arab countries and it is endorsed by the prestigious Emirates Oncology Society.

Promoting Interdisciplinarity in Knowledge Generation and Problem Solving - Al-Suqri, Mohammed Nasser 2017-10-31

Interdisciplinary research is a method that has become efficient in accelerating scientific discovery. The integration of such processes in problem solving and knowledge generation is a vital part of learning and instruction. *Promoting Interdisciplinarity in Knowledge Generation and Problem Solving* is a pivotal reference source for the latest scholarly research on interdisciplinary projects from around the world, highlighting the broad range of circumstances in which this approach can be effectively used to solve problems and generate new knowledge. Featuring coverage on a number of topics and perspectives such as industrial design, ethnographic methods, and methodological pluralism, this publication is ideally designed for academicians, researchers, and students seeking current research on the promotion of interdisciplinarity for knowledge production.
