Verbal Behavior - Burrhus Frederic Skinner 1957

Bulletin of the Atomic Scientists - 1986-04
The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

The Advocate - 2002-07-09
The Advocate is a lesbian, gay, bisexual, transgender (LGBT) monthly newsmagazine. Established in 1967, it is the oldest continuing LGBT publication in the United States.

Organizational Behavior - Fred Luthans 2011
Organisational Behavior by Fred Luthans was one of the first mainstream organisational behavior texts on the market and continues the tradition of being the most current and up-to-date researched text today. Well-known author Fred Luthans is the 5th most prolific Publisher in Academy of Management Journals and a senior research scientist with the Gallup Organization, who continues to do research in the organisational behavior area. The Twelfth Edition of Organisational Behavior is ideal for instructors who take a research-based and conceptual approach to their OB course.

Management of Organisational Behaviour -

Nirmal Singh 2004-03

Research Methods in Psychology - Rajiv Jhangiani 2019

Pygmalion in Management - J. Sterling Livingston 2009-04-24
Numerous studies show that people will rise, or fall, to the level where their superiors believe them capable. As a manager, it is up to you to have high expectations for your employees, and to communicate those expectations to them. In *Pygmalion in Management*, J. Sterling Livingston urges you to understand the power you have over your subordinates' success, and use it to benefit everyone involved. Since 1922, Harvard Business Review has been a leading source of breakthrough ideas in management practice. The Harvard Business Review Classics series now offers you the opportunity to make these seminal pieces a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world.

The Contemporary Thesaurus of Search Terms and Synonyms - Sara D. Knapp 2000
Whether your search is limited to a single database or is as expansive as all of cyberspace, you won't find the intended results unless you

use the words that work. Now in its second edition, Sara Knapp has updated and expanded this invaluable resource. Unlike any other thesaurus available, this popular guide offers a wealth of natural language options in a convenient, A-to-Z format. It's ideal for helping users find the appropriate word or words for computer searches in the humanities, social sciences, and business. The second edition has added more than 9,000 entries to the first edition's extensive list. Now, the Thesaurus contains almost 21,000 search entries! New or expanded areas include broader coverage of business terms and humanities-including arts literature, philosophy, religion, and music.

Essentials of Organizational Behavior - Terri A. Scandura 2017-12-13

Concise, practical, and based on the best available research, *Essentials of Organizational Behavior: An Evidence-Based Approach, Second Edition* equips students with the necessary skills to become effective leaders and managers. Author Terri A. Scandura uses an evidence-based approach to introduce students to new models proven to enhance the well-being, motivation, and productivity of people in the work place. Experiential exercises, self-assessments, and a variety of real-world cases and examples provide students with ample opportunity to apply OB concepts and hone their critical thinking abilities. New to this Edition A new Emotions and Moods chapter delves into important topics like emotional intelligence, emotional contagion, and affective neuroscience. A new Power and Politics chapter unpacks the most effective influence strategies and helps students develop their political skills. A streamlined table of contents now combines perception and decision making in a single chapter and change and stress in a single chapter. New case studies, including some from SAGE Business Cases for the Interactive eBook, on topics such as virtual teams, equal pay and the gender wage gap, and the use of apps at work introduce timely and relevant discussions to help foster student engagement. The new edition has been rigorously updated with the latest research throughout and includes expanded coverage of Machiavellian leadership, ethical decision making, and organizational design through change. New Best Practices and

Research in Action boxes as well as new Toolkit Activities and Self-Assessments have been added to make the text even more hands-on and practical.

Interview Questions and Answers - Richard McMunn 2013-05

Current Catalog - National Library of Medicine (U.S.)

First multi-year cumulation covers six years: 1965-70.

