[Delivering the Future](#) - Sam Coulter-Smith 2022-02-16

For over 275 years, the Rotunda Hospital has been at the forefront of maternity services in Ireland. In *Delivering the Future: Reflections of a Rotunda Master*, Sam Coulter-Smith celebrates the history of the hospital, with a particular focus on the last thirty years, and explains why voluntary hospitals, with their ability to lead, adapt, research, and provide the best clinical services to their patients, play a vital role in maintaining and improving standards in our health service. Along with personal stories from a professional life that has revolved around the Rotunda, Prof. Coulter-Smith explores the recent developments in the Irish hospital service, particularly on the back of the Covid-19 pandemic, and how the independence of Ireland's surviving voluntary hospitals is being stealthily eroded by current government policy and HSE controls, to the detriment of the entire health service. He also examines what we can learn from how our health service has been managed in the past and questions how we can use this learning to plan for a better future.

**Evidence-based Obstetrics** - David K. James 2003

This companion to James et al's popular HIGH RISK PREGNANCY, 2ND EDITION, summarizes the evidence for a broad range of obstetric clinical problems. Its convenient handbook summary style and cross references to HIGH RISK PREGNANCY make it perfect for on-the-spot consultations and for further study. Uses a convenient tabular format for quick reference. Features "Summary of Management Options" boxes (170 in all) on left-hand pages while providing a synopsis of the quality of evidence that supports each management plan on the facing right-hand pages. Gives each management option a score based on the Evaluation System of the US Preventative series Task Force. Provides key references along with summaries of the nature of the data. Includes cross references to James et al: High Risk Pregnancy, 2nd Edition.

**Mosby's Pocket Guide to Cultural Health Assessment - E-Book** - Carolyn D'Avanzo 2008-01-08

With all of the cultural and ethnic information that could affect patient and family care, POCKET GUIDE TO CULTURAL HEALTH ASSESSMENT, 4th Edition is the perfect portable yet complete reference. This guide discusses the clinical implications of ethnic populations from over 170 countries with a wealth of information on each—from languages spoken to health care beliefs and practices to eye contact. Ideal for everyday use, this handbook is the most comprehensive and portable resource on the market for patient care. Alphabetically organized by country with all sections presented consistently to give you quick access to important cultural information. Presents comprehensive content on all cultural aspects that affect patient assessment. Includes brief descriptions of each country's topography and provides maps to illustrate potential environmental etiologies of an illness. Updated international childhood immunization schedules and the latest information from the World Health Organization provide the most up-to-date healthcare standards from around the world. Extensive bibliographies give you resources for further information. A streamlined and concise format with thumb tabs dividing each section makes this pocket guide the perfect quick reference tool. Thoroughly updated content includes new country names and their demographics, patient data, health care practices, and other cultural implications that affect care of today's culturally diverse patient population. New international contributors bring together a wealth of information on the specifics of care for patients from over 170 countries. Includes more historical and political information for each country to provide current background information. Increased emphasis on how a population appears in the worldview and how their religion affect decision-making gives you a

fuller perspective on each country's culture. More information on naturalistic healing and practices helps you treat patients from a variety of backgrounds.

*Best Practice in Labour and Delivery* - Sir Sabaratnam Arulkumaran  
2016-11-24

In light of revised recommendations for intrapartum care, this updated edition reviews best practice in all aspects of labour and delivery.

*Preterm Birth* - Felice Petraglia 2007-02-08

Preterm delivery is probably the most important problem in obstetrics, and a major public health concern. Recent developments - such as the preventive use of progesterone, and new data on possible mechanisms of initiation of parturition - have placed the topic at the forefront of the interests and preoccupation of many in maternal-fetal medicine and obstetrics. Recent studies have found that preterm deliveries have increased even amongst low risk women. Also shown is that assisted conceptions, multiple pregnancies and elective deliveries are associated with early birth. The impact on society is considerable. Preterm birth can also have considerable impact on long-term health, including severe mental or physical disability. With all this being currently debated, Obstetricians should re-evaluate the risks and benefits of delivering babies earlier. This book, published in collaboration with the Society for Gynecologic Investigation, is a balanced, authoritative, well-referenced work with a rigorous underpinning of basic science and evidence-based clinical guidelines. The Editors have ensured that there is development of modern ideas throughout regarding understanding, research, prevention and treatment of preterm birth. The book will be essential reading for Specialists in Maternal-Fetal Medicine, Obstetrics and Perinatology. Since the book also highlights definitions, classifications and management algorithms, it will also be useful to general ObGyns, both in practice and training.

