*El origen de la dama de negro* - Juan Moisés De La Serna 2019-06-22

Un hecho tan confuso, a la vez que lleno de evidencias contradictorias, que no hacía sino acrecentar mi interés y me provocaba cierto temor al

no descubrir de qué se trataba aquel misterio, que estaba segura, rodeaba a ese lago de aguas tan singulares. Un episodio que a más de uno le habría gustado olvidar, pero que había quedado grabado a fuego en mi memoria, como uno de los sucesos más increíbles que había vivido, por lo menos hasta que llegué a este pueblo con este lago tan particular. No me resultaba demasiado difícil, recordar hechos extraordinarios, que había experimentado en mis múltiples viajes, quizás esa era una de las aficiones que más sustos me habían provocado, no porque pudiese tener en algún momento un accidente, e incluso poder perder la vida en ello, pues era algo que lo tenía asumido y por tanto no lo temía. Pero tantos otros hechos que he vivido, de los que a veces he podido extraer alguna conclusión coherente y en otras ocasiones, únicamente he sido testigo de prodigios que no ha habido forma de explicar. **The Proceedings of 11th Asia-Oceania Symposium on Fire Science and Technology** - Guan-Yuan Wu 2019-09-12

This book features selected papers from the 11th Asia-Oceania Symposium on Fire Science and Technology (AOSFST 2018), held in Taipei, Taiwan. Covering the entire spectrum of fire safety science, it focuses on research on fires, explosions, combustion science, heat transfer, fluid dynamics, risk analysis and structural engineering, as well as other topics. Presenting advanced scientific insights, the book introduces and advances new ideas in all areas of fire safety science. As such it is a valuable resource for academic researchers, fire safety engineers, and regulators of fire, construction and safety authorities. Further it provides new ideas for more efficient fire protection.

Who is Who in Thermal Analysis and Calorimetry - Imre Miklós Szilágyi 2014-11-18

This is an expanded and revised second edition, presenting accurate and comprehensive information about our leading thermal scientists to current and future generations. In our globalized world, most researchers in thermal analysis do not know each other in person and are not familiar with each other's achievements. This volume provides the reader with an up-to-date list of the prominent members in this community. The publication contains only living scientists. The selection is based partly on several decades of the editors' personal professional experience and also partly on the opinion of the Regional Editors of the Journal of Thermal Analysis and Calorimetry.

**Wrong** - Diarmuid Hester 2020-06-01

Dennis Cooper is one of the most inventive and prolific artists of our

time. Working in a variety of forms and media since he first exploded onto the scene in the early 1970s, he has been a punk poet, a queercore novelist, a transgressive blogger, an indie filmmaker—each successive incarnation more ingenious and surprising than the last. Cooper's unflinching determination to probe the obscure, often violent recesses of the human psyche have seen him compared with literary outlaws like Rimbaud, Genet, and the Marquis de Sade. In this, the first book-length study of Cooper's life and work, Diarmuid Hester shows that such comparisons hardly scratch the surface. A lively retrospective appraisal of Cooper's fifty-year career, *Wrong* tracks the emergence of Cooper's singular style alongside his participation in a number of American subcultural movements like New York School poetry, punk rock, and radical queercore music and zines. Using extensive archival research, close readings of texts, and new interviews with Cooper and his contemporaries, Hester weaves a complex and often thrilling biographical narrative that attests to Cooper's status as a leading figure of the American post-War avant-garde.

*Wine Traceability* - Maria Carla Cravero 2019-11-14

Wine traceability is a central theme in the current world market where consumers are increasingly demanding the quality and origin of food and drink. The wine production chain and wine composition are generally

controlled by different laws (International Organization of Vine and Wine (OIV), European Union (EU), and national governments) and need specific documentation. Nevertheless, wine production is subject to fraud. Consequently, the improvement of the methods applied to verify the origin and quality of wines is very important to protect wine consumers and producers. In this book, eight different papers—six research papers and two reviews—address the topic from different points of view.
