Constructing Trade - Sophie Schram 2019-11-26

Die diskursanalytische Arbeit untersucht die handelspolitischen Interessen der Provinz Quebec während der CETA-Verhandlung zwischen Kanada und der EU (2006-2014). Die Verhandlung der Vertragskapitel "Öffentliche Vergabe", "Ausländische Direktinvestition" und "Landwirtschaft" aus der Perspektive Quebecs macht deutlich, dass die Regierung aus bestehenden Ideenrepertoires schöpfte, um Quebecs Interessen in einem komplexen transatlantischen Gefüge zu entwickeln und geschickt voranzutreiben. Den Bezugsrahmen, um aktuelle und historische Vorgänge zu interpretieren und Allianzen zur Durchsetzung der eigenen Position zu schmieden, stellten dabei insbesondere der kanadische Föderalismus sowie wirtschaftspolitische und kulturelle Entwicklungsdiskurse dar. Die Untersuchung basiert auf der systematischen quantitativen Analyse von Quebecer Parlamentsdebatten sowie der qualitativen Auswertung strukturierter Interviews mit Regierungsmitgliedern, Verwaltungsbeamten, Wirtschaftsverbänden und NGOs.

The Theological Programme of Mark - Francesco Filannino 2021-05-31

The first chapters of literary works are indispensable to understanding them. This is also true of the Gospels. Francesco Filannino shows that the introductory section of Mark's Gospel (Mark 1:1-15) is an important key to accessing the whole narrative, because it anticipates the main contents of the evangelist's theology.

Economic Analysis of Institutional Change in Ancient Greece - Carl Hampus Lyttkens 2012-12-12

This book presents an economic analysis of the causes and consequences of institutional change in ancient Athens. Focusing on the period 800-300 BCE, it looks in particular at the development of political institutions and taxation, including a new look at the activities of individuals like Solon, Kleisthenes and Perikles and on the changes in political rules and taxation after the Peloponnesian War.

Planning in the Soviet Union - Philippe J. Bernard 2013-10-22

Planning in the Soviet Union compiles the result of M. Bernard's two-month visit to the USSR in 1961, for the purpose of investigating regional planning on behalf of the French Government Planning Office. This compilation deals with the Soviet planning apparatus, including its organization and administration together with the reforms that have been at work since 1957, furnishing a broad outline of the many economic and social problems forming the essence of Soviet thinking and planning. This book provides a very clear picture of the complexity of problems involved, particularly with the USSR government battling with the concepts of centralization, decentralization, and in industry between a vertical and horizontal structure. The topics that include economic growth, investment, location of industry, transport, manpower, use of available local resources, and migration are discussed only in broad outline of the magnitude of problems in the Soviet economic system. The efficiency of investments, choice of criteria, problem of priorities,

productivity in highly integrated units, rationalization, specialization, and cooperation are also deliberated in this selection. This publication is intended for the average informed reader, particularly those who are interested in administering the planning apparatus in the near future.

The Adam Smith Review - Fonna Forman 2017-09-27

Adam Smith's contribution to economics is well recognised, but scholars have recently been exploring anew the multidisciplinary nature of his works. The Adam Smith Review is a rigorously refereed annual review that provides a unique forum for interdisciplinary debate on all aspects of Adam Smith's works, his place in history, and the significance of his writings to the modern world. It is aimed at facilitating debate between scholars working across the humanities and social sciences, thus emulating the reach of the Enlightenment world which Smith helped to shape. This tenth volume brings together leading scholars from across several disciplines, and offers a particular focus on Smith's continuing impact on the history of economics. There is also an emphasis throughout the volume on the relationship between Smith's work and that of other key thinkers.

The banking and credit system of the USSR - O. Kuschpèta 2012-12-06

It is a pleasure to introduce Dr. Kusehpeta's study of the USSR banking and credit system with some measure of enthusiasm, for the subject is one about which there is, as yet, not much literature available in the Western European languages and this study approaches the subject from the view-point of sources taken from within the Soviet Union itself. No matter how revolutionary the change, some ties with the past still remain and it is for this reason that the author has paid initial attention to the banking system of the Tsars and proceeds to deal with the development of the banking system since the Revolution of 1917. While history has made the Communist Civil War, the New Economic Policy and the Khrushchev reforms to be familiar to us, the effects of these events on the banking and monetary system have, thus far, never been fully researched. Next, the author deals extensively with the existing banking and credit system. This subject is not easy to understand, because we are obliged to become familiar with totally different concepts than those governing the mixed economic system of the Western World. I, personally, am struck by the sharp separation between the currency and the 'deposit' or 'transfer' money circulation.

