Agricultural Waste Management - Thelma Bosso 2016-08-06

Agricultural waste refers to the waste produced by various agricultural activities. It can include both organic waste, like unwanted produce, manure, etc; and inorganic waste like excess pesticides, agrochemicals, silage, waste from machineries like oil, grease, etc. Agricultural waste has become a growing concern for environmentalists. Thus, its management has become a priority. Agriculture waste management insures that the things used for agricultural activities are recycled, reused and the use of non-biodegradable waste is reduced. This book will elucidate the various concepts and theories to manage agricultural waste and provide case studies to comprehend the usefulness of their applications. The topics covered here in will offer readers new insights in this field. It is an essential guide for agriculturists, environmentalists, ecologists and those who wish to pursue this discipline further.

Educational Research - L R Gay 2015-10-08

A leader in Introduction to Educational Research courses, Educational Research: Competencies for Analysis and Applications, ninth edition, remains a practical text focused on the skills and procedures students need in order to become competent consumers and producers of educational research. The accessible writing style and light, humorous tone of this book helps to demystify and enliven this demanding course. The text uses a direct, step-by-step approach to the research process. Tasks are included throughout the text to guide students through the process of creating their own research report. Published research articles are now included in every research methods chapter to provide students with illustrations of exemplary qualitative and quantitative research. Key changes in the ninth edition include an expanded coverage of qualitative research through a new chapter on Case Study Research (Chapter 17), a new chapter on Survey Research (Chapter 7), an increased emphasis on ethical considerations in the conduct of educational research (Chapter 1), and significant updates to Descriptive Statistics (Chapter 12) and Inferential Statistics (Chapter 13) that increase the coverage of how to use technology in the research process."

Features a new afterword by the author.

The Entrepreneurial Mind - Jeffrey A. Timmons 1989

THE ENTREPRENEURIAL MIND, Jeffrey A. Timmons, Harvard Business School "A well-written & practical book designed to aid persons contemplating an entrepreneurial venture. Timmons, a specialist in entrepreneurship, has done an excellent job covering the field. Starting with a broad overview of what entrepreneurship is, he concludes with an

assessment aimed at summing up the strengths & weaknesses of a new enterprise in advance. In between, he provides sound advice on necessary managerial skills; how to form, build, & reward a new venture team; planning & goal-setting; & the pros & cons of family businesses. Particular attention is also given to the need for ethical standards. Recommended." -- Library Journal. "A close look at the psychology of the entrepreneur & how that type of personality reacts with people & the world at large. Timmons does a good job of exploding myths & misconceptions, offering a wealth of insight into success, failure, & the hard work it takes to succeed in starting up a business or taking over the reins of an established or family-owned enterprise. The pitfalls of entrepreneurial life are analyzed, but more importantly, the positive attributes of the entrepreneur are emphasized. Numerous real-life case studies supplement the coverage." -- Booklist.

Experiencing School Mathematics - Jo Boaler 1997

This is the first book of its kind to provide direct evidence for the effectiveness of traditional and progressive teaching methods. It reports on careful and extensive case studies of two schools which taught mathematics in totally different ways. Three hundred students were followed over three years and the interviews that are reproduced in the book give compelling insights into what it meant to be a student in the classrooms of the two schools. The different school approaches are compared and analyzed using student interviews, lesson observations, questionnaires given to students and staff and a range of different assessments, including GCSE examinations. Questions are raised about the effectiveness of different teaching methods in preparing students for the demands of the 'real world' and the 21st century, the impact of setted and mixed ability teaching upon student attitude and achievement, and gender and learning styles. New evidence is provided for each of these issues. The book draws some radical new conclusions about the ways that traditional teaching methods lead to limited forms of knowledge that are ineffective in non-school settings. The book will be essential reading for math teachers, parents, and policy makers in education.

Research in Education: Pearson New International Edition - James H. McMillan 2013-07-26

This substantially revised text provides a comprehensive, highly accessible, and student friendly introduction to the principles, concepts, and methods currently used in educational research. This text provides a balanced combination of quantitative and qualitative methods and enables students to master skills in reading, understanding, critiquing, and conducting research. Many examples and article excerpts are used throughout the text to demonstrate and highlight best practices in educational research. Evidence-based inquiry is emphasized in two ways: (1) Introductory chapters focus on the added importance of data driven decision-making, (2) Methodological chapters provide explicit guidelines for conducting empirical studies.

Branding Bud - David Paleschuck 2021-05-25

Never before has a book been compiled on cannabis brands and the consumers they appeal to. Once an underground commodity, with legalization in more and more states and countries, cannabis is now marketed under a variety of national brands, each with its own unique

approach to targeting consumers. The global legal cannabis market was valued at US\$17.7 billion in 2019 and is expected to reach US\$73.6 billion in 2027. Celebrities, athletes, politicians, and large corporations alike are investing and competing in this fast-paced industry. But what makes a cannabis brand successful? What techniques do companies use to brand and market their products? What segments have been established? In *Branding Bud: The Commercialization of Cannabis*, David Paleschuck answers these questions, digging deep into this evolving industry to uncover what both small companies and large corporations are doing to introduce their products to the hearts and minds of cannabis consumers. The results of his exploration may surprise you. *Branding Bud* showcases the exciting range of products that cannabis consumers will be able to buy in a local dispensary once legalization comes to their state. The book offers a comprehensive overview and contextualization of this new segment, examining the multitude of emerging brands, their creative assets, and the strategies behind them, and the political, legal, and cultural aspects of cannabis that inform the brand landscape of today. This book is a must-read for entrepreneurs, investors, marketers, designers, and anyone interested in the rapidly growing cannabis industry. -- David Paleschuck

This book is about so much more than referrals. This is about building a business that not only feeds your family, but also feeds your soul.

