Charting the Afrofuturist Imaginary in African American Art - Elizabeth Carmel Hamilton 2022-08-12

This book examines Afrofuturism in African American art, focusing specifically on images of black women and how those images expand the discourse of representation in visual culture of the United States. This volume defines a visual language of Afrofuturism that includes materiality, temporality, and black liberation. Elizabeth Hamilton discusses the visual progenitors of Afrofuturism. In the artworks of Pierre Benuu, Sanford Biggers, Alison Saar, Mequitta Ahuja, Robert Pruitt, Renee Cox, Dawolu Jabari Anderson, Alma Thomas, and Harriet Powers, the fantastic narratives of Afrofuturism are uncovered through in-depth case studies. These case studies engage with Afrofuturism as a black feminist visual theory that helps to unburden the images of black women from the stereotypical visual scripts that are so common in contemporary visual culture of the United States. The book will be of interest to scholars working in art history, visual studies, American literature, gender studies, popular culture, and African American studies.

Under the Turk in Constantinople: A record of Sir John Finch's Embassy, 1674-1681 - G. F. Abbott 2022-07-21

The history of Anglo-Turkish relations as a whole remains to be written—a strange and not very creditable fact, considering the part which the Ottoman Empire has played in our commercial and political career since the age of Queen Elizabeth. This monograph deals only with a fraction of a vast subject—the English Embassy to Turkey from 1674 to 1681, though for the sake of intelligibility it glances at the years which preceded and followed that septennium.

Chains - Laurie Halse Anderson 2011-08-02

From acclaimed author Laurie Halse Anderson comes this compelling first novel in the historical middle grade *The Seeds of America* trilogy that shows the lengths we can go to cast off our chains, both physical and spiritual. As the Revolutionary War begins, thirteen-year-old Isabel wages her own fight...for freedom. Promised freedom upon the death of their owner, she and her sister, Ruth, in a cruel twist of fate become the property of a malicious New York City couple, the Locktons, who have no sympathy for the American Revolution and even less for Ruth and Isabel. When Isabel meets Curzon, a slave with ties to the Patriots, he encourages her to spy on her owners, who know details of British plans for invasion. She is reluctant at first, but when the unthinkable happens to Ruth, Isabel realizes her loyalty is available to the bidder who can provide her with freedom.

The Monster Hunter in Modern Popular Culture - Heather L. Duda 2014-01-10

As monsters in popular media have evolved and grown more complex, so have those who take on the job of stalking and staking them. This book examines the evolution of the contemporary monster hunter from Bram Stoker's Abraham Van Helsing to today's non-traditional monster hunters such as Blade, Buffy the Vampire Slayer, and Watchmen. Critically surveying a diverse range of books, films, television shows, and graphic novels, this study reveals how the monster hunter began as a white, upper-class, educated male and became everything from a vampire to a teenage girl with supernatural powers. Now often resembling the monsters they've vowed to conquer, modern characters occupy a gray

area where the battle is often with their own inner natures as much as with the "evil" they fight.

The CG Story - Christopher Finch 2013-12-03

The Art of Walt Disney author Christopher Finch tells the story of the pioneers of CG films: producer/directors like George Lucas, Steven Spielberg, and Ridley Scott; and John Lasseter and Ed Catmull, founders of Pixar. Computer generated imagery, commonly called "CG," has had as big an impact on the movie industry as the advent of sound or color. Not only has it made possible a new kind of fully animated movie, but it also has revolutionized big-budget, live-action filmmaking. The CG Story is one of determined experimentation and brilliant innovation carried out by a group of gifted, colorful, and competitive young men and women, many of whom would become legendary in the digital world. George Lucas, Steven Spielberg, and Ridley Scott embraced the computer to create believable fantasy worlds of a richness that had seldom if ever been realized on screen. Their early efforts helped inspire a revolution in animation, enabled by technical wizardry and led by the founders of Pixar, including John Lasseter and Ed Catmull, who would create the entirely computer-produced worlds of Toy Story and subsequent Pixar films. Meanwhile, directors like James Cameron used the new technology to make hybrid live-action and CG films, including the extraordinary Avatar. Finch covers these and more, giving a full account of today's most significant CG films.