**Operative Techniques in Obstetric Surgery** - Michael Belfort  
2022-01-03

The fifth volume in Dr. Jonathan Berek's bestselling series, *Operative Techniques in Obstetric Surgery* provides superbly illustrated, authoritative guidance on operative techniques along with a thorough understanding of how to select the best procedure, how to avoid complications, and what outcomes to expect. Easy to follow, up to date, and highly visual, this step-by-step reference edited by Drs. Michael A. Belfort, Alireza A. Shamshirsaz, Steven L. Clark, and Karin A. Fox covers the most common operations in obstetrics and is ideal for residents and physicians in daily practice. **Fetal Medicine** - Charles H. Rodeck 2009-01-01

Fetal medicine has emerged as a separate subspecialty over the last 30 years as a result of major advances in a number of areas, in particular ultrasound imaging, cytogenetics, molecular biology and biochemistry. The widespread use of antenatal screening and diagnostic tests has led to an increased need for obstetricians to have knowledge and skills in fetal medicine. This book provides the information that underpins training programmes in fetal medicine and integrates science and clinical disciplines in a practical and useful way. Clinical sections include: the latest advances in prenatal screening; a systems-based presentation of the diagnosis and management of fetal malformations; complete coverage of common and rare fetal conditions including growth restriction, endocrine and platelet disorders, early pregnancy loss, and twins/multiple pregnancy. More focus on important basic-science concepts, such as maternofetal cell trafficking, and the relevance to clinical management.

**Obstetrics: Prepare for the MRCOG** - Philip N Baker 2015-10-01

*Obstetrics* is a new e-book presenting a collection of key articles from Obstetrics, Gynaecology and Reproductive Medicine, mapped by module to the MRCOG Part 2 exam. As well as mapping to the MRCOG, the Inkling version of this e-book also enables anyone with a short-term interest in a specific area to buy individual articles at a price-point which will give affordable access to all readers (from medical students to GPs and practitioners in related areas, such as genitourinary medicine). Inkling's app-like quality of user experience on mobiles, tablets and laptops will be an added bonus for learning on the move. As well as being vital preparation for the MRCOG exam, this material is also ideal for life-long learning, CPD and, indeed, preparation for all post-graduate exams in obstetrics (not just MRCOG), including especially the new EBCOG exam in Europe and local college exams in India.[the Middle East and Africa. The parent journal is a rolling, continuously updated review of obstetrics over a three-year cycle covering all the important topics for the MRCOG Part 2 exam. Its Editorial Board comprises some of Europe's most influential specialists and includes, among others, the current Presidents of FIGO and EBCOG, as well as the past President of the Royal College of Obstetrics and Gynaecology. The journal's articles are refreshed, updated, augmented or replaced as appropriate each time the

subject is due for revision to provide a concise overview of knowledge and practice core to the curriculum. Each article is written by invited experts and overseen by the relevant subject specialist on the Board. There is a trainee on the Board too, ensuring relevance and accessibility to exam candidates. Inkling version gives a highly attractive, app-like user experience, enabling much easier, more pleasurable use of the content on smartphones, tablets and laptops for learning on the move. Affordable chapter-level purchase on Inkling version opens out the journal's authority and expertise to all interested users (medical students, family clinicians, genitourinary specialists and all other related specialties). Derived from top-notch authoritative content from the OGRM journal. Overseen by a world-class Editorial Board of experts, which includes the Presidents of FIGO, EBCOG and past President of the RCOG. A trainee representative on the Editorial Board ensures relevance and accessibility for exam candidates. Relevant to all post-graduate exams, including the new EBCOG exam and college exams in India, the Middle East and Africa. Highly appropriate content for life-long learning, personal development portfolios and CPD.