Hook Point - Brendan Kane 2020-08-04

Hook Point: How to Stand Out in a 3-Second World, by out of the box thinker Brendan Kane, breaks down the most effective strategies to generate new opportunities, innovate and scale your business, and create a compelling brand--both online and off--so you can thrive in the new micro-attention world in which we live. A lot of people know who they are, what they do, and a few even know why they do it--but even when brands or individuals have clarity in these areas, they often struggle to grab a potential audience's attention for long enough to get them to learn about their attributes. Others have amazing products or services that fail to achieve great success because they don't know how to talk about what they do effectively. This is because digital and social media have reshaped our world into one of micro-attention. There are over sixty billion messages shared on digital platforms each day, and the average person is exposed to between four thousand to ten thousand ads a day. This bombardment of stimuli has changed the way we communicate and market content both online and off. In fact, research shows that you have less than three seconds to capture a person's attention. With such a short window of time, we need to hook audiences quickly, efficiently, and consistently if we want to successfully fuel brand awareness and growth. Luckily, Brendan Kane, an out of the box thinker and strategist who's built platforms for celebrities like Taylor Swift and Rhianna, and worked with Fortune 500 companies like Paramount, Viacom, and MTV has mastered the art of standing out. In *Hook Point: How to Stand Out in a 3-Second World* he reveals the power of hook points--a communication tool that helps marketers package their messages in a succinct, attention-grabbing way that leads to better opportunities both online and off. Whether you're promoting a brand, product, or service this book is the essential guide for making it in our three-second world.

Creativity & Innovation - Ashwini Kumar Singh 2021-03-17

"Creativity and innovation are to events, what the heart and soul are to the living." The book aims at encouraging readers to capture the traits

and develop skills for enhancing their creative and innovative capabilities, cultivating the culture of creativity and innovation. Creativity is inventiveness with new ideas; critical thinking is generating and selecting ideas; and innovation turns creativity into products, processes and services. Creativity + Critical thinking + Innovation = Path of Desired Change The primary difference between creativity and innovation is that the former refers to conceiving a new idea while the latter involves converting that idea into a marketable commodity. Creativity and innovation are an attempt to gain a competitive advantage. Organizations are now focusing on enhancing their employees' creativity and not merely developing their technical competencies and skills. Undoubtedly, creativity is the most important human resource of all without which there would be no progress, and we would be forever repeating the same patterns. Innovation is at the heart of all successful companies.

Emotional Intelligence for Sales Success - Colleen Stanley 2012-11

Even skilled salespeople buckle in tough selling situations-getting defensive with prospects who challenge them on price or too quickly caving to discount pressure. Those are examples of the fight-or-flight response-something salespeople learn to avoid when they build their emotional intelligence. Studies have shown that emotional intelligence (EI) is a strong indicator of success. In Emotional Intelligence for Sales Success, sales trainer and expert Colleen Stanley shows how closely EI is tied to sales performance and how salespeople can sharpen their skills to maximize results. Readers will discover: * How to increase impulse control for better questioning and listening * The EI skills related to likability and trust * How empathy leads to bigger sales conversations and more effective solutions * How emotional intelligence can improve prospecting efforts * The EI skills shared by top sales producers * And much more Emotional intelligence plays a vital role at every stage of the sales process, from business development to closing the deal. When customers can get product information and price comparisons online, the true differentiator is the ability to deftly solve problems and build relationships-EI territory!

Reinforcements - Heidi Grant 2018-06-12

Humans have a natural instinct to help others. Imagine walking up to a

stranger on the subway and asking them for their seat. What about asking a random person on the street if you could borrow their phone? If the idea makes you squeamish, you're not alone--social psychologists have found that doing these very things makes most of us almost unbearably uncomfortable. But here's the funny thing: even though we hate to ask for help, most people are wired to be helpful. And that's a good thing, because every day in the modern, uber-collaborative workplace, we all need to know when and how to call in the cavalry. However, asking people for help isn't intuitive; in fact, a lot of our instincts are wrong. As a result, we do a poor job of calling in the reinforcements we need, leaving confused or even offended colleagues in our wake. This pragmatic book explains how to get it right. With humor, insight, and engaging storytelling, Heidi Grant, PhD, describes how to elicit helpful behavior from your friends, family, and colleagues--in a way that leaves them feeling genuinely happy to lend a hand. Whether you're a first-time manager or a seasoned leader, getting people to pitch in is what leadership is. Fortunately, people have a natural instinct to help other human beings; you just need to know how to channel this urge into what it is you specifically need them to do. It's not manipulation. It's just management.