Bulletin of the Atomic Scientists - 1992-05

Multilingual - 2006

Executricks - Stanley Bing 2008-06-03

People in the high flush of a successful but sometimes frenetic business career often look with envy at those who have entered their golden years. Ah! they think. To be retired! Free to wake when you wish, to have the time to reflect on the deeper things in life, play golf or quots, or just go fishin' in the middle of the day. The stressed-out mind boggles at the prospect, and the lip cannot help but tremble and drool. At the same time, you may not be emotionally-or financially-ready to hang it all up. Which is why, whether you're a withered graybeard or a teeny young future hotshot in leather jodhpurs, you need Stanley Bing's global positioning system for a sane and pleasantly successful life:

Executricks, or How to Retire While You're Still Working. Bing is the ultimate corporate insider, one who has attained nosebleed altitude and worked long and hard enough to lose his desire to work long and hard enough. Over time, he has watched the power players who have made their jobs into a waking festival of indolence and fun, and gleaned a vast range of executricks they have developed over the years, based around several core concepts: Delegation, or getting other people to do the stuff you don't want to do; Absence, or the ability to get "work" done while not being physically on the scene; Abuse of status; Acting visionary when confused; Intense engagement (used only in crisis); A wellspring of executricks flow from these simple precepts, including: The use of the cell phone and BlackBerry to establish a permanent state of simultaneous Omniscience and Not-Presence; Roping off mealtimes as zones of defensible

entitlement Travel as an alternative to work The art of the nap Golf-the ultimate dodge Philanthropy and social activism, a pleasant parallel universe Executricks is the most precious of resources for those who work hard but would rather be hardly working; a secret handbook that lays bare the stratagems of those who have already ascended to the pinnacles of power. No office, home, or backpack should be without a dog-eared copy. Early adopters earn extra points.

The Illustrated London News - 1847

Leaders Eat Last - Simon Sinek 2014-01-07

The New York Times bestseller by the acclaimed, bestselling author of *Start With Why* and *Together is Better*. Now with an expanded chapter and appendix on leading millennials, based on Simon Sinek's viral video "Millennials in the workplace" (150+ million views). Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things. In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. "Officers eat last," he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice their own comfort--even their own survival--for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a "Circle of Safety" that separates the security inside the team from the challenges outside. Sinek illustrates his ideas with fascinating true stories that range from the military to big business, from government to investment banking.

Contemporary Marketing - Louis E. Boone
2015-01-01

CONTEMPORARY MARKETING, Seventeenth Edition, is the proven, premier teaching and learning resource for foundational marketing courses. The authors provide thorough coverage of essential marketing principles, exploring all components of the marketing mix, and providing practical guidance to help students prepare for successful marketing careers. This trusted text continues to grow stronger with each groundbreaking new edition, preserving what has made previous editions perennial best-sellers, while adding innovative new features and up-to-date information on current trends, topics, research, and best practices in this ever-evolving field. Because it is so technologically advanced, student-friendly, instructor-supported, and more relevant than ever, CONTEMPORARY MARKETING, Seventeenth Edition, remains in a class by itself. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Management Accountant - 1983

Cumulated Index Medicus - 1992

Bulletin of the Atomic Scientists - 1986-04

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.
Indian Journal of Social Research - 1972

New York Magazine - 1987-11-23

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Documentation Abstracts - 1983

The World Book Encyclopedia - 2002

An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

501 Word Analogy Questions - 2002

Unlike most resources, this handy, portable study aid is not prepared exclusively for the Miller Analogy Test. Though it can certainly be used for it, this book prepares test takers for any standardized test containing word analogies, such as: SAT, GRE, GMAT, or LSAT. Often cited as a difficult section for even the best students, discover the best resource for word analogies practice, and no extras. Test-takers work with these questions and find out how to score better through practice. All answers are explained, reinforcing strategies and identifying tricks to figuring out the questions.

Drive - Daniel H. Pink 2011-04-05

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing*. Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

National Library of Medicine Current Catalog - National Library of Medicine (U.S.) 1984

The 5 Levels of Leadership - John C. Maxwell 2011-10-04

Use this helpful book to learn about the leadership tools to fuel success, grow your team,

and become the visionary you were meant to be. True leadership isn't a matter of having a certain job or title. In fact, being chosen for a position is only the first of the five levels every effective leader achieves. To become more than "the boss" people follow only because they are required to, you have to master the ability to invest in people and inspire them. To grow further in your role, you must achieve results and build a team that produces. You need to help people to develop their skills to become leaders in their own right. And if you have the skill and dedication, you can reach the pinnacle of leadership—where experience will allow you to extend your influence beyond your immediate reach and time for the benefit of others. The 5 Levels of Leadership are: 1. Position—People follow because they have to. 2.

