Mars 2194 - Jack Stornoway
2019-05-10

In 2194, the winds of change are sweeping across Mars. It's been a decade since the eco-revolution started and stalled after liberating only 20% of the planet. Since then the eco-revolution has spread to Earth, and a cyber-revolution has begun in the asteroid belt. Now the revolution is spreading back to Mars, and impacting the lives of ordinary people. From somewhere inside her there came a deep swell of emotion, and she screamed. Some of it was from the loss of her husband. Some of it was fear of these terrible people. Some of it was just anger. But

most of it was a nameless emotion, something primal, the feeling that an animal might have when after being chased into a corner, it turns to attack its predator. That emotion when not only does it need to fight, but a switch in its mind has been thrown and now it wants to fight.

Murder of a Sweet Old Lady - Denise Swanson 2001-04-01

When she left Scumble River years ago, school psychologist Skye Denison thought she'd never be back. But after a run of bad luck in the big city, she has a new appreciation for the down-home charm of small-town life--and decides to start over in the town where she started out... When Skye's beloved grandmother is found dead in her bed, the family consensus is natural causes. Still, Skye insists on an autopsy--an examination that proves the sweet old lady was, in fact, murdered! But who could have done the deadly deed? Skye is determined to find out, though her snooping doesn't sit well with the relatives. Family tensions can mean only one thing: family secrets. And when a series of hooligan attacks on Skye's property leads to an outright physical assault, Skye has to wonder if by exposing the rotten roots of her family tree, she's one step closer to exposing the killer...

Walking the Corbetts Vol 2 North of the Great Glen - Brian Johnson
2013-08-27

The Corbetts (Scotland's 2500-2999ft mountains) are every bit as interesting as the Munros (3000ft and over), often clear when the Munros are in cloud, walkable on short winter days, free of the peak-bagging crowds of their taller

neighbours. Walking the Corbetts is divided into two volumes. The guide covers the Corbetts to the north of the Great Glen, which runs from Fort William to Inverness and includes those in Knoydart, Applecross, Torridon and the isles of Skye, Mull, Rum and Harris. Choosing the best, rather than the quickest, routes up each summit the author covers 109 peaks in 90 routes, illustrated with custom 1:100,000 mapping. South of the Great Glen it is the Munros which attract most attention, but along the western seaboard and in the far north it is the Corbetts that dominate the landscape with isolated rocky peaks rising steeply above the sea and inland lochs, in a wilderness of heather and bog dotted with sparkling lochs and lochans. There are spectacular Corbetts all the way from Ardgour to Cape Wrath. The far north-west provides some of the most magnificent mountain scenery in the world and it is difficult to beat the magical islands of Mull, Rum, Skye and Harris.

Beasts Before Us - Elsa

Panciroli 2021-06-10

For most of us, the story of mammal evolution starts after the asteroid impact that killed the dinosaurs, but over the last 20 years scientists have uncovered new fossils and used new technologies that have upended this story. In *Beasts Before Us*, palaeontologist Elsa Panciroli charts the emergence of the mammal lineage, Synapsida, beginning at their murky split from the reptiles in the Carboniferous period, over three-hundred million years ago. They made the world theirs long before the rise of dinosaurs. Travelling forward into the Permian and then Triassic periods, we learn how our ancient mammal ancestors evolved from large hairy beasts with accelerating metabolisms to exploit miniaturisation, which was key to unlocking the traits that define mammals as we now know them. Elsa criss-crosses the globe to explore

the sites where discoveries are being made and meet the people who make them. In Scotland, she traverses the desert dunes of prehistoric Moray, where quarry workers unearthed the footprints of Permian creatures from before the time of dinosaurs. In South Africa, she introduces us to animals, once called 'mammal-like reptiles', that gave scientists the first hints that our furry kin evolved from a lineage of egg-laying burrowers. In China, new, complete fossilised skeletons reveal mammals that were gliders, shovel-pawed Jurassic moles, and flat-tailed swimmers. This book radically reframes the narrative of our mammalian ancestors and provides a counterpoint to the stereotypes of mighty dinosaur overlords and cowering little mammals. It turns out the earliest mammals weren't just precursors, they were pioneers.
