El desarrollo de una mente crítica inicia con un ¿por qué? -

Christopher E. Wissar Acosta 2019-11-14

La vida debiera vivirse con propósito, y con el objetivo de aprender y mejorarse a uno mismo cada día, siendo en todo momento personas de verdad y honestidad. Pues no existe peor desperdicio de tiempo que, despertar y ser exactamente el mismo individuo que se fue ayer, sin cambio, crecimiento, mejora ni evolución. Vivir con sentido en la existencia, sin olvidar que también se es un hombre de ciudad, lleno de extravagancias y concepciones urbanas, un ser humano al que nada de lo que es humano le es ajeno, aceptando y reconociendo que en muchas de las ocasiones, sus oportunidades en la vida no son ni su culpa ni su mérito, sino mera cuestión de geografía ... aunque también se puede vivir de la manera que a cada quien le haga más feliz, sin que nada concuerde

con lo antes dicho. Este libro plasma experiencia y reflexión de vida, tal vez lo más destacado sea que al adentrarse en él, no estés tan seguro que el concepto que aprendiste del mal, es el mal, ni el concepto del bien, es el bien, sino que ambos se entrelazan de modo inextricable ... además, nada escapa a la verdad, y cuando la vida te habla no queda más remedio que callarte y escuchar.

Teaching and Learning in Digital World - Mercè Gisbert 2015-06-11

Many reports over the last few years have analysed the potential use of games, videogames, 3D environments and virtual reality for educational purposes. Numerous emerging technological devices have also appeared that will play important roles in the development of teaching and learning processes. In the context of these developments, learning rather than teaching becomes the main axis in the organisation of the educational process. This process has now gone beyond the analogue world and face-to-face education to enter the digital world, where new learning environments are being produced with ever greater doses of realism. *Teaching and Learning in Digital Worlds* examines the teaching and learning process in 3D virtual environments from both the theoretical and practical points of view.

Science and Empires - P. Petitjean 2012-12-06

SCIENCE AND EMPIRES: FROM THE INTERNATIONAL COLLOQUIUM TO THE BOOK Patrick PETITJEAN, Catherine JAMI and Anne Marie MOULIN The International Colloquium "Science and Empires - Historical

Studies about Scientific Development and European Expansion" is the product of an International Colloquium, "Sciences and Empires - A Comparative History of Scientific Exchanges: European Expansion and Scientific Development in Asian, African, American and Oceanian Countries". Organized by the REHSEIS group (Research on Epistemology and History of Exact Sciences and Scientific Institutions) of CNRS (National Center for Scientific Research), the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris. This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago, and proposed "Sciences and Empires" as one of the main research programmes for the project to organize such a colloquium was a bit of a gamble. Its subject, reflected in the title "Sciences and Empires", is not a currently-accepted sub-discipline of the history of science; rather, it refers to a set of questions which found autonomy only recently. The terminology was strongly debated by the participants and, as is frequently suggested in this book, awaits fuller clarification.

While she was in hiding, Anne wrote diaries which described her secret life, and the loves, hopes, fears and dreams of a teenage girl in extraordinary times. After the war, the diaries became famous around the world. This is the story of the diaries, of Anne Frank's early years, and of her life during and after the time in hiding.
