aviation students as well as legal professionals who are looking for broad-based, introductory coverage of the subject. The text begins with basic legal concepts that build a foundation for in-depth exploration of aviation-specific subject matter. This allows the instructor to utilize one text in situations where a basic foundation in law is required before moving into aviation law specifics. It includes citations to relevant and key court decisions that provide a solid underpinning for the student of aviation law. The book is divided into six general categories, with fifteen relevant sub-chapters, allowing focused learning into particular areas of law. Throughout it features chapter summaries, key word indices and review questions. The design easily allows instructors to develop syllabi that spotlight the specific area of law that they are interested in exploring, providing comprehensive coverage of both traditional introductory legal concepts and topical aviation subject matter.
