Portnoy's Complaint - Philip Roth 2011-04-13

The groundbreaking novel that propelled its author to literary stardom: told in a continuous monologue from patient to psychoanalyst, Philip Roth's masterpiece draws us into the turbulent mind of one lust-ridden young Jewish bachelor named Alexander Portnoy. Portnoy's Complaint n. [after Alexander Portnoy (1933-)] A disorder in which strongly-felt ethical and altruistic impulses are perpetually warring with extreme sexual longings, often of a perverse nature. Spielvogel says: 'Acts of exhibitionism, voyeurism, fetishism, auto-eroticism and oral coitus are plentiful; as a consequence of the patient's "morality," however, neither fantasy nor act issues in genuine sexual gratification, but rather in overriding feelings of shame and the dread of retribution, particularly in the form of castration.' (Spielvogel, O. "The Puzzled Penis," Internationale Zeitschrift für Psychoanalyse, Vol. XXIV, p. 909.) It is believed by Spielvogel that many of the symptoms can be traced to the bonds obtaining in the mother-child relationship.

Upwelling Ecosystems - R. Boje 2012-12-06

Upwelling areas are among the most fertile regions of the ocean. In principle, upwelling is caused by the divergence of the flow in the surface layer of the ocean which arises as a consequence of a particular wind field, the presence of a coastline, or other special conditions. Since deeper oceanic layers are usually enriched with nutrients, it is the permanent supply of nutrients which forms the basis for the high productivity of upwelling regions. The study of upwelling and its consequences were, for a long time, the task of individual scientists from all disciplines of marine science. Today, it is perhaps the branch of oceanography where interdisciplinary cooperation has developed best. Becoming aware of the large potential yield of upwelling regions, governments increased the funds for upwelling research. With research activities developed on a larger scale, interdisciplinary cooperation became a necessity. On the international level, several symposia documented the rapid development. Three volumes reflect the results of these scientific meetings (Rapp. Proc.-Verb. 159, 1970; Inv. Pesq. 35, 1, 1971; Tethys §. 1-2, 1974). The present book contains selected papers from the Third Symposium on Upwelling Ecosystems, which was held in Kiel in September 1975. Although the third of a series of meetings, it was the first where the word "ecosystem" stood in the title for a scientific program.

Etymological Dictionary of the Hittite Inherited Lexicon - Alwin Kloekhorst 2008

Hittite is the oldest attested Indo-European language and therefore of paramount importance for comparative Indo-European linguistics. Although in the last few decades our knowledge of the synchronic and historical linguistics of Hittite has profoundly increased, these new insights have not been systematically applied to the whole Hittite material. This book fills this gap by, for the first time, providing an etymological dictionary of the entire Hittite lexicon of Indo-European origin in which all words are

treated in a coherent way. Furthermore, it provides a thorough description of the synchronic phonological system of Hittite as well as a comprehensive study of the Hittite historical morphology and phonology. The result is a monumental handbook that will form an indispensable tool for Indo-Europeanists and Hittitologists alike.

Natural Disasters, Cultural Responses - Christof Mauch 2009-03-16

Catastrophes, it seems, are becoming more frequent in the twenty-first century. According to UN statistics, every year approximately two hundred million people are directly affected by natural disasters_seven times the number of people who are affected by war. Discussions about global warming and fatal disasters such as Katrina and the Tsunami of 2004 have heightened our awareness of natural disasters and of their impact on both local and global communities. Hollywood has also produced numerous disaster movies in recent years, some of which have become blockbusters. This volume demonstrates that natural catastrophes_earthquakes, hurricanes, floods, etc._have exercised a vast impact on humans throughout history and in almost every part of the world. It argues that human attitudes toward catastrophes have changed over time. Surprisingly, this has not necessarily led to a reduction of exposure or risk. The organization of the book resembles a journey around the globe_from Europe to North Africa, the Middle East, and Asia, and from the Pacific through South America and Mexico to the United States. While natural disasters appear everywhere on the globe, different cultures, societies, and nations have adopted specific styles for coping with disaster. Indeed, how humans deal with catastrophes depends largely on social and cultural patterns, values, religious belief systems, political institutions, and economic structures. The roles that catastrophes play in society and the meanings they are given vary from one region to the next; they differ_and this is one of the principal arguments of this book_from one cultural, political, and geographic space to the next. The essays collected here help us to understand not only how people in different times throughout history have learned to cope with disaster but also how humans in different parts of the world have developed specific cultural, social, and technological strategies for doing so.