Principes d'economie politique suivis de quelques recherches relatives a leur application et d'un tableau de l'origine et du progres de la science - J. R. McCulloch 1851

Government to Government - Susan Johnson 2000

State and tribal governments have common purposes: to use public resources effectively and efficiently, to provide comprehensive services to their respective citizens, and to protect the natural environment, all while sustaining healthy economies. Neighboring governments, as a practical matter, share many aspects of their respective economic and social systems, and are connected through political and legal relationships. Although these mutual interests have created jurisdictional disputes that historically have been solved through litigation, there is an increasing need for cooperation. Public resources are an issue for all governments, and state and tribes can benefit by collaborating and pooling resources to the fullest extent possible.

The Economics of Feasible Socialism - Alec Nove 2013-11-05

The first part of *The Economics of Feasible Socialism* demonstrates why Marx's theories provide no guide to the issues that must face economists under any realistically conceivable Socialism. The experience of communist-ruled countries, especially the former Soviet Union, is often negative: economic inefficiency, bureaucracy, despotism. The causes of these defects and possible remedies and reforms are discussed. The

problems of transition, in the context of Western industrialized countries and of developing countries, is also examined, with particular attention centred on the errors of economic policy in Chile and China, amongst other countries.

Rewriting Democracy - Elizabeth Deeds Ermarth 2007

Illuminating and comprehensive, this excellent volume addresses the problematic relationship between democratic institutions and the current critique of enlightenment and modernity. It focuses on the terms and conditions under which it would be possible to prevent events such as 9/11 or the genocide in Darfur in the future.

The Rocket into Planetary Space - Hermann Oberth 2014-10-22

For all being interested in astronautics, this translation of Hermann Oberth's classic work is a truly historic event. Readers will be impressed with this extraordinary pioneer and his incredible achievement. In a relatively short work of 1923, Hermann Oberth laid down the mathematical laws governing rocketry and spaceflight, and he offered practical design considerations based on those laws.

Socialism, Economics and Development (Routledge Revivals) - Alec Nove 2012-11-12

First published in 1986, this text brings together a selection of papers written by the great Alec Nove on development economics, Marxist economies, the Soviet economy, and law and politics in the Soviet Union. Reflecting the varied and diverse interests of its distinguished author, the topics range from Soviet constitutional law, to Trotsky's view of collectivization; from a critique of conventional micro-economics, to the economic disaster of the Allende regime in Chile. The author's long-standing immersion in the past and present of the Soviet Union helps to provide the unique insights into the workings of Socialist economies characteristic of Professor Nove's previous work. This volume should be essential reading for anyone interested in development economics, socialist economies, or the problems facing contemporary Soviet economic reformers.

A History of Portuguese Economic Thought - Antonio Almodovar
2002-01-04

A History of Portuguese Economic Thought offers the first account in English of the development of economic thought in Portugal. The authors adopt a comparative approach to analyse how economic doctrine, theories and policies have been disseminated and assimilated by Portuguese economists in different periods. They assess the influence on Portuguese economic thought of major economists such as Adam Smith, Keynes and Hayek.

Urban Food Democracy and Governance in North and South - Alec

Thornton 2019-11-28

"Grounded in the urban politics of the 21st Century world-wide, this thoughtful volume hooks urban food - and especially its production - to social justice in a realistic and manageable way." —Diana Lee-Smith, Mazingira Institute, Kenya "An excellent international overview of urban food democracy and governance, with impressive geographical reach." —Andre Viljoen, University of Brighton, UK This edited collection explores urban food democracy as part of a broader policy-based approach to sustainable urban development. Conceptually, governance and social justice provide the analytical framework for a varied array of contributions which critically address issues including urban agriculture, smart cities, human health and wellbeing and urban biodiversity. Some chapters take the form of thematic, issue-based discussions, where others are constituted by empirical case studies. Contributing authors include both academic experts and practitioners who hail from a wide range of disciplines, professions and nations. All offer original research and robust consideration of urban food democracy in cities from across the Global North and South. Taken as a whole, this book makes a significant contribution to understanding the potential enabling role of good urban governance in developing formal urban food policy that is economically and socially responsive and in tune with forms of community-driven adaptation of space for the local production, distribution and consumption of nutritious food.