Clarence Darrow, the Journeyman - Mike Papantonio 1997

If I have been charitable in my judgments of my fellow man; if I have tried to help him as best I could; if I have done my utmost to truly understand him, I know why I have taken this course - I could not help it. I could have had no comfort or peace of mind if I had acted any other way. I have been interested in the study of man, and the motives that move and control his life. I have rejoiced with him, and have grieved with him, I have followed my instincts and sought to rescue the suffering when I could. - Clarence Seward Darrow. The Buddhists have a term they use to describe the process of comfortably meshing our core values with the way we make our living. They refer to it as the process of finding a

right livelihood. The values that Clarence Darrow meshed with his role as a lawyer came from many sources. He was a philosopher, scientist, sociologist, historian, and theologian. Darrow in no way resembled the single-dimensional linear-thinking attorney that seems to be almost cliché and epidemic in the 90s. He was not the abridged version of a lawyer. His endless effort to understand and appreciate the world outside the four walls of his law office contributed to his legendary ability as an advocate. More importantly, his effort contributed to his arriving at a right livelihood.

Mars is supposed to be dead... a fact Lt. Shaila Jain of the Joint Space Command is beginning to doubt in a bad way. Freak quakes are rumbling over the long-dormant tectonic plates of the planet, disrupting its trillion-dollar mining operations and driving scientists past the edges of theory and reason. The only clues they have stem from the emissions of a mysterious blue radiation, and a 300-year-old journal that is writing itself. Lt. Subdivided - Jay Pitter 2016-05-23

Using Toronto as a case study, *Subdivided* asks how cities would function if decision-makers genuinely accounted for race, ethnicity, and class when confronting issues such as housing, policing, labor markets, and public space. With essays contributed by an array of city-builders, it proposes solutions for fully inclusive communities that respond to the complexities of a global city. Jay Pitter is a writer and professor based in Toronto. She holds a Masters in Environmental Studies from York University. John Lorinc is a Toronto-based journalist who writes about urban affairs, politics, and business. He co-edited *The Ward: The Life and Loss of Toronto's First Immigrant Neighbourhood* (Coach House, 2015). *Anne Finch and Her Poetry* - Barbara McGovern 1992

Anne Finch and Her Poetry is the first major critical examination of the life and works of the foremost English woman poet of the eighteenth century. This biography places Anne Finch (1661-1720) in her social and literary milieu and includes discussion of such topics as love and marriage, female friendships, melancholy, and nature as they relate both to Finch's life and to her poetry. Barbara McGovern gives considerable attention to the methods by which Finch developed her artistry and molded a largely masculine literary tradition to her own designs through a variety of rhetorical and stylistic devices. She examines the entire body of Finch's work, including two verse plays and a number of previously

unpublished poems and letters, and corrects numerous misconceptions about the poet and her work. Though recognized in her lifetime as a talented poet, for nearly two hundred years Finch has been overlooked or, when anthologized, misrepresented. McGovern focuses on the historical place and displacement of Finch in Restoration and early eighteenth-century England in terms of her involvement with Britain's most critical religious and political controversies. An Anglican and Royalist who along with her husband was attached to the Stuart court at the time of the Glorious Revolution, Finch was an outsider because of her politics and religion as well as her gender. Despite her marginal status in society, Anne Finch was able to develop her poetic identity in part by defining her relationships with other early women writers, including Katherine Philips and Aphra Behn. Her female friendships, as well as aristocratic family ties and titled position, gave her access to a number of the most famous literary figures of her age, including Alexander Pope and Jonathan Swift. A thoroughly researched, well-written, and compelling work, *Anne Finch and Her Poetry* will no doubt become the standard biography of the finest woman poet in England before the nineteenth century.

As Poe and the socially awkward programmer Tilly Bradshaw delve deeper into the case, they are faced with seemingly unanswerable questions: despite being heavily vetted for a high-profile job, why does nothing in the victim's background check out? Why was a small ornament left at the murder scene - and why did someone on the investigation team steal it? And what is the connection to a flawlessly executed bank heist three years earlier, a heist where nothing was taken . . .