Francophone Africa at Fifty - Tony Chafer 2018-02

France's presence on the African continent has often been presented as 'cooperation' and part of French cultural policy by policy-makers in Paris and quite as often been denounced as 'the longest scandal of the republic' by French academics and African intellectuals. Between the last years of French colonialism and France's sustained interventions in former African colonies such as Chad or Côte d'Ivoire during the 2000s, the legacy of French colonialism has shaped the historical trajectory of more than a dozen countries and societies in Africa. The complexities of this story are now, for the first time, addressed in a comprehensive series of essays, based on new research by a group of specialists in French colonial history. The book addresses the needs of both academic specialists and those of students of history and neighbouring disciplines looking for structural analysis of key themes in France's and Africa's shared history.

Translators through History - Jean Delisle 2012-07-05

Acclaimed, when it first appeared, as a seminal work – a groundbreaking book that was both informative and highly readable – Translators through History is being released in a new edition, substantially revised and expanded by Judith Woodsworth. Translators have played a key role in intellectual exchange through the ages and across borders. This account of how they have contributed to the development of languages, the emergence of literatures, the dissemination of knowledge and the spread of values tells the story of world culture itself. Content has been updated, new elements introduced and recent directions in translation scholarship incorporated, providing fresh insights and a more nuanced view of past events. The bibliography contains over 100 new titles and illustrations have been refreshed and enhanced. An invaluable tool for students, scholars and professionals in the field of translation, the latest version of Translators through History remains a vital resource for researchers in other disciplines and a fascinating read for the wider public.

Rapport mondial des Nations Unies sur la mise en valeur des ressources en eau 2021 - 2021-03-22

L'eau est une ressource qui n'est pas infinie et qui est non substituable. En tant que fondement de la vie, des sociétés et des économies, l'eau comporte de multiples valeurs et avantages. Mais contrairement à la plupart des autres ressources naturelles, il s'est avéré extrêmement difficile de déterminer sa véritable «valeur». L'édition 2021 du rapport mondial sur la mise en valeur de l'eau des Nations Unies, intitulée «Valuing Water» évalue l'état actuel et les défis de la valorisation de l'eau dans différents secteurs et perspectives et identifie les moyens de promouvoir sa valorisation en tant qu'outil pour aider à améliorer sa gestion et parvenir à un développement durable à l'échelle mondiale.

The Acharnians - Aristophanes 1887

The Birth of the Author - Jeffrey F. Hamburger 2021-08-20

The images devised to accompany medieval commentaries, whether on the Bible or on classical texts, made claims to authority, even inspiration, that at times were even more forceful than those made by the texts themselves. Pictorial prefaces of the twelfth century represent commentaries of their own; they articulate and elaborate complex arguments regarding critical matters of faith. This study examines pictorial programmes in copies of Horace's poetic works, the Glossa ordinaria, anti-heretical polemics, and Rupert of Deutz's commentary on the Song of Songs to demonstrate the ways in which they helped to shape

understandings of authorship at a critical historical moment.

The United Nations World Water Development Report - UNESCO World Water Assessment Programme 2021-03-22

Water is a finite and non-substitutable resource. As the foundation of life, societies and economies, it carries multiple values and benefits. But unlike most other natural resources, it has proven extremely difficult to determine its true 'value'. The 2021 edition of the United Nations World Water Development Report, titled "Valuing Water" assesses the current status of and challenges to the valuation of water across different sectors and perspectives and identifies ways in which valuation can be promoted as a tool to help improve its management and achieve global sustainable development.

That Winter - Pamela Gillilan 1986

Pamela Gillilan was born in London in 1918, married in 1948 and moved to Cornwall in 1951. When she sat down to write her poem Come Away after the death of her husband David, she had written no poems for a quarter of a century. Then came a sequence of incredibly moving elegies. Other poems followed, and two years after starting to write again, she won the Cheltenham Festival poetry competition. Her first collection That Winter (Bloodaxe, 1986) was shortlisted for the Commonwealth Poetry Prize.

Africa's Critical Choices - Dunod Editeur 2019

This volume examines contemporary Africa, a vast continent which, while entering the era of globalization, is also confronted by a number of issues, including the environment and climate change, demographics, trade issues, internal and external migration, education, economic Issues, governance, and the influence of other countries. Written by former Prime Minister of Niger and current Chief Executive Officer of the Secretariat of the New Partnership for Africa's Development (NEPAD), Dr Ibrahim Assane Mayaki, this book offers an overview of Africa, and looks to the next generation of leaders in the continent, aiming to offer a manifesto for future change.