Permission—People follow because they want to. 3. Production—People follow because of what you have done for the organization. 4. People Development—People follow because of what you have done for them personally. 5. Pinnacle—People follow because of who you are and what you represent. Through humor, in-depth insight, and examples, internationally recognized leadership expert John C. Maxwell describes each of these stages of leadership. He shows you how to master each level and rise up to the next to become a more influential, respected, and successful leader.

Writing Literature Reviews - Jose L. Galvan 2017-04-05

Guideline 12: If the Results of Previous Studies Are Inconsistent or Widely Varying, Cite Them Separately

Popular Science - 2005-09

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Popular Science - 2003-11

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help

make it better.

Strengthening Forensic Science in the United States - National Research Council
2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

E-learning Methodologies - Beatrice Ghirardini
2011

The "E-Learning Methodologies" guide will support professionals involved in the design and development of e-learning projects and products. The guide reviews the basic concepts of e-learning with a focus on adult learning, and introduces the various activities and roles involved in an e-learning project. The guide covers methodologies and tips for creating interactive content and for facilitating online learning, as well as some of the technologies

used to create and deliver e-learning.

Concepts of Biology - Samantha Fowler
2018-01-07

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, *Concepts of Biology* is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of *Concepts of Biology* is that instructors can customize the book, adapting it to the approach that works best in their classroom. *Concepts of Biology* also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Research Methods in Human Resource Management - Eugene F. Stone-Romero
2020-05-01

Empirical research in HRM has focused on such issues as recruiting, testing, selection, training, motivation, compensation, and employee well-being. A review of the literature on these and other topics suggests that less than optimal methods have often been used in many HRM studies. Among the methods-related problems are using (a) measures or manipulations that have little or no construct validity, (b) samples of units (e.g., participants, organizations) that bear little or no correspondence to target populations, (c) research designs that have little or no potential for supporting valid causal

inferences, (d) samples that are too small to provide for adequate statistical power, and (e) data analytic strategies that are inappropriate for the issues addressed by a study. As a result, our understanding of various HRM phenomena has suffered and improved methods may serve to enhance both the science and practice of HRM. In view of the above, the purpose of this volume of Research in Human Resource Management is to provide basic and applied researchers with resources that will enable them to improve the internal validity, external validity, construct validity, and statistical conclusion validity of research in HRM and the related fields of industrial and organizational psychology, and organizational behavior. Sound research in these fields should serve to improve both science and practice. With respect to science, support for a theory hinges on the validity of research used to support it. In addition, the results of valid research are essential for the development and implementation of HRM policies and practices. In the interest of promoting valid research-based inferences in HRM research, the chapters in this volume identify a wide range of methods-related problems and offer recommendations for dealing with them. Chapters in it address such HRM research-related topics as neglected research issues, causal inferences in research, heteroscedasticity in research, range restriction in research, interrater agreement indices, and construct validity issues in measures of such constructs as job performance, organizational politics, and safety climate.

The Peter Principle - Laurence J. Peter 1970

The Peter principle is defined "In a hierarchy, every employee tends to rise to his level of incompetence"--Cover.

Model Rules of Professional Conduct - American Bar Association. House of Delegates 2007

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical

application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Behavioral Finance: The Second Generation - Meir Statman 2019-12-02

Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

Training Needs Assessment - Jean Barbazette 2006-01-20

This book covers the essentials of needs analysis from the emerging trainer's perspective by providing just the right amount of support and knowledge without going too deep into the subject. The topics covered include when and how to do a training needs analysis; using informal and formal analysis techniques; goal, task and population analysis; and how to develop and present a training plan for management approval. Each chapter includes appropriate data gathering tools. The Skilled Trainer series provides practical guidance for those who've had some exposure to training and would like to take their career to the next level.

Resources in Education - 1980