Markets from Networks - Harrison C. White 2018-06-05

In *Markets from Networks*, one of America's most influential sociologists unveils a groundbreaking theory of the market economy. Arguing that most economists use overly abstract models of how the economy operates, Harrison White seeks a richer, more empirically based alternative. In doing so, he offers a more lucid, generalized treatment of the market models described in his important earlier work in order to show how any given market is situated in a broader exchange economy. White argues that the key to economic action is that producers seek market niches to maximize profit and minimize competition. As they do so, they base production decisions not only on anticipated costs from suppliers and anticipated demand from buyers, but also by looking at their competitors. In fact, White asserts, producers act less in response to actual demand than by anticipating it: they gauge where competitors have found demand and thus determine what they can do that is similar and yet different enough to give themselves a special niche. Building on these and related insights, White creates new mathematical models of how the economy works and how the interaction of its sectors creates mutual protection from the uncertainties of business. These models provide new ways of accounting for profits, prices, market shares, and other vital economic phenomena. He shows, for example, that prices are determined by the coalescing of local variables rather than set in terms of averages as implied by the "law" of supply and demand. The model of "pure" competition favored by economics is deficient, he concludes, as it fails to account for the varied circumstances of particular industries. Throughout, White draws extensively on case studies of American businesses and on recent mathematical and sociological work on networks. Rivaling standard economic theories with its rich empirical grounding, sheer originality, and scholarly rigor, *Markets from Networks* will resonate in economics and economic sociology for years to come.

The Evolution of International Arbitration - Alec Stone Sweet
2017-02-10

The development of international arbitration as an autonomous legal order comprises one of the most remarkable stories of institution building at the global level over the past century. Today, transnational firms and states settle their most important commercial and investment disputes not in courts, but in arbitral centres, a tightly networked set of organizations that compete with one another for docket, resources, and influence. In this book, Alec Stone Sweet and Florian Grisel show that international arbitration has undergone a self-sustaining process of institutional evolution that has steadily enhanced arbitral authority. This judicialization process was sustained by the explosion of trade and

investment, which generated a steady stream of high stakes disputes, and the efforts of elite arbitrators and the major centres to construct arbitration as a viable substitute for litigation in domestic courts. For their part, state officials (as legislators and treaty makers), and national judges (as enforcers of arbitral awards), have not just adapted to the expansion of arbitration; they have heavily invested in it, extending the arbitral order's reach and effectiveness. Arbitration's very success has, nonetheless, raised serious questions about its legitimacy as a mode of transnational governance. The book provides a clear causal theory of judicialization, original data collection and analysis, and a broad, relatively non-technical overview of the evolution of the arbitral order. Each chapter compares international commercial and investor-state arbitration, across clearly specified measures of judicialization and governance. Topics include: the evolution of procedures; the development of precedent and the demand for appeal; balancing in the public interest; legitimacy debates and proposals for systemic reform. This book is a timely assessment of how arbitration has risen to become a key component of international economic law and why its future is far from settled.

The European Productivity Agency and Transatlantic Relations, 1953-1961 - Bent Boel 2003

The European Productivity Agency (EPA) was initially designed as a means to "Americanize" Western Europe through the transfer of American techniques, know-how and ideas to the Old Continent. It increasingly became a framework within which the member countries sought "European" solutions to their problems. This study of the EPA sheds new light on the nature of European cooperation and transatlantic relations in the 1950s as well as on the changes these relations underwent during the early postwar period.

Transnational French Studies - Alec G. Hargreaves 2012-01-01

The 2007 manifesto in favour of a "Littérature-monde en français" has generated new debates in both "francophone" and "postcolonial" studies. Praised by some for breaking down the hierarchical division between "French" and "Francophone" literatures, the manifesto has been criticized by others for recreating that division through an exoticizing vision that continues to privilege the publishing industry of the former colonial metropole. Does the manifesto signal the advent of a new critical paradigm destined to render obsolescent those of "francophone" and/or

"postcolonial" studies? Or is it simply a passing fad, a glitzy but ephemeral publicity stunt generated and promoted by writers and publishing executives vis-a-vis whom scholars and critics should maintain a skeptical distance? Does it offer an all-embracing transnational vista leading beyond the confines of postcolonialism or reintroduce an incipient form of neocolonialism even while proclaiming the end of the centre/periphery divide? In addressing these questions, leading scholars of "French", "Francophone" and "postcolonial" studies from around the globe help to assess the wider question of the evolving status of French Studies as a transnational field of study amid the challenges of globalization.

A Dictionary of Phonetics and Phonology - R.L. Trask 2004-08-02

Written for students of linguistics, applied linguistics and speech therapy, this dictionary covers over 2,000 terms in phonetics and phonology. In addition to providing a comprehensive, yet concise, guide to an enormous number of individual terms, it also includes an explanation of the most important theoretical approaches to phonology. Its usefulness as a reference tool is further enhanced by the inclusion of pronunciations, notational devices and symbols, earliest sources of terms, suggestions for further reading, and advice with regard to usage. The wide range of topics explained include: * Classical phonology, including American Structuralism and the Prague School * Contemporary approaches, including Autosegmental Phonology, Metrical Phonology, Dependency Phonology, Government Phonology and Lexical Phonology * Prosodic ideas in phonology, both traditional and contemporary ^ * * historical phonology * Intonation and tonology This dictionary devotes space to the various theoretical approaches in proportion to their importance, but it concentrates most heavily on non-theory-bound descriptive terminology. It will remain a definitive reference for years to come.