Right of Inspection - Jacques Derrida 1998

"You will never know, nor will you, all the stories I kept telling myself as I looked at these images." With these words Jacques Derrida opens his reading of Marie-Francoise Plissart's hundred-page photo-novel. Originally published in France in 1985, this tour de force of word and image is available in English for the first time. Plissart's visual narrative unfolds in photographs, and photographs of photographs, in a kind of silent cinematography. Derrida's polylogue explores gender, photographic genre, time, language, and the interpretative act of seeing. The text and the photographs, each with its own structure and syntax, together illuminate what is at stake in the "right of inspection."

How does one go about promoting a pink asteroid that doesn't look the least bit menacing? By promising a gay, old time, of course! Approximately 1,000 words.

World Heritage and Sustainable Development - Peter Bille Larsen 2018-07-03

In 2015, the General Assembly of State Parties to the World Heritage Convention passed a ground-breaking Sustainable Development policy that seeks to bring the World Heritage system into line with the UN's sustainable development agenda (UNESCO 2015). World Heritage and Sustainable Development provides a broad overview of the process that brought about the new policy and the implications of its enactment. The book is divided into four parts. Part I puts the policy in its historical and theoretical context, and Part II

offers an analysis of the four policy dimensions on which the policy is based – environmental sustainability, inclusive social development, inclusive economic development and the fostering of peace and security. Part III presents perspectives from IUCN, ICOMOS and ICCROM – the three Advisory Bodies to the World Heritage Committee, and Part IV offers ‘case study’ perspectives on the practical implications of the policy. Contributions come from a wide range of experienced heritage professionals and practitioners who offer both ‘inside’ perspectives on the evolution of the policy and ‘outside’ perspectives on its implications. Combined, they present and analyse the main ideas, debates and implications of the policy change. This book is key reading for all heritage professionals interested in developing a better understanding of the new Sustainable Development policy. It is also essential reading for scholars and students working in the area.

The Global Findex Database 2017 - Asli Demirguc-Kunt 2018-04-19

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

Managing Environmental Disputes - Pieter Glasbergen 1995-06-30

The concept of sustainable development is a source of inspiration for many, who see it as a call to cooperative action. In practice, however, policies intended to further this goal often generate conflicts of interest. The ensuing disputes occur among governmental organizations, but disputes also arise between public authorities, private interest groups, and the environmental movement. In the opinion of the authors, the fact that environmental policy can provoke such conflict may be attributed largely to decision making

procedures in our society. Accordingly, the authors are convinced that a new approach to managing environmental disputes is needed in order to deal effectively with environmental problems. Indeed, this book presents a viable alternative, which is called network management.

Governing Lethal Behavior in Autonomous Robots - Ronald Arkin 2009-05-27

Expounding on the results of the author's work with the US Army Research Office, DARPA, the Office of Naval Research, and various defense industry contractors, *Governing Lethal Behavior in Autonomous Robots* explores how to produce an "artificial conscience" in a new class of robots, humane-oids, which are robots that can potentially perform more ethically than humans in the battlefield. The author examines the philosophical basis, motivation, theory, and design recommendations for the implementation of an ethical control and reasoning system in autonomous robot systems, taking into account the Laws of War and Rules of Engagement. The book presents robot architectural design recommendations for Post facto suppression of unethical behavior, Behavioral design that incorporates ethical constraints from the onset, The use of affective functions as an adaptive component in the event of unethical action, and A mechanism that identifies and advises operators regarding their ultimate responsibility for the deployment of autonomous systems. It also examines why soldiers fail in battle regarding ethical decisions; discusses the opinions of the public, researchers, policymakers, and military personnel on the use of lethality by autonomous systems; provides examples that illustrate autonomous systems' ethical use of force; and includes relevant Laws of War. Helping ensure that warfare is conducted justly with the advent of autonomous robots, this book shows that the first steps toward creating robots that not only conform to international law but outperform human soldiers in their ethical capacity are within reach in the future. It supplies the motivation, philosophy, formalisms, representational requirements, architectural design criteria, recommendations, and test scenarios to design and construct an autonomous robotic system capable of ethically using lethal force. Ron Arkin was quoted in a November 2010 New York Times article about robots in the military.

A Good African Story - Andrew Rugasira 2013-02-07

Since it was founded in 2003, Good African Coffee has helped thousands of farmers earn a decent living, send their children to school and escape a spiral of debt and dependence. Africa has received over \$1 trillion in aid over the last fifty years and yet despite these huge inflows, the continent remains mired in poverty, disease and systemic corruption. In *A Good African Story*, as Andrew Rugasira recounts the very personal story of his company and the challenges that he has faced – and overcome – as an African entrepreneur, he provides a tantalising glimpse of what Africa could be, and argues that trade has achieved what years of aid have failed to deliver. This is a book about Africa taking its destiny in its own hands, and dictating the terms of its future.
