Critical Essays in Music Education - MarveleneC. Moore 2017-07-05

This volume of essays references traditional and contemporary thought on theory and practice in music education for all age groups, from the very young to the elderly. The material spans a broad range of subject areas from history and philosophy to art and music, and addresses issues such as curriculum, pedagogy, assessment and evaluation, as well as current issues in technology and performance standards. Written by leading researchers and educators from diverse countries and cultures, this selection of previously published articles, research studies and book chapters is representative of the most frequently discussed and debated topics in the profession. This volume, which documents the importance of lifelong learning, is an indispensable reference work for specialists in the field of music education.

Multiple Choice Questions on Energy - Arun K. Tripathi 2011-01-01

Since energy is an important aspect in all sectors, it needs to be given a due attention in education and awareness. Multiple Choice Questions on Energy y attempts to present the subject in a simple yet comprehensive manner for students and aspirants of various competitive exams. Keeping in view the present trend of various exams, the various types of energy have been presented in the form of multiple choice questions, which is the most common pattern of examination in every field of study in the science stream. Energy-related questions figure in various national-level competitive examinations, besides featuring in question papers for examinations in bachelor degree courses on engineering and technology. Multiple Choice Questions on Energy contains about 1300 multiple choice questions covering various sectors of energy, including mechanical energy, electrical energy, chemical energy, nuclear energy, thermal energy, magnetic energy, sound energy, energy from coal, petroleum oil and natural gas, renewable energy, and energy conservation. An introduction to energy has been presented in a comprehensive yet simplified form. This book is useful for academicians, students pursuing engineering or agriculture-related courses, aspirants of various competitive exams, professionals, and stakeholders in the energy sector. It can also be a tool for various quiz programmes organized in schools, universities, engineering institutions.

Data Mining with SPSS Modeler - Tilo Wendler 2016-06-06

Introducing the IBM SPSS Modeler, this book guides readers through data mining processes and presents relevant statistical methods. There is a special focus on step-by-step tutorials and well-documented examples that help demystify complex mathematical algorithms and computer programs. The variety of exercises and solutions as well as an accompanying website with data sets and SPSS Modeler streams are particularly valuable. While intended for students, the simplicity of the Modeler makes the book useful for anyone wishing to learn about basic and more advanced data mining, and put this knowledge into practice.

A Blueprint for Computer-Assisted Assessment - Joanna Bull 2003-12-16

The rapid development and integration of computer-assisted assessment (CAA) in mainstream post-compulsory educational institutions today make this an exciting and invaluable reference text. It provides a practical, research-based guide on a subject that is becoming increasingly important as educational assessment changes and grows. The book addresses theory and practice, offering a comprehensive evaluation of many key aspects of CAA such as: * question and test design, scoring and analysis, and feedback and integration with other assessment methods * the role of CAA in feedback processes * wider use of technology to support and enhance assessment * technical, operational and support issues. The authors present a lucid, balanced analysis of the strengths and weaknesses of CAA. This text will appeal to all those involved in higher or further education who wish to model their CAA systems on the best practice available.