**EMQ's for the MRCOG Part 2 in Gynaecology** - Prabha Sinha  
2014-07-21

In 2011 the format of the Part 2 MRCOG written examination changed, the number of EMQs increased from 40 to 90. EMQs now make up 40% of overall marks. Therefore it is crucial that a candidate has experience and practice in answering them beforehand. This book is a perfect introduction to the Part 2 MRCOG exam. It is a companion to the earlier publication from the same authors, EMQs FOR MRCOG PART 2 IN Gynaecology. It features 160 questions covering the subject of gynaecology, and is primarily based on guidelines published by the RCOG, the National Institute for Health and Clinical Excellence (NICE) and the most up-to-date research and consensus. The book contains evidence-based answers, so candidates will find them easy to understand. All the questions are based on real clinical scenarios commonly encountered in day-to-day clinical practice - outpatient clinics, acute admissions from accident and emergency, and labour wards. Full details about the exam itself are available on the RCOG website. This book follows the established format; just choose the most appropriate answer for each question. It is important to read the statements carefully to identify the theme and then select the most relevant and appropriate answer. This book will coach students to answer EMQs effectively. It is a must read for Part 2 MRCOG exam revision.

**Maternal-Fetal Nutrition During Pregnancy and Lactation** - Michael E. Symonds 2010-01-28

Improving clinicians' understanding of effects nutrition can have on maternal health and fetal and neonatal development can have considerable impact on achieving a healthy pregnancy and reducing childhood morbidity. This book defines the nutritional requirements with regard to each stage of fetal development and growth, placing scientific developments into a clinical context. Clinicians and scientists discuss: how the fetus grows and what macro- and micronutrients it requires; what happens when there is nutrient deficiency and when placental development is abnormal; aspects of infant feeding, both with breast milk and formula milk. Specific problems encountered in pregnancy that pose a nutritional challenge are also considered, including pregnancy in teenagers, multiple pregnancies and pregnancy in those who are vegetarians or vegans. All doctors, health-care workers or scientists who

either care for women, their newborn and growing infants, or who are involved in research in these areas, will find this to be essential reading. **The EBCOG Postgraduate Textbook of Obstetrics & Gynaecology** - Tahir Mahmood 2021-12-02

**Bleeding During Pregnancy** - Eyal K. Sheiner 2011-06-23

The phenomenon of bleeding has been shown to appear in up to 22% of all pregnancies and is associated with significant maternal and fetal morbidities, and even mortality. Although vaginal bleeding occurs mainly during the first trimester, it can appear at any stage of pregnancy and in the postpartum period. This sometimes life-threatening event requires an extensive work-up in order to recognize its cause and establish a rapid and effective therapeutic approach. This book is a comprehensive appraisal of this critical condition. It draws on evidence-based data and brings together, in a single volume, updated information on all aspects of

pregnancy-related bleeding. A global group of interdisciplinary experts contributed chapters on: bleeding during early pregnancy (early pregnancy loss, ectopic pregnancy, gestational trophoblastic disease, and cancer of the reproductive tract during pregnancy); bleeding in late pregnancy (preterm delivery, placental abruption, placenta previa, vasa previa and uterine rupture); and postpartum hemorrhage.

Constancy of Purpose - Dafydd Emrys Evans 1987-11-01

The Faculty of Medicine of the University of Hong Kong traces its origins back to the inauguration of the Hong Kong College of Medicine for Chinese on 1 October, 1907, of which Dr Sun Yat-sen was one of the first and most illustrious graduates, and it accordingly celebrates its centenary in 2007. This volume relates the development of the Faculty from its beginnings and commemorates the establishment of one of the oldest and most reputable medical schools in South East Asia. It is hoped that it will be of special attraction and appeal not only to those connected with the Faculty but also a much wider audience interested in the development of modern medical education in this region.
